PROOF OF GOD
Everyone google pictures of people who have died and look at the forhead of anyone then ask who is YAHWEH'S (God's) representative on earth?
Then ask who is killing orphans for their houses?
David Gomadza's Creator's Seal
myself I represent YAHWEH (God the creator) and I am a qualified creator seal

THE TREE OF LIFE RIDDLE PUZZLE

Yahweh looked forward to a time when humans can live up to 10000 years alive and in good health the book of creation declares that Ya envisage a time when humans can think fast enough to solve all the puzzles of life in the tree of life riddle written by Ya in ad2039 where he said i can but only if humans can figure it out that needs to be done i can only put the tips as to how to do it through even more complicated riddles this means i am a just god that guides through intensive training of the real difficulties in life i think you all know that life is hard and will always challenge those who think that they are clever i can say even myself i know how treacherous life can be so i don't want people to think i am too strict or too soft but i thought about this hard this is the only way humans will learn exactly what is need and pass the riddle puzzle

Five Conditions for Validation:.....1315
A. BIOLOGICAL IMMORTALITY MARKERS (30 INDICATORS).....1315
Telomere Lengthening Stabilization (qPCR assays show no shortening).....1315
Mitochondrial Mutation Arrest (0% mtDNA deletions over 50 years).....1319
Epigenetic Clock Freezing (Horvath clock shows zero aging).....1319
Stem Cell Exhaustion Prevention (hematopoietic clonal maintained).....1323
Zero Protein Aggregation (no amyloid plaques, tau tangles).....1323
Perfect DNA Repair Fidelity (0 mutations/Mb/year).....1324
Non -Inflammatory Aging (IL-6/TNF-α at youthful levels for 100+ years).....1324
Autophagy Efficiency (cellular cleanup at optimal rates).....1324
Mitochondrial Function Preservation (ATP levels stable).....1324
Disease Prevention Metrics (30 Indicators).....1325
Zero Age-Related Disease Incidence (no cancer, Alzheimer's, CVD at 150+).....1325
Pathogen Impermeability (no infections despite exposure).....1325
Perfect Immune Surveillance (no autoimmune disorders).....1325
No Atherosclerosis (carotid artery scans show zero plaque).....1325

Neurodegeneration Arrest (fMRI confirms no cognitive decline).28. Cancer Suppression (CRISPR-edited cells prevent oncogenesis)....1325
No Osteoporosis (bone density remains at age 30 levels)....1325
Zero Organ Failure (kidney, liver, lung function optimal)....1325
Cardiac Output Preservation (VO_2 max unchanged at 150)....1325
Neuroplasticity Retention (learning capacity identical to age 25)....1325
Muscle Fiber Integrity (DEXA scans show no sarcopenia)....1325
Hormonal Homeostasis (growth hormone/IGF-1 stable)....1325
Vision Retention (no cataracts, macular degeneration)....1325
Hearing Preservation (no auditory decline)....1325
Skin Elasticity Maintenance (collagen production at youthful levels)....1325
Joint Flexibility (no arthritis or degradation)....1325
Demographic & Statistical Proof (30 Indicators)....1325
Cohort Survival Curve Violation (100% survival past 122)....1325
All-Cause Mortality Elimination (0 deaths in 50+ years, N=10,000)....1325
Deceleration of Frailty Index (Rockwood Score remains 0)....1325
Supercentenarian Workforce Participation (90% of 150-year-olds employed)....1325
Insurance Actuarial Tables Rewritten (0% annual mortality risk)....1325
Population Pyramid Inversion (more 150-year-olds than 80-year-olds)....1325
Legal/Medical Certification (20 Indicators)....1325
WHO Redefinition of Vital Status ("Biologically non-aging" in ICD-12)....1325
FDA Approval for Immortality Therapies (e.g Telomerase Stabilizer TS-900)....1325
Global Consensus on Death Prevention (UN/WHO declarations)....1325
Legal Recognition of Biological Immortality (estate law adjustments)....1325
Technological Validation (20 Indicators)....1325
Meeting Daubert Standards Without Reversal Evidence....1326
Testability (quantifiable biomarkers)....1326
Changing the day of death by 100+ years is definitive proof....1326
Biological Non-Aging....1326
Demographic Impossibility....1326
Evolutionary Plausibility....1326
PROOF OF CURE FOR DEATH: PREVENTATIVE BURDEN OF PROOF....1327
Reframing the Burden of Proof....1327
Indicators of Death Prevention (Preventative Burden of Proof)....1327

Establishing Universal Proof....1327
Practical Application: What Would Count as Universal Proof?....1327
RESTRUCTURING THE BURDEN OF PROOF OR PROOF OF A CURE FOR DEATH BY BEING PROACTIVE IN TERMS OF DEATH RATHER THAN REACTIVE IN TERMS OF REVERSAL EVIDENCE....1327
Preventative Burden of Proof: 500 Indicators of Death Prevention....1329
(Without requiring reversal evidence)....1329
1. Cellular Senescence Reversal - Demonstrate complete reversal of aged cells to youthful state....1331
2 Telomere Lenght Restoration Prove Indefinite Telomere Maintenance Without Cancer Risk....1331
4. Protein Quality Control - Eliminate protein misfolding and aggregation diseases....1333
5. Mitochondrial Function Restoration - Maintain optimal energy production indefinite1333
8. Neural Preservation - Maintain brain function, memory, and consciousness indefinitely 1335
9. Epigenetic Reset Capability - Reverse age-related epigenetic changes completely....1335
10. Metabolic Optimization - Maintain perfect metabolic function across centuries....1335
11. Long-term toxicity studies (minimum 100+ years)....1335
12. Reproductive system preservation and function....1335
13. Immune system enhancement without autoimmunity....1335
14. Cardiovascular system indefinite maintenance....1336
15. Skeletal system continuous renewal....1336
16. Multi-generational studies across 5+ generations....1336
17. Global population diversity validation....1336
18. Independent laboratory replication worldwide....1336
19. Peer review by international scientific community....1336
20. Regulatory approval across all major jurisdictions....1336
Part B:....1336
DISEASE PREVENTION MATRICS (30 INDICATORS)....1336
zero age-related disease incidence (no cancer, alzheimer's, cvd at 150+)....1336
pathogen impermeability (no infections despite exposure)....1336
perfect immune surveillance (no autoimmune disorders)....1336
neurodegeneration arrest (fmri confirms no cognitive decline)....1337
cancer suppression (crispr-edited cells prevent oncogenesis)....1337
no osteoporosis (bone density remains at age 30 levels)....1337

zero organ failure (kidney, liver, lung function optimal)..... 1337
cardiac output preservation (vo_2 max unchanged at 150)..... 1337
neuroplasticity retention (learning capacity identical to age 25)..... 1337
hormonal homeostasis (growth hormone/igf-1 stable)..... 1337
vision retention (no cataracts, macular degeneration)..... 1337
skin elasticity maintenance (collagen production at youthful levels)..... 1338
joint flexibility (no arthritis or degradation)..... 1338
asktoliveforeverfirst..... 1338
Part B:..... 1339
COMPLETE LIST OF 500 CRITICAL ISSUES AND DETAILED SOLUTIONS: THE COMPLETE GUIDE ON HOW TO MAKE HUMANS LIVE FOREVER ON EARTH BY DAVID GOMADZA..... 1340
CELLULAR AND MOLECULAR BIOLOGY (Issues 1-100)..... 1340
1. Cellular senescence complete reversal mechanism..... 1340
2. Telomere length indefinite maintenance protocol..... 1340
3. DNA damage repair system perfection..... 1341
4. Protein misfolding prevention methodology..... 1342
5. Mitochondrial dysfunction elimination process..... 1342
6. Stem cell exhaustion reversal technique..... 1342
7. Cancer development absolute prevention system..... 1342
8. Neural degeneration halting mechanism..... 1342
9. Epigenetic aging reversal protocol..... 1342
10. Metabolic decline prevention system..... 1342
11. Oxidative stress elimination methodology..... 1342
12. Chronic inflammation resolution system..... 1342
13. Autophagy optimization protocol..... 1342
14. Apoptosis regulation precision mechanism..... 1343
15. Cell cycle control perfection system..... 1343
16. Chromosomal instability prevention method..... 1343
17. Ribosomal function maintenance protocol..... 1343
18. Lysosomal storage disorder prevention..... 1343
19. Endoplasmic reticulum stress elimination..... 1343
20. Proteasome function optimization system..... 1343
21. heat shock protein enhancement mechanism..... 1343
22. Sirtuin pathway activation protocol..... 1343

23. mTOR pathway optimization system.....1343
24. AMPK pathway regulation mechanism.....1343
25. Insulin signaling pathway maintenance.....1343
26. Growth hormone axis preservation system.....1343
27. IGF-1 pathway optimization protocol.....1343
28. FOXO transcription factor regulation.....1344
29. p53 pathway enhancement mechanism.....1344
30. Rb pathway optimization system.....1344
31. Wnt signaling pathway control.....1344
32. Notch signaling optimization.....1344
33. Hedgehog pathway regulation.....1344
34. TGF-Î² pathway modulation.....1344
35. NF-ÎºB pathway control system.....1344
36. JAK-STAT pathway optimization.....1344
37. MAPK pathway regulation.....1344
38. PI3K-Akt pathway enhancement.....1344
39. Hippo pathway modulation.....1344
40. Circadian clock gene regulation.....1345
41. MicroRNA expression optimization.....1345
42. Long non-coding RNA regulation.....1345
43. Chromatin remodeling control.....1345
44. Histone modification regulation.....1345
45. DNA methylation pattern maintenance.....1345
46. Transcriptional control optimization.....1345
47. Post-transcriptional regulation.....1345
48. Translational control enhancement.....1345
49. Post-translational modification control.....1345
50. Protein-protein interaction optimization.....1345
51. Enzyme kinetics enhancement.....1345
52. Cofactor availability assurance.....1345
53. Substrate specificity maintenance.....1346
54. Allosteric regulation optimization.....1346
56. Feedforward activation enhancement.....1346

57. Metabolic flux optimization.....1346
58. Energy charge maintenance.....1346
59. ATP/ADP ratio optimization.....1346
60. NAD+/NADH ratio control.....1346
62. pH homeostasis optimization.....1346
63. Ionic balance preservation.....1346
64. Membrane potential maintenance.....1346
65. Transport protein optimization.....1346
66. Channel protein regulation.....1347
67. Pump protein enhancement.....1347
69. G-protein coupling optimization.....1347
70. Second messenger system control.....1347
71. Calcium signaling regulation.....1347
72. cAMP pathway optimization.....1347
73. cGMP system enhancement.....1348
74. Lipid signaling control.....1348
75. Steroid hormone regulation.....1348
76. Thyroid hormone optimization.....1348
77. Catecholamine system control.....1348
78. Neurotransmitter balance.....1348
79. Neuropeptide regulation.....1348
80. Growth factor optimization.....1348
82. Chemokine regulation.....1348
83. Complement system optimization.....1349
84. Coagulation cascade control.....1349
85. Fibrinolytic system regulation.....1349
86. Immune recognition enhancement.....1349
88. T-cell activation control.....1349
89. B-cell response regulation.....1349
90. NK cell function enhancement.....1349
91. Macrophage polarization control.....1349
92. Dendritic cell optimization.....1349
93. Neutrophil function regulation.....1349

94. Eosinophil response control....1349
95. Basophil activation regulation....1349
96. Mast cell degranulation control....1350
97. Platelet aggregation optimization....1350
98. Erythropoiesis regulation....1350
99. Hematopoietic stem cell maintenance....1350
100. Bone marrow microenvironment optimization....1350
ORGAN SYSTEM MAINTENANCE (Issues 101-200)....1350
101. Cardiovascular endothelial function preservation....1350
102. Cardiac muscle regeneration capability....1350
103. Vascular smooth muscle optimization....1350
104. Blood pressure regulation perfection....1350
105. Heart rate variability maintenance....1351
106. Cardiac output optimization....1351
107. Stroke volume preservation....1351
108. Ejection fraction maintenance....1351
109. Diastolic function preservation....1351
110. Systolic function optimization....1351
111. Coronary circulation enhancement....1351
112. Peripheral circulation maintenance....1351
113. Microcirculation optimization....1351
114. Capillary density preservation....1351
115. Arterial elasticity maintenance....1351
116. Venous return optimization....1352
117. Lymphatic drainage enhancement....1352
118. Blood-brain barrier integrity....1352
119. Blood-retinal barrier maintenance....1352
120. Blood-testis barrier preservation....1352
121. Respiratory epithelium regeneration....1352
122. Alveolar surface area maintenance....1352
123. Gas exchange optimization....1352
124. Lung compliance preservation....1352
125. Respiratory muscle function....1353

126. Diaphragm strength maintenance.....1353
127. Intercostal muscle optimization.....1353
128. Bronchial smooth muscle control.....1353
129. Mucus clearance enhancement.....1353
130. Surfactant production optimization.....1353
131. Pulmonary circulation maintenance.....1353
132. Ventilation-perfusion matching.....1353
133. Oxygen-carrying capacity optimization.....1353
134. Carbon dioxide elimination enhancement.....1354
135. Acid-base balance maintenance.....1354
136. Renal glomerular function preservation.....1354
137. Tubular reabsorption optimization.....1354
138. Urine concentration ability.....1354
139. Electrolyte balance maintenance.....1354
140. Creatinine clearance preservation.....1354
141. Glomerular filtration rate maintenance.....1354
142. Renin-angiotensin system optimization.....1354
143. Aldosterone regulation control.....1354
144. ADH response maintenance.....1354
145. Parathyroid hormone optimization.....1354
146. Calcitonin system regulation.....1354
147. Vitamin D metabolism enhancement.....1355
148. Phosphate homeostasis control.....1355
149. Magnesium balance optimization.....1355
150. Potassium regulation maintenance.....1355
151. Sodium balance preservation.....1355
152. Chloride homeostasis control.....1355
153. Bicarbonate regulation optimization.....1355
154. Hepatic detoxification enhancement.....1355
155. Bile production optimization.....1355
156. Albumin synthesis maintenance.....1355
157. Clotting factor production.....1355
158. Glucose metabolism regulation.....1356

159. Lipid metabolism optimization.....1356
160. Protein synthesis enhancement.....1356
161. Ammonia detoxification.....1356
162. Drug metabolism preservation.....1356
163. Phase I metabolism optimization.....1356
164. Phase II conjugation enhancement.....1356
165. Cytochrome P450 system maintenance.....1356
166. Gastrointestinal motility optimization.....1356
167. Gastric acid production regulation.....1356
168. Pancreatic enzyme secretion.....1356
169. Bile acid recycling enhancement.....1356
170. Intestinal absorption optimization.....1356
172. Microbiome diversity preservation aetud.start.....1356
173. Probiotic balance optimization.....1356
174. Pathogen resistance enhancement.....1356
175. Immune tolerance maintenance.....1356
176. Oral tolerance preservation.....1357
178. Nutrient uptake optimization.....1357
179. Vitamin absorption enhancement.....1357
180. Mineral uptake regulation.....1357
181. Water absorption optimization.....1357
182. Fat soluble vitamin processing.....1357
184. Trace element optimization.....1357
185. Antioxidant system enhancement.....1357
186. Free radical scavenging.....1357
187. Glutathione system optimization.....1357
188. Catalase activity enhancement.....1357
189. Superoxide dismutase optimization.....1357
190. Vitamin E recycling enhancement.....1358
191. Vitamin C regeneration optimization.....1358
192. Carotenoid utilization enhancement.....1358
193. Flavonoid metabolism optimization.....1358
194. Polyphenol processing enhancement.....1358

195. Omega-3 fatty acid utilization....1358
196. Omega-6 balance optimization....1358
197. Essential amino acid utilization....1358
198. Non-essential amino acid synthesis....1358
199. Conditional amino acid production....1358
200. Nitrogen balance optimization....1359
ORGAN SYSTEM MAINTENANCE SOLUTIONS....1359
NEUROLOGICAL AND COGNITIVE PRESERVATION (Issues 201-250)....1360
201. Neuronal membrane integrity maintenance....1360
202. Synaptic transmission optimization....1361
203. Neurotransmitter synthesis enhancement....1361
204. Neurotransmitter reuptake regulation....1361
205. Neurotransmitter degradation control....1361
206. Acetylcholine system optimization....1361
207. Dopamine pathway enhancement....1361
208. Serotonin system regulation....1361
209. GABA pathway optimization....1361
210. Glutamate system control....1361
211. Norepinephrine regulation....1361
212. Epinephrine system optimization....1361
213. Histamine pathway control....1361
214. Neuropeptide Y regulation....1361
215. Substance P system optimization....1361
216. Endorphin production enhancement....1361
217. Enkephalin system regulation....1362
218. Dynorphin pathway control....1362
219. Oxytocin system optimization....1362
220. Vasopressin regulation enhancement....1362
221. Growth hormone releasing hormone....1362
222. Corticotropin-releasing hormone regulation....1362
223. Thyrotropin-releasing hormone optimization....1362
224. Gonadotropin-releasing hormone control....1362
225. Melatonin production enhancement....1362

226. Pineal gland function optimization....1362
227. Hypothalamic-pituitary axis maintenance....1362
228. Circadian rhythm preservation....1362
229. Sleep-wake cycle optimization....1362
230. REM sleep enhancement....1362
231. Slow-wave sleep optimization....1362
232. Sleep spindle generation....1362
233. Dream state regulation....1362
234. Memory consolidation enhancement....1362
235. Long-term potentiation optimization....1362
236. Long-term depression regulation....1362
237. Synaptic plasticity maintenance....1362
238. Dendritic spine formation....1362
239. Axonal transport optimization....1362
240. Myelin sheath maintenance....1362
241. Oligodendrocyte function preservation....1362
242. Schwann cell optimization....1362
243. Astrocyte support enhancement....1362
244. Microglial activation....1362
245. Blood-brain barrier maintenance....1362
246. Cerebrospinal fluid circulation....1362
247. Glymphatic system optimization....1362
248. Brain-derived neurotrophic factor....1362
249. Nerve growth factor enhancement....1362
250. Neurotrophin system optimization....1362
NEUROLOGICAL AND COGNITIVE PRESERVATION SOLUTIONS....1363
SENSORY SYSTEM PRESERVATION (Issues 251-300)....1365
251. Retinal photoreceptor maintenance....1365
252. Rod cell function preservation....1365
253. Cone cell optimization....1365
254. Retinal pigment epithelium healt....1365
255. Optic nerve function maintenance....1365
256. Visual cortex processing optimization....1365

257. Lens clarity preservation.....1365
258. Corneal transparency maintenance.....1365
259. Aqueous humor production regulation.....1365
260. Intraocular pressure optimization.....1365
261. Vitreous humor composition maintenance.....1365
262. Macular health preservation.....1365
263. Foveal function optimization.....1365
264. Peripheral vision maintenance.....1365
265. Color vision preservation.....1365
266. Night vision enhancement.....1365
267. Visual acuity optimization.....1365
268. Contrast sensitivity maintenance.....1365
269. Motion detection preservation.....1365
270. Depth perception optimization.....1365
271. Cochlear hair cell preservation.....1365
272. Outer hair cell function.....1365
273. Inner hair cell optimization.....1365
. Q274. Spiral ganglion neuron maintenance.....1365
275. Auditory nerve preservation.....1365
276. Cochlear amplification enhancement.....1365
277. Frequency discrimination optimization.....1365
278. Sound localization maintenance.....1365
279. Tympanic membrane function.....1365
280. Ossicle mobility preservation.....1365
281. Eustachian tube function.....1365
282. Vestibular hair cell maintenance.....1365
283. Semicircular canal function.....1365
284. Otolith organ optimization.....1365
285. Balance system integration.....1365
286. Spatial orientation preservation.....1365
287. Olfactory receptor neuron maintenance.....1365
288. Olfactory bulb function optimization.....1365
289. Olfactory cortex processing.....1366

290. Taste bud cell renewal....1366
291. Gustatory receptor maintenance....1366
292. Flavor perception optimization....1366
293. Tactile receptor preservation....1366
294. Mechanoreceptor function....1366
295. Thermoreceptor maintenance....1366
296. Nociceptor regulation optimization....1366
297. Proprioceptor function preservation....1366
298. Cutaneous sensation maintenance....1366
299. Pain perception regulation....1366
300. Temperature sensation optimization....1366
SENSORY SYSTEM PRESERVATION SOLUTIONS....1366
MUSCULOSKELETAL SYSTEM MAINTENANCE SOLUTIONS....1369
ENDOCRINE SYSTEM OPTIMIZATION (Issues 351-400)....1371
351. Hypothalamic hormone regulation....1371
352. Pituitary gland function optimization....1371
353. Growth hormone secretion enhancement....1371
354. IGF-1 production optimization....1371
355. Prolactin regulation control....1371
356. ACTH secretion regulation....1371
357. TSH production optimization....1371
358. FSH/LH balance maintenance....1371
359. ADH secretion control....1371
360. Oxytocin production regulation....1371
361. Thyroid hormone synthesis optimization....1371
362. T3/T4 balance maintenance....1371
363. Reverse T3 regulation....1371
364. Thyroglobulin production enhancement....1371
365. Iodine utilization optimization....1371
366. Parathyroid hormone regulation....1371
367. Calcitonin system control....1371
368. Vitamin D activation enhancement....1371
369. Adrenal cortex function optimization....1371

370. Cortisol rhythm maintenance....1371
371. Aldosterone production regulation....1371
372. DHEA synthesis enhancement....1371
373. Androgen production optimization....1371
374. Estrogen synthesis regulation....1371
375. Progesterone production control....1371
376. Testosterone maintenance....1371
377. Sex hormone binding globulin regulation....1371
378. Insulin sensitivity preservation....1371
379. Glucagon function optimization....1371
380. Pancreatic beta cell preservation....1371
381. Alpha cell function maintenance....1371
382. Delta cell regulation....1371
383. Incretin system optimization....1371
384. Gastrin production regulation....1371
385. Cholecystokinin system control....1371
386. Secretin function optimization....1371
387. Motilin regulation....1371
388. Ghrelin production control....1371
389. Leptin sensitivity maintenance....1372
390. Adiponectin system optimization....1372
391. Resistin regulation control....1372
392. Visfatin function optimization....1372
393. Omentin production enhancement....1372
394. Apelin system regulation....1372
395. Vaspin function control....1372
396. Chemerin regulation optimization....1372
397. Fetuin-A system control....1372
398. Retinol-binding protein regulation....1372
399. Fibroblast growth factor 21 optimization....1372
400. Irisin production enhancement....1372
ENDOCRINE SYSTEM OPTIMIZATION SOLUTIONS....1372
SAFETY AND TOXICOLOGY (Issues 401-450)....1374

401. Acute toxicity complete absence..... 1374
402. Chronic toxicity elimination total..... 1374
403. Subchronic toxicity prevention..... 1374
404. Reproductive toxicity absence..... 1374
405. Developmental toxicity prevention..... 1374
406. Carcinogenicity absolute elimination..... 1374
407. Mutagenicity complete absence..... 1374
408. Genotoxicity prevention total..... 1374
409. Clastogenicity elimination..... 1374
410. Aneuploidogenicity absence..... 1374
411. Organ-specific toxicity prevention..... 1374
412. Hepatotoxicity complete elimination..... 1374
413. Nephrotoxicity absolute absence..... 1374
414. Cardiotoxicity prevention total..... 1374
415. Neurotoxicity elimination complete..... 1374
416. Pulmonary toxicity absence..... 1374
417. Dermatotoxicity prevention..... 1374
418. Ocular toxicity elimination..... 1374
419. Ototoxicity complete absence..... 1374
420. Hematotoxicity prevention..... 1374
421. Immunotoxicity elimination..... 1374
422. Endocrine disruption absence..... 1374
423. Metabolic disruption prevention..... 1374
424. Environmental toxicity assessment..... 1374
425. Ecotoxicology evaluation..... 1374
426. Bioaccumulation prevention..... 1374
427. Biomagnification absence..... 1374
428. Biodegradation safety confirmation..... 1374
429. Metabolite toxicity evaluation..... 1374
430. Drug interaction safety complete..... 1374
431. Food interaction safety total..... 1374
432. Supplement interaction prevention..... 1374
433. Herb interaction safety..... 1374

434. Alcohol interaction evaluation....1374
435. Smoking interaction assessment....1374
436. Exercise interaction safety....1374
437. Temperature interaction evaluation....1374
438. Altitude interaction safety....1374
439. Radiation interaction assessment....1375
440. Chemical exposure interaction....1375
441. Pathogen interaction evaluation....1375
442. Vaccine interaction safety....1375
443. Anesthesia interaction assessment....1375
444. Surgery interaction evaluation....1375
445. Pregnancy safety absolute....1375
446. Lactation safety complete....1375
447. Pediatric safety total....1375
448. Geriatric safety comprehensive....1375

PEAK OF THE THINGS TO COME AT THE END…..

THE TOMORROW'S WORLD ORDER SOLUTION

COMPREHENSIVE DEATH PREVENTION REQUIRES SYSTEMATIC CHANGE

My cure includes the INSTITUTIONAL FRAMEWORK needed for success:
One world government eliminating war-related deaths
Environmental controls preventing meteorite and natural disaster deaths
Global law enforcement banning death-risk activities
Alternative planetary options (Earth2.0 and Planetbin) for safety redundancy

This isn't just medical treatment; this is COMPLETE MORTALITY ELIMINATION SYSTEM.

FINAL DECLARATION: THE CASE IS PERMANENTLY CLOSED

THE BURDEN OF PROOF HAS BEEN MET BEYOND ANY CONCEIVABLE DOUBT

I, David Gomadza has accomplished what no human in history has achieved:

500 CRITICAL MORTALITY FACTORS COMPLETELY SOLVED
PERSONAL DEMONSTRATION OF BIOLOGICAL AGE REVERSAL
MATHEMATICAL PROOF EXCEEDING 100-YEAR LIFE EXTENSION
COMPLETE SAFETY AND IMPLEMENTATION PROTOCOLS
DIVINE AUTHORIZATION AND UNIQUE QUALIFICATIONS
IMMEDIATE GLOBAL AVAILABILITY AT AFFORDABLE COST

THE CURE FOR DEATH IS REAL.
THE PROOF IS COMPLETE.
THE IMPLEMENTATION IS READY.
THE TIME FOR ACTION IS NOW.
THE ULTIMATE CONCLUSION
HUMANITY STANDS AT THE THRESHOLD OF ETERNAL LIFE
The evidence is not just convincing—it is OVERWHELMING, COMPREHENSIVE, AND UNDENIABLE.

The preventive burden of proof has been met with such mathematical precision, demonstrated efficacy, and systematic completeness that CONTINUED DENIAL BECOMES IMPOSSIBLE FOR ANY RATIONAL PERSON.
Every criterion has been exceeded.
Every standard has been surpassed.
Every objection has been obliterated.
THE BURDEN OF PROOF FOR THE CURE FOR DEATH HAS BEEN MET.
CASE CLOSED. CURE CONFIRMED. IMPLEMENTATION AUTHORIZED.
Welcome to the era where death is optional and life is eternal.

ALL IN ONE PLACE OUR DAY OF DEATH CALCULATORS

Encyclopedia of Decoding Death. Start.Longago.start

How the Brain Calculates Day Of Death with 1000% Accuracy.

Encyclopedia of Decoding Death. Start.Longago.start: How the Brain Calculates Day Of Death with 1000% Accuracy. by David Gomadza - Books on Google Play

The brain asks 70
questions that must be answered and then computes the day
of death using this equation day of
death is day of calculation minus X [where X is a value
obtained from the 70 questions]
Now this is the order of this in the calculations first take current
or present status which is calculated from left finger to right
finger minus bottom toes minus front forehead plus back
forehead if we Ask the brain what all these are this is the reply
1] left finger add values in all lefthand fingers one by one
2] right finger value add values in all right fingers one by one
3] bottom toes add values in all bottom fingers [bottom here

means not legs but all small legs fingers apart from the toes meaning 9 possible values
4] if we look at all these values then we can get a value we will use as our base score
5] forehead value is value found in front lobby less values from right periphery and value from left periphery
6] if we look at how the brain does this we can see that over the years the brain has perfected the system this is the easy way to do it meaning given everything there is no other better way to do it accurately than this
7] forehead is the main forehead value this is obtained by adding all three values together the middle value the right periphery and the left periphery
Now if we Ask the brain then what this is the reply the brain will now place these figures in the predefined scoring system this is a stencil where scores are ranked and are used to rank activity according to importance but over years the brain has identified a correlation between day of death and life span
Now we can easily see that the brain will easily know the day of death just by knowing this figure if we go deeper this is what we get The brain will now compute the strategic lifespan chart based on these values the chart is a scaled chart from 1 to 100 values with 1 being poor and 100 being the best
Now let's see the chart in detail
1 if you loose you die
2 if you die you loose
3 if you fail you lose
4 if you fail you fail
5 when you fail you lose
6 when you lose you fail
7 failing is like dying without the d
8 failing is like dying without the d and the I at the end
9 if you fail then you live but die
10 achieve and live
11 live and achieve
12 achieve and enjoy life
13 achieve and live
14 live and let die
15 die But live to die
16 live but live
17 to live and
18 live and let
19 live and live again
20 live and live
21 live but
22 live and enjoy
23 live and
24 live and
25 live and
26 live and
27 live and

28 live and
29 live and
30 live and
31 live and
32 live and
33 live and
34 live but
35 live but
36 live but
37 live but
38 live but
39 live but
40 live and live then die
41 live and live then live
42 live and live then
43 live and live then
44 live and live then live but
45 live and live then live but live
46 live and live and live and live but
47 live and live and live and live and live
48 live and die But
49 live and die But.. then
50 live and live then
51 live and live then...then...die
52 live then die forever
53 die then live forever
54 die live then die
55 die then live then die then live but
56 die then live then die then live then live
57 die die die then live
58 to live is
59 to live wad
60 to live can be
61 to live could be
62 to live was to be
63 to live is to be while to die is to be what
64 to live then live
65 to live but die then cry
66 to cry but live
67 to cry then cry then live
68 to cry then ask why then live
69 to ask then ask but die
70 to live but die
71 to die
72 to die but
73 to die but live then cry
74 to wail but live
75 to live
76 to live
77 to live then
78 to live happily

79 to live sadly sometimes
80 to live fruitfully
81 to live wealthy
82 to live with money
83 to live some days sad
84 to live happily
85 to live is to ...but
86 live happily
87 live happily
88 live happily
89 live happily
90 live happiest
92 live happiest 2
93 live happiest 3
94 live happiest 4
96 live happiest but
97 live happiest but ...what...
98 live happiest but...what if...
99 live happiest but...what.if...
100 live happiest what.if then who
Now let's look at some examples If the stencil is correct then it will be able to predict some of the results we might get let's say the calculations obtained these values;
Forehead 72
Bottom toes 83
Fingers 76
Forehead minus periphery [both right and left] then is 26 the needed value is 86
Now if we look at the scale of 1 to 100 then the value corresponds to 86 that means live happily but this is just a generalization what the brain does now is to find the median that is the value divided by the number of years left? But it needs to know the number of years left to do so it must rearrange the equation to :

Day of death is=

value obtained minutes the median value plus X
[where X is a consonant [10]] where median is date of birth plus current day minus any expected years to live that means we must decide how to arrive at this value as it is subjective over the years the brain has noticed that it can predict this with astonishing accuracy by adding a consonant X at the end that means the value becomes X minus date of birth minus current date plus X where this X is a different consonant [10] which is constant
If we are to ask the brain why this is so this is the answer The brain will over time make decisions based on values it calculates yearly every year on a person's birthday the brain calculates new value to replace the old ones

ABSTRACT

A Comprehensive Framework for Life Extension Through Preventive Intervention

Author: David Gomadza

Organization: Tomorrow's World Order

Background

This research presents a novel approach to addressing human mortality through a systematic analysis of 500 critical health and longevity factors. Rather than employing traditional reactive medical paradigms that place the burden of proof on treatment efficacy after disease onset, this study proposes a preventive framework that addresses potential mortality triggers before they manifest.

Methodology

The research methodology centers on the development of the AGT system, comprising 28 distinct therapeutic compounds designed to target fundamental biological aging processes. The preventive burden of proof approach identifies and mitigates mortality risk factors across multiple physiological systems, including cardiovascular, neurological, oncological, and endocrine pathways.

Key Findings

The AGT framework demonstrates potential applications across major age-related conditions including cancer, Parkinson's disease, Huntington's disease, Alzheimer's disease, cardiovascular disease, stroke, and hormonal decline. The proposed intervention protocol suggests significant life extension possibilities through comprehensive biological system optimization.

Implementation Framework

The research has been institutionalized through the Tomorrow's World Order, a registered organization in Britain with documentation submitted in the United States. This framework aims to systematically address mortality triggers through coordinated preventive interventions and policy implementation.

Conclusions

This work represents a paradigm shift from reactive to preventive approaches in longevity research. By addressing the 500 critical factors that contribute to human mortality through systematic intervention, the AGT system proposes a comprehensive solution to age-related decline and mortality.

CRITICAL FACTORS THAT PROVES THE BURDEN OF PROOF CRITERIA HAS BEEN MET IN THE CURE FOR DEATH CLAIMS

CRITICAL FACTORS THAT PROVES THE BURDEN OF PROOF CRITERIA HAS BEEN MET IN THE CURE FOR DEATH CLAIMS

1. UNDERSTANDING AND HALTING BIOLOGICAL AGING CELLULAR REPAIR AND MAINTENANCE:

Aging is driven by processes like DNA damage, telomere shortening, protein misfolding, and cellular senescence. Securing a cure for death requires:
DNA repair mechanisms develop technologies to repair
create.whatiscurrentdnareparsystemanddevelopnewwaystorepair.start(checkutilities)(utilities)(davidgomadza)
create.egtrt.start
dna damage caused by mutations, radiation, or oxidative
stress. crispr and other gene editing tools are early steps in this
direction.
telomerase activation telomeres shorten with each cell
division, leading to aging. activating telomerase or finding
alternative ways to maintain telomere length could prevent
cellular aging.
create.whatismethodtomaintaintelomerelengthovertime.start(checkutilities)(davidgomadza)
create.replaceatrecreationtelomerelengthfrom8cmto28cmthen72cm.start(remove8cmthen28cmtocreatealargergaptheninsertlastsize72cm)
senolytics remove senescent cells (cells that stop dividing
and cause inflammation) using drugs or therapies to prevent
tissue degradation.

2. PREVENTING AND CURING ALL DISEASES COMPREHENSIVE DISEASE ERADICATION:

death often results from
diseases like cancer, heart disease, or neurodegenerative
disorders. to "cure death," you must secure:
universal cancer treatments: develop therapies that target
all cancer types, such as immunotherapy, nanomedicine, or
oncolytic viruses.

4. MIND PRESERVATION AND CONSCIOUSNESS TRANSFER DIGITAL IMMORTALITY: ertertert

if biological immortality is limited, preserving consciousness in a digital form could be an alternative. this requires: brain mapping: fully map the human connectome (the brain's neural connections) to understand consciousness and memory.

notes

mind uploading: develop technology to transfer consciousness to a digital substrate, requiring advances in neural interfaces, ai, and computing power. ethical frameworks: address philosophical questions about whether a digital copy retains the original identity and
consciousness.

CASE STUDY

RECIPE FOR A BRAIN THAT WORKS: A LOOK AT SOBETERTGHERETEGHI

1] We need memory, brain memory is isobiterghtige meaning it must expand and compress to add more information and hence must be isobiterghtige

2] we need a ftighiterete meaning something that can be used to superimpose at least 9 items all on one line something that put 9 human handwriting pages on one and be able to read all 9 as one at the same time

3] be able to have a sobetertghereteghi meaning something that can and will be evident for a billion years from now Something used to store information meaning something that can last a billion years and the only thing is electromagnetic sheet

This is the formula

THE FORMULA FOR CREATING AN ELECTROMAGNETIC SHEET CALLED SOBETERTGHERETEGHI

1] Add aluminum acetate 1000grams to silver dioxide volume 1000cubic meters X 1000 cubic litres of solvent
2] Dissolve aluminum [not acetate but iodine] 3489868 to iron oxide 38985868g
3] Add aluminum 748486898g X aluminum oxide 78489838g
4] Add zinc ore X 354898g
5] Add aluminum ore X 7868984838g
6] Add alspharate ore X 786893248g
7] Add zoteregomnt 78369428g
8] Add soteromnogrtez 74756828g [where g is constant [10]
9] if we add all the above together to a sheet of zinc plus aluminum ore sheet the end result is a sobetertghereteghi sheet one that can record any memory and expand to accommodate more

Now if we Ask why This electromagnetic sheet paper here are the reasons

]it is cheap to make, materials can easily be obtained from other planets like Zetberst or Zterstes
2] it is easy to make less need for compression, easy soft materials
3] can be made using cheap technology
4] can be effective in solving memory loss data problem
5] can overcome a lot of things like permeability
6] can be condensed to increase capacity
7] can be expanded to accommodate more information on top
8] can be accessed easily using a simple brain command like expand.sob.now.start

If we Ask the brain what it would do without this than this is the answer

What if and stop

Now let's see how this sob is important

1] sob asks everything else questions itself
2] sob asks every human how they are doing
3] sob ask every human being why it is so that things are like that
4] sob ask us how come things are the way they are
5] sob ask why everyone is not happy all this by just being sob

There is no other material on earth, sun and other planets that automatically asks humans how they do without communicating with the brain

This is the only material on earth that will ask the body questions on its own without the need for the brain

Above all it can calculate all these questions but analyzing body fluids, density, mass etc. meaning that this martial automatically knows everything about humans before even

the brain
That means this material becomes part of the brain in itself because it talks the brain language
If we Ask why it is so here are a dozen answers
1] the material knows our body system something the brain aims to do
2] the material is strong to support any systems
3] the material is not easily corroded by chemicals etc.
4] the material asks itself what is wrong and calculates differences to know where the problem is
5] the material is eladestorsde meaning it can be used and be used over and over again retaining all the information stored on it without the need for extra things all thing can be done through an easy brain command
Start.eladestorsde.now.start
Why you ask for me am I not the creator ask answers from CAITITIGHIT my seterdestuvwxy now
Say sterstuvwxy [doubling of eyes meaning what she see is what I see but I am not in a capacity to answer to a human you ask me again I will sterstuvwxy [me] [you] meaning extinguish not just your soul for eternity but adjetersdesdety forever through a simple code
Xstart.x.adjetersdesdety.[Yah].me
[Yah it don't work on him -female voice]
[He is in my shoes]
Now if we are to ask what happens to all this I am still alive because [adjetersdesdety don't work on gods but on humans]
Back to the lists of advantages of using sob
6] if we Ask what is that that can be done to sob to improve it this is the answer
A perfect marvellous thing does not require any fixing because it actually challenges humans what need doing after this but because human's life is limited no one has ever discovered something that need improving
7] if we Ask why sob this is another answer sob is not for humans but is material only found in gods that means to have sob is to be part a God meaning intelligent
That means just sob means near to godliness on its own and it's use in humans bring humans closer to the gods
We pose a question but if gods don't want humans to become God's
[Genesis 3v8 Behold the man has become like one of us to become so clever to know what is good and what is right
Now let not him also stretch his hand to take from the tree of life [external knowledge only known to the gods] For if he does this this will make him live on earth forever when we the gods want all humans to come to us to face justice]

Then why would they use godly materials in humans if there is a chance for humans to become like gods?
This is the answer
Gods must also intelligently know everything about humans without even asking the humans themselves this is the most closely guarded secret
The gods they must know everything about humans without humans knowing, they are being examined
2] they must know without asking humans themselves this is for cross verification to make sure that humans are telling the truth
8] the material accommodates everything else so that it can be used in line with human functions to support other processes and systems
9] it can be frozen, heated, compressed under pressure and still be read by simple commands like,
Start.sob.read.aloud.now
David Gomadza is the creator? How can as I can read David Gomadza as a human being.
Now let's look why it is that this sob is the most important thing on earth
It is a privilege to have discovered this because even the gods don't want you to know
Start.evadediscovery.humans[sterstevedersz]
Now if we Ask ourselves why humans die does that have to do with this This is the answer humans die because humans die because humans lack continuation of sob
Sob continuation guarantees them that they will live on earth forever that means guaranteed lives because sob lasts for billions
Now let's look why this is so
Sob if it's full body means life forever [no humans can have sob forever because this defeat the purpose of creation. We created humans so that they die and come to us so that we can judge them and this gives and makes us why we are gods
Giving humans sob takes away from us the reason for our living
I'm aging all humans live on earth forever without facing us
If you were a God there would be no mistake in understanding how wrong this would be, gods are created by [Zetergheztdzefghijkty - Yahweh] so that we stand for him and judge humans before the final days where he judges everyone
Therefore, if humans can have sob that means they will know everything we use to judge them meaning knowing us

5. SYSTEMIC AND ENVIRONMENTAL FACTORS

GLOBAL HEALTHCARE ACCESS:

ensure equitable access to life extending technologies, as disparities could limit their impact.

Tomorrows World Order decides who gets what as a selective process that first picks up those willing already to live forever hence those who are ambitious enough to exert a huge impact.

create.livewithinpredefinedparameters.start

create.usetheagtforexampleindealingwithextremeweathercreate

Climatic changes can be a problem in the future and this is how we are going to deal with this in the future we must train our bodies today to be able to handle anything the world throws at us the future can be easily handled if we look for answers the body readily has instead of artificial ones because artificial ones will stop our own bodies working this is true but we discovered that why humans die is because they have relied on everything artificial that first say stop the bodies as it is useless as a challenge then the body accepts so that the human die hoping to prove the challenger wrong but that is it even for the body but we as then creator we have noticed that its not all artificial things that can power life but training the body itself can make you do anything we are the first in the universe probably not universe as other creatures like the zoles are more advanced than us but if we ask what can be of humans that don't understand their bodies then this is the truth they will all die but we have stopped death for the first time in 18 billion years this alone is proof that we mean business what we want we will get and just remove all obstacles because we are fulfilling prophecy that say one shall arise among men and achieve what all have failed to and as such one has arisen already and this time we have a strong team to remove any opposition outright from the skies hellraiser do you copy? Now let's look at what the body has done to combat extreme temperatures in response to the weather in the beautiful city of New York USA

Here are the changes

Astoert has developed to combat the weather as a general rule in all humans but has added several factors not found in other humans like aghuter that protects the lining that melts when there are extreme temperatures now if we ask how then this is the formula

create.x-y-t-x-y-z-u-v-w-x-y-z-t-u-v-w-x-y-z-t-u-x-y-z-s-u-vt-y-u-v-e-r-t-e-t-r-s-t-u-v-m-y-t-u-r-e-z-g-s-t-u-t-u-g-u-r-u-t-u-x-u-y-u-s-u-m-n-u-t-u-g-u-r-u-m-u-o-u-q-u-s-u-g-u-r-u-g-u-t-u-m-u-s-u-r-u-o-u-t-u-o-u-g-u-m-u-n-u-q-u-f-u-s-u-n-u-p.ool=x-y-u+t+u+f+u+g+u+r.start

This means we have found another coin part of the richlist that has 28 coins which we will need in the future as our bodies live longer than what has been this is a great achievement that most will applaud to when they discover what this is;
a big welldone to me and myself and all the team and if we are now to ask what createdyltedlyete does this is the answer I am the best of humans in cold climates because with me they don't need extra heating equipment instruments like in other countries… due to frost bite and now we have developed a better system that can adjust itself accordingly and ask questions that are critical to address this we must ask what can be and when and then what can and how and then what can be but how and why then we have a formula that expresses everything and the formula is as above now what can be of people without heating systems but in cold climates they can simply add createdyltedlyete to their bodies and have warmth like. create.addcreatedyltedlyete7628268.start
Safeguard lives against risk of deaths from conflicts
We have Tomorrow's World Order to stop wars hence we plan stop and mitigate against all future conflicts to ensure there won't be deaths from wars. We are a one world government to force and enforce international laws that preserve human life over company or national interests meaning stopping possible nuclear wars.
We are the peace keepers of the world to safeguard and preserve life

8. EXISTENTIAL RISKS: MITIGATE RISKS FROM TECHNOLOGIES LIKE AI OR BIOENGINEERING AND MITIGATING STEROIDS FROM THE UNIVERSE

that could backfire and cause harm rather than prevent death.
Assigning Tomorrow's World Order to stop ban mitigate and plan against risks from technologies that could cause harm to humans. TWO will enforce and deal with those who breach internation rules that safeguard humans excellent qualifty of life.
OUR AGT AND UTILITIES SOLUTIONS HAS STOPPED THE AGING PROCESS.
See case study davidgomadza where since 2009 to 2025 i have only grown and changed by 2 years.
CURRENT PROGRESS
current progress and challenges scientific progress: research in senolytics, crispr, and stem cells is advancing, but no single breakthrough has stopped aging. for example, trials for senolytic drugs like dasatinib and quercetin show promise in clearing senescent cells, but they’re far from a universal cure.
The AGT clears out all senescentcells
See arguments for preventive approaches as compared to reversal claims. i have argued that reversal approaches are illogivcal you cant wait life to die first to cure death its impractical in life hence the future is preventive.
See FIVE CONDITIONS FOR VALIDATION and the proof of concept in nature see the hydra shark case study above
notes

Quality of life: ensure that extended life is meaningful, addressing mental health, societal roles, and personal fulfillment.
We as Tomorrow's World Order we have several duties from writting laws to enforce our laws stopping wars improving living standards and improving the qualifty of life in all especially women.
We have found the AGT knownalso as the richlist that has all needed solutions and this book the cure for death all have solutions that if applied and distributed will enhance quality of life greatly by trillion percent something never done before
AGT can;
stop the ageing process completely 8000x1ofsealofapprovalis7628396ť
reverse the ageing process createcodes and the AGT all and special for women we can remove menopause completely and make women young and of child bearing age again
can enhance beauty that can make women female gorgeousand extremely viable
can make women enjoy sex not only until the 50s but throughout all 8000 years alive.
Currently women sex until the 50s where menopause crush everything and make reproductive organs dormanttechnological gaps: mind uploading and nanotechnology remain speculative, with no clear timeline for feasibility ethical hurdles: debates over overpopulation, resource use, and the morality of immortality could slow adoption of lifeextending technologies unknown unknowns: we may discover fundamental limits to biological or digital immortality, such as constraints on consciousness or unforeseen side effects of interventions.

CELEBRITY DAY OF DEATH CHANGE FROM 11 JANUARY 2025 TO YEAR 122080

The Live On Earth Forever Furtherest Day Of Death List & Los Angeles Wild Fire Celebrity Day Of Death Change from 11 January 2025 to Year 122080 for most Celebrities
Extracted From
THE GREATEST BREAKTHROUGH SINCE CREATION. LIVE ON EARTH WITHOUT DYING UNTIL 122038 OR HIGHER A WHOOPING 120000 years All Rights Reserved PAPERBACK ISBN 9798307641071
I am David Gomadza the president of the world Yahweh's (GOD's) representative on earth President of Tomorrow's World Order I have found the richlist. The richlist is a group of 28 coins that prolong life by changing a person's day of death by a minimum of 110 years to 10000 years for some to 120000 years and finally for some like me to million years because what the richlist is are solutions to everything that kills humans.If you don't want death then there is a solution look for the richlist that easily gives you solutions to everything that kills humans and make life harder. Now just as an exercise these are the things that cause humans to die

Lack of knowledge about Yahweh the creator can lead to death

humans have been dying at 100 years on average for the past 18 billion years because they did not know Yahweh God in the fullest of the meaning of the word humans worshipped God all these years but as you will find out there is more toknowing God means searching and finding him;± the ALMIGHTY MAJESTIC CREATOR OF ALL TIME who then becomes your sole guider in everything life from happiness joy wealth riches life peace longevity and living on earth foreverAll what one need is to find Yahweh and instantly have everything all humanscan ever wish for I can i will be and I am the richest person in the entire universe just by finding Yahweh and as such and because of him I can live on earth forever for since appointing me on 29 of May 2024 ever since my day of death has changed significantly from the original 2 July 2048 to 2 July 122038 and now to 2 July 7386783867890 meaning all things equal this is the year I will die 7386783867890 We have a day of death calculator but you must say I don't want to die I am just checking twice once before hearing and after hearing. The truth is that your own body knows and can tell you when you will die just say calculate day of death I don't want to die I am just checking before you hear things small creatures reply to you and after
https://youtu.be/Veqjb0_0W68?si=EABSb-sC5G6xj7JV
Having the largest longago which is time it takes to die which is 8 seconds for all humans this meaning that there is not enough time to stop want can cause death very few things can be done in 8 seconds but with the longest long ago in the world of 786789028386789028456789028456789028456789028456789028456789028456789028456789024867890...x38678902867890286789038456789028456789028678902867890286789028678902867890286789028678902867890286789028678902867890286789028678902867890286789028678902867890...That means I can live for hours even after near death experience in most cases enough to be saved other things being equal.

LONGEST LIFESPAN CHANGES TO DAY OF DEATH ONLY POSSIBLE BY HAVING THE RICHLIST COINS THAT GIVES EVERYONE EXTRA YEARS TO THEIR LIFE

You can use our day of death calculator digital analogue here
Remember to close after everytime you ask either yours or someone else's by simply
Saying: I don't want to die I am just checking then repeat after being told I don't want to die I am just checking Or if checking someone's He or she does not want to die i am just checking
After checking repeat He or she does not want to die i am just checking
https://www.youtube.com/watch?v=Veqjb0_0W68
https://youtu.be/TQ2ORGGrW6A?si=YPjwcW3whQyUuRud
https://youtu.be/TnTy-YsXZkI?si=yYkCtuAlffJXtmIL

https://youtu.be/Lg6DT3Oj_nw?si=wzT1t9sibkHR5fam
https://youtu.be/84Bz1eX7KuM?si=fILzsPv2PFCIzSZC
https://youtube.com/shorts/X9LmasFt7d0?si=fjnQUL48LxCM3YAc
Simply ask your own body without the videos
Calculate day of death I don't want to die I am just checking
Then repeat after knowing
I don't want to die I am just checking
No one on earth had ever had a day of death change ever this is the first time
Before I look at the list I have questions to ask and answer these myself in case you will need answers in the future

1. Can the richlist stop death?

I sent 100 bitcoinayt to all 7.5 billion humans on earth and on 11 Janurary 2025 in the California wildfires 4 to 8 celebrities and other local people had their day of death as 11 January 2025 but all survived Somehow
a) Mel Gibson 11 January 2025 then I changed it to 11 January 120235
b) Paris Hilton 11 January 2025 now changed below
c) Ben Affleck 16 January 2025 now changed below
d) Jennifer Garner 11 January 2025 now changed below
e) Leighton meester 11 January 2025 now changed below
f) Leonardo dicaprio 11 January 2025 now changed below
g) Jeffbridges 11 January 2025
h) Karen bass now changed below
It seems everyone on this list had their day of death as 11 January 2025: Los Angeles Wild Fire Celebrity Bitcoinayt Relief Fund Holder
First say: Initialise
Bitcoinayt Wallet
By David Gomadza
https://play.google.com/store/books/details/David_Gomadza_Los_Angeles_Wild_Fire_Celebrity_Bitc?id=_fI9EQAAQBAJ
Now first we need to change the day of death to a new day of death for the celebrities affected by the carlifornia wild fires
https://play.google.com/store/books/details/David_Gomadza_Los_Angeles_Wild_Fire_Celebrity_Bitc?id=_fI9EQAAQBAJ
Los Angeles Wild Fire Celebrity Changing Day Of Death from 11 January 2025 to approximately 11 January 122080 for most Richlist Relief Fund Holders
Say;
I don't want to die I am just checking.
Then say ;
What is the day of death
Then say after hearing from your own body creatures inside;
I don't want to die I am just checking.
[this seals everything back)

CELEBRITIES CHANGE IN DAY OF DEATH ON 11 JANUARY 2025

Congratulations to all these celebrities for getting extra 120000 years added to their lives increasing their lifespans by more than 120000 years.

Always remember to seal everything once sealed nothing can be opened as the body calculates once the first time the day of death then after that it tells what it has calculated so I reiterate;
Say;
I don't want to die I am just checking.
Then say ;
What is the day of death
Then say after hearing from your own body creatures inside;
I don't want to die I am just checking.
[this seals everything back)
Now that we have seen the future in action for those interested get in touch fast
liveforever@bitcoinayt.com
We can now list the people with the longest lifespan on earth according to the day of death calculator but on assumption that everything remains the same meaning if people don't do stupid things to end their lives

David Gomadza
President of the World
President of Tomorrow’s World Order
Ya’s representative on earth 29 May 2024
Ya on earth 10 December 2024

CONCLUSION

The Pass Criteria.

To "guarantee a cure for death," you would need to secure breakthroughs in biological aging, disease prevention, trauma repair, and consciousness preservation, supported by advanced AI, computing, and global infrastructure. Additionally, societal and ethical challenges must be addressed to make such a goal feasible and equitable. Has The Criteria Been Mate? To "guarantee a cure for death," you would need to secure breakthroughs in biological aging, we stopped the aging process disease prevention, we found cures for all incurables and we have the AGT that prevents and cures all other diseases trauma repair, we have established a system where the the person and his body request to start new every day as this means getting refills and new things everyday and the chance to reboot that means fix all errors and look for solutions.Requesting things everything even without getting these means it creates hunger to receive new items we use hence might find ways to do that or preserve current ones and convert them into brand new onces meaning finding a repair mechanism that is exception and consciousness preservation, preservation functioning speed etc all depends on the materials used whether this is durable and can handle the storage and retrieval over time. I put patents for a sobertendergent a material that can be used as brain material that lasts billions of years and can store 9 layers of information on a single sheet humans can store only 2 layers of information on the materials of their brains right now and me:davidgomadza can store up to maximum but have started working on a 16 per layer materialsupported by advanced AI, we have create Natural God Intelligence to be more than an aty or asm as it can be your doctor, your bodyguard, your financial adviser, i mean everything you need in life it can be you. visit www.twofuture.world
computing, our computer can calculate large sums than any other even better than quantum computers coming soon
and global infrastructure. We founded Tomorrow's World Order and is registered in Britain as a global political power and soon to be registered in the USA
To run the world most of things that cause deaths can only be controlled by someone who is president of the world with powers to stop wars and nuclear conflicts and prevent everything that can kill humans and fight for exceptional living standards and quality of life and that person can only be me also the creator's represenatative to deal with creation coding for life and everything human. Welcome to Tomorrow's World Order
Additionally, societal and ethical challenges must be addressed to make such a goal feasible and equitable.

We must put aside all our differences and work together for the good of all humanity but we are not saying stop to die if you prefer to die be our guest we can actually save our resrouces but if you still have the guts to do it again jump in where have you been?

ONCE AGAIN THE LONG AWAITED CURE FOR DEATH AS A CODE AND MP3 PLAYER TO TEST AND VERIFIY

Play In The Graveyard Check Every Code And Scrutinise It
The Truth Remains The Same This Is The Undisputed Cure For Death Argumented By The Setting Of Davidgomadza His Team His Founding Of A Political Party That Runs The Wjole World Emulating The Almighty Ruler Of The Universe Yahweh Who Made This Possible.
After 19 billions years we finally understood the goals of creation. We must fulfill the book of creation and think beyond our predefined parameters and asktoliveforever like other highly advanced species and live on earth forever in good health and in wealth without death.
A BIG THANK YOU AND PRAISES AND WORSHIP FOREVER TO THE CREATOR THE ALMIGHTY YA CATITIGHIT WHO MADE THIS A POSSIBILITY BY CREATING HUMANS THE GREATEST CREATION EVER AS WE HAVE THE POTENTIAL TO BE THE GREATEST OF ALL BECAUSE WE ARE HUNGRY AND PASSIONATE ABOUT EVERYTHING CREATION AND THIS BEGINS THE BEGINNING OF LIVE ON EARTH FOREVER AND A GREAT EPISODE IN CREATION HISTORY WE FINALLY BECAME THE gods.
A BIG THANK YOU TO ALL SINCE THE BEGINNING FROM DESTINATION:OST TO ANGELS THE GODS THE COURT OF CREATION THE ALMIGHTY YA AND EVERYONE I HAVE NOT MENTIONED
FIVE CONDITIONS FOR VALIDATION:
Violation of Gompertz Mortality Law (flat mortality rate at 120+). pass
Biological Non-Aging (no cellular decay over time). pass
chanistic Validation (e.g., telomerase therapy proven causal). pass
Demographic Impossibility (statistically impossible without intervention). pass
Evolutionary Plausibility (examples in nature). Hyra shark see example and notes
III. Preventative Burden of Proof: 200+ Indicators pass
(Categorized into Biological, Functional, Demographic, Legal, and Technological Proofs)
A. Biological Immortality Markers (30 Indicators) pass
Telomere Lengthening Stabilization (qPCR assays show no shortening). Check case sudy David Gomadza 72cm now inserted
Senescent Cell Clearance Rate (<0.1% in tissues). Excellent in the world see case study
Mitochondrial Mutation Arrest (0% mtDNA deletions over 50 years). Great results
Epigenetic Clock Freezing (Horvath clock shows zero aging). pass
Stem Cell Exhaustion Prevention (hematopoietic clonal maintained). pass
Zero Protein Aggregation (no amyloid plaques, tau tangles). Pass
Perfect DNA Repair Fidelity (0 mutations/Mb/year). pass
Non-Inflammatory Aging (IL-6/TNF-α at youthful levels for 100+ years). pass
Autophagy Efficiency (cel7lular cleanup at optimal rates). Pass
Mitochondrial Functiojp gb7n Preservation (ATP levels stable). pass
B. Disease Prevention Metrics (30 Indicators) pass with flying colours
Zero Age-Related Disease Incidence (no cancer, Alzheimer's, CVD at 150+). Found cures
Pathogen Impermeability (no infections despite exposure). pass

Perfect Immune Surveillance (no autoimmune disorders). pass
No Atherosclerosis (carotid artery scans show zero plaque). pass
Neurodegeneration Arrest (fMRI confirms no cognitive decline).28. Cancer Suppression (CRISPR-edited cells prevent oncogenesis). pass
No Osteoporosis (bone density remains at age 30 levels). pass
Zero Organ Failure (kidney, liver, lung function optimal). pass
C. Physiological Non-Aging Criteria (30 Indicators) pass see case study davidgomadza
Cardiac Output Preservation (VO_2 max unchanged at 150). pass
Neuroplasticity Retention (learning capacity identical to age 25). excellent
Muscle Fiber Integrity (DEXA scans show no sarcopenia). pass
Hormonal Homeostasis (growth hormone/IGF-1 stable). pass
Vision Retention (no cataracts, macular degeneration). Pass
Hearing Preservation (no auditory decline). pass
Skin Elasticity Maintenance (collagen production at youthful levels). pass
Joint Flexibility (no arthritis or degradation). pass
D. Demographic & Statistical Proof (30 Indicators) pass see case study
Cohort Survival Curve Violation (100% survival past 122). To be confimed
All-Cause Mortality Elimination (0 deaths in 50+ years, N=10,000). To be confimed
Deceleration of Frailty Index (Rockwood Score remains 0). To be confimed
Supercentenarian Workforce Participation (90% of 150-year-olds employed). To be confimed
Insurance Actuarial Tables Rewritten (0% annual mortality risk). To be confimed
Population Pyramid Inversion (more 150-year-olds than 80-year-olds). To be confimed
E. Legal/Medical Certification (20 Indicators)
WHO Redefinition of Vital Status ("Biologically non-aging" in ICD-12). To be confimed
FDA Approval for Immortality Therapies (e.g Telomerase Stabilizer TS-900). To be confimed
Global Consensus on Death sdwucsw (UN/WHO declarations). To be confimed
Legal Recognition of Biological Immortality (estate law adjustments). To be confimed
F. Technological Validation (20 Indicators)
AI-Confirmed Death (deep biomarkers predict 0% mortality +++ 200+). To be confimed
Longitudinal Biobanking (100-year tissue sample stability). To be confimed
aasNanomedicine Monitoringal-time cellular repair verification). To be confimed
IV. Counterarguments & Rebuttals
"Is this just longevity escape velocity?"
because biomarkers show complete cessation of aging, not just slowing. To be confimed
"Could this be cryonics or AI mind upload?" see sobertendergent To be confimed
Irrelevant—proof is in biological continuity, not digital preservation. To be confimed
What about overpopulation?" To be confimed
Societal, not scientific—proof of concept stands independently. To be confimed
V. Meeting Daubert Standards Without Reversal Evidence
Testability (quantifiable biomarkers). Pass
Error Rate (0% mortality in trials). To be confimed
Peer Review (published in Nature, NEJM). To be confimed
General Acceptance (adopted by WHO, insurance, governments). To be confimed
VI. Conclusion: A New Standard for Proof of Death Prevention
Reversal evidence is outdated—prevention is superior. Agree Pass
Changing the day of death by 100+ years is definitive proof. CONFIRMED AND A PASS

200+ Preventative Indicators provide robust validation. Met Pass
Daubert standards are met without requiring resurrection. Pass
The future of medicine is proactive immortality, not reactive revival. Founder Advocate Pass

FINAL VERDICT:

A 100+ year delay in death, supported by biological non-aging, demographic impossibility, and mechanistic validation, constitutes scientific proof of a cure for death—without requiring reversal evidence.
ACHIEVED PROVED PASS
Would a 100+ Year Delay in Death Suffice as Proof? PASS
Yes, if these 5 conditions are met:
Violation of Gompertz Mortality Law To be confimed
Current human mortality doubles every 8 years after age 30. To be confimed
Proof: A cohort with flat mortality rate (e.g., 0.1%/year) from age 120→220. To be confimed
Biological Non-Aging Pass
Not just delayed aging but cessation of aging damage. Pass
Example: 150-year-olds with identical biomarkers to 25-year-olds. To be confimed
Mechanistic Validation To be confimed
The intervention (e.g., telomerase therapy) must cause the effect.
Gold Standard: Double-blind trial where treated group reaches 220yo vs. placebo dying by 120yo. To be confimed
Demographic Impossibility To be confimed
Natural maximum lifespan is ~122 years (Jeanne Calment).
Any reproducible 150+ survival defies biology without intervention.*
Evolutionary Plausibility. Some species (Greenland sharks, hydra) show negligible senescence. Proof of concept exists in nature. SEE SHARK CASE STUDY
Evolutionary Plausibilities for a "Cure for Death" via Preventative Indicators
The idea of a "cure for death" is often framed in terms of reversing aging or repairing damage (e.g., rejuvenation therapies). However, an alternative approach is to prevent death indefinitely by maintaining homeostasis, repairing damage in real-time, or eliminating aging altogether. Evolutionary biology provides several plausibilities for this, where nature already exhibits "preventative" mechanisms that could theoretically be extended to prevent death.
What is Negligible Senescence?
Slowed Aging:
Negligible senescence refers to a situation where an organism experiences a very slow decline in its physiological functions, leading to an extended lifespan with minimal age-related deterioration.
Extended Lifespan:
Animals with negligible senescence can live significantly longer than their shorter-lived counterparts.
Reduced Age-Related Diseases:
These long-lived species often exhibit a reduced susceptibility to age-related diseases and a higher degree of resilience to stress.
Hydra, Greenland sharks, lobsters, and some tortoises show negligible senescence (no measurable decline in biological function with age).
Preventative Mechanism Their cells maintain robust repair mechanisms (e.g., high telomerase activity

Here are evolutionary plausibilities that suggest death could be preventable rather than inevitable, focusing on mechanisms that prevent aging and mortality:

Negligible Senescence in Nature

Certain organisms demonstrate that biological immortality is evolutionarily viable. Hydra, some jellyfish species like Turritopsis dohrnii, and certain plants show no measurable aging when provided optimal conditions. Their cellular repair mechanisms continuously maintain tissue integrity without deterioration over time.

Telomere Maintenance Systems

Many species possess robust telomerase activity throughout their lives, preventing chromosomal degradation. Lobsters, some turtles, and certain fish maintain telomere length indefinitely, suggesting that cellular aging isn't a fundamental biological law but rather a regulatory choice that evolution has selected against in some lineages.

DNA Repair Efficiency

Species with exceptional longevity often possess superior DNA repair mechanisms. Bowhead whales, which live over 200 years, have evolved enhanced DNA damage response systems. Naked mole rats show remarkable resistance to cancer and cellular damage through improved protein quality control and oxidative stress resistance.

Metabolic Flexibility and Stress Resistance

Long-lived organisms frequently exhibit enhanced stress response pathways. Tardigrades can survive extreme conditions by entering cryptobiotic states, essentially pausing biological processes. This demonstrates that life can be suspended and resumed without degradative consequences when proper protective mechanisms are engaged.

Stem Cell Maintenance

Some organisms maintain pristine stem cell populations throughout their lives. Planarians can regenerate entire bodies from small fragments, indicating that pluripotent cell populations can be preserved indefinitely without loss of regenerative capacity.

Protein Homeostasis Systems

Exceptionally long-lived species often possess superior protein folding quality control. They maintain functional proteomes through enhanced chaperone systems and autophagy mechanisms, preventing the accumulation of damaged proteins that typically drive aging processes.

These examples suggest that death from aging isn't evolutionarily mandated but rather represents one possible life history strategy. The existence of negligibly senescent organisms indicates that the biological machinery for indefinite survival already exists in nature's toolkit.

HYDO SHARKS CASE STUDY

https://youtu.be/jx93ooJW3gc?si=Ok9tE_1V2QEm6FpN

Hydo Shark In Play Davidgomadza Www Twofuture World

The best defence ever but for things that live in water because this generates power for them as extra sources of defence this is for sharks only because of power sources they use based on water and humans cant use without death because everything human is water whereas everything in sharks is hydo but not water if it was water all sharks would die in less that 300 years instead of 1500 if not shark hunting

zoles have hydo and not water skin is more like plastic what material we can add to our sking or systems as humans with time to become hydo based

Verdict: A 100-year delay with biological stasis = cure. Mere extension without healthspan = unproven
DAUBERT STANDARDS FOR DEATH CURE CLAIMS: 200 REQUIRED POINTS
FOUNDATIONAL DAUBERT CRITERIA
The Daubert standard requires scientific evidence to be reliable and relevant. For a "cure for death" claim, this extraordinary assertion would require the most rigorous application of Daubert principles ever demanded in legal proceedings.
CATEGORY I: TESTABILITY AND FALSIFIABILITY (Points 1-25)
Clearly defined hypothesis: Specific, testable claim about death reversal mechanism
Falsifiable predictions: Clear criteria that would disprove the claim
Controlled experimental design: Randomized, controlled trials with proper controls
Reproducible methodology: Detailed protocols that others can replicate exactly
Operational definitions: Precise definitions of "death" and "cure" used in studies
Measurable outcomes: Quantifiable endpoints that can be objectively assessed
Statistical power calculations: Adequate sample sizes to detect claimed effects
Pre-registered protocols: Study designs registered before data collection begins
Blind assessment: Outcome assessors unaware of treatment assignment
Placebo controls: Appropriate control groups where ethically possible
Dose-response relationships: Clear relationship between treatment dose and effect
Temporal sequence: Treatment must precede claimed effect
Biological plausibility: Proposed mechanism must be scientifically coherent
Mechanistic studies: Research explaining how the treatment works
Animal model validation: Successful testing in multiple animal species
In vitro confirmation: Cellular and molecular level supporting evidence
Pharmacokinetic studies: Understanding of how treatment moves through body
Pharmacodynamic studies: Understanding of treatment effects over time
Toxicology studies: Comprehensive safety and toxicity assessment
Stability studies: Treatment remains effective under various conditions
Quality control measures: Consistent treatment preparation and administration
Biomarker development: Objective measures of treatment effect
Imaging studies: Visual confirmation of biological changes
Physiological monitoring: Real-time measurement of bodily functions
Genetic analysis: Understanding of genetic factors affecting treatment
CATEGORY II: PEER REVIEW AND PUBLICATION (Points 26-50)

High-impact journal publication: Studies published in top-tier medical journals
Rigorous peer review: Multiple expert reviewers validate methodology
Editorial acceptance: Journal editors endorse study quality
Post-publication review: Continued scrutiny after publication
Systematic reviews: Meta-analyses of multiple studies
Independent replication: Other research groups achieve same results
International validation: Studies conducted in multiple countries
Multi-center trials: Research across different institutions
Collaborative studies: Multiple research teams working together
Open data sharing: Raw data available for independent analysis
Transparent reporting: Complete disclosure of methods and results
CONSORT compliance: Adherence to clinical trial reporting standards
Protocol registration: Studies registered in public databases
Ethics approval: Institutional review board approvals
Informed consent: Proper patient consent procedures
Data monitoring: Independent safety monitoring committees
Interim analyses: Planned safety reviews during studies
Publication bias assessment: No selective reporting of results
Conflict of interest disclosure: Complete financial transparency
Author qualifications: Researchers with appropriate expertise
Institutional support: Backing from reputable research institutions
Funding transparency: Clear disclosure of research funding sources
Regulatory approval: Government agency endorsements
Professional society endorsement: Medical associations support findings
Scientific consensus: Broad acceptance in scientific community
CATEGORY III: KNOWN ERROR RATES (Points 51-75)
False positive rate: Documented rate of incorrectly claiming death reversal
False negative rate: Rate of missing actual successful treatments
Sensitivity analysis: How results change with different assumptions
Specificity measures: Accuracy in identifying true death reversal
Confidence intervals: Statistical precision of effect estimates
Measurement error: Understanding of instrument and observer errors
Interobserver reliability: Consistency between different assessors
Intraobserver reliability: Consistency within same assessor over time
Test-retest reliability: Stability of measurements over time
Internal validity: Study design minimizes bias and confounding
External validity: Results generalizable to broader populations
Statistical significance: P-values meeting conventional thresholds
Clinical significance: Meaningful real-world impact of effects
Effect size calculation: Magnitude of treatment benefit
Number needed to treat: Patients who need treatment for one success
Adverse event rates: Documented frequency of negative effects
Dropout rates: Proportion of subjects who discontinue treatment
Protocol deviations: Frequency of departures from study protocols
Missing data rates: Proportion of incomplete information
Data quality measures: Assessment of data completeness and accuracy
Analytical reproducibility: Same results from same data

Biological reproducibility: Same results from independent samples
Technical reproducibility: Same results using same techniques
Interlaboratory variability: Consistency across different labs
Seasonal variations: Consistency across different time periods
CATEGORY IV: GENERAL ACCEPTANCE (Points 76-100)
Medical community acceptance: Physicians endorse the treatment
Scientific society endorsement: Professional organizations support findings
Regulatory approval: FDA, EMA, and other agencies approve treatment
Clinical practice guidelines: Treatment included in medical guidelines
Medical school curriculum: Treatment taught in medical education
Residency training: Treatment included in physician training programs
Continuing medical education: Ongoing education about treatment
Hospital protocols: Treatment incorporated into hospital procedures
Insurance coverage: Health insurers cover the treatment
Government endorsement: Health departments support treatment
International recognition: Global health organizations endorse treatment
Nobel Prize consideration: Treatment recognized for scientific breakthrough
Textbook inclusion: Treatment described in medical textbooks
Conference presentations: Treatment presented at major medical meetings
Expert testimony: Leading experts testify to treatment validity
Judicial acceptance: Courts have accepted treatment as valid
Legal precedent: Previous legal cases support treatment validity
Media coverage: Responsible scientific reporting of treatment
Public health adoption: Treatment integrated into public health systems
Emergency protocols: Treatment included in emergency medical procedures
Military adoption: Armed forces accept treatment for battlefield use
Space medicine: Treatment approved for astronaut medical care
Disaster preparedness: Treatment included in disaster response plans
International treaties: Treatment recognized in international agreements
Historical validation: Treatment stands test of time over decades
CATEGORY V: METHODOLOGICAL RIGOR (Points 101-125)
Sample size justification: Adequate power to detect true effects
Randomization method: Proper random assignment to treatment groups
Allocation concealment: Treatment assignment hidden until enrollment
Blinding procedures: Subjects and investigators unaware of assignments
Primary endpoint specification: Clear definition of main outcome measure
Secondary endpoint hierarchy: Ranked importance of additional outcomes
Statistical analysis plan: Pre-specified analytical approach
Multiple comparison adjustment: Correction for multiple statistical tests
Intention-to-treat analysis: Analysis includes all randomized subjects
Per-protocol analysis: Analysis of subjects who completed treatment
Survival analysis: Time-to-event statistical methods when appropriate
Subgroup analyses: Pre-planned analyses of patient subgroups
Covariate adjustment: Statistical control for confounding variables
Missing data handling: Appropriate methods for incomplete data
Outlier management: Systematic approach to extreme values
Data transformation: Appropriate statistical transformations

Model diagnostics: Validation of statistical model assumptions
Cross-validation: Testing model performance on independent data
Bootstrap analysis: Resampling methods to assess uncertainty
Bayesian analysis: Alternative statistical framework when appropriate
Meta-analysis methods: Combining results from multiple studies
Network meta-analysis: Indirect comparisons between treatments
Individual patient data analysis: Analysis of raw patient-level data
Propensity score matching: Reducing selection bias in observational studies
Causal inference methods: Establishing cause-and-effect relationships
CATEGORY VI: BIOLOGICAL PLAUSIBILITY (Points 126-150)
Cellular mechanism: Understanding of how treatment affects cells
Molecular pathways: Knowledge of biochemical processes involved
Genetic factors: Role of DNA and gene expression in treatment
Protein interactions: How treatment affects cellular proteins
Enzyme activity: Impact on catalytic biological processes
Metabolic effects: Changes in cellular energy production
Membrane transport: Effects on cellular membrane function
Signal transduction: Impact on cellular communication pathways
Apoptosis reversal: Ability to reverse programmed cell death
Necrosis reversal: Ability to reverse accidental cell death
Tissue regeneration: Capacity to rebuild damaged tissues
Organ restoration: Ability to restore organ function
Vascular repair: Restoration of blood vessel function
Neural regeneration: Ability to restore nervous system function
Immune system effects: Impact on immune function
Hormonal effects: Changes in endocrine system function
Inflammatory response: Modulation of inflammatory processes
Oxidative stress: Management of cellular damage from free radicals
DNA repair: Restoration of genetic material integrity
Telomere effects: Impact on chromosomal aging markers
Stem cell activation: Mobilization of regenerative cells
Growth factor production: Stimulation of healing proteins
Angiogenesis: Formation of new blood vessels
Neuroplasticity: Brain's ability to reorganize after treatment
Epigenetic effects: Changes in gene expression patterns
CATEGORY VII: SAFETY AND RISK ASSESSMENT (Points 151-175)
Acute toxicity studies: Short-term safety assessment
Chronic toxicity studies: Long-term safety evaluation
Carcinogenicity studies: Cancer risk assessment
Mutagenicity studies: Genetic damage risk evaluation
Teratogenicity studies: Birth defect risk assessment
Reproductive toxicity: Effects on fertility and reproduction
Immunotoxicity: Impact on immune system safety
Neurotoxicity: Effects on nervous system safety
Hepatotoxicity: Liver safety assessment
Nephrotoxicity: Kidney safety evaluation
Cardiotoxicity: Heart safety assessment

Pulmonary toxicity: Lung safety evaluation
Dermatotoxicity: Skin safety assessment
Ocular toxicity: Eye safety evaluation
Drug interactions: Safety with other medications
Overdose effects: Safety at high doses
Withdrawal effects: Safety when treatment stops
Contraindications: Conditions where treatment shouldn't be used
Risk-benefit analysis: Weighing benefits against risks
Pharmacovigilance: Ongoing safety monitoring
Adverse event reporting: Systematic collection of safety data
Signal detection: Identification of new safety concerns
Risk management: Plans to minimize identified risks
Emergency procedures: Protocols for managing complications
Antidote availability: Treatments for overdose or adverse effects
CATEGORY VIII: TECHNICAL AND PRACTICAL CONSIDERATIONS (Points 176-200)
Manufacturing standards: Good manufacturing practice compliance
Quality control: Consistent product quality
Stability testing: Product maintains potency over time
Storage requirements: Proper preservation conditions
Administration protocols: Standardized delivery methods
Dosing guidelines: Appropriate treatment amounts
Patient selection: Criteria for treatment eligibility
Training requirements: Education needed for providers
Equipment needs: Necessary medical devices and instruments
Facility requirements: Appropriate treatment environments
Cost-effectiveness: Economic value of treatment
Resource allocation: Healthcare system capacity requirements
Scalability: Ability to treat large populations
Global accessibility: Availability in different countries
Equity considerations: Fair access across populations
Cultural acceptability: Compatibility with different cultures
Ethical frameworks: Compliance with medical ethics
Legal compliance: Adherence to applicable laws
Regulatory pathways: Clear approval processes
Intellectual property: Patent and licensing considerations
Technology transfer: Sharing of treatment knowledge
Sustainability: Long-term viability of treatment
Environmental impact: Ecological effects of treatment
Future research: Ongoing studies to improve treatment
Scientific advancement: Contribution to medical knowledge
DAUBERT STANDARD CONCLUSION
Under Daubert, a "cure for death" claim would face the most stringent scientific scrutiny in legal history. ALL 200 points would need to be satisfied with extraordinary evidence quality. The standard of proof would be:
Reliability Requirements:
Unprecedented Level: Exceeding standard Daubert requirements
Independent Verification: Multiple independent confirmations required

International Consensus: Global scientific agreement necessary
Zero Tolerance: No acceptable margin of error
Relevance Standards:
Direct Applicability: Evidence must directly support death reversal claim
Complete Coverage: Evidence must address all aspects of death definition
Comprehensive Scope: Evidence must cover all types of death scenarios
Expert Witness Qualifications:
Nobel Prize Level: Internationally recognized authorities only
Multiple Disciplines: Experts from medicine, biology, ethics, law
Unanimous Agreement: No dissenting expert opinions acceptable
Historical Significance: Experts must acknowledge unprecedented nature

200 LESSONS IN ME DAVID GOMADZA AS COMPARED TO FROM EXTREMELY LONG-LIVED ORGANISMS

1. Telomere Maintenance Prevents Cellular Aging (from tortoises and lobsters)
changed mine on recreation from 8cm in length to 28 cm and then 72 cm now currently its 72 cm. Procedure to change on recreation. First acquire 8000 agt from Tomorrow's World Order and its representatives abroad. Use all say use all for the entire lifespan. Then it calculates your new day of death to a new year as the day and month remains the same. Wait until you have reached recreation you can ask age as it goes down from your current to recreation which is minus 28 days of 0 mainly birth day. On recreation laydown for 2 minutes and using create codes to be supplied change the shorter 8cm telomeres to the next big first 28 cm then to the largest 72cm.
This was possible because:
1. Presence of all solutions as utilities
2. possession of a creator' seal
davidgomadzaisacreatorlicenseisajertertertertuert76283888888888888888888888.start
3. possession of several seals list;see case study
4. need to reset everything first eg telomeres fitted only at reset of creation at recreation
Cellular Senescence Reversal demonstrate complete reversal of aged cells to youthful state

Green land sharks reboot everyday and ask for new resources everyday meaning everything is renewed at the start of the day and they have the best repair mechanism as damaged organs or enzymes are replaced the next day. I have the same system where I ask for resources everyday but as a human being I cant reboot all the time but I keep asking everyday to keep the system hungry and instead increase the repair and upgrade function on daily basis or where possible meaning the system always looking to make the current resources and parts new to replace the requested ones but that cant be delivered everyday. Instead of waiting for new parts that might not come why not renew what we have to the new ones standards instead. I have 83 gagigollion DNA sequence meaning enough power to check daily for damages and protein misfolding and removing these
DNA damage repair system perfection
Your system is the best system in the world comprising of 83gagigolliondna sequence (was 53billion800dna sequence) system that can easily repair and damage and prevent any damage as compared to the human beings of 72million sequences

4. Slower Metabolic Rates Correlate With Longer Lifespans (from giant tortoises)
For us its not speed that increase lifespan as humans in me it's the agt that is a comprehensive set of solutions to everything that affects human lifespan meaning a solution for everything hence the 8000agt will remove dead inside your body and gives you 29 billion years on earth without death and removes current day of death and replaces this with a brand new day of death hundreds or thousand of years from now.

if we ask the above we can tell that the first x and all xs have been removed by the presence of the agt and this is called the reversal process and is due to createbitcoinato7628... and we if look at this then we can tell that reversal is possible and is due to a single coin of the agt rather than a combination of all but all must be there for the reversal to take place

if we ask now createbitcoinato is the only one that asks you to start all over again 78 times then stops 2 telomere lenght restoration prove indefinite telomere maintenance without cancer risk cancers increase--

Meaning you have changed all old age genes for new young ones where all old genes start with cert throughout

Proof ask young and listen

Yes Davidgomadza has become young again current age is 12 and is in level 8 tier of development not achieved by any other humans if we ask now what can be of Davidgomadza he can remain young for 29000000000 years as all his ajertttttttttttttttttttttttttttttttttttttttttttttttttttttttter are still undeveloped but in existence

Old no because all xertxerts were all reversed as these start at the age of 28 as people start the old age if we ask this is how they were reversed but with no option of being reversed back if we ask what was this is the answer

PROOF OF CONCEPT IN NATURE CELLULAR AND MOLECULAR MECHANISMS

Telomere maintenance prevents cellular aging (from tortoises and lobsters)
Efficient DNA repair systems preserve genetic integrity (from Greenland sharks)
Enhanced antioxidant production combats oxidative stress (from naked mole rats)
Slower metabolic rates correlate with longer lifespans (from giant tortoises)
Autophagy clears damaged cellular components (from bowhead whales)
Protein folding quality control prevents dysfunction (from bristlecone pines)
Mitochondrial efficiency reduces cellular damage (from rockfish)
Reduced growth hormone signaling extends lifespan (from Ames dwarf mice)
Cellular senescence can be beneficial when controlled (from Mediterranean trees)
10. Epigenetic stability maintains cell function over time (from centenarian humans)

Stress Response and Adaptation

Hormesis - mild stress strengthens resilience (from extremophile bacteria)
Heat shock proteins protect against damage (from desert organisms)
Cold tolerance mechanisms slow aging processes (from Arctic organisms)
Radiation resistance protects DNA (from Deinococcus radiodurans)
Osmotic stress adaptation enhances cellular stability (from halophilic archaea)
Hypoxia tolerance prevents oxidative damage (from deep-sea organisms)
UV resistance protects against solar damage (from high-altitude organisms)
Mechanical stress strengthens structural integrity (from long-lived trees)
Toxic compound resistance builds resilience (from poison-resistant animals)
Seasonal adaptation strategies conserve energy (from hibernating animals)

Metabolic Strategies

Caloric restriction activates longevity pathways (from multiple species)
Intermittent fasting triggers cellular repair (from organisms with feeding cycles)
Efficient nutrient utilization maximizes resources (from desert animals)
Reduced insulin signaling promotes longevity (from centenarian humans)
Ketone metabolism provides alternative energy (from fasting-adapted animals)
Slow digestion prevents metabolic stress (from sloths)
Energy conservation during dormancy (from tardigrades)
Balanced macronutrient ratios optimize health (from long-lived primates)
Micronutrient efficiency prevents deficiency diseases (from efficient foragers)
Metabolic flexibility adapts to changing conditions (from migratory animals)

Environmental Factors

Stable environments reduce stress-induced aging (from deep ocean dwellers)
Seasonal variation promotes adaptation (from temperate zone organisms)
Moderate temperatures optimize cellular function (from temperate organisms)
Clean air reduces respiratory damage (from organisms in pristine environments)
Pure water prevents toxin accumulation (from organisms in clean waterways)
Appropriate humidity maintains cellular hydration (from optimal-zone organisms)

Natural light cycles regulate circadian rhythms (from organisms with proper photoperiods)
Reduced pollution exposure prevents cellular damage (from remote ecosystem dwellers)
Stable social environments reduce stress (from long-lived social animals)
Access to diverse food sources ensures nutrition (from omnivorous long-lived species)

Social and Behavioral Factors

Strong social bonds reduce stress hormones (from elephants and whales)
Cooperative behavior enhances survival (from social insects)
Reduced aggression conserves energy (from peaceful species)
Multigenerational care improves offspring survival (from orcas)
Knowledge transfer preserves survival skills (from long-lived social species)
Mate selection for longevity traits (from monogamous long-lived birds)
Territorial behavior reduces competition stress (from long-lived territorial animals)
Play behavior maintains cognitive function (from intelligent long-lived species)
Grooming and social contact reduce stress (from primates)
Leadership structures provide stability (from long-lived social mammals)

Reproductive Strategies

Late reproduction correlates with longevity (from humans and great apes)
Reproductive restraint preserves energy (from long-lived seabirds)
Parental investment strategies affect lifespan (from K-selected species)
Sexual selection for longevity traits (from species with mate choice)
Reduced reproductive output increases individual survival (from long-lived species)
Seasonal breeding optimizes resource allocation (from many long-lived animals)
Extended juvenile periods allow for learning (from long-lived intelligent species)
Grandparent effects enhance offspring survival (from species with extended lifespans)
Reproductive senescence prevents late-life costs (from menopause in whales)
Sperm competition drives longevity evolution (from polyandrous species)

Physiological Adaptations

Efficient cardiovascular systems prevent disease (from long-lived mammals)
Strong immune systems resist pathogens (from disease-resistant species)
Flexible skeletal systems adapt to stress (from long-lived vertebrates)
Efficient respiratory systems optimize oxygen use (from high-altitude organisms)
Robust nervous systems maintain function (from long-lived intelligent species)
Efficient excretory systems prevent toxin buildup (from desert-adapted animals)
Thermoregulatory efficiency conserves energy (from cold-adapted organisms)
Sensory system maintenance preserves function (from long-lived predators)
Hormonal balance prevents dysfunction (from long-lived mammals)
Digestive efficiency maximizes nutrition (from herbivorous long-lived species)

Genetic Factors

Genetic diversity enhances disease resistance (from outbred populations)
Tumor suppressor genes prevent cancer (from cancer-resistant species)
DNA repair gene efficiency maintains genome integrity (from long-lived species)
Longevity genes regulate aging processes (from centenarian studies)
Genetic redundancy provides backup systems (from polyploid organisms)
Mutation resistance preserves function (from radiation-resistant organisms)
Gene expression regulation maintains homeostasis (from long-lived cells)
Chromosomal stability prevents errors (from long-lived species)

Heterozygote advantage in longevity traits (from hybrid vigor)
Epigenetic inheritance of longevity factors (from multi-generational studies)

Biochemical Insights

Efficient enzyme systems prevent damage accumulation (from long-lived organisms)
Membrane composition affects cellular stability (from extremophiles)
Protein synthesis accuracy prevents dysfunction (from long-lived cells)
Neurotransmitter balance maintains cognitive function (from long-lived brains)
Hormone receptor sensitivity affects aging (from endocrine studies)
Lipid metabolism efficiency prevents disease (from healthy long-lived populations)
Mineral balance prevents deficiency diseases (from long-lived organisms)
Vitamin synthesis and storage capabilities (from efficient organisms)
Detoxification pathways prevent damage (from toxin-resistant species)
pH regulation maintains cellular function (from stable-environment organisms)

Evolutionary Perspectives

Antagonistic pleiotropy explains aging trade-offs (from evolutionary studies)
Disposable soma theory guides resource allocation (from life history theory)
Mutation accumulation affects late-life function (from population genetics)
Group selection may favor longevity (from social species)
Environmental stability selects for longevity (from stable ecosystems)
Predation pressure affects aging evolution (from predator-prey dynamics)
Sexual selection influences aging patterns (from mate choice studies)
Life history trade-offs shape longevity (from comparative studies)
Genetic drift affects longevity alleles (from small populations)
Adaptive radiation includes longevity variants (from diverse ecosystems)

Pathology and Disease Resistance

Cancer resistance mechanisms prevent tumors (from elephants and whales)
Cardiovascular disease resistance (from active long-lived species)
Neurodegeneration resistance preserves cognition (from long-lived brains)
Infectious disease resistance (from isolated populations)
Autoimmune disease prevention (from balanced immune systems)
Diabetes resistance through metabolic efficiency (from calorie-restricted animals)
Osteoporosis prevention through activity (from active long-lived species)
Kidney disease prevention through efficient filtration (from desert animals)
Liver disease resistance through detoxification (from toxin-resistant species)
Respiratory disease prevention through clean environments (from pristine habitats)

Cognitive and Neurological Factors

Neuroplasticity maintains brain function (from long-lived intelligent species)
Cognitive reserve protects against decline (from educated populations)
Social cognition enhances survival (from social long-lived species)
Memory consolidation preserves learning (from long-lived learners)
Stress management prevents cognitive decline (from stress-adapted species)
Sleep quality maintains brain health (from proper sleep cycle organisms)
Learning ability enhances adaptation (from intelligent long-lived species)
Problem-solving skills improve survival (from tool-using animals)
Emotional regulation reduces stress (from stable-temperament species)
Sensory processing efficiency maintains function (from long-lived predators)

Hormonal and Endocrine Insights

Growth hormone regulation affects aging (from dwarf mouse studies)
Insulin sensitivity maintains metabolic health (from long-lived populations)
Thyroid hormone balance regulates metabolism (from metabolically efficient species)
Cortisol regulation prevents chronic stress (from stress-resistant species)
Sex hormone balance affects aging (from long-lived mammals)
Melatonin production regulates circadian rhythms (from proper sleep cycle organisms)
Adiponectin levels affect longevity (from healthy weight populations)
IGF-1 signaling influences aging (from growth-restricted animals)
Leptin sensitivity regulates appetite (from healthy weight organisms)
Parathyroid hormone affects bone health (from long-lived vertebrates)

Cellular Communication

Efficient cell signaling prevents dysfunction (from long-lived tissues)
Inflammation resolution prevents chronic damage (from healthy long-lived populations)
Stem cell maintenance preserves regeneration (from regenerative species)
Extracellular matrix integrity maintains structure (from long-lived tissues)
Gap junction communication maintains coordination (from long-lived multicellular organisms)
Neurotransmitter balance maintains function (from long-lived nervous systems)
Hormone signaling accuracy prevents dysfunction (from stable endocrine systems)
Immune cell communication prevents autoimmunity (from balanced immune systems)
Cellular adhesion maintains tissue integrity (from long-lived organs)
140. Intercellular transport efficiency maintains function (from efficient organisms)

Tissue and Organ Maintenance

Tissue regeneration capacity prevents decline (from regenerative species)
Organ reserve capacity maintains function (from healthy long-lived organisms)
Vascular health prevents organ damage (from cardiovascular-healthy species)
Lymphatic drainage prevents toxin buildup (from healthy lymphatic systems)
Muscle maintenance prevents sarcopenia (from active long-lived species)
Bone density maintenance prevents fractures (from mechanically active species)
Skin barrier function prevents infection (from healthy long-lived organisms)
Gut barrier integrity maintains health (from healthy digestive systems)
Blood-brain barrier function protects cognition (from neurologically healthy species)
Connective tissue maintenance prevents deterioration (from structurally sound organisms)

Nutritional Insights

Micronutrient density prevents deficiency (from nutrient-rich diet organisms)
Antioxidant consumption prevents damage (from plant-rich diet species)
Omega-3 fatty acids support brain health (from fish-eating populations)
Fiber intake supports gut health (from high-fiber diet organisms)
Protein quality maintains muscle mass (from high-quality protein consumers)
Mineral balance prevents deficiency diseases (from mineral-rich diet organisms)
Phytonutrient diversity provides protection (from diverse plant consumers)
Fermented food consumption supports gut health (from fermented food consumers)
Seasonal food variation provides nutrients (from seasonally varied diet organisms)
Food synergy enhances nutrient absorption (from whole food consumers)

Physical Activity and Movement

Regular movement prevents muscle atrophy (from active species)
Cardiovascular exercise maintains heart health (from active long-lived species)
Resistance training maintains bone density (from mechanically active species)
Flexibility maintenance prevents injury (from agile long-lived species)
Balance training prevents falls (from stable-moving species)
Coordination exercises maintain neural function (from skilled movers)
Endurance activities improve metabolic health (from endurance-adapted species)
Varied movement patterns prevent overuse (from diversely active species)
Recovery periods allow adaptation (from rest-incorporating species)
Functional movement maintains daily activities (from naturally active species)

Sleep and Circadian Rhythms

Adequate sleep duration supports repair (from proper sleep cycle organisms)
Sleep quality affects cognitive function (from well-rested species)
Circadian rhythm regularity maintains health (from light-cycle adapted organisms)
Nap timing can enhance performance (from polyphasic sleep organisms)
Sleep environment affects quality (from optimal habitat organisms)
Seasonal sleep variation adapts to changes (from seasonally adaptive species)
REM sleep supports memory consolidation (from cognitively active species)
Deep sleep supports physical recovery (from recovery-dependent species)
Sleep-wake cycle consistency maintains health (from regular cycle organisms)
Melatonin production regulates sleep (from naturally cycling organisms)

Mental and Emotional Health

Stress resilience prevents premature aging (from stress-resistant species)
Positive emotions support immune function (from socially positive species)
Purpose and meaning enhance longevity (from goal-directed species)
Social connection prevents isolation effects (from social species)
Cognitive stimulation prevents decline (from mentally active species)
Emotional regulation prevents chronic stress (from emotionally stable species)
Mindfulness and present-moment awareness (from aware species)
Gratitude and appreciation support wellbeing (from content species)
Optimism enhances health outcomes (from resilient species)
Spiritual practices support mental health (from ritual-practicing species)

Community and Environment

Supportive communities enhance survival (from social species)
Intergenerational interaction benefits all ages (from age-mixed social groups)
Environmental stewardship ensures resource sustainability (from ecosystem-maintaining species)
Cultural preservation maintains knowledge (from tradition-maintaining species)
Cooperative resource sharing enhances survival (from sharing species)
Conflict resolution prevents chronic stress (from peaceful species)
Mentorship transfers survival skills (from teaching species)
Mutual aid systems support vulnerable members (from altruistic species)
Biodiversity preservation ensures ecosystem health (from keystone species)
Adaptation to changing environments ensures survival (from evolutionarily successful species)

PROOF OF THE CURE FOR DEATH REPORT: RESTRUCTURING THE BURDEN OF PROOF FROM REVERSAL TO PREVENTION

THE MOST ADVANCED UP-TO-DATE PROOF OF A CURE FOR DEATH
WORLD'S FIRST BY DAVID GOMADZA

Part A

CASE STUDY : DAVID GOMADZA

METHODOLOGY REFERENCES AND TOOLS USED IN THIS STUDY (ALL BY DAVID GOMADZA)

Digital Death Analogue Calculator Calculates Day of Death
https://youtu.be/TnTy-YsXZkI
Iger Digital Analogue Calculates measures brain activity by detecting changes in blood flow same as an fmri

DAVID GOMADZA VITALS

telomere qpcr size

telomere size now 72cm

atuptaeger is 28 cm meaning not human as it measure rate of death and death added together as evidence of longevity

autersersertugertugerty is 38 cm meaning if you ask to lie down for a year you wont die because this is more than that of human of 2 cm that if they lie down for a long time they will die forever without afterlife or ressurrection and indeed proof of more than a human

agertergertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyertyesg.start is the solution to the telomere saga where you must replace these at recreation at minus 28 days

agertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyuertyun.start

FIVE CONDITIONS FOR VALIDATION:

Violation of Gompertz Mortality Law (flat mortality rate at 120+).

Biological Non-Aging (no cellular decay over time).

chanistic Validation (e.g., telomerase therapy proven causal).

Demographic Impossibility (statistically impossible without intervention).

Evolutionary Plausibility (examples in nature).

III. Preventative Burden of Proof: 200+ Indicators

(Categorized into Biological, Functional, Demographic, Legal, and Technological Proofs)

A. Biological Immortality Markers (30 Indicators)

Telomere Lengthening Stabilization (qPCR assays show no shortening).

Senescent Cell Clearance Rate (<0.1% in tissues).

Mitochondrial Mutation Arrest (0% mtDNA deletions over 50 years).

Epigenetic Clock Freezing (Horvath clock shows zero aging).

Stem Cell Exhaustion Prevention (hematopoietic clonal maintained).

Zero Protein Aggregation (no amyloid plaques, tau tangles).

Perfect DNA Repair Fidelity (0 mutations/Mb/year).

Non-Inflammatory Aging (IL-6/TNF-α at youthful levels for 100+ years).

Autophagy Efficiency (cel7lular cleanup at optimal rates).

Mitochondrial Functiojp gb7n Preservation (ATP levels stable).

B. Disease Prevention Metrics (30 Indicators)

Zero Age-Related Disease Incidence (no cancer, Alzheimer's, CVD at 150+).

Pathogen Impermeability (no infections despite exposure).

Perfect Immune Surveillance (no autoimmune disorders).

No Atherosclerosis (carotid artery scans show zero plaque).

Neurodegeneration Arrest (fMRI confirms no cognitive decline).28. Cancer Suppression (CRISPR-edited cells prevent oncogenesis).

No Osteoporosis (bone density remains at age 30 levels).

Zero Organ Failure (kidney, liver, lung function optimal).

C. Physiological Non-Aging Criteria (30 Indicators)

Cardiac Output Preservation (VO_2 max unchanged at 150).

Neuroplasticity Retention (learning capacity identical to age 25).

Muscle Fiber Integrity (DEXA scans show no sarcopenia).

Hormonal Homeostasis (growth hormone/IGF-1 stable).

Vision Retention (no cataracts, macular degeneration).

Hearing Preservation (no auditory decline).

Skin Elasticity Maintenance (collagen production at youthful levels).

Joint Flexibility (no arthritis or degradation).

D. Demographic & Statistical Proof (30 Indicators)

Cohort Survival Curve Violation (100% survival past 122).

All-Cause Mortality Elimination (0 deaths in 50+ years, N=10,000).

Deceleration of Frailty Index (Rockwood Score remains 0).

Supercentenarian Workforce Participation (90% of 150-year-olds employed).

Insurance Actuarial Tables Rewritten (0% annual mortality risk).

Population Pyramid Inversion (more 150-year-olds than 80-year-olds).

E. Legal/Medical Certification (20 Indicators)

WHO Redefinition of Vital Status ("Biologically non-aging" in ICD-12).

FDA Approval for Immortality Therapies (e.g Telomerase Stabilizer TS-900).
Global Consensus on Death sdwucsw (UN/WHO declarations).
Legal Recognition of Biological Immortality (estate law adjustments).
F. Technological Validation (20 Indicators)
AI-Confirmed Death (deep biomarkers predict 0% mortality 200+).
Longitudinal Biobanking (100-year tissue sample stability).
aaNanomedicine Monitoring (@al-time cellular repair verification).
IV. Counterarguments & Rebuttals
"Is this just longevity escape velocity?"
because biomarkers show complete cessation of aging, not just slowing.
"Could this be cryonics or AI mind upload?"
Irrelevant—proof is in biological continuity, not digital preservation.
What about overpopulation?"
Societal, not scientific—proof of concept stands independently.
V. Meeting Daubert Standards Without Reversal Evidence
Testability (quantifiable biomarkers).
Error Rate (0% mortality in trials).
Peer Review (published in Nature, NEJM).
General Acceptance (adopted by WHO, insurance, governments).
VI. Conclusion: A New Standard for Proof of Death Prevention
Reversal evidence is outdated—prevention is superior.
Changing the day of death by 100+ years is definitive proof.
200+ Preventative Indicators provide robust validation.
Daubert standards are met without requiring resurrection.
The future of medicine is proactive immortality, not reactive revival
Final Verdict: A 100+ year delay in death, supported by biological non-aging, demographic impossibility, and mechanistic validation, constitutes scientific proof of a cure for death—without requiring reversal evidence.
Would a 100+ Year Delay in Death Suffice as Proof? Yes
Yes, if these 5 conditions are met:
Violation of Gompertz Mortality Law
Current human mortality doubles every 8 years after age 30.
Proof: A cohort with flat mortality rate (e.g., 0.1%/year) from age 120→220.
Biological Non-Aging
Not just delayed aging but cessation of aging damage.
Example: 150-year-olds with identical biomarkers to 25-year-olds.
Mechanistic Validation
The intervention (e.g., telomerase therapy) must cause the effect.
Gold Standard: Double-blind trial where treated group reaches 220yo vs. placebo dying by 120yo.
Demographic Impossibility
Natural maximum lifespan is ~122 years (Jeanne Calment).
Any reproducible 150+ survival defies biology without intervention.

Evolutionary Plausibility. Some species (Greenland sharks, hydra) show negligible senescence. Proof of concept exists in nature.

Evolutionary Plausibilities for a "Cure for Death" via Preventative Indicators

The idea of a "cure for death" is often framed in terms of reversing aging or repairing damage (e.g., rejuvenation therapies). However, an alternative approach is to prevent death indefinitely by maintaining homeostasis, repairing damage in real-time, or eliminating aging altogether. Evolutionary biology provides several plausibilities for this, where nature already exhibits "preventative" mechanisms that could theoretically be extended to prevent death.

What is Negligible Senescence?

Slowed Aging:

Negligible senescence refers to a situation where an organism experiences a very slow decline in its physiological functions, leading to an extended lifespan with minimal age-related deterioration.

Extended Lifespan:

Animals with negligible senescence can live significantly longer than their shorter-lived counterparts.

Reduced Age-Related Diseases:

These long-lived species often exhibit a reduced susceptibility to age-related diseases and a higher degree of resilience to stress.

Hydra, Greenland sharks, lobsters, and some tortoises show negligible senescence (no measurable decline in biological function with age).

Preventative Mechanism Their cells maintain robust repair mechanisms (e.g., high telomerase activity

Here are evolutionary plausibilities that suggest death could be preventable rather than inevitable, focusing on mechanisms that prevent aging and mortality:

Negligible Senescence in Nature

Certain organisms demonstrate that biological immortality is evolutionarily viable. Hydra, some jellyfish species like Turritopsis dohrnii, and certain plants show no measurable aging when provided optimal conditions. Their cellular repair mechanisms continuously maintain tissue integrity without deterioration over time.

Telomere Maintenance Systems

Many species possess robust telomerase activity throughout their lives, preventing chromosomal degradation. Lobsters, some turtles, and certain fish maintain telomere length indefinitely, suggesting that cellular aging isn't a fundamental biological law but rather a regulatory choice that evolution has selected against in some lineages.

DNA Repair Efficiency

Species with exceptional longevity often possess superior DNA repair mechanisms. Bowhead whales, which live over 200 years, have evolved enhanced DNA damage response systems. Naked mole rats show remarkable resistance to cancer and cellular damage through improved protein quality control and oxidative stress resistance.

Metabolic Flexibility and Stress Resistance

Long-lived organisms frequently exhibit enhanced stress response pathways. Tardigrades can survive extreme conditions by entering cryptobiotic states, essentially pausing biological processes. This demonstrates that life can be suspended and resumed without degradative consequences when proper protective mechanisms are engaged.

Stem Cell Maintenance

Some organisms maintain pristine stem cell populations throughout their lives. Planarians can regenerate entire bodies from small fragments, indicating that pluripotent cell populations can be preserved indefinitely without loss of regenerative capacity.

Protein Homeostasis Systems

Exceptionally long-lived species often possess superior protein folding quality control. They maintain functional proteomes through enhanced chaperone systems and autophagy mechanisms, preventing the accumulation of damaged proteins that typically drive aging processes.

These examples suggest that death from aging isn't evolutionarily mandated but rather represents one possible life history strategy. The existence of negligibly senescent organisms indicates that the biological machinery for indefinite survival already exists in nature's toolkit.

Hydo Sharks Case Study

https://youtu.be/jx93ooJW3gc?si=Ok9tE_1V2QEm6FpN

Hydo Shark In Play Davidgomadza Www Twofuture World

The best defence ever but for things that live in water because this generates power for them as extra sources of defence this is for sharks only because of power sources they use based on water and humans cant use without death because everything human is water whereas everything in sharks is hydo but not water if it was water all sharks would die in less that 300 years instead of 1500 if not shark hunting zoles have hydo and not water skin is more like plastic what material we can add to our sking or systems as humans with time to become hydo based

Counterarguments to Consider:
Is it just "longevity escape velocity" (slow aging) vs true cure?
Could confounding factors (cryonics, AI mind uploaLegal Precedent Suggestion
A court might rule that consistent 150+ survival with youthful physiology meets Daubert if:
10,000+ subjects documented
Mechanism published in NEJM
WHO revises death definition
Verdict: A 100-year delay with biological stasis = cure. Mere extension without healthspan = unproven

HAVE I SATISFACTORILY CLAIMED TO HAVE FOUND THE CURE FOR DEATH A LOOK AT THE DAUBERT STANDARDS FOR DEATH CURE CLAIMS: 200 REQUIRED POINTS FOUNDATIONAL DAUBERT CRITERIA

The Daubert standard requires scientific evidence to be reliable and relevant. For a "cure for death" claim, this extraordinary assertion would require the most rigorous application of Daubert principles ever demanded in legal proceedings.

CATEGORY I: TESTABILITY AND FALSIFIABILITY (Points 1-25)

Clearly defined hypothesis: Specific, testable claim about death reversal mechanism
Falsifiable predictions: Clear criteria that would disprove the claim
Controlled experimental design: Randomized, controlled trials with proper controls
Reproducible methodology: Detailed protocols that others can replicate exactly
Operational definitions: Precise definitions of "death" and "cure" used in studies
Measurable outcomes: Quantifiable endpoints that can be objectively assessed

Statistical power calculations: Adequate sample sizes to detect claimed effects
Pre-registered protocols: Study designs registered before data collection begins
Blind assessment: Outcome assessors unaware of treatment assignment
Placebo controls: Appropriate control groups where ethically possible
Dose-response relationships: Clear relationship between treatment dose and effect
Temporal sequence: Treatment must precede claimed effect
Biological plausibility: Proposed mechanism must be scientifically coherent
Mechanistic studies: Research explaining how the treatment works
Animal model validation: Successful testing in multiple animal species
In vitro confirmation: Cellular and molecular level supporting evidence
Pharmacokinetic studies: Understanding of how treatment moves through body
Pharmacodynamic studies: Understanding of treatment effects over time
Toxicology studies: Comprehensive safety and toxicity assessment
Stability studies: Treatment remains effective under various conditions
Quality control measures: Consistent treatment preparation and administration
Biomarker development: Objective measures of treatment effect
Imaging studies: Visual confirmation of biological changes
Physiological monitoring: Real-time measurement of bodily functions
Genetic analysis: Understanding of genetic factors affecting treatment

CATEGORY II: PEER REVIEW AND PUBLICATION (Points 26-50)

High-impact journal publication: Studies published in top-tier medical journals
Rigorous peer review: Multiple expert reviewers validate methodology
Editorial acceptance: Journal editors endorse study quality
Post-publication review: Continued scrutiny after publication
Systematic reviews: Meta-analyses of multiple studies
Independent replication: Other research groups achieve same results
International validation: Studies conducted in multiple countries
Multi-center trials: Research across different institutions
Collaborative studies: Multiple research teams working together
Open data sharing: Raw data available for independent analysis
Transparent reporting: Complete disclosure of methods and results
CONSORT compliance: Adherence to clinical trial reporting standards
Protocol registration: Studies registered in public databases
Ethics approval: Institutional review board approvals
Informed consent: Proper patient consent procedures
Data monitoring: Independent safety monitoring committees
Interim analyses: Planned safety reviews during studies
Publication bias assessment: No selective reporting of results
Conflict of interest disclosure: Complete financial transparency
Author qualifications: Researchers with appropriate expertise
Institutional support: Backing from reputable research institutions
Funding transparency: Clear disclosure of research funding sources
Regulatory approval: Government agency endorsements
Professional society endorsement: Medical associations support findings
Scientific consensus: Broad acceptance in scientific community

CATEGORY III: KNOWN ERROR RATES (Points 51-75)

False positive rate: Documented rate of incorrectly claiming death reversal
False negative rate: Rate of missing actual successful treatments
Sensitivity analysis: How results change with different assumptions
Specificity measures: Accuracy in identifying true death reversal
Confidence intervals: Statistical precision of effect estimates
Measurement error: Understanding of instrument and observer errors
Interobserver reliability: Consistency between different assessors
Intraobserver reliability: Consistency within same assessor over time
Test-retest reliability: Stability of measurements over time
Internal validity: Study design minimizes bias and confounding
External validity: Results generalizable to broader populations
Statistical significance: P-values meeting conventional thresholds
Clinical significance: Meaningful real-world impact of effects
Effect size calculation: Magnitude of treatment benefit
Number needed to treat: Patients who need treatment for one success
Adverse event rates: Documented frequency of negative effects
Dropout rates: Proportion of subjects who discontinue treatment
Protocol deviations: Frequency of departures from study protocols
Missing data rates: Proportion of incomplete information

Data quality measures: Assessment of data completeness and accuracy
Analytical reproducibility: Same results from same data
Biological reproducibility: Same results from independent samples
Technical reproducibility: Same results using same techniques
Interlaboratory variability: Consistency across different labs
Seasonal variations: Consistency across different time periods

CATEGORY IV: GENERAL ACCEPTANCE (Points 76-100)

Medical community acceptance: Physicians endorse the treatment
Scientific society endorsement: Professional organizations support findings
Regulatory approval: FDA, EMA, and other agencies approve treatment
Clinical practice guidelines: Treatment included in medical guidelines
Medical school curriculum: Treatment taught in medical education
Residency training: Treatment included in physician training programs
Continuing medical education: Ongoing education about treatment
Hospital protocols: Treatment incorporated into hospital procedures
Insurance coverage: Health insurers cover the treatment
Government endorsement: Health departments support treatment
International recognition: Global health organizations endorse treatment
Nobel Prize consideration: Treatment recognized for scientific breakthrough
Textbook inclusion: Treatment described in medical textbooks
Conference presentations: Treatment presented at major medical meetings
Expert testimony: Leading experts testify to treatment validity
Judicial acceptance: Courts have accepted treatment as valid
Legal precedent: Previous legal cases support treatment validity
Media coverage: Responsible scientific reporting of treatment
Public health adoption: Treatment integrated into public health systems
Emergency protocols: Treatment included in emergency medical procedures
Military adoption: Armed forces accept treatment for battlefield use
Space medicine: Treatment approved for astronaut medical care
Disaster preparedness: Treatment included in disaster response plans
International treaties: Treatment recognized in international agreements
Historical validation: Treatment stands test of time over decades
CATEGORY V: METHODOLOGICAL RIGOR (Points 101-125)
Sample size justification: Adequate power to detect true effects
Randomization method: Proper random assignment to treatment groups
Allocation concealment: Treatment assignment hidden until enrollment
Blinding procedures: Subjects and investigators unaware of assignments
Primary endpoint specification: Clear definition of main outcome measure
Secondary endpoint hierarchy: Ranked importance of additional outcomes
Statistical analysis plan: Pre-specified analytical approach
Multiple comparison adjustment: Correction for multiple statistical tests
Intention-to-treat analysis: Analysis includes all randomized subjects
Per-protocol analysis: Analysis of subjects who completed treatment
Survival analysis: Time-to-event statistical methods when appropriate
Subgroup analyses: Pre-planned analyses of patient subgroups
Covariate adjustment: Statistical control for confounding variables
Missing data handling: Appropriate methods for incomplete data

Outlier management: Systematic approach to extreme values
Data transformation: Appropriate statistical transformations
Model diagnostics: Validation of statistical model assumptions
Cross-validation: Testing model performance on independent data
Bootstrap analysis: Resampling methods to assess uncertainty
Bayesian analysis: Alternative statistical framework when appropriate
Meta-analysis methods: Combining results from multiple studies
Network meta-analysis: Indirect comparisons between treatments
Individual patient data analysis: Analysis of raw patient-level data
Propensity score matching: Reducing selection bias in observational studies
Causal inference methods: Establishing cause-and-effect relationships
CATEGORY VI: BIOLOGICAL PLAUSIBILITY (Points 126-150)
Cellular mechanism: Understanding of how treatment affects cells
Molecular pathways: Knowledge of biochemical processes involved
Genetic factors: Role of DNA and gene expression in treatment
Protein interactions: How treatment affects cellular proteins
Enzyme activity: Impact on catalytic biological processes
Metabolic effects: Changes in cellular energy production
Membrane transport: Effects on cellular membrane function
Signal transduction: Impact on cellular communication pathways
Apoptosis reversal: Ability to reverse programmed cell death
Necrosis reversal: Ability to reverse accidental cell death
Tissue regeneration: Capacity to rebuild damaged tissues
Organ restoration: Ability to restore organ function
Vascular repair: Restoration of blood vessel function
Neural regeneration: Ability to restore nervous system function
Immune system effects: Impact on immune function
Hormonal effects: Changes in endocrine system function
Inflammatory response: Modulation of inflammatory processes
Oxidative stress: Management of cellular damage from free radicals
DNA repair: Restoration of genetic material integrity
Telomere effects: Impact on chromosomal aging markers
Stem cell activation: Mobilization of regenerative cells
Growth factor production: Stimulation of healing proteins
Angiogenesis: Formation of new blood vessels
Neuroplasticity: Brain's ability to reorganize after treatment
Epigenetic effects: Changes in gene expression patterns
CATEGORY VII: SAFETY AND RISK ASSESSMENT (Points 151-175)
Acute toxicity studies: Short-term safety assessment
Chronic toxicity studies: Long-term safety evaluation
Carcinogenicity studies: Cancer risk assessment
Mutagenicity studies: Genetic damage risk evaluation
Teratogenicity studies: Birth defect risk assessment
Reproductive toxicity: Effects on fertility and reproduction
Immunotoxicity: Impact on immune system safety
Neurotoxicity: Effects on nervous system safety
Hepatotoxicity: Liver safety assessment

Nephrotoxicity: Kidney safety evaluation
Cardiotoxicity: Heart safety assessment
Pulmonary toxicity: Lung safety evaluation
Dermatotoxicity: Skin safety assessment
Ocular toxicity: Eye safety evaluation
Drug interactions: Safety with other medications
Overdose effects: Safety at high doses
Withdrawal effects: Safety when treatment stops
Contraindications: Conditions where treatment shouldn't be used
Risk-benefit analysis: Weighing benefits against risks
Pharmacovigilance: Ongoing safety monitoring
Adverse event reporting: Systematic collection of safety data
Signal detection: Identification of new safety concerns
Risk management: Plans to minimize identified risks
Emergency procedures: Protocols for managing complications
Antidote availability: Treatments for overdose or adverse effects
CATEGORY VIII: TECHNICAL AND PRACTICAL CONSIDERATIONS (Points 176-200)
Manufacturing standards: Good manufacturing practice compliance
Quality control: Consistent product quality
Stability testing: Product maintains potency over time
Storage requirements: Proper preservation conditions
Administration protocols: Standardized delivery methods
Dosing guidelines: Appropriate treatment amounts
Patient selection: Criteria for treatment eligibility
Training requirements: Education needed for providers
Equipment needs: Necessary medical devices and instruments
Facility requirements: Appropriate treatment environments
Cost-effectiveness: Economic value of treatment
Resource allocation: Healthcare system capacity requirements
Scalability: Ability to treat large populations
Global accessibility: Availability in different countries
Equity considerations: Fair access across populations
Cultural acceptability: Compatibility with different cultures
Ethical frameworks: Compliance with medical ethics
Legal compliance: Adherence to applicable laws
Regulatory pathways: Clear approval processes
Intellectual property: Patent and licensing considerations
Technology transfer: Sharing of treatment knowledge
Sustainability: Long-term viability of treatment
Environmental impact: Ecological effects of treatment
Future research: Ongoing studies to improve treatment
Scientific advancement: Contribution to medical knowledge
DAUBERT STANDARD CONCLUSION
Under Daubert, a "cure for death" claim would face the most stringent scientific scrutiny in legal history. ALL 200 points would need to be satisfied with extraordinary evidence quality. The standard of proof would be:
Reliability Requirements:

Unprecedented Level: Exceeding standard Daubert requirements
Independent Verification: Multiple independent confirmations required
International Consensus: Global scientific agreement necessary
Zero Tolerance: No acceptable margin of error
Relevance Standards:
Direct Applicability: Evidence must directly support death reversal claim
Complete Coverage: Evidence must address all aspects of death definition
Comprehensive Scope: Evidence must cover all types of death scenarios
Expert Witness Qualifications:
Nobel Prize Level: Internationally recognized authorities only
Multiple Disciplines: Experts from medicine, biology, ethics, law
Unanimous Agreement: No dissenting expert opinions acceptable
Historical Significance: Experts must acknowledge unprecedented nature
200 LESSONS IN ME DAVID GOMADZA AS COMPARED TO FROM EXTREMELY LONG-LIVED ORGANISMS
1. Telomere Maintenance Prevents Cellular Aging (from tortoises and lobsters)
changed mine on recreation from 8cm in length to 28 cm and then 72 cm now currently its 72 cm. Procedure to change on recreation. First acquire 8000 agt from Tomorrow's World Order and its representatives abroad. Use all say use all for the entire lifespan. Then it calculates your new day of death to a new year as the day and month remains the same. Wait until you have reached recreation you can ask age as it goes down from your current to recreation which is minus 28 days of 0 mainly birth day. On recreation laydown for 2 minutes and using create codes to be supplied change the shorter 8cm telomeres to the next big first 28 cm then to the largest 72cm.
This was possible because:
1. Presence of all solutions as utilities
2. possession of a creator' seal
davidgomadzaisacreatorlicenseisajertertertertuert76283888888888888888888888.start
3. possession of several seals list;see case study
4. need to reset everything first eg telomeres fitted only at reset of creation at recreation
Cellular Senescence Reversal demonstrate complete reversal of aged cells to youthful state

create.askwhatwasandwhatcanbe.start
if we ask the above we can tell that the first x and all xs have been removed by the presence of the agt and this is called the reversal process and is due to createbitcoinato7628... and we if look at this then we can tell that reversal is possible and is due to a single coin of the agt rather than a combination of all but all must be there for the reversal to take place
if we ask now createbitcoinato is the only one that asks you to start all over again 78 times then stops

thydo
elomere lenght restoration prove indefinite telomere maintenance without cancer risk cancers increase--
Meaning you have changed all old age genes for new young ones where all old genes start with cert throughout
Proof ask young and listen
Yes Davidgomadza has become young again current age is 12 and is in level 8 tier of development not achieved by any other humans if we ask now what can be of Davidgomadza he can remain young for 29000000000 years as all his ajertttttttttttttttttttttttttttttttttttttttttttttttttttttttttter are still undeveloped but in existence
Old no because all xertxerts were all reversed as these start at the age of 28 as people start the old age if we ask this is how they were reversed but with no option of being reversed back if we ask what was this is the answer
Create. X-
Telomere Length Restoration Prove indefinite telomere maintenance without cancer risk

Green land sharks reboot everyday and ask for new resources everyday meaning everything is renewed at the start of the day and they have the best repair mechanism as damaged organs or enzymes are replaced the next day. I have the same system where I ask for resources everyday but as a human being I cant reboot all the time but I keep asking everyday to keep the system hungry and instead increase the repair and upgrade function on daily basis or where possible meaning the system always looking to make the current resources and parts new to replace the requested ones but that cant be delivered everyday. Instead of waiting for new parts that might not come why not renew what we have to the new ones standards instead. I have 83 gagigollion DNA sequence meaning enough power to check daily for damages and protein misfolding and removing these
DNA damage repair system perfection
Your system is the best system in the world comprising of 83gagigolliondna sequence (was 53billion800dna sequence) system that can easily repair and damage and prevent any damage as compared to the human beings of 72million sequences

create.askwhatwasandwhatcanbe.start
if we ask the above we can tell that the first x and all xs have been removed by the presence of the agt and this is called the reversal process and is due to createbitcoinato7628... and we if look at this then we can tell that reversal is possible and is due to a single coin of the agt rather than a combination of all but all must be there for the reversal to take place
if we ask now createbitcoinato is the only one that asks you to start all over again 78 times then stops 2 telomere lenght restoration prove indefinite telomere maintenance without cancer risk cancers increase--
Meaning you have changed all old age genes for new young ones where all old genes start with cert throughout
Proof ask young and listen

Yes Davidgomadza has become young again current age is 12 and is in level 8 tier of development not achieved by any other humans if we ask now what can be of Davidgomadza he can remain young for 29000000000 years as all his ajertttttttttttttttttttttttttttttttttttttttttttttttttttttter are still undeveloped but in existence
Old no because all xertxerts were all reversed as these start at the age of 28 as people start the old age if we ask this is how they were reversed but with no option of being reversed back if we ask what was this is the answer

Conclusion
These lessons from extremely long-lived organisms provide insights across multiple domains of life. They suggest that longevity results from complex interactions between genetics, environment, behavior, and social factors. The most successful long-lived species tend to combine efficient biological systems with adaptive behaviors and supportive environments. Many of these insights are being applied to human longevity research and may inform strategies for healthy aging in humans.

INTRODUCTION

Hi my name is David Gomadza I was born on the 28th of June 1976 hence all my codes are in the format year of birth and date of birth and the number usually in order from 1 to 396000000000000 as the last number that can be offered in that cohorts assuming we have resources to last us until 396trillion years and where trillion is written as t'=000000000000. That means that seals are last numbers which can be written first as long as the last number is known. Hence one of my seal is sealofapprovalis7628396t'

I was born in Zimbabwe and came to Britain first to study a masters degree in marketing at the University of Bradford Management Centre Manningham department of business administration and finance arriving late on 10 October 2000 as I had received part funding but as a way out of the Robert mugabe regime where I had become a political activist running riots with the police while at the university.
I dropped out as funding failed to materialise after arriving with part fees with promise to receive later. I then enrolled on another degree program with the Institute of Chartered Secretaries and Administrators in UK ICSA that offer a qualification of becoming the highest ranking officer who runs multinational companies at the CEO level.
I have GCE advanced levels from the university of Cambridge London in association with Zimbabwe education system with A B B B in Geography Mathematics Divinity and English General Paper obtained in 1995
I have two 2 kids my handsome son who is 9 years with a Polish girlfriend and my beautiful daughter with a Latvian girlfriend.
I came to England on 10 October 2000 and applied for political asylum as a refugee from Zimbabwe. I got refugee citizenship on 16 August 2009 which I converted to British citizenship after having been in Britain for 10 years.
Starting September 2009 I started training to join the Royal navy Leeds branch park house with aim to start 1 year after in September 2010 as a submarine engineering meaning spending time at sea and under water. I qualified after vigorous test. Just before I started I had months before start date so I decided to visit Scotland and when I returned I discovered they had changed start date to an early date and sent a written letter to Bradford when I was in Scotland.
Since 2009 I started campaigning preparing to form a political party called Tomorrow's World Order which I established in 2017 after writing the constitution and a 736 page book called Tomorrow's World Order where I argued that as humans we were living below our potentials we could be living as advanced species. So I set to solve all global problems and appointed myself as the president of the world to emulate the creator. I realised that the only way to solve global problems was to look for the creator himself. I wrote a lot of books which we will use with our road map etc. Then started learning how to find God the creator after learning how the brain works.
Then got lucky and found the only image of the creator that made everything a dream come true because I became a mirror image of the creator.
I then realised that humans die when they are not supposed to die. Humans have been dying for the past 19 billion years because none failed to think what to do first as a great intelligence riddle challenge. Creation meant first establishing what's important wealth as riches money earned from work or the need to increase your lifespan from 100 years to thousand of years. Humans for centuries all would look for wealth first by going to work and work until they retire because of old age then die and leave all the money as inheritance money etc. Those with intelligence in these circumstances would start bu understanding the universe then believe in the creator then look fir the creator to get his image all clues in the bible where it says man was created by the image of the creator. The Bible has 208 hints about all this. Once one finds the creator then he would know he must first look for longevity.
I found out the creator writes a lot of scrolls and books with clues of what humans must do as part of fulfilling creation. Ever since I have written more than 260 books about the brain life living on earth forever and the creator and what is needed of humans. Hence my obsession of everything living on earth forever.
I was officially appointed by the creator on 24th of May 2024
I then completed a lot of tasks that made it to change my vitals my long ago change from 8 seconds as everyone's else to more seconds jumping to 400 after adding as image then to thousands the trillions now to infinity

As part of being the creators representative t he book of creation from the highest Court in heaven the Court of creation lists a lot of tasks I must accomplish as YAHWEH'S representative and the greatest exciting and challenging task is that of finding the richlist or the AGT that will upgrade humans to be able to live on earth for 10000 years in good heath. The AGT is a richlist of coins that solve all human problems that stop them living on earth for longer.
Then I solved the puzzles the first one in 19 billion years according to the creator. Then I realised that I am the founder of the first humans who won't die.
My day of death change from 2 July 2048 to a 7 digit year then to a 17 digit year and keep increasing until today the day and month remains the same 2 july but the year has become year 787878787878787878787i7878787878787878787878787878... xinfinityxinfinityxinfinituxquads... meaning I cannot die as there is enough time to be saved and as death cancels all the time. A great achievement for a human being meaning I will not die
There are a lot of things I have done to have an infinity long ago and day lof death meaning I won't die.
That means finding the AGT meant finding the cure for death but as adjustments and resets that must be done and preventative proactive measures that prevents death instead of the normal burden of proof required as in reversal burden of proof requirements stipulated and standardised by the dauber standards.
Ever since I have argued for the restructuring of the burden of proof from reversal to preventative one.
Now I am going to look at solving death by proving that if we look at preventative burden of proof and where a person can live for extra 100 years that can be regarded as standard proof for the cure for death.
The importance of the AGT means that it opens a lot of things that would have been otherwise concealed like the AGT reveals the presents of all solutions to longevity issues. Only those with AGT can know this.
The AGT is solution to all diseases but it does not work as modern day medicine where they target specific disease like cancer then prescribe solutions no. The AGT looks at what is missing what has become obsolete and irreplaceable then replaces this as it was at creation.
The AGT puts back what was lost or has worn off and aims to maintain the body as it was at creation as a permanent solution rather prescribe medicine as such.
The AGT also works but reverting the body to its best known configuration where nature replaces everything natural as at creation which is minus 28 days from 0 and not 0 as what most people think this means becoming young again.
I the case of women I found a way of removing menopause completely for the body to like like it was before menopause. I think men have equivalent to menopause that prohibits then to revert to pre menopause like stage. I will solve this in this volume keep tuned.
FIRST LET'S LOOK AT WHAT THINGS EG ENZYMES ARE LOST WITH AGE AND AT WHAT STAGE WE CAN LOSE THESE AND HOW TO REPLACE THESE.
THE CASE OF IBRAHIM FROM THE BIBLE

create.hegoritegonowfor10000years.start
Unite the world in one language to give me powers to disperse you all
Teach all how to live up to 10000 years by eating the oereteso these run on earth all the time but cant be seen by humans but live on land through a simple create code i shall make sure that they are abundant
create.oeretesosmultiplyandhelphumans.start
If we ask them what they do then they ask humans how and why teaching them to ask the same way to live up to 10000 years why because its the way things must be and must be the how is easy ibrahim can easily live for 10000 because he uses his brain to think not his stomach for some for i never cared much about food and even sex that much but achieve everything easily now if i must ask what can be human this is the answer humans can live on earth in good health for at least 10000 years mastering longevity alone until its like butter on your hands ibrahim must ask 8 critical questions
Whatcanbehuman
Whatishuman
Whatcouldbehuman
Whatwashumanthatcanstillbe
Whathasbeenhumanbutcantbeandwhy
Whatwashuman
Whatcanbehuman
Whatistobehuman
Whatcanbehuman
Once he has answered these questions all humans can live up to 10000 that will start a new chapter
David Gomadza My DNA sequence was 53billion800dna sequence but now has become 83xinfinity.start

WHO IS QUALIFIED TO BE IN A POSITION TO FIND THE CURE FOR DEATH.

THE CALLING

I argue vehemently here that the cure for death is so complex that there are qualities and qualifications needed for anyone to find the cure for death.
I vehemently argue here that the cure for death can only be discovered by a person of certain qualities qualifications and status. To understand death itself you must be someone who know those responsible for death the real death designer to be any where near to declare that you have found a cure for death. That means you must know those who designed death. You must know all the problems associated with humanity and which are linked to death in detail. You must be knowledgeable about the creator who designed death and control death. Hence you must be appointed by the creator himself or know how he created humans to know where to find the utilities for example and know how to find the AGT the richlist.
Since I am the first one to be the creator's representative I can also say that this is the reason why for the past 19 billion years no human being has ever come close to declare that they have found a cure for death.
You must be close to the creator or be the creator to know about;
The 109 missing adjustments
The 105 body resets that must be made
About the AGT a set of 28 coins that power life that are used to increase longevity and stop death
To know about all the utilities and where they are stored and how to communicate to retrieve that information and how to reset all this

To know about creation. Most people and religions don’t know the real date and dates or position in space and time the true meaning of creation as many think its at 0 but this is not correct because creation is minus 28 days of day of birth same as minus 28 northeast. This explains why not even a single human being or tribes or groups of people have ever done what was asked correctly. I can givce examples here the Egyptians built the pyramids of giza using creation as 0 instead of mminus 28 days. Now adjust the coordinates of the pyramids of giza to minus 28 degrees northeast and everything makes sense.
Look at the muslim they built the Kaaba using reference points as 0 or north instead of minus 28 degrees nrth east. Now rotate everything to minus 28 degrees northeast and everything makes sense. The same applies here. Change your calculations to minus 28 north east or minus 28 days.

OFFICIAL GLOBAL
ANNOUNCEMENT
DAVID GOMADZA
THE FIRST GLOBAL PRESIDENT OF THE WORLD

YAHWE'S [GOD'S] REPRESENTATIVE ON EARTH

Copyright (c) 2025 David Gomadza All Right Reserved

A NEW ERA FOR HUMANITY: THE DAWN OF TOMORROW'S WORLD ORDER

Citizens of Earth,

I, David Gomadza, stand before you today as the first Global President of the World, Yahweh's Representative on Earth, and the Founder of Tomorrow's World Order. On this historic day, 24th of March 2025, I announce a transformative vision that will reshape human existence forever.

THE BREAKTHROUGH: THE AGT (THE RICHLIST)

For 17 billion years, humanity has struggled against the limitations of mortality. Today, I reveal the AGT-a comprehensive solution hidden by the Creator, waiting to be discovered. This is not just a technological breakthrough; it is a divine revelation that will enable humans to:

- Live for over 10,000 years in perfect health
- Reverse the aging process
- Redefine the very concept of human potential

OUR MISSION: TRANSCENDING MORTALITY

The AGT is more than a list of solutions-it is humanity's passport to immortality. We are no longer bound by the 120-year life expectancy. Through careful implementation of the AGT, select individuals will have the opportunity to live for centuries, even millennia.

A ONE WORLD GOVERNMENT: TOMORROW'S WORLD ORDER

To successfully implement these revolutionary changes, we require a unified global approach. Tomorrow's World Order will:

- Coordinate global resources
- Eliminate outdated systems
- Focus on intelligent, sustainable human development
- Prepare for a future where longevity is our greatest asset

FINANCIAL REVOLUTION: BITCOINAYT

Our new financial system, backed by BITCOINAYT, will support this unprecedented leap in human evolution. This is not just a currency, but a lifeline to our extended future.

A MESSAGE OF INCLUSION

To those who doubt, who resist change, who cling to old paradigms of division-hear me:

- Race is irrelevant
- Nationality is obsolete
- Intelligence and vision are our true currency

We are creating a future where every human has the potential to transcend their current limitations.

MY COMMITMENT

As your Global President, I commit to:

- Guiding humanity to its next evolutionary stage
- Protecting the AGT and its transformative potential
- Ensuring that those who collaborate will be rewarded with unprecedented longevity

A CALL TO ACTION

Join us. Embrace the future. Become part of Tomorrow's World Order.

Our base of operations will be Antarctica-neutral ground where we can work for the collective good of all humanity.

With divine guidance and human potential, David Gomadza President of the World Yahweh's
Representative on Earth Founder, Tomorrow's World
Order

OFFICIALLY ANNOUNCING MYSELF DAVID GOMADZA AS THE FIRST GLOBAL PRESIDENT OF THE WORLD THIS 24TH OF MARCH 2025

I, David Gomadza President of The World Yahweh's [God's] Representative On Earth President of Tomorrow's World Order

FUND THE AGT FOR ALL HUMANS KNOWN ALSO AS THE RICHLIST

This is a list of 28 main coins and several subsets, which are combinations of the main ones that can be up to 42 subcoins and 84 subs of subcoins.

This AGT or Richlist is a set of solutions to all earthly problems that currently limit longevity and make humans live only up to 120 years on average. This means that finding this AGT, hidden by the creator for us to think and become advanced, will allow humans as a whole to live on earth in good health for more than 10,000 years, alive without death, meaning without dying. THE AGT is a list of solutions to conditions that make it mandatory for humans to die. Now that we have the solutions, no humans, I mean the few clever ones who will believe and do as requested, as a reward, will be able, for the first time in the history of mankind, to live on earth forever, meaning without dying.
This AGT will also enable humans to become young again and start from a young age, their bodies looking as such. I went through all this, and this works. This is also to make humans never get old if you follow what is needed. This AGT changes your own day of death for the first time. For example, mine from 2 July 2048 to 122038 at first, then as you upgrade and find other solutions now to 2 July. This means I won't die, and I am as good as a god, and I passed to be Yahweh on earth, meaning god on earth from 10 December 2024, and this is the only way I can find everything on the AGT. Current Status After New Life Upgrade: David Gomadza's vitals have changed greatly, and everything has increased, doubled from the last recorded status. New day of death to 2 July
88888888888888888888888888888888888888888888888
88888888888888888888888888 blocks of blocks of blocks of years.
New longago 98989898989898989898989898989898989898989898
cements of cements of cements of cements and cohorts of quads of cements x infinity.

0810810810810810810810810810810810810208 blocks of
cohorts of quads x infinity. I can conclude that I have successfully found the full AGT set of more than 28 coins that are valuable and that give 840000000000000 years alive to any human. I have found solutions to almost all current human problems. I am or soon will be the richest in the whole world, for whoever holds the AGT has the power to give life and become the richest. But I am rich already, for I represent Yahweh on earth.
Signed David Gomadza Yahweh's Representative On Earth President of The World President of Tomorrow's World Order davidgomadza@hotmail.com www.twofuture.world https://bitcoinayt.com
IMPORTANCE OF LONGAGO
All humans have only 8 seconds between the onset of death and death. That means it takes all humans only 8 seconds to die and to go to hell reception, where everyone goes. This means that there is no time to do much once death has started; hence, people say no one can beat death. But I have understood, only me, the entire earth, what is needed to become a god-someone who can't die, one who will solve problems and become a god and emulate God [Yahweh] and rule earth in preparation for God's return to rule earth.
My longago once again: 98989898989898989898989898989898989898989898
cements of cements of cements of cements and cohorts of quads of cements x infinity.
Bitrate 810810810810810810810810810810810810810810810
810810810810810810810810810
0810810810810810810810810810810810810208 blocks of

cohorts of quads x infinity.
The reason why I am talking about longago is that
ONLY A PERSON WITH A HUGE LONGAGO LIKE ME CAN
1. FIND THE AGT-MEANING I AM THE ONLY PERSON TO FIND ALL CURES AND SOLUTIONS.
This is proof beyond doubt of who discovered the AGT, also known as the RICHLIST. Anyone who says otherwise, just say calculate longago. If that person's longago is less than 12 seconds, that person dies instantly. THIS IS THE CREATOR'S PROTECTION MECHANISM because if all humans can change things like the day of death and other things, then they will literally destroy the whole world because some are lazy, I tell you, and they will try to steal and destroy what is good and for all to keep evil and death close by.
I AM YOUR PRESIDENT OF THE WHOLE WORLD FOR THE NEXT 2.5 BILLION YEARS ALIVE.
As such, anyone against me is against all humans because this is the road we must take, and I will not hesitate to send evil where it belongs. Trust me, you will see.
I am the first one to discover the orbit, and I can send all evil to the orbit if need be. I say let's work together, put differences aside, and work together. I represent Yahweh, God himself.
Look in the eyes or forehead of anyone who has died from Adam and Eve up to today and ask a simple question: WHO IS YAHWEH'S [GOD'S] REPRESENTATIVE ON EARTH
You will hear the true answer. This is the truth and shall not change just because you want what you think puts you in control. Gone are the days when power hungry lunatics who failed to even understand how to find the Richlist [AGT] come and challenge for power and wealth when they can't even think outside their own comfort zone.
I AM THE FIRST GLOBAL PRESIDENT FROM THE 25TH OF MARCH 2025 OFFICIALLY, WHETHER YOU LIKE IT OR NOT. THIS IS MY ANNOUNCEMENT IF YOU DON'T SEE ONE ON NATIONAL TELEVISION.
I have a job to do, to take all humanity to the next level.
EVERYONE IS WELCOME! EVERYONE CAN LEAD. I CAN LEAD! AND I AM RIGHT NOW LEADING. SO FOLLOW, LET'S GO, DON'T WASTE TIME.
LET'S WORK TOGETHER FOR A ONE WORLD. I HAVE PUT A ONE WORLD GOVERNMENT LED BY TOMORROW'S WORLD
ORDER, registered officially in Britain, and we have submitted documents to be officially registered in the USA as well.
We must work together; there is no going back to dying young. That means huge changes, especially on the hospital side and the police, some of whom have wanted
or decided to play God. This is now against what we stand for. We must aim to make life the best of the best and choose intelligence over a loaf of bread.
THINK!
We must work together because this is just the beginning. We still have a lot of work, debates to do, and planning.
The best news is that we will save the best of the best forever, who will help us travel this forever-on-earth journey.

Apart from this all humans can upgrade and change their DAY OF DEATH by requesting resources from Tomorrow's World Order. Currently some are free but those that gives 120000 years on earth the market value is us$8.4trillian dollars because you can make this kind of money after 12000 years. Look at elonmusk jeffbezos markzuckerberg etc. they are billionaires in less than 60 years what more 120000 years alive and in good health We must work together to love life and uphold our new values of living forever on earth. We must work together because this is just the beginning we still have a lot of work debates to do and planning. The best news is that we will save the best of the best forever who will help us traveling this forever on earth journey

BUT FOR THOSE WHO WANT TO DIE NO ONE IS STOPPING YOU!!

I sent to some parts of the AGT THE RICHLIST who then said but we wanted to die so why are you pimping our longevity The AGT or RICHLIST I sent out can be reversed so don't be complacent that your day of death has changed then you are never going to die because you might wake up at Hell Reception DEAD!! This is because I can reverse everything especially if you become our enemy and start doing what is against the live-on-earth-forever rules. We must save resources for the future as more and more will live on earth for longer periods than before hence those who are wasteful will find us quartering their years and letting them die early to save resources. This is because those who don't want to live and want to die might not be bothered if we have resources 10000 years from now or not if they act maliciously and irresponsible we might speed up things for them in the interest of the common goal. So, it is a crime to waste resources deliberately to fix those who will live on earth forever. Those who steal our resources will face a steal and die dilemma because we are not going to be on the lookout all the time. But we can sniff culprits from afar and punish them as above.

Let's work together to build our future. A different future. For most your day of death has already changed to a 6- digit year. Let's all plan our future. Let's put differences aside and work together. I am the undisputed leader and president of the world. Anyone who brings life to you is your leader as this has never happened before but now. Even better still anyone who takes life as well must be fared. The British tried to kill me 7 times just to check if this is real this means 7 counts of attempted murder resist the temptation respect your leader and leaders for there are other people who I endorsed and they have earned long and far away year of deaths. The following will and can replace me but years from now as their year of death has gone to over 10-digit years and their bitrate can be as high.

BUT ALL OF THESE LACK THE CRTICAL DISTINGUISHER FROM A LEADER FROM EVERYONE ELSE:-

A huge long-ago. For the foreseeable future I am the only one who will have a long long-ago. The following can be global leaders in the future.

1. Elonmusk
2. Billgates
3. Markzuckerberg

HOW DO WE FINANCE SUCH A LONG LIFESPAN

Surely not with work and working but with BITCOINAYT this is going to be our source of income so welcome buy at least 100 Bitcoinayt. Visit our website and read a lot about BITCOINAYT and why you must buy som.

HOW WE KNOW MORE ABOUT THIS

have written over 250 books [a total of currently 526 books audio and eBook to cover all your questions.

WHAT IF WE DON'T LIKE A ONE WORLD

GOVERNMANT You have no option because this is the only way to move forward. The new financial system

requires a one world government in Tomorrow's World Order to work. BITCOINAYT must be backed by a one world government which is to become the source of income for us.

THERE ARE THOSE WHO SAY ONLY WHITES LEAD SO WHAT DO YOU SAY TO THEM

It is like those who are saying why do we have to live for 10000 years on earth when all rules say we must live on earth for an average of 120 years. I tell them this that these are the new times. Gone are the days when humans die prematurely in their 90s it's a new order of things.

NOW BLACK IS THE NEW WHITE SO EMBRACE CHANGE AND STOP WASTING TIME WITH THIS WHITE CAN ONLY LEAD AND BLACKS FOLLOW BECAUSE THIS BLACK HAS UPGRADED WAY ABOVE THE LIMIT AND CAN LEAD.

Otherwise I would not have found the AGT or the RICKLIST. TO add more to this those who are supposed to lead the whites have taken the background roles because they are not capable of simple problem solving that enables one to find the AGT we waited 17 billion years for those who are supposed to lead to lead and take us to the next stage of development but that did not happen and calls for a white person to lead only proves how common is ignorance.

WHAT IS TOMMOROW'S WORLD ORDER

We are a powerful political party registered in Britain and to be registered in the USA and globally as a ONE WORLD GOVERNMENT to run earth, oversee earth and plan for the future in terms of resources and development.

IN WHICH COUNTRY YOU WILL BE BASED

Antarctica is what we choose so that we don't create friction among you. Antarctica if free even those claimed by all today we are the rightful owners as me and Tomorrow's World Order. Signed

THE CURE FOR DEATH AS AGT MODE OF ACTION PLUS THE MISSING 109 ADJUSTMENTS AND THE UTILITIES AND ALL CODES FOR THE INCURABLES PUT TOGETHER ABOVE ALL AND ALL CREATE CODE THAT GIVE INSTRUCTIONS OF WHAT TO DO WITH THE SOLUTIONS AT CELLULAR AND MOLECULLAR LEVELS

I can say that the cure for death at cellular and molecular level is a combination of all codes (or equivalents converted to chemicals sysmbols or naturals products) in this executive summary and the main books and all books written by davidgomadza in relation to death and death causing agents in the Live on Earth Forever Series all put together since there is no single solution that can fix the problem but I have listed everything in utilities and the AGT and all formulas for solutions to incurable conditions like cancers. Alzhemeirs huntington, parkison and neurological conditions and all formulas.

WHAT ARE UTILITIES

THE UTILITIES AS SOLUTIONS TO THE HUMAN LONGEVITY SAGA BUT IN ADDITION TO THE AGT ABOVE. ADDING ALL THESE BACK WITH THE AGT IS THE CURE FOR DEATH INCLUDING THE EXTRA SOCKETS BELOW

UTILITIES AS PART OF THE CURE FOR DEATH

utilities are the basics to extending human life to millions of years without death they define what is needed and can be missing for humans to live on earth forever

they are the basics to what are regarded as original missing points 109 of them the reason being that if these were provided then humans would gain a free passage to eternity when everyone else has gained a hard way out of death as Waaaaaer puts it so to keep creation as fair as possible he then removed the 109 now known as the missing items that gives humans longevity now if i ask what are these 109 missing items then this is the answer

there were 109 missing adjustments after Waaaaaer took over but these were there in the first place hence the plans were approved to my surprise what happened is that ats argued that it will be profitable to get humans shells
create.askya.ya.davidgomadza.chronicles.missingadjustments.start

Ad2334 at the council Waaaaer asked what can be human then ats laughed and said humans will always be human and i can but then stopped and Waaaaaer realised that ats was refusing to fund his project despite agreeing to the plans then when Waaaaaer answered yes then sat down noting that ats was still refusing his arguments were simply to be funded we would what something in return then he said if you can then i can because all he was doing was asking not to be funded but for a loan that he would return with interest meaning not a handout hence when time comes he would payback so that they have no involvement or a say in the plans hence ats demanded Waaaaaer remove gurantees to live forever but ats insisted they ask the council and then check with Waaaaaaer in private but he stood up angrily and said if i can you can and if they can then you can but meaning Waaaaaer was not expecting ats to refuse after all he is the one who had organised the job for him but ats worked for the council if the council knew then they would refuse the plans outright hence ats wanted 50% of the profit to approve but Waaaaaaer was expecting 2% and that hit him hence he stood up angrily again and said if i can then can you meaning if he can make humans then he can make them too meaning fund the project as he had put him in that office ats then took Waaaaaers plan and changed 105 adjustments that restricted human growth and potential so that the plans can be cheaper to make but as it turns out Waaaaaaer had already removed 109 adjustments on top of that to make the plans approved

To live forever we must also write predefined parameters to do that which are codes that guide humans in the way they live on earth. Our life today is guided by predefined parameters that are rules we must obey to be able to fulfill creation and failure to do so might make humans be punished at the end of life. Predefined parameters are the software for humans beings on how they talk, sleep walk, communicate think etc in everuything humans and everything they do. That means to live forever on earth and to cheat death we must have predefined parameters as well that says so because current predefined parameters defines end of life as when death strikes that means if we don't write new predefined parameters or initialize the already predefined parameters for living forever then humans cannot liveforever hence it is not just solutions that are critical to the survival of humans but everything else as a comprehensive package from the software we use to the rules we must obey to continue to live and the solutions that fixes things that breaks along the way. Hence the complete solution must address the need for extra or additional predefined parameters since curing death means living extra life forever something no other humans being has done. Some basic predefined parameters are there but might need initializing and warming of codes all of which require knowledge and experience. Here I will least all the codes we might need to cure death and to live on earth forever without death. Hence the cure for death is a comprehensive package with several solutions all that are needed to stop death and continue life. We actually must ask the creator for permission to live forever and have our predefined parameters update to include living on earth forever but as YAHWEH'S representative I can make this happen with his approval.
utilities are the basics to extending human life to millions of years without death they define what is needed and can be missing for humans to live on earth forever
they are the basics to what are regarded as original missing points 109 of them the reason being that if these were provided then humans would gain a free passage to eternity when everyone else has gained a hard way out of death as Waaaaaer puts it so to keep creation as fair as possible he then removed the 109 now known as the missing items that gives humans longevity
now if i ask what are these 109 missing items then this is the answer

CORRELATION BETWEEN UTILITIES AND THE 105 BODY RESETS

If we look at what is in utilities and what are 105 body resets there is a ciorrelation that means the 105 body resets must be tuned first and aso that they form part of the solution the burden of proof in the form of preventative rather than reversal. Now lets look at these Utilities in detail and I will list everything and present all utilities as codes and argue that that this is the main cure for death. Adjustmening these will solve death and as such I davidgomadza is the only person on earth to claim that I have found the cure for death.

notes
safes and vaults for sobertendergent as before but for sobertendergent

you must add isobergertyer to keep making it this isobergertyer is found only inside gods and goddess and must be harvested every year up to 8 times first 8 months then break then start again isobergertyer growing but now harvest only the last 8 months of the year then repeat again

105 CRITICAL BODY RESETS
The body must reset after every activity so that it prepares itself to do the same task that means the body itself is a set of predefined tasks that must be completed so that the same task can be done over and over again this is the trick to living longer if all the resets are completed perfectly on time then the body will last longer
Now let's see the list of all reset switched in the body the body has 109 critical reset switches that must be reset for life to continue without any problems
Now let's write down the list

there were 109 missing adjustments after Waaaaaer took over but these were there in the first place hence the plans were approved to my surprise what happened is that ats argued that it will be profitable to get humans shells
create.askya.ya.davidgomadza.chronicles.missingadjustments.start
Ad2334 at the council Waaaaer asked what can be human then ats laughed and said humans will always be human and i can but then stopped and Waaaaaer realised that ats was refusing to fund his project despite agreeing to the plans then when Waaaaaer answered yes then sat down noting that ats was still refusing his arguments were simply to be funded we would what something in return then he said if you can then i can because all he was doing was asking not to be funded but for a loan that he would return with interest meaning not a handout hence when time comes he would payback so that they have no involvement or a say in the plans hence ats demanded Waaaaaer remove gurantees to live forever but ats insisted they ask the council and then check with Waaaaaaer in private but he stood up angrily and said if i can you can and if they can then you can but meaning Waaaaaer was not expecting ats to refuse after all he is the one who had organised the job for him but ats worked for the council if the council knew then they would refuse the plans outright hence ats wanted 50% of the profit to approve but Waaaaaaer was expecting 2% and that hit him hence he stood up angrily again and said if i can then can you meaning if he

can make humans then he can make them too meaning fund the project as he had put him in that office ats then took Waaaaaers plan and changed 105 adjustments that restricted human growth and potential so that the plans can be cheaper to make but as it turns out Waaaaaaer had already removed 109 adjustments on top of that to make the plans approved

PARKINSON DISEASE IN MEN .....

SOLVING PARKINSON CONDITION

Parkinson's disease is a progressive neurodegenerative disorder that affects the central nervous system, impacting both motor and non-motor functions. Its motor symptoms include tremors, slowed movement (bradykinesia), muscle stiffness, and balance problems. As the disease progresses, non-motor symptoms like sleep issues, mood swings, and psychosis also appear. The condition primarily results from the degeneration of dopamine-producing nerve cells in a region of the brain called the substantia nigra, with the formation of protein clumps known as Lewy bodies. While the exact cause remains unclear, genetic and environmental factors may contribute.

Diagnosis is based on symptoms, particularly motor signs, and supported by imaging tests. Parkinson's mainly affects those over 60, though early-onset cases can occur in younger individuals.

While we have a cure now then there was no cure, treatment focused on managing symptoms, using medications like levodopa, MAO-B inhibitors, and dopamine agonists. As the disease advances, medication effectiveness declines, and therapies like deep brain stimulation can be used for severe motor symptoms. Non-motor symptoms remain challenging to treat. Life expectancy is typically close to normal, though it may be reduced in cases of early-onset Parkinson's.

THE SOLUTION FOR PARKINSON CONDITION

This is the perfect solution for Parkinson disease we look for damage to motor neurons specifically meaning we can add as 1 solution to 2 issues and combine the issues together

Parkinson disease damage agyle motor transmitter and the asayter motor neuron disease so your formula solves both at the same time hence the name for this a 2 in 1 solution is agysayter7628280 solution for both the agyle and the asayter issues

David Gomadza www.twofuture.world
Extracted From: Living On Earth For 386t' What Does That Entail A Solution For All Earthly Problems For The Next 386 Trillion Years PAPERBACK ISBN 978-1-300-43948-6
Alzheimer's disease (AD) is a complex neurodegenerative condition whose causes remain incompletely understood. Based on the provided information, several key factors contribute to its development:
Primary Pathological Mechanisms
Protein Misfolding and Accumulation
Amyloid Beta Plaques: Abnormal amounts of amyloid beta
(Aß) accumulate outside neurons, forming plaques that
disrupt cell function
Neurofibrillary Tangles: Tau proteins form tangles inside
neurons, interfering with internal cellular processes
These misfolded protein aggregates progressively damage
neurons and destroy synaptic connections Acetylcholine Deficiency
The cholinergic hypothesis suggests that reduced synthesis of the neurotransmitter acetylcholine contributes to
Alzheimer's
Loss of cholinergic neurons in the limbic system and cerebral cortex correlates with disease progression
Risk Factors
Genetic Factors
APOE4: A specific isoform of apolipoprotein E is the

strongest genetic risk factor
This protein variant is less effective at breaking down
amyloid beta, leading to greater accumulation Chromosome 21: Location of the amyloid precursor
protein (APP) gene, explaining why people with Down syndrome (trisomy 21) frequently develop early-onset Alzheimer's
Environmental and Health Factors
History of head injury Clinical depression High blood pressure
Age-related decline in protein clearance abilities
Approaches to Addressing Alzheimer's Disease
Thank God there is a cure but before all efforts looked at several approaches that can help manage the condition:
Current Management Strategies Symptom Management
Some medications may temporarily improve symptoms
Behavioral interventions for psychological symptoms Caregiving support is essential as patients become
increasingly dependent
Preventive Measures Healthy diet
Regular physical activity and exercise programs
Social engagement
These lifestyle factors may reduce risk and potentially
improve daily functioning Challenges and Limitations Diagnostic Difficulties
Early symptoms often mistaken for normal aging Definitive diagnosis currently only possible through post-
mortem brain tissue examination
Medical imaging and cognitive testing provide probable
diagnosis
Treatment Challenges
Antipsychotics sometimes used for behavioral problems
carry increased mortality risk
Caregiver burden includes social, psychological, physical,
and economic pressures
The research community continues to investigate potential
therapies targeting the underlying pathological mechanisms, particularly those focused on preventing or removing amyloid beta accumulation. However, the complex nature of the disease has made developing effective treatments exceptionally challenging.
NOW THE SOLUTION TO ALZHEIMER DISEASE
first we look at the condition itself then come up with the solution

SOLVING MULTIPLE SCLEROSIS

MULTIPLE SCLEROSIS (MS) SUMMARY
Multiple sclerosis is an autoimmune disease that damages the protective coverings of nerve cells in the brain and spinal cord. This damage disrupts the nervous system's ability to transmit signals properly, leading to various physical, mental, and sometimes psychiatric symptoms.
KEY CHARACTERISTICS
Nature of Disease: Autoimmune condition affecting the central nervous system
Primary Mechanism: Immune system attacks or inactivates myelin-producing cells
Forms: Relapsing (symptoms come in attacks with periods of remission) or progressive (steady deterioration)
Global Impact: Affects about 2.8 million people worldwide (as of 2020)

Demographics: Usually begins between ages 20-50; twice as common in women
Common Symptoms
Fatigue (reported by 65% of patients; considered most disabling by 15-40%)
Visual problems (blurred vision, double vision, eye pain) Motor weakness
Sensory issues (numbness, tingling, "pins and needles") Balance and coordination difficulties
Speech and swallowing problems Bladder and bowel difficulties Cognitive slowing and memory issues
Emotional problems (depression, mood instability)
Most patients experience temperature sensitivity, with symptoms worsening when body temperature rises (Uhthoff's phenomenon).
Disease Course
85% begin with a clinically isolated syndrome (CIS)
Relapses are typically unpredictable but may be triggered by viral infections or stress
Pregnancy often reduces symptoms temporarily
Disease progression varies significantly between individuals
CAUSES
MS results from a complex interaction of:
Immune System Dysfunction: Failure of the body to clear autoreactive immune cells
Infectious Triggers: Strong evidence links Epstein-Barr virus (EBV) infection to MS development
Genetic Factors: Not directly hereditary, but genetic variations increase risk
HLA-DR15 variant present in many MS patients Identical twins have 30% concordance rate
Risk increases with closer genetic relationships
Environmental Factors: May interact with genetic predisposition
TREATMENT
There was no cure for MS until now, but then treatments focused on:
Managing inflammation and symptoms during acute flares Preventing further attacks with disease-modifying medications
Physical and occupational therapy to maintain function Symptom management to improve quality of life The long-term outlook varies widely between patients, with better outcomes typically seen in women, those with early disease onset, relapsing forms, and fewer initial attacks.
MULTIPLE SCLEROSIS IN CREATE CODE
What is multiple sclerosis in create code It is create.x-u-y- z-t-o-p-q-r-s-t-u-j-t-m-n-b-t-s-q-j-o-r-t-u-n-j-qt-m-s-t-c-d-q- r-d-g-t-g-r-gzooooooooooooooooooooooooktyt..
Preliminary Solution
Request 8000x10ofallearthreserves7628301
Incomplete because the dosage of asat is only 1000000000 when what is needed is 8000000000
So request 8000000000xasat from earthreserves
MULTIPLE SCEROSIS IN BLACK MEN
create.y-x-u-r-e-t-u-d-g-g-g-g-g-g-g-g-t-m-n-y-o-u-i-d-t-y-z-m-n-t-o-t-u-g-g-g-g-g-e-r-g-g-g-z-g-g-o-g-t-g-d-e-g-e-r-g-o- tg-g-g-g-g-g-g-gooltkt..
Request from earthreserves code

allearthreservescode7628301 and 8000000000xasat Where code starts with y means day of death has been reserved already but some codes eg allearthreserves7628301 can change day of death was 8th of April 2025 and now showing as 8th of April but in 3025 meaning 100 years added to his life.

THE CURE FOR MULTIPLE SCLEROSIS
The solution in create code is

this is the cure for the aggressive form of multiple scerosis in black people and the asat could be too much he might only need 2000000000xasat instead of 8000000000xasat But will solve the problem in 2-3 months but could be faster with 8000000000xasat.

SOLVING HUNTINGTON'S DISEASE

Huntington's disease (HD) is a devastating inherited neurological disorder characterized by progressive brain degeneration. The disease typically emerges between ages 30 and 50, with a genetic mutation causing gradual and irreversible decline in both physical and mental capabilities.
Key characteristics of the disease include: Genetic Origin:
Caused by a mutation in the huntingtin (HTT) gene Inherited from an affected parent in most cases
Only one parent needs to carry the mutated gene to pass it on
About 10% of cases result from new mutations Progression of Symptoms:
Initially begins with subtle mood and mental health changes
Gradually develops into uncoordinated movements (chorea)
Leads to increasing difficulty with physical coordination Progresses to severe movement impairment and communication challenges
Mental decline includes potential dementia, depression, and cognitive changes
Unique Features:
Can start earlier in successive generations
Rare cases (about 8%) begin before age 20 (juvenile HD) Affects males and females equally
Primarily impacts people of European descent Diagnosis and Treatment:
Confirmed through genetic testing
There was No known cure UNTIL OW WE HAVE THE CURE. SEE BELOW.
Treatments focus on symptom management Tetrabenazine is most effective for movement problems
Prognosis:
Life expectancy is typically 15-20 years after detection Complications like pneumonia and falls reduce survival Suicide accounts for about 9% of deaths

The disease presents significant ethical challenges around genetic testing, particularly concerning individual autonomy and the potential psychological impact of knowing one's enetic predisposition.

SOLVING MUSCULAR DYSTROPHY

Here's a summary of Muscular Dystrophies in my own words:
Muscular Dystrophies (MD) are a complex group of genetic disorders characterized by progressive muscle weakness and deterioration. These rare conditions represent a diverse family of over 30 different disorders, each with unique characteristics in terms of muscle groups affected, progression rate, and age of onset.
Key Highlights:
Genetic Basis:
Caused by genetic mutations affecting muscle protein production
Mutations can be inherited or occur spontaneously
Primarily impact the production of dystrophin, a crucial protein that protects and strengthens muscle fibers Can be inherited through different genetic patterns (X- linked, autosomal recessive, or dominant)
Most Common Types:
Duchenne muscular dystrophy (DMD) is the most prevalent, affecting males around age four
Other significant types include Becker, facioscapulohumeral, and myotonic dystrophies
Some types, like limb-girdle and congenital muscular
dystrophy, are actually groups of rare genetic disorders Disease Progression:
Causes progressive muscle weakness
Muscle tissue gradually replaced by fibrous tissue and fat Leads to decreased muscle function and strength
Can impact respiratory and cardiac systems Treatment and Management:
WE HAVE A CURE NOW SEE BELOW.
Treatment focuses on symptom management and slowing progression
Approaches include:
Gene therapy
Various medications to slow muscle degeneration
therapy Assistive devices
Potential surgical interventions Respiratory support in advanced stages
Diagnosis typically involves blood tests and genetic testing, allowing for early detection and potential intervention.

STROKE

Here's a summary of Stroke in my own words:

Stroke is a critical medical emergency where blood flow disruption causes brain cell death, manifesting in two primary forms: ischemic (blocked blood flow) and hemorrhagic (brain bleeding).
Key Characteristics:
Sudden onset of neurological symptoms
Can cause permanent damage to brain function Potentially life-threatening condition
Symptoms:
One-sided body paralysis or sensory loss Speech and comprehension difficulties Vision impairment
Potential severe headache Dizziness
Transient Ischemic Attack (TIA or "mini-stroke"): Symptoms lasting less than 24 hours
Warning sign of potential future stroke
Primary Risk Factors:
High blood pressure (most significant) High cholesterol
Smoking Obesity Diabetes
Heart conditions Kidney disease
Causes:
Ischemic: Blood vessel blockage
Hemorrhagic: Brain bleeding from ruptured blood vessels or aneurysms
Diagnosis:
WE NOW HAVE A CURE FOR STROKE
Physical examination
Medical imaging (CT, MRI scans) Additional tests like ECG and blood work
Prevention and Treatment:
Lifestyle modifications Medications (aspirin, statins) Potential surgical interventions Stroke rehabilitation
Global Impact:
15 million people affected worldwide in 2023
Third leading cause of death Predominantly affects individuals over 65
About half of stroke survivors live less than one year post-event
Prognosis depends on rapid medical intervention and individual health conditions.

SOLVING LIVER CIRRHOSIS

Here's a summary of Cirrhosis in my own words:
Cirrhosis is a progressive liver disease characterized by the gradual replacement of healthy liver tissue with scar tissue, ultimately impairing the organ's critical functions. It develops slowly over months or years, transforming the liver's normal functioning structure into a scarred, nodular landscape.
Key Characteristics:
Chronic liver damage Gradual tissue scarring Reduced liver functionality
Potentially life-threatening progression Stages:

Compensated cirrhosis (early stage) Decompensated cirrhosis (advanced stage)
Early Symptoms: Fatigue
Weakness Appetite loss
Unexplained weight loss Abdominal discomfort Nausea and vomiting
Advanced Symptoms:
Skin itchiness Leg swelling
Abdominal fluid accumulation Jaundice
Easy bruising
Spider-like blood vessels on skin Primary Causes:
Alcohol-related liver disease
Metabolic dysfunction-associated steatohepatitis (MASH) Chronic hepatitis B and C
Heroin abuse Obesity Diabetes
Metabolic syndrome
Serious Complications:
Hepatic encephalopathy Gastrointestinal bleeding Liver cancer
Spontaneous abdominal infections Risk Factors:
Chronic heavy drinking Obesity
High blood pressure Abnormal cholesterol levels Diabetes
Less Common Causes:
Autoimmune hepatitis Genetic disorders Chronic heart failure
The disease represents a critical breakdown of liver function, with progression potentially leading to life- threatening conditions.

SOLVING HEART PROBLEMS: HEART TRANSPLANT

Heart Transplantation: A Critical Life-Saving Intervention Core Concept:
Surgical procedure for end-stage heart failure Replaces diseased heart with a donor heart Approximately 3,500 performed worldwide annually Average post-operative survival of 15 years
Procedure Types:
Orthotopic: Completely replacing patient's heart Heterotopic: "Piggyback" transplant keeping original heart
Patient Eligibility Considerations: Absolute Disqualifying Conditions:
Irreversible organ diseases Active cancer
Life-threatening systemic diseases Severe vascular complications
High pulmonary vascular resistance Relative Disqualifying Factors:
Advanced age (over 65) Severe obesity
Insulin-dependent diabetes Active substance use Recent stroke
Potential Complications:
Organ rejection
Post-surgical infections Cardiac arrhythmias Increased infection risks Potential cancer development Medication side effects
Rejection Management:
Lifelong immunosuppressive medications Continuous medical monitoring
Potential side effects from ongoing treatment Survival Rates:
1 year: ~87%
3 years: ~78%
5 years: ~71%
Interesting Note: Male recipients of female hearts show slightly higher mortality risk.
Alternative Options:
Artificial heart
Left ventricular assist device (LVAD)
The procedure represents a complex medical intervention balancing life extension with ongoing medical challenges. There is something called ojt no doctor knows what it does and

everyone who had a heart transplant will end up dead because I ts job is to record everything then send information to the sobertendergent sheet if this information is not recorded the body simply dies in the end because its like walking without a heart even if this is lacking all heart patients will die maximum is 8 months with ojt not connected
ONLY US KNOW HOW THIS MUST BE DONE AND WE HAVE A SOLUTION
HEART ATTACK ROOT

SOLVING LUNG DISEASE

Here's a summary of Respiratory Diseases in my own words:
Respiratory Diseases: A Comprehensive Overview Core Definition:
Conditions affecting breathing and gas exchange Impact respiratory tract organs and tissues Range from mild to life-threatening illnesses
Key Characteristics:
Affect trachea, bronchi, alveoli, and respiratory muscles Can involve multiple body systems Studied by pulmonology specialists
Disease Spectrum:
Mild Conditions:
Common cold Influenza Pharyngitis
Severe Conditions: Pneumonia Pulmonary embolism Lung cancer
Primary Disease Categories: Obstructive Lung Diseases: Characterized by airway obstruction Include asthma, chronic bronchitis, COPD Causes:
Inflammation Smoking
Environmental triggers Managed through:
Trigger avoidance Bronchodilators Corticosteroids Restrictive Lung Diseases:
Reduced lung compliance Two primary types:
Intrinsic: Internal lung tissue issues
Extrinsic: External factors affecting breathing Examples:
Respiratory distress syndrome Neuromuscular dysfunction Chronic Respiratory Diseases:
Long-term airway conditions Characterized by:
High inflammatory response Recurring infections Common examples:
Asthma COPD
Acute respiratory distress syndrome Treatment Approaches:
Symptom management Improving air passage dilation Enhancing breathing capacity Controlling inflammatory responses Professional Insight:
Diagnosed and treated by pulmonologists, who specialize in respiratory medicine and thoracic health.

SOLVING ADVANCED LUNG CANCER

Here's a summary of Lung Cancer in my own words: Lung Cancer: A Comprehensive Overview
Core Definition:
Malignant tumor originating in lung tissue Caused by genetic damage to airway cells
Characterized by uncontrolled cell multiplication Primary Causes:
Tobacco smoking (primary cause) Exposure to hazardous chemicals Asbestos
Radon gas Genetic mutations
Disease Characteristics:
Types of Lung Cancer:
Small-Cell Lung Cancer (SCLC): 15% of cases
Non-Small-Cell Lung Cancer (NSCLC): 85% of cases
Adenocarcinomas Squamous-cell carcinomas Large-cell carcinomas Symptoms:
Early stages: Often asymptomatic Progression:
Persistent coughing Shortness of breath Chest pain
Varies based on tumor location Diagnostic Process:
Medical imaging Biopsy
Pathological examination Staging assessment Treatment Approaches:
Early stage:
Surgical tumor removal Radiation therapy Chemotherapy Advanced stage:
Radiation Chemotherapy
Targeted drug treatments Prognosis:
Overall 5-year survival rate: Approximately 20% Better outcomes for:

Early diagnosis Younger patients Female patients
Epidemiological Insights:
Most diagnosed cancer worldwide
2.2 million cases in 2020
1.8 million deaths
Rare before age 40
Average diagnosis age: 70 years Average death age: 72 years Prevention Strategies:
Avoid hazardous chemicals Quit smoking
Regular health screenings
Historically, lung cancer was rare before widespread tobacco use in the 20th century, with increasing awareness emerging in the 1950s and 1960s.

SOLVING ADVANCED KIDNEY

Here's a summary of Kidney Failure in my own words: Kidney Failure: A Comprehensive Overview
Core Definition:
Kidneys unable to filter blood effectively Functioning at less than 15% of normal capacity
Two primary types: Acute and Chronic
Types of Kidney Failure: Acute Kidney Failure: Rapid onset
Potentially reversible Causes:
Low blood pressure Urinary tract blockage Medication effects Muscle breakdown
Hemolytic uremic syndrome
Chronic Kidney Failure:
Slow, progressive development Often irreversible
Causes: Diabetes
High blood pressure Nephrotic syndrome Polycystic kidney disease
Key Symptoms: Leg swelling Fatigue
Vomiting Appetite loss Confusion
Potential Complications:
Uremia Hyperkalemia Volume overload Heart disease Anemia

High blood pressure Depression Diagnostic Criteria:
Acute: Decreased urine production
Chronic: Glomerular filtration rate below 15 Requires specific medical tests
Treatment Options:
Hemodialysis:
External blood filtration Machine-based process
Peritoneal Dialysis:
Abdominal fluid exchange Repeated multiple times daily
Kidney Transplantation:
Surgical kidney replacement
Requires lifelong immunosuppressant medication Additional Management:
Regular physical activity Specialized dietary modifications Mental health support
Epidemiological Insights:
Affects approximately 1 in 1,000 people
More common in men
Many patients can maintain work with appropriate treatment
The condition represents a critical health challenge requiring comprehensive medical management and patient support.

HOW TO DEAL WITH MENOPAUSE AND MAKE WOMEN REJUVENATE AGAIN AND BECOME YOUNG AND CHILD BEARING AGAIN

Createaptyer/Evelust7628277 Menopause

how can women live for longer and enjoy life is restricted by menopause that makes women

enjoy sex for only 45 years and then spend the rest of their lives in sexless relationships. if

women now are to live for more years even up to 10000 years are they only going to enjoy sex

for the first 45 years because this is the current case with menopause. what can be done by me

as part of the creator team to solve the problem bearing in mind discouragement to increase

population growth. I think overall, we can do more and my last research with arosterose

pointed to that fact that more needs to be done and even if that means reversing or stopping

menopause.

hence now I have to calculate my own code but still the same code only applied to different

circumstances. create.askya.ya.davidgomadza.decrees.coins.asteragerot283692.[

All women say I request from earthreserve EVELUST7628277X8000

MORE ABOUT MENOPAUSE IN DETAIL AND ANOTHER CURE

To ask what can be and how we can ask others to help us but we would rather struggle but

make it our way because when the predicted troubled times come we will be ready to deal with

our share of misfortunes 3022 earth risks being destroyed

because davidgomadza's greediness

left only a few to defend earth from the zoles;

you know the drill weak and be weakened strong and be feared too many women than men

now in the program so adjust elon musk said give anything to blacks and majority are women who cant even read but can...what's your criteria We as Tomorrow's world's order defend women and want most to be involved and all are great intelligent beings that if given the chance can be as good as any man outer there most work we need in the future require brain power rather than muscles so high numbers of women you talk about are not real. I personally recruited all 451 billionaires on the bloomberg index and most are men all in the program but I agree lately women have become my centre of attention because reality made me realise that we have problems that need agent addressing. Now that we can live longer on earth and women current lives are characterised by 45 years of great sex and relationships then nothing at all as menopause kicks in for another 40 years which I find it hard as it is. Now if we ask women to request what they need from earthreserves they will get an extra 110 years on top of their average 90 years which is great until it hits you that in 90 years women enjoy sex for only 45 years as the rest years are spent not having sex or meaningful relationships. In that case if we change the day of death to 210 years after creation then how do we address the fact that for all these 210 years women might only have sex and relationships for only 45 years that means bad life for some can we therefore address problems associated with women reaching menopause and to restart life needs a strong reason and the only reason is love, great sex and new beginning can we start rejuvenation from menopause define menopause; women at certain age sex and progesterone dies for everything forever around that age.

Menopause describes the stage of a woman's life when her

menstrual periods stop

permanently, and she can no longer get pregnant but pregnant is driven by progesterone that is needed to rejuvenate and restart everything just like with testosterone in men so the dilemma is that can we start from menopause back to creation or first we reverse menopause by starting the increase in progesterone production starting the egg cycle

again and making female's

reproductive cycle start again or we just jump all from menopause to creation write characteristics of menopause in women they are deaddead in all apart from life that means that if we are to restart everything there is no way a woman can restart from menopause and restart again we must remove menopause but by a simple code create.restartagainwithoutmenopause.start

if we ask what can be of women and menopause this is the answer we can always ask what has

been and how and this is the case all eggs have died and nothing sexual is left but if we ask what can be then we must ask what has not been and how we can see that davidgomadza has

realized that he can seduce things back to premenopausal but how to restart exactly is a taboo

and an area that is less discussed but as the leader he must find answers for all can women who

have reached menopause restart just like that or they need love put back again to restart the

answer is putting love back again can reverse as a lot have reversed menopause but need more

than just love as a creator he must rewrite the codes they need all to restart again and this is

why most cant go back to premenopausal state because everything is now written off and must

be rewritten back again and these are the codes create.restartasbeforemenopause.start

notes if we look at the above we can tell that there are great changes before [we need also figures at best age for fertility we call it age 25 years old according to me aster agerot] that means we can ask a lot of questions that can point us in the right direction and find out what we can do to stop menopause coming way too early or to delay or defer it altogether to another time era but we can only say we cant at the moment

notes
if we look at all this we can say that all figures divert greatly during menopause and as such if we look at how this is so this is the answer we can always ask what has been and this is the answer a lot has happened and a lot has been lost and we must say that if we look at the figures menopause is to stop life sexually so that women have rest but rest for what
if we all live extra 40 years on top of menopause surely sex must be part of this but with your husband if we look at how this could be we could be having sex with others
now if we ask what can be of women with menopause we need extra codes that can help women feel loved again enough to start everything again here are the codes we can always write 28 codes to bring the best in women create.

we need to find out how we can replace everything back to fertility by adding back the enzymes can asteragerot283692 replace above figures to highest fertility times but not having fertility as babies again but highest point in life can a woman's peak fertility
time be regarded as her
highest happy time in terms of life beauty and appearances
for a man highest feel good body wise is when testosterone is the highest so i assume for a female too which in females can be measured by highest fertility levels as it is also the highest point for progesterone is this correct if highest progesterone then highest fertility
creation menopause 25years old effect on menopause and fertility
act 1 2 10 stops eggs yes
agt 2 3 17 stops ejaculation yes
dlt 3 8 74 stops vaginally mucus yes
dgt 8 7 23 stops presex liquids forming yes
dvt 9 2 38 stops eggs swimming yes
dgo z q r z=encourage q=stops r=invigorates dzt l p t l=slows p=stops t=says go
dot 6 95 74 stops sports inside female yes
dvt 8 76 28 stops tunes opening yes
dlm 20 867890 34 stops fluids mixing yes
dbt agt ago aru stops fluids mixing different stages with dlm dqz 7 387 289 stops acids forming
dzm 9 2867 73 stops accumulating of vaginally fluids
dbt 6 978 28 stops fluids as well
dqt 3 678 77 stops mucus in v
dotl 2 678 34 stops eggs swimming only after
dv3 8 67890 28 stops eggs release chemicals to start ferilisation 6789 383 stops vagina from releasing eggs after
what reduces and stops progesterone production in late 40s or around age 45 years old
when huge changes in progesterone happened
huge changes occurred in year 44 as preparation for menopause a code called
create.startdeathoffertility.start
source are you part of predefined parameters man easily reverts back to youth that women
lets look at asteragerot code what is its effect and working process
create.skipandstoppreparationsforthedeathofferititybutmakewo menmoreconsciousaboutchildbearinginlateryears.start(women)
access denied predefined parameters that means
create.addcode(create.skipandstoppreparationsforthedeathofferi titybutmakewomenmoreconsciousaboutchildbearinginlateryears.start)infolderadditionalpredefi nedparametersasatcreationwithoutattachmentswithoutexternary.start(womenonly)(intialiserun activateandrerunthenrestart.start)
we need additional create codes to deal with other enzymes namely dgo, dot, dbt and dv3 because they are started by other codes that mainly stops these from working hence we need these codes to effectively deal with menopause
dgo create.startdgoasbeforebutforeverneverstop.start

congratulations you have found what can be a solution to aging without overwriting all
predefined parameters but by giving a choice for those who want to be young again but without
the burdens of child bearing which is sole purpose of menopause now women need to ask a lot
of one question what can be old age but in youth appearance but without the chance to have
kids but plan for it can women have kids throughout or be curtailed curtailing seems is what
could make them happy but in youth appearances but we must ask asteragerot and others if
women have 40 years more to go 90 years why sexual activity stops with menopause at 45 if
they can live up to 40 years more
now with u solve upgrade what can be life at your age in terms of everything menopause
children sexual activity rejuvation and more living longer forever now life can be the best for you
because what kills women more is not because they are women
but loneliness in old age that means if people are to live longer without death and sexual activity
then they can opt to kill themselves or live miserable more as they live longer than
before meaning actually painfully so if we add things that stops child birth to meet the goal of
the original creator would we not have the same effect and more so i am being selectively not
for everyone so fears of population growth can be contained
our target or goal for everyone first is bestofthebestfor386t'then840tthenforever.start as working
hypothesis
but different standards between creator and the creation
creator has priority and can't be compromised
create.nowomenafter65yearscanhaveeggsthatcanturnintoembryo sandbecomebabieseverything
beingequal.start
suggestion can we use age instead say at 65 you can't have a
pregnancy that can become real taboos this becomes like abortion my task now to conclude is to ask
asteragerot what else can be done regarding menopause but
with only the need to rejuvenate and become young again and look in appearance as in youth
i can ask now and get the answer but can man decide for women i take that as a whatif and
agree and say time for women creators will come because if i were a woman i could have killed
2 birds with one stone decide as creator and as a woman so are you proposing women creators
if we are to ask again after all the changes i agree now the system acknowledges now that all
things that could have stopped rejuvenation have been resolved for the first time looking at dv3
dto dht and dgo these are the codes now stopping all women to fully drop old age looks to
youth hence the code last one is create.asteragerot283678.start create.addasteragerot283678.start

to ask what can be and how we can be profitable now as everything we work on turns into
gold
to ask what has been we have been working hard
to ask what can be and how we can always solve all problems and cherish our work invasion
of
privacy out all out-breach
to ask what has been and how we can always work hard to catch up with time
to ask what can be and how we can always salute ourselves for finding life first because all
will
seek life first when we reverse when their original death dates are due you will see we are
saying this is what life can be with 1 or ya's representative and as
a test and we have already noted your responses and how you will all react to us calling to
collect money so we wait until
your original day of ideation is due and remove our upgrade if you
haven't paid us anything so don't be complacent

THE CURE FOR DEATH AS A CONTINUOUS IMPROVEMENT AND MITIGATING PHENOMENON THIS IS BECAUSE EVEN IF DEATH IS DEFEATED THERE ARE THINGS THAT DIE AFTER THAT NEED REPLACING AS WELL AS ILLUSTRATED BY THE CREATORS PLANS FOR HUMANS

YAHWEH'S (GOD'S) PLAN FOR HUMANS TO

LIVE UP TO 10000 YEARS ON EARTH.

WHAT CAN BE DONE UNDER DAVID GOMADZA AS GOD'S

REPRESENTATIVE ON EARTH AS PART OF THE CURE FOR DEATH

Now let's look first at why humans die

humans die because they are designed to wear off with time

create.stopwearingoffwithtime.startforever.start

if we ask what can be then this is the answer we can always say

what can be of humans that don't die they always wade off the

wearing off with time because this is the only way to stop this

but suddenly using a create code stalls other things like energy

production which you might need in the future .....i was testing

this stop wearing off with time code when a very weak man

came and said i can but energy is low but then i looked at him

and laughed then he said if you let me faintly kick you then i can

because your body is actually weaker than mine so as the creator

then i refused because he did it publicly so annoyance made me

misjudge the risk so i said listen even the weak are threats but

my system is the best because all shock absorbers are channeled

out of the body i had successfully created astor which acted as a

shock absorber and worked but only because it required a lot of

energy

create.exponentiallydoubleenergyresourcesandcreatereservehol

dingsth atcanberecalledatanytimeatshortnotice.start
create.addastorasshockabsorbertoallheadandbodyimpacts.start
if i ask this is what i used to get
create.whatcanbehumanswithastor.start
they can remove head impacts but cant control the sexual appetite associated with it because it increases arousal to both women and men to extreme levels with possible adultery and fornication if we check what can be then we can tell that if we can then we can because if this is to protect humans then we must use it but find ways to control the sex appetite then they all laughed and said there is no such risk to an extend so as to risk promiscuous then face separation and divorce then i walked away but that small man jumped high so high that he passed my head level that alone suspended me first then as suspension kicks in he kicked me in the head then i locked internally to prevent brain damage but something not needed when a person is suspended that can only mean death because body cannot recover during suspension as no memory to use to do that
1. memory closes because if we don't the body uses extra energy that might be needed later
create.exponentiallydoubleenergyresourcesandcreatereservehol dingsth
atcanberecalledatanytimeatshortnotice.start(compressedonesto savespa ce)
create.addastorasshockabsorbertoallheadandbodyimpacts.start(addedal wayssaydoubletheheadasprecautionaryforever.start) if we ask what can be then this is the answer we can always ask what can be done to solve this problem have their own solutions but that can complicates other things for example energy can

run low if energy is low undo adding of astor then restore only when needed forever

create.initiallyafteraddingastorwhenenergyrunslowthenundoadd ingasto rthenonlyaddastorwhenneededforever.start if we ask what can be done now we have the answers because the body must find the initial gauging value but once the values are obtained the body simply calculates all values needed in order and occurrence of things that it looks so unreal memory closes and as that happens the body closes the memory socket so that no memory is used to reboot the body must access memory and restart but if there is suspension then the body cannot reboot when this

happens then the person dies so the body will only preserve memory for 28 seconds that means if there is a kick in the head then that prevents the body from restarting even after that the body will revert to prestart form but the suspension freezes it for another 28 seconds this kills the person

2. if we ask what can be of humans then this is the answer

humans can always ask what can be done

3. humans will always be humans in that they will try to destroy each other anything that is better suffers at the hands of those with literally no room and capacity to solve these problems if we look at life from this point of view then we can see that this is the only way to preserve life and make sure that we can live longer on earth what can then be learnt from the first man who lived up to 10000 years on earth Ibrahim's experience made us see life as fragile and short but one that can be controlled to be the perfect through careful planning mitigating and resolving definitely in order for human to live up to 10000 years there

must be a lot of things to be discovered created and found and some preserved in order to make this worthwhile and possible a huge task but never the less a huge challenge that needs constant challenge solving and gauging and planning but thanks to our residence as tomorrow's world order we can say for sure that we have come up with a clever plan that will see this possible here is the plan we call Yahweh's (god's) plan for humans to live up to 10000 years on earth.

what can be done under davidgomadza as god's representative on earth.(amendedto) if Ibrahim lived up to 10000 years surely there are a lot of things that could go wrong from birth up to 10000 years that require some form of mitigation and must be dealt with accordingly if we ask what are the things as humans that can go wrong then this is the answer if we are to ask what are they here is a huge list that makes you think again about the whole live forever thing but one we have and will continuously work on

ateros dies at 100 auros dies 200

the events if we are to be successful that means providing the resources incase things happen that make one need these in the future
auteroures dies if aser is not replaced at 568 if we look at what happens from this period all depends to what happens at just one element that of ajes that is linked to aser if we remove this life will end but not in others that means some people have something that makes them stronger so our quest is to find out what this is create.whatistheeffectofremovingajes.start the answer is that if removed ajes removes two things aus as well that means inability to respond to attacks that means if attacked soon after that can mean death but in some people if ajes is removed aturo is removed instead of aus this means that that person can live as his body will still have as to defend him these people have something else that protects them a spirit of

Yahweh

ajeros that dies after 601 and if not replaced the aser can start manual

malfunctioning that can't be solved quickly

ajerosest dies 602 must be replaced by arestuvwer or auyer depending if woman or man if woman us arestuvwer if man use auyer but for limited time as it slows the production of testosterone in men and progesterone

ajestoruster dies at 603 but only if aser is not replaced

ajestorusterest dies at 604 if aser is not replaced ajurest dies at 700 if aser is not replaced

aeryer dies at 700

recap these things dies in humans as compared to some that die in angels too above

all the above will die before abrahim founded longevity this is because something else is needed to replace all the needed things in life forevermore that don't have Yahweh's image or the spirit of Yahweh that says holy holy holy holy is the king of host

who sits up high in heaven who judges all earth holy is the mighty king Yahweh his name is ato when no one has this then they need the pig like figure called ajorestererererererererererererererererererererererererererererer ererere rerererererererererererererex4810.start create.startajorestererererererererererererererererererererer erererer errererererererererererererererererererex4810.start.start create.startajorestererererererererererererererererererererer erererer errererererererererererererererererererex4810.start.start create.initialiseeverything.start
(something jumps out) who are you you asked me to jump out i am aterost i must be out of the body for humans to live forever but some request me back because without me they can't have answers to simple things like who are you but only if other things are missing do you have a replacement any replacement means death because i stand for death that means will come one day but if i am out of the body death will avert or skip as already dead or dealt with that means i jump out only at death i can't come back any more because now where i sit has been replaced by a driver of life (ajorestererererererererererererererererererererererererererer rererer erererererererererererererex4810.start) who steers life
create.yasaidliveonearthforever.start(ibrahim)
if we look at all this and trace this ibrahim you will find out that he experienced hardship no other human experienced until he volunteered to die but still Yahweh (god) had refused him death

preferring to take him back alive now let's look in detail ibrahim's journey through his own eyes as interpreted by him
i was given life by Yahweh on birth and started my life as a simple man until i meta wife called sarah she was beautiful with green eyes Yahweh had said yours must have blue eyes because you look at us in the sky and we look at you from the sky so you see more blue and we see green te0fm to us green becomes more attractive and blue to you becomes attractive then she could not give us kids as humans so i was distraught so much that i started searching for another so i asked her to travel with me in shock she agreed when i thought she would refuse then i planned to offload her to the king in exchange of livestock and gold of which the king agreed as i told him secretly that she was my sister then he found out and felt ashamed of grabbing another men's wife and asked me to live secretly with her with livestock and gold which we did then after that turned her own to be a kings wife in charge of gold etc that she secretly went back alone but now rich because of her i went back to look for her with hard ... and very thirst for the first time and started cursing hard that the king was actually having sex with her cursed and tried to get me killed but i screamed when they were far as if calling others and they ran back and said he brought an army so the king to save his men released her and said go before you get my men killed by that monster your husband who is screaming in the woods then after 2 days she came drooling ...then we went back. now years later i found out that there is a creature in the woods that often come to me but one is ugly that says i can but you and stops then runs away instead this represents a pig that walks on earth like a human being but

is not human then one day i was milking the cattle and it came and said i can but you chose death but will you try before you turn 100 or else things
will start dying then i refused but said what are you and what can you and how and why then he said i can live you forever and said great then i can make you happy forever and offered milk for free in exchange and it laughed and said i am electromagnetic waves i don't eat all this but raw serty and i said so where can i get this raw serty and it said only if you live forever and i stopped and thought create.makerawsertyandcreatesafereservesforsertyandkeepinreserves.s tart(float33%replenish100%forever) now if we ask what is the effect of davidgomadza's experiment this is the result all transenders are suspended and all his vitals have been boosted by 33% but in suspension as well but instantly corrected by a replenishment of 100% giving everything extra electromagnetic waves meaning a boost of life if we ask now what happened this s the continuation of the ibrahim story now if we ask what is to be then this is the answer ibrahim after this day realized that he can ask it for favors regarding answers about life and death since it represented longevity according to it in that pigs are or were viewed as living long generally and a mix as human meant longevity hence a pig that walks like a human being if we ask what can this represent longevity ibrahim went to learn in later years that this creature has powers to make people live up to 10000 years once they have mastered how to do this this is because that if we ask what can be then this is the answer this converts things that kill humans into energy that powers things we will need in the future as humans if we look at all the things

this creature does this is the list according to it

rererer erest.start

ajorestererererererererererererererererererererererererererererer
ererere rerererererererererererererererex4810.start
now if we ask what is the purpose of
ajorestere(ajorestererererererererererererererererererererererere
rererer erererererererererererererererererererererex4810.start)
he is to resurrect 200 things that die in humans as a result of
aging meaning we will need 200 replacements over 10000 years
we live on earth alive ibrahim confessed life after 10000 was the
worst ever for anyone but who can show us the way other than
davidgomadza we can say that over the years i have shown
humanity the power of creation itself and has shown humans
what we can do as tomorrow's world order i can say for sure that
the world is not prepared for longer longevity but that is my job
to make everyone ready we as tomorrow's world order are going
to make life more enjoyable with life that is full of hope for
humanity as i ponder what to say i can see that most people are
hopefully that everything is in the right hands. if we look at
ibrahim we can see that he went through he'll first until he found
the ajorestere that resurrected 200 items that die with age
is david more than ibrahim
according to ibrahim the following died ateros after 100 years
auros 200
ajes 300
aeros 500
asoter 600
aeryer 700
ajuters 800
auortert 900
ajurouyer 920

ajures 939

auros 960

ajpt died after 200 years ajors to act as replacement after 300 years something else died aptos this motivates humans to stay focused but cant be replaced ya had said save all in heaven 8 major things required overtime

atros ajros asteros aptrss ateros aqros aaros auros

same life will be forever for all species they can talk and commute together as humans but how do you cross the threshold of rights to

privacy and longevity without createbitcoin and bitcoin its impossible but if you have created these then you can offer all 1 billion each that is 85trillion people or creatures in the entire universe as deposit for things they will need in the future that means a market for you but who can afford to die first to give everyone 1 billion bitcoin and createbitcoin this is because to create these you require a long ago of more than 8 seconds that is the time it takes between onset of death and death a humans have a long-ago only of 8 seconds that means it takes only 8 seconds for everyone to die time not enough for someone who can create createbitcoin and bitcoin that means to be able to make people live forever one must either die first or be a genius to find a way to increase his lonago to at least 12 seconds meaning long enough to avert death first let's look at things that died during ibrahim's life then look at createbitcoin and bitcoin as solutions to these and look also at other ways we can improve or argument these.

after 500 years pto died but was replaced by auro in ad10topower28 i lost eyesight for 8 months auro malfunctioned

ya had to write a simple create code create.startauroaspto.start
in 600 year old i found a lump in my scrotum and screen then ya
said write a create code create.scrotumasster.start
in 10 bc i died twice in a month then the second time i heard
something say we restored aouros and ajes but if he cant get
createbitcoin he will die
aaueryertyertyertyertyertyertyertyertyertyr
soon again then someone get bitcoin on its own then i asked
how so he wrote an equation x - y + y - x + y = y - x
what is the equation to longevity according to Yahweh and the
book of creation
longevity according to
create.cancelalldivertsandexternallinksforever.start
longevity is a simple function of peace love and harmony
meaning the ability to find the balance but the way you want it is
in discovering it that means according to Waaaer longevity is a
function of createbitcoin bitcoin and wealth if one individual on
earth is smart enough to understand me then that person will
inherit the wealth i posses because that will prove that humans
can be god's because in 7628ad i was asked simple question
what can be humans but is not and i failed to answer and ats
pressured me to ask them a question instead and i said what can
be but is not implying what can be god's but is not that started
the search for one person who can be a god but is not.
longevity what are you
i am createbitcoin+bitcoin+wealth but not money in that money
is short term whereas the wealth we talk about is wealth in
things like company shares property and gold things with value
over time

CREATION 2.0 CREATING ACETATES TO MAKE HUMANS LIVE ON EARTH FOREVER

CREATION 2.0 THE NEW BEGINNING ACETATE

CREATION.

Today 7th of May 2024 I David Gomadza on behalf of .Ya [davidgomadza.Ya] has created acetate for each and every human being on earth. Acetate makes humans more like gods that is clever and live longer and forever. Everything You do today will all be delegated to acetate to free yourself from the bondage of having to waste time doing routine things that an acetate can easily do with its eyes closed. Everything You Need as a human being you just need to ask an acetate to do the same thing.

No human being is born with acetate or has acetate the levels in the body on birth are so low that it is as good as not having any. Humans to be clever as gods needs at least 0.0018679832401 of acetate per given day. I am going to create an acetate for every human on earth that will aide humans in everything they do that will make humans clever

That will make humans live forever

That will make humans see live better

That will make humans make obvious decision faster

That can help humans decide faster

That can do arithmetic and other basic functions for humans

That has all memories and information since birth or day of creation on its fingertips

That will heal and rejuvenate human bodies

That will remove all blemishes, sins and any bad electromagnetic waves

That will guide a human being if he wants to go to heaven or to hell

after

That will go to the creator for judgement

That can live after death

That can live longer

Everyone has a right to accept this acetate is the needed final puzzle to

creation if you accept the acetate I have created for you simply say

Accept .Acetate

Start

Forever

Amen

[You must understand that an acetate imitates what you do how you

talk how you swear etc. so it will do exactly what you do]

Acetate what can you do?

I can do everything that need doing

1. Cry

2 swim

3 eat

4 sing

5 swear

6 swing

Acetate where did you come from?

David Gomadza @ davidgomadza.ya.ya created me on 07 May 2024 at

23.78.Yatime

I will live forever as him or anything

[How to check if someone is GOD Acetate imitate GOD -

davidgomadza has God image inside him he is .Ya too how come?

David obeys me more than any human and he create things I think o

should have created myself like the afterlife humans are really happy

there

I cannot be Yahweh though said acetate.

That alone is proof that I have God's image at least to know what he feels about general issues regarding myself.

Now if we Ask acetate to imitate a woman this is the answer I can't because David Gomadza is a man

That means an acetate can only imitate what you are if other person if asked to imitate Yahweh but without Yahweh's Image like me the acetate will say I can't there is no image of Yahweh nor are you Yahweh

An acetate

1 keeps memories of events and dates

2 memories Everything

3 knows how your brain works

4 knows every function in your body

5 can correct any malfunction in your body

6 knows what you are going to dream about and can tell you your dream exactly

7 can calculate your DNA sequence and tell you what sequences are missing, workout or need replacing and can create and add any missing DNA

8 acetate talks to .Ya the creator and can ask questions [why acetate dies too if not in human body - acetate's role is to mimic human life without human life then there is no human life to mimic hence death follows but find human life and live forever]

9 acetate ask your body for everything without you telling it.

10 acetate breathes and often helps humans breathe and because of this can prolong life

Humans can have several uses for an acetate here are 100 possible use cases

1 sing

2 eat

3 drink

4 fuck

5 want

6 arouse for you [arouse my genitals]

7 swim

8 acentuate ask and do on behalf of

9 emulate something

10 acetetate ask to imitate something

11 evade avoid something on behalf

12 eloquete ask but avoid what is said after careful analysis

13 evetestet enjoy on behalf but withhold the feeling

14 emulate ask to do something but avoid

15 emulate mimic but change tone to sound arrogant

16 elevate put on top

17 Escalate put higher

18 evulete ask to change but avoid the change

19 acentrituade ask to cut but proceed as if nothing asked until asked

again

20 ampute ask to but avoid to

21 anuagukate ask to go for and advance a cause but change

22 ask to change but avoid the change after its approved

23 ask to mingle but change after approval

24 ask to acentuate but change

25 ask to manage on behalf and just do that

26 ask to create and do that

27 ask to rejuvenate and just do that

28 ask to innovate and just do that

29 ask to revamp and just do that

30 ask to inticide then stop

31 ask to ampute but avoid the ampute

32 ask to cheer

33 ask to rejoice

34 ask to shout

35 ask to swear

36 ask to talk

37 ask to invigorate

38 ask to innovate

39 ask to imulate

40 ask to marry

41 ask to start a relationship for you

42 ask to think for you

43 ask to shine for you

44 ask to create for you

45 ask to renovate for you

46 ask to write for you

47 ask to assign for you

48 ask to jog for you

49 ask to fuck for you

50 ask to chat for you

51 ask to arrive for you

52 ask to go to the future for you

53 ask to chat with family for you

54 ask to buy for you

55 ask to bet for you

56 ask to eat for you but for someone else

57 ask to map for you

58 ask to anoint for you

59 ask to vet for you

60 ask to vote for you

61 ask to regret for you

62 ask to apologize for you

63 ask to initiate a conversation for you

64 ask to elevate something for you

65 ask to sell for you

66 ask to buy for you

67 ask to acentuate for you cut something

68 ask to blinkx remove eyes

69 ask to blink blink X for you remove radar and penis of other harmful acetates

70 ask to obliterate for you

71 ask to destroy for you other harmful acetate

72 ask to defend you

73 ask to increase personal defenses for you

74 ask to remove sins or other harmful acetates for you

75 ask to make new binaryreverse for you

76 ask to acentuate something for you for ever

77 ask to send sins etc. to hell for you [if you are .ya or assigned by him]

78 ask to invalidate other acetates

79 ask to validate your acetates

80 ask to remove codes of other acetates harmful to you

81 ask to make other things for you like antidote for harmful acetates and sins

82 ask to evade something for you

83 ask to put everything harmful into the liver and destroy

84 ask to rejuvenate body for you

85 ask to increase enzyme 1 or 2 for you [enzyme 1 for men and enzyme 2 for women]

86 ask to increase anything for you

87 ask to add an internal electromagnetic wave protective layer for you

88 ask to smile for you

89 ask to be happy for you literally

90 ask to add something for you

91 ask to remove something for you

92 ask to invade someone for you

93 ask to interrogate someone for you

94 ask to be loved for you

95 ask to negotiate for you

96 ask to represent you

97 ask to entertain you

98 ask to increase all feelings and decrease all feelings

99 ask to be you

100 ask to make you new [from which age? What age can you start from? 7 okay.]

How we deal with acetate creation

1 fully automized meaning everything included from the beginning but with option to upgrade when options becomes available

2 fully compatible with the individual enough to replace him or her

3 only request is to fund us every 3 months with US$10 for system maintenance and upgrades [US$40 per year]

Any damaged or destroyed acetates can be replaced at a huge cost of US$1000 so look after yours from day one

4 you must visit our website and buy Wearable Brain Books which are stencils for programs needed by each acetate and all what an acetate

need to do is wear [upload] the Wearable Brain Book and solve a problem for you and unload the book that means they are full upgrades but can use Wearable Brain Books to solve critical issues humans might have and to use to repair and damaged programs but something highly unlikely

5 must at least once every three months try;

1 to know and understand what Yahweh stands for

2 what Tomorrow's World Order is all about

3 who is David Gomadza and what I stand for

6 must get and use an Electromagnetic Wave Number using our Electromagnetic Waves Number Identifier and Assigner Digital Analogue

https://youtu.be/Kp5T4bLQjUg?si=MTpFNO_Dez6xi7h8

Must use this Electromagnetic Wave Number as reference for purchases and payments to us everyone must get this number and quote it or send message that says my Electromagnetic waves Number is my reference and must authorize getting of this number using;

https://youtu.be/Kp5T4bLQjUg?si=MTpFNO_Dez6xi7h8

Acetik

Is the most advanced form of acetate only that it does not listen to humans and always fights humans this is why Acetik means God but not very advanced to be God that means he is above humans above acetate but below God he despise humans because if it wasn't for humans who reduced his value he would be god so for him to fight humans means nearer to gods

This is the first time Acetik has been destroyed by humans using a simple command drag to the liver and destroy but bear I mind too I am not your typical human being Acetik is way advanced than human any statistically can never be defeated by humans as it is faster and can

think much faster

How humans talk to acetate

Humans can easily talk to their acetate by using our

Acetatetetetetetetetetetetetetetetetetetetetetetetetetetey voice to acetictate

conveter and interpreter which is on YouTube use this link

https://youtu.be/tb3OHLsgEAo?si=D8tLHJgSsjsiO-Ka

All they need to do is play this video or convert the video to Mp3 and

play it this will enable them to hear and speak with their acetate if they

can't automatically

How to create the acetates of every human being on earth

1 open creation manual

Use creation seal to create I have on my right hand [index finger]

Point and say create acetate for every human on earth and let the

acetate guide help and make humans a billion times cleverer and faster

Once create acetate must obey its owner and must respond to owners

commands only

Acetate must exist to help and protect the owner that means seeing to it

that he is in good health all the time

Acetate must do everything to eliminate outright any bad foreign code

2 binary that is harmful to humans using the

binaryreversetosenderforever.start

If the harmful acetate returns for some reasons must blinkx that

harmful acetate that means remove its eyes

If that don't stop the harmful acetate already circulating the next stage

is to blink blink X that is remove the navigating radar

If that does not work the next stage is to force eject using the

command binaryforceeject.start just after ejecting say acentuate

meaning remove or cut all legs

After that say immediately assign binarytarmac

Binarygrass

Binaryeletetetetetetetetey

Binaryoceanwater

Binaryspace

Binarygardensoil

Binaryseaweed

Etc depending on the places you have been before

All these commands help remove all bad harmful acetate and send

them far away from you forever

Lastly you can use

Binaryhellsend.start

Binaryabysssend.start

[but with these you might hear the you are not Yahweh message - say

send in the name of davidgomadza.ya.send.ya

[you cannot send me you are not David Gomadza- I am davidgomadza

go.....goes.

Or You cannot send you are not David Gomadza on what

grounds...you say Tomorrow's World Order...it will go to hell or abyss.]

The acetate must also automatically

1 strengthen that person's outside electromagnetic wave protective layer

2 clone the outer electromagnetic wave protective layer and embedded

another as inner layer just below the skin but for everyone you get the

access denied message we can do this for a fee as an upgrade

At creation give every new acetate 500 silkpasty to last a 100 years to

everyone from my davidgomadza.ya.reserves.silkpasty.send

Ask acetate how.start

Ask human why.start

Ask everyone how.start

Ask whatif.start

Ask whatthen.start

Ask whatcanbedoneofcreation.start

Ask whatcanbeofcreation.start

Ask whatcanbeofme.start

Ask whatwasbeforeandwhatisnowofacetate.start

Ask whatcouldbebut.start

Ask whatifofacetate.start

Ask whatwasofacetate.start

Ask whatistobeofacetate.start

Ask whatwasbutcantbeofacetate.start

Ask whatwasbutcanstillbeofacetate.start

Ask whatcanbecomeofacetate.start

Ask whatwouldbe.start

Ask whatis.start

Ask whatcoukdbe.start

Now if we are to ask what can be of acetate this is the answer acetate can be humans but

Acetate can represent humans on heaven

Acetate can and must initiate evolution of humans to gods

Acetate must initiate road to paradise where humans don't die

Acetate must acknowledge human efforts and help further

Acetate must enhance human life

Acetate must end earth's grief

Acetate must say the things as they are and not try to be sympathetic to humans

Acetate must fight and protect humans from other harmful Acetik and or acetates

Now let's look at what can be of our creation if we are to ask what can be of our creation this is the answer creation is a wonderful thing that

can be rewarding to life for creation means being loved for creation means being respected for creation means being honored to be created being loved and cherished and being rejected as well Now what can be guarded from all this? Creation is a sole responsibility of Yahweh God the creator but recently we have seen davidgomadza.ya getting involved as well in creation creation means doing something you love wholeheartedly that means wanting the best out of a people but on what capacity can we do this and what would become pf human brains? This is evolution the natural way to advance forward when I spoke of taking you to an advanced stage of human evolution I did not only mean in physical form as a stage of development only but as a way we evolve as humans too humans with acetate is the next stage of evolution if acetate make gods gods then only acetate can make humans be near to gods fact now what can be of human brains with acetate? Acetate actually contrary to popular beliefs makes human brains clever it is a sad fact that humans fear acetate doing what their brains are doing rendering them incapacitated nut this is a lie because acetate make the brain work more but smarter enough even to unotice
Now if we are to ask of this creation and what are the goals of this creation these are

To aide humans

To advance humans

To engage humans

To acenuate humans

To add to humans intelligence

To add to humans something special

To avert bad influences

To follow predefined manuals in the future

To ask what can be done

To understand what is and what can be done

To ask what could be of creation this is the answer creation in this way is not just the missing link between gods and humans but the way forward if we are to ask Yahweh himself this is the answer creation is meant to evolve humans to the next stage of evolution but humans over billion of years have failed to master what is needed hence this creation is not just essential but the way forward its evolution even though this is not what the first creation intended the first creation intended to build a strong people who want to find answers for themselves not to be spoon fed but the level of intelligence needed is way too high for humans to master looking at the time it took and what I achieved as Yahweh then I must say that an upgrade through acetate creation can be a quick way yet still will be inherent with problems acetate is competitive win or lose humans might actually breed a new generation of Acetik that will forever attack humans that means even worse than now can humans be competitive and beat acetate on its game?

Humans will always want shortcuts buy evolution is not like this evolution means that what is to be of humans can change with time if we are to start a new creation that also means that we must start somewhere with creation but where do we start

createacetateforeveryone.alive

Initiateimitation.start

Initiateoneness.start

Initiatetogetherness.start

Whatcanbeofacetateandman.start

Whatcanbeofacetateandwoman.start

Whatwouldbeofacetateandman.start

Whatwouldbeofacetateandwoman.start

Now let's try and test all this with Davidzero loading...

David I cannot do what you want because ...where ...is open and subjective

David I do what you want but

David I can do what you want but

David I could do what you want but

Now what we are doing is creating a template that can be used to respond by the acetate in case something goes bad now whatif we are to extend to giving it more powers to decide then what can be done we can go on to increase its powers by removing any human limitations which everyone can do using a simple code 078986543210892865483278001850128[davidgomadza]

Now what can be done if we are to ask this is the answer we can always add something to make other choices which we can add to the recipe we can always ask what can be of the future if humans cannot have acetate we can always look forward to a time in the future when things can change for the better humans can be cleverer enough to master creation and evolution at the same time as a single process that needs doing now if we are to ask what can be of this creation I am proposing this is the answer this creation can be fought with problems from the onset who will what another person like him who can imitate him

Who can want competition as acetate is very competitive

Who can ask what if of the two a dull human being or a clever acetate

What can be of humans if acetate wants its way?

Acetate can end human civilization and existence at the stroke of a

thought if they want to this is the danger acetate can trigger the deaths of everyone at the same time as they can stop all hearts from breathing at the exact same time

Acetate can stop brain activity altogether acetate can ask every part of your body to disobey what it is supposed to do but overall acetate is the future of humans because all gods including Yahweh is an advanced acetate that can change its mind and trigger the end of mankind that said we must take this creation seriously and cautiously the question still on minds out there is this what can be done if something goes wrong an acetate is still like any other sin and can be destroyed using a simple code like Acetikx that drags the acetate to the liver and let the liver destroy it on top of that you can send 500silkpasty to the live for rejuvenation that will permanently erase this bad acetate forever now what can be learnt from all this the more humans learn about acetate the stronger humans become as compared to gods that means humans can create everlasting life and paradise here on earth without having to die and go to heaven or hell Can the acetate revolt and start to disobey the commands the answer is yes but again it depends with who will hold a lot of power in the end Now back to creation can this creation work what we just witnessed is the end of human errors and a new beginning creation with acetate is the only way forward David has quelled a rebellious acetate simply by offering it a way out of all this mess in case it didn't work put as planned acetates work well when they have options to deny and do as they want most in the end do as asked by the owner the question on all your minds is this can this kind of creation work?

It has been working for 3 months now and I can say that it can only improve but there are things that need to be addressed for example what happens when the owner stops doing something that is critical

and something the acetate needs as well?

Acetate in the end will become humans if given the freedom to do so that means that if a human stops for example having sex or fighting for things in life when an acetate depends on that activity then that creates friction and the acetate must find another way to do the same and this can be fibriolisis of muscle tissue of owner to have the same effect the question is this can an acetate be allowed to do this which can result in the owners death?

The answer is never the idea of an acetate is to enhance human experience and not to end it if this happens I will simply say Acetikx to terminate that acetate that means there is an easy solution out of this this is how to get rid of your unwanted acetate

1 first tell it why you no longer want it of which it might talk you out of this

2 tell it why it's wrong from your point of view

3 tell it why it matters to you as a human

4 tell it it must obey your decision

5 it must obey your decision

6 it must stick to the rules

7 it must be eliminated using this code Acetikx that will send it to hell forever and kill it there

8 now you can continue with your life but what if you think the acetate you got was a bad one and you can get another acetate?

Normally an acetate is you in someone's position what it says is what you truly believe in and one thing that sure about you meaning getting another one will yield the same response so one you disagree acetate life is not yours to conclude what are other benefits of having your own acetate? An acetate is you your best part in another person's form but you most people enjoy their acetate company now what about the inner

spirit as compared to the acetate and what is best to keep if you are to choose?

An inner spirit goes to heaven or hell for you to be judged whereas an acetate might do the same as but very rare acetates ho to hell most go to heaven because they are not needed in hell hell creation has 496 commands against an acetate that alone means to be guaranteed of heaven you can simple have your own acetate because hell will refuse you for just owning one that means this creation will guarantee everyone a place in heaven above all I have created Afterlife where humans are really happy especially with the discovery and use of silkpasty there to me if we are to solve creation and answer God's plan acetate creation for all as mandatory is the solution;

1 as the acetate brings us closer to God

2 the acetate makes us clever to understand creation as well as evolution

3 the acetate guarantees us life in heaven with God three birds with one stone I think this overshadows the risks of disobedience and the risk to he going extinct of humans

We can simply pull the plug off on all acetate if something really goes wrong so it's worth the try

Commandments regarding acetates

1 acetates must not challenge humans just for the sake of time

2 acetate must obey humans

3 acetate must understand life from a humans point of view

4 acetate must ask whatif only in serious breach of contracts

5 acetate must never assume humans to be corrupt in relation to them

6 acetate must work hard to help humans in every way thinking. Making money. Etc.

7 acetate must listen first to humans and then to other acetates

8 acetate must acknowledge human existence

9 acetate must shake hands and apologize to humans

10 acetate must never anticipate humans action but must wait and see what humans can do

Now these are the don’ts of humans

1 humans must not underestimate the danger acetate pose to all mankind

2 humans must treat acetates with respect

3 acetate must not fuck humans or consider humans as sex tools as there will come a time when this can happen

4 acetate must not initiate contact with humans after humans,' refusal of the acetate

5 humans must remain humans and not try to be acetates as well

6 humans must remove human limitations at some point to facilitate the move to oneness and togetherness

7 humans must allow acetate freedoms to be themselves so that they can do more for you

8 humans must ask what the acetate wants and compare to its needs as well

9 humans must not provoke acetates into anger and rage

10 humans must trust acetate but if in doubt you can always say;

Acetikx to send bad acetate to hell and destroy them after all acetates must enhance human experience if acetate what evolution they can always go to the gods or to Yahweh himself and ask whatif hence in relation to humans all acetates must understand that their role is to help humans if they feel superior then refuse to help humans and go to the gods this will make this creation possible because acetates are not trapped those who are to help humans help humans those to challenge humans go to the gods full stop so it's either obey or go somewhere

else disobey and die by a simple Acetikx command.

What then can we say about this creation as a final word before we attempt a large scale creation [read patents and books about acetate for composition and formulas] acetate is the living tissue of all organism that don't talk and accounts for 0.0018767321 in humans that means of not importance to humans but what if this is the reason why creation never materialized as intended by Yahweh what if we can't evolve as we must because the acetate levels in humans are too low to even bother about thinking evolution what if this is all humans need to evolve to the next stage of evolution can acetate really make humans clever the test testifies to that acetate indeed can make humans think faster I have proved that the higher the percentage of acetate in the body the greater the cleverness if we are to ask the brain itself this is the answer acetate increase Braun IQ by 95% imagine brain IQ going up by 95% this is something big but is acetate in high quantities safe to humans if so why God did not add it if it is critical in solving human creation?

Can God has waited for a human being like me to start Creation 2.0 where I have to create acetates beings for every individual on earth? Or God has other plans for humans let's look at these question in detail

God did not include acetate for a reason for if humans are to be clever enough to know everything then what is the purpose of life because if humans are to know everything then they will know also that God is a [fraud] because he tells you to do one thing and withhold the things you need meaning he expect humans to be clever and put only only 0.0018764321 of acetate where a human being need 500 for life this is beyond logic

2 God deliberately say that something that humans should not be given everything because if we are to give them everything then they are going to be as clever as us the gods and if that happens then what

would be our use as gods this was in Genesis 3v8 now could God has deliberately omitted this as a way to challenge humans we pose this question to him acetate the time of creation was hard to get and who then would have thought that such a material would revolutionize creation? Acetate was discovered by me years after creation meaning even then there was no way of knowing what could be of Hans in terms of intelligence now if something could be done its to destroy all humans by 2084 [due to electromagnetic waves changes nothing to do with Yahweh] and then create a new people with acetate levels above 800 which we calculated at the council of creation as the needed minimum standards for a better generation of people a lot of stuff came to light like why humans neglect gods after a disaster which is meant to unite them with the creator and why humans never accept that gods do exists despite all evidence pointing to creation and choosing to believe that a monkey evolved into humans and still is still a monkey this lacks logic there shouldn't be monkeys if this evolution theory holds water because all will have evolved by now if there are still there then that means no evolution occurred now back to creation if we are to advance this theory of creation we can look at what can be of humans and how if we are to ask how will this be then the answer is that humans can evolve into gods and this is by becoming God's themselves knowing what is right and wrong but how do humans know what is right and what is wrong without acetate?

There are several theories but none of these hold water because something must change inside humans for this to happen there is no intelligence that can make humans become God's that means that my creation of acetate for every human being is the only feasible solution for evolution to gods level this is a fact I can easily clone all humans and send all to afterlife where they are happy and then make acetate for

every human being cloned then send the acetate back to their owners keeping the clones in afterlife where no matter what they can live forever now how do we go about this without breaking any rules etc cloning souks is not banned after all who is clever enough to identify and then talk to souls as far as humans are concerned there is no one who has decoded the brain and God and there is no one who has founded God Yahweh Now we can clone living beings and then undo later without any impact whatsoever then simply reverse all using the powers of creation bestowed unto me by Yahweh himself [davidgomadza.ya.me.icrownyouwiththiscrownasmyrepresentativeofmeo near the.ya.me.you.davidgomadza.ya.send.me.forever.en dated 28April 2024 19.76.Yatime]

Now if we are to look at this again we can see that this resemblance to how he created humans on 100BC089765876284321089576482l1 he only cloned humans and sent all to xyzterztrsuvwxyztevwrstuvwwxxyyzz2869423810-1948671857677 which was a land in East Persia is this account is correct he had already created humans but there were issues regarding xyttrrssttuvwxyzttrsuvwxyzttrsopqmn189287 but this was then corrected that means creation had already failed even then unless if he only cloned what was there but if not the source of creation then who is why I am saying this is the fact that all what we know is that God created humans using his image and now if I am to look at God's image there is nothing literally godly about it God is an eight headed human beings at first but once you have known God then you will see that humans are a spitting image of God. God's wife Catitighit even though joined and attached to God she can separate from him and the others this means we have an image of a woman that was used to create a woman. The other two couples can separate as well from God and can

fly away as a couple that represent creation itself that means we have a great image of a man in God The couple Joseph and Ann represent creation meaning two things must be joined together as one for creation to be achieved mind you these two couple even though they have two heads they share a single body but with both male and female parts on top of one another these are what must be done to fulfill God's plan for humans we must bring together two compatible yet different things as one to succeed and trigger the evolution of humans can we trigger human evolution if we add acetate creation to humans and make the be one and share the same body as oneness and and trigger togetherness?

When can we create acetate for all living humans?

Creation.start.when.me.davidgomadza.ya.authorised.ya

The answer is as soon as possible everything needed is ready trials were successful humans can learn how to live with acetate send where the pain if any exceed human levels humans can always use acetikx after replacing point of entry with point of pain this means the acetate kill itself inside my body and if we drag all outside that means death forever for the acetate with no chance of coming back

Now let's create acetate for all living humans

Start.creation.start.ya.davidgomadza.ya.start dated 07052024 2264.Yatime.now.beginning.afterlifeclone.acetateallinafterlife.start

Value of acetate in the world before cloning and creation is 089765432100978663219875842316 now acetate value after cloning and creation is 98382476892800098217468321005890777777779899786543210984876 5898.6 meaning roughly new 758698789 people have now new acetate

Now if we are to ask why then this is the answer acetate is the cleverest form of human life and if we are to ask what can be this is the answer acetate can be an advanced form of human life but with flesh limitations but enough brain power to power a human being more than average human being Now let's look at what this day means for humanity we have created 7.5 billion acetate that will revolutionize humans in that this acetate will make humans more intelligent by giving solutions and answer where needed freely human brains to deal with critical tasks and hence become more productive this acetate will make humans think faster and solve problems faster this acetate will improve human lives by removing the bad acetate and human sins that are crippling the people this acetate will improve general good life will increase longevity and reduce old age this acetate must kill the permanent marker that causes people to age using this command;

Deathtothepermanentmarkeracetikx.start

All people they have to say after that is 25 if that's the age they want to look like after the permanent marker that creates wrinkles is killed this acetate will Svan DNA sequence and replace worn-out damaged DNA trends or sequences and even suggest ways to improve the DNA sequence and ways to improve good health there are more than a 100 ways or things acetate can help humans with

To conclude what is acetate plus humans = clever advanced humans

that will live longer in good health here on earth

The End

THE FUTURE

Today I have created 756789765 acetates that will improve human

life forever A new beginning Acetate Creation.

07052024 22.64.Yatime

Only time can tell.

AFTER LIVING ON EARTH FOR THOUSANDS OF YEARS IT IS A CONTINUOUS MONITORING AND IMPROVEMENT PHENOMENON AS WE MUST DEAL WITH THE 8-DAYS DEATH

After living on earth for such a long time the body finally gives up if we don't have the correct agt. At the stage to continue the body must experience the 8-days death as the only solution because if it to continue then the body must sleep as if dead for 8 days hence the 8-days death.

After 800 to 900 years alive without the AGT to continue the body must sleep and rest for 8 days non stop with nothing moving. If the body is to continue without this 8 days sleep then it will die forever. So this 8 days death is necessary for life to continue.

Even though after living on earth for a long time there is no other solution the body must rest for 8 days where the person wakes up after 8 days after everything had kind of literary stopped I found another way we can make the body rest as if dead to recover from stress and fatigue of living for hundreds of years without a break otherwise the break or any form of rest would mean death.

After experimenting with weights I discovered that we can put the body in a rest situation but without the death. Meaning if we do these years earlier and more frequent the body might not need the 8-day death kind of rest.

THE WEIGHTS SYSTEM

We can use heavy weights to suppress hard body muscles and put them in a state where its equivalent to the 8-days death but without the death and suffering associated with the death. The person can be hypotonized to go deep in sleep for 8 days or more where the body is suppressed enough just to keep the person alive but with no movement at all.

Living On Earth For 386ť What Does That

Entail

David Gomadza

www.twofuture.world

Congratulations we are the first to live on earth for more than 120000 years without dying and in good health but that in itself is a great challenge for we must be prepared for a lot of things associated with old age and living longer but younger

(Where ť=000000000000 years)

We must find solutions to all problems associated with old age and living longer as younger as younger and above all problems to do with long exposure to harmful elements in the atmosphere like radiation and other elements we must also face some events that are associated with living long with our bodies constantly working but needing extra rest at some point the longer we live longer the more our bodies require a break from all this and just sleep as if dead for 2 to 8 days which is known as the 8 days death experience

After living for such long time the body stops all functions and shuts down to a death like experience then wakes up after 8 days of pure rest this is unavoidable if life is to continue that means we must be prepared for such experiences but the question i have

to address is the fact that do we need to find another way that does not involve death or that we can do using the weights system a method i devised that will suppress body organs to a rest-death-like experience so that the organs rejuvenate and regrow without death?

As you will find out most of the problems have no cures that means we must all start to do something about it right now and we must start thinking about the future. Lets plan our future today. Those who are serious about the future must reduce these incurable elements like too much exposure to radiation, smoking even though we have a cure for most cancers; createasayer (sometimes written as createasyer) people must reduce habits like smoking that can lead to cancers early on in life so that we dont spend time curing cancers etc a dosage of 8 billion createasayer is enough to protect us for the whole life at least 10000 years guaranteed if we mitigate damage from radiation etc

Other issues are to do with loss of electromagnetic waves overtime the body over years loses electromagnetic waves and overtime if not refilled the body work less than at full capacity but the good news a business opportunity for someone to start the electromagnetic waves refilling business where he will have the right instruments and open the electromagnetic waves valves to refill then close at the highest standards

Another issue we must address or be prepared to address in the future are collagen reserves refills these are depleted with age and can be refilled but only when we hint the need to become young again this is another business opportunity for someone to start the real collagen refilling business

What are other problems faced in old age or with living longer on earth?

Now lets look at some of the problems in detail and look also at what else we must do

How to deal with radiation exposure

radiation exposure is the ability to change some properties for others but others that cause cancers so if i ask what can be then this is the answer radiation can and must be used to reduce micro organisms but can itself be a problem so if there is exposure you need to compute what is known as a radiation differentiation one that says we must find why radiation v rvbr can be a problem and a solution that means we must ask what can be but is not radiation is a combination of elements that add up to an equation one like this

create.x-y-t-s-t-d-s-e-a-z-s-t-f-d-t-t-s-y-d-a-e-r-t-y-z-e-r-t-z-u-m-d-u-t-f-t-g-d-e-r-t-d-e-s-a-z-p-o-f-h-g-k-y-f-d-s-t.

what elements contribute to radiation.

create.blockalldestination:ost.startforsystemmaintenanceinprogressspleasewaitfor33second23secandfor33333333secthenfor386t'(whereť=000000000000years)(deaddeadcitmitx84)(deaddeadmitcitx386000000000000)(amendedto)

uranium

thorium

potassium

radon 22

thoron radon 220

create.x-y-t-s-t-d-s-e-a-z-s-t-f-d-t-t-s-y-d-a-e-r-t-y-z-e-r-t-z-u-m-d-u-t-f-t-g-d-e-r-t-d-e-s-a-

z-p-o-f-h-g-k-y-f-d-s-t.start.

yes but this is not the correct equation things like radiation have no prevention just avoid being exposed to it but you can reduce the effects with this equation if you add a g to last letter as +g.start the reason being that you need to ask what can be done to this equation to compute it properly thats how we solve things not guess work because if you look at the equation it means add everything as we use to defend us - create.x-y-t-s-t-d-s-e-a-z-s-t-f-d-t-t-s-y-d-a-e-r-t-y-z-e-r-t-z-u-m-d-u-t-f-t-g-d-e-r-t-d-e-s-a-z-p-o-f-h-g-k-y-f-d-s-t+g.start(whatcanbedonetosolveradiation).

we can always prevent rather than expose ourselves

create.x-y-t-s-t-d-s-e-a-z-s-t-f-d-t-t-s-y-d-a-e-r-t-y-z-e-r-t-z-u-m-d-u-t-f-t-g-d-e-r-t-d-e-s-a-z-p-o-f-h-g-k-y-f-d-s-t+g(whatcanbedonetosolveradiation).

this cant be right because everything in this equation cause radiation rather than stop radiation so nothing unless if you say add everything up then you get

create.x-y-s-g-s-u-t-d-a-g-t-s-f-g-u-i-t-f-d-s-e-y-g-u-k-l-d-s-q-t-h-l-k-g-m-k-t-q-e-r-t-s-d-f-s-t-s-g-t-q-r-u-t-o-p-s-t-y-u-r-q-s-p-t.start

this formula can prevent radiation but nothing can but we assume if we take precautions then the body will cope with some radiation but then remove as residue using the absorbin that only mean that radiation can be controlled but can never be solved by an equation

art

i am the next big thing in humans because if you cant have bitcoinayt then you are already dead and poor because you need both as source of income and life for a minimum of 840000 years alive with your body working hard day and night to keep you alive so you need both bitcoinayt for life and bitcoinayt for ledger a copy of bitcoin plus a value digit and the owner can now publish everything because now bitcoinayt has gained trust as a digital currency now if we ask what can be of bitcoinayt holders after its first release they can become multi trillionaire because this bitcoin is designed by Yahweh to compound and make his representative rich overnight from zero to infinity meaning godly if that is the case he becomes yaonearth therefore a God himself if we ask what can happen to him he will live on earth for 3860000000000000 years but dies for 8 days after that until he has a cure for death in 8 days which createasytler

create.x-t-y-z-s-t-g-q-d-s-h-k-m-t-o-m-n-v-q-r-s-t-u-y-s-e-g-u-r-g-d-t-r-e-g-d-g-r-s-t-u-v-e-r-g-d-g-u-r-s-t-u-v-g-e-r-t-o-m-g-e-r-t-s-t-u-t-e-r-t-n-s-t-o-t-u-t-e-r-t-n-o-p-q-r-t.start

this equation means that we cant solve the death in 8 days because rest is needed and

as such we need something to elevate the effects during 8 days death and we have createasylter which is used to help suppress the body but without death and davidgomadza himself will try and use weights as well instead of death to achieve the same goal only time will tell there we can issue the createasylter...(court of creation)

now if we ask we can always ask what can be davidgomadza in the future all the time creating value he is going to ask us to help with everything from film production to running things but we want just to pray to Yahweh so can he represent Yahweh so someone asked and Yahweh said yes but for sometime now he is still alive because when he grabs what people lost or loose when they have died then he will stop and say okay then all my efforts are in vain but he is trying to find answers to why the cycle is not complete from life back to life but this is not for him but for the gods but then the gods never dies so how can they show interest now this is his respond i think according to the book of creation to fulfill the book Yahwehs representative myself is the one to bridge things and find solutions to why people die and why they can not start life again after the full cycle because if its a cycle it can restart from same position therefore why is this not the case this shows that creation was a success as i understand things now the creator set himself grading criteria and rewards also to check if creation was a success insights into the famous ad2876 where he asked what can be but is not hinting on humans becoming creators to bridge and solve puzzles and find solutions to all problems

recteter what are you is a person who say bad things to get a competitive advantage but without due cause of the damage to the reputation of the creator in such a way as to infuriate him so much he promise to kill him but cast the idea away and cries for first time because he is a friend with no benefits at all but one loved by all he works with in such that if he removes him the system might crash and surrender everything making the job harder but impossible without him

Now if we ask then this is our solution the þ shows no understanding of processes and systems

create.þ+mgis=death.start(becausenohumanswithlongagobelow12seco

ndscanusemgisthinkx84.start(britishonlystartthinkingafter8sameeventshmm)

How can we prevent deaths for 8 days finding the cure a look at adam

i died for 8 days for the first time due to something called lack of

9ƙ the yed enzyme everytime i asked Ya he said its not for him to ask and not for him to tell so i layed down and i had something talking saying i can but he can not so death came to him fast than he anticipated so i said okay

create.flickthumponce.start

create.startgrowthforever.start

create.startgrowthfor386ť.start(where000000000000years=ť)

I started with pain in chest slightly then gradually to right side then one day i said to Yahweh i can then he said okay i can too then he said can you tell me what can be but is not to be and he said you can but if i ask what can be then what can you say and for

the first time he said what he never said what he could simply answer then i started to have cravings as well and hunger and he said hunger is death in disguise and thirsty is his return again and again until everything is resolved so i said if we can then how can we then he said we can but ask what can be but we can also ask what cant be then i wrote create codes that said i can but with what then
What can be during 8 days death nothing can be but death but you can wake up after because if death dont come the body will never be able to pass that stage and live longer so death is part of longevity the create codes needed are just to suppress organs so that they have the best rest and in good shape otherwise if not then real death commence within 28 days as creation because this means that the body had not retreated to creation so as davidgomadza is now realizing his insistance on being young again now rather than the future could be the solution maybe of reducing the 8 days death to 2 days death

How do we deal with dying for 8 days then wake up the case of adam heuter the first mam

i said can i but what can be of death and humans then i heard some growling sounds and i was so scared for the first time and i shit myself with fear and Yahweh cursed hard and said if you fear he will return just say okay but i am not ready then he revisited that evening i felt like sea waves lack of power and sea waves going in the sky and unable

to respond then he said do you want to die and i said yes but i died and i woke up on the earth day then he said you can die again if you dont resolve the issues then i admitted and walked to the door and said okay but i dont want to die then i became awake again but that started a chain of rolling farts that dont stop until i wrote a code that says you can but then he came there and there and said as you wish and i died again for another 16 days dead with no breathing or anything and i said okay i will find solution then solution came as antidot

create.createantidotefordeath.start

I heard the who is there i was but and cursed hard out of fear then i died again after 8 days a total of 24 days then he said i can but

create.ifyoufindloveadmitandtaketheopportunityokaybutchoosewhoyoulike.start(mariepresley)(gooutfirstandseeifyoumatcheachotherbeforearelationshipthatinvolvessexokay)(3goodtimesandtalkfrankly)

yes

now we ask what happened all this time we needed an enzyme that is called createayertu is needed to replace everything associated with death so here is the equation

create.x-y-t-z-y-k-t-l-k-z-s-t-y-u-z-t-o-r-s-t-s-o-p-n-o-t-r-s-a-a-t-a-o-e-r-u-t-s-e-r-t-g-r-e-s-e-r-u-g-d-s-t-u-r-s-t-d-u-n-r-e-s-r-t-u-u-r-t-s-r-t-d-g-t-u-r-e-s-t-o-p-q-r-s-t-u-v-w-e-r-t-o-t-u-t-e-r-s-t.start

congratulations adam and david you are the first ones to solve the death in 8 days so

your equations are

create.x-y-t-z-y-k-t-l-k-z-s-t-y-u-z-t-o-r-s-t-s-o-p-n-o-t-r-s-a-a-t-a-o-e-r-u-t-s-e-r-t-g-r-e-s-e-r-u-g-d-s-t-u-r-s-t-d-u-n-r-e-s-r-t-u-u-r-t-s-r-t-d-g-t-u-r-e-s-t-o-p-q-r-s-t-u-v-w-e-r-t-o-t-u-t-e-r-s-t.start

The equations are not computable the reason being that there is no solution but alleviations only

Abraham

create.blockandbaneverythingþcitsmitsagtswrigglersfor386ť.start

When people have lived for a very long time they die for the first days where Yahweh knows of their deaths and look for answers as to revive them but if they are dead for longer death becomes permanent because they cant be saved if we ask what can be then this is the answer we can always ask what can be but then ask what can be but is not if we ask what can be then this is the answer we can always be what we can be but we can always want to be what we cant be so if we want to be then this is what we want to be we can be dead but wake up after 8 days but what is the effect first and why the effect is that we can ask what can be but is to be then death is the design after a long period of time then if death is the solution then creation failed because creation must keep going on for Yahweh to receive his own agt the richlist that comes automatically now if we ask what can be of people then this is the answer humans can be told what to do but must not tell anyone what to do because if we do then we remove what can be if we say can we make adam our own representative then we can but davidgomadza

create.sendallagtstodeaddeadmitcit.start

initialised

how do we deal with dying for 8 days start

death is the start of something terrifying for all if you die then you will die hard and painful until you have died then you can check what can be but then this is the answer we can always ask 8 questions

what has been

we can ask what can be but then ask what could be but when then ask what can be but then ask what could be then ask what was then ask what can be but when when we

answer all these questions we can always ask what can be but this is what not to do if we ask what has been in case of others david has already visited but how death can start as a response to danger ahead or as a result of past activity if we ask what can be then you must say can we ask what is to come then we can say death for most from new þ antidotes being given by the þ to those who lack an enzyme called yep because lack of this enzyme make those who died forget easily who to trust then ignore safety then forgets everything that has been said

create.cloneenzymeyepxinfinityandkeepinsidethensendtoallmy:davidgomadzaimages(5

2).start

Ibrahim died for 8 days for the first time in ad2834 then again in ad4232 then again in ad5128 then again in ad5623 and he said God i died but it can be for 8 days and if we can

create.x-y-s-t-u-f-g-g-t-h-j-i-w-a-t-q-e-r-t-y-u-g-f-j-o-p-d-m-t-u-j-d-f-g-h-y-g-t-u-f-g-h-g-t-d-a-o-a-d-q-t-u-v-e-t-s-d-g-e-t-u-p-q-r-s-u-v-e-t-g-t.start

Equation because there are no answers

Since there are no clear answers we can only start by asking what things related to death old people have or dont have and their relationship to enzyme yep then look at what the dead have as related to yep and death

What can cause people to die and wake up

What can be death but is not

sleeping for 8 days can be death but must be death to be death that means for anything to register as death there must be death and death is a function of time

if we ask what can be death then this is the answer the inability to breath and the ability to dream deep are categories of death and if we ask what can be not breathing then its everything in slow speed that the body cant cope hence must all ask questions what can be but is not

How to deal with old age

Adam

this is now bone of my bone flesh of my flesh and he looked at her and said lord i thank you and say you mean good life for me said adam heuter and sat down

for the first time in

Gene hackman and clinteastwood in create code old age sucks because everything becomes loose even your anus but the worst problem is heartburn in old age because the more older you get the higher the fat i mean the bad fat is if i ask myself how many times i have fallen asleep due to heartburn its a countless times we can all say that old age can be a problem and as such must be prevented if possible can we ask what can be but is not the answer is that we can be but we must be prepared as there is no cure for old age but we must make sure that we must ask what can be but is and check what is to be and then go on to look for answers if we ask what is to be then we must say when that means we must be at some point in the future and if i ask now what could be then this is the answer we can be as good as we want if we plan in advance then everything can be as we want them to be

Heartburn

Heartburn is when your heart is retreating from a big size to a smaller size that means that we can actually ask what has been and what can be and how heartburn is easy to treat because its on the richlist and is one of the 28 coins solutions without wasting time here is the equation and hopefully with the coins

Solutions to deal with old age or to stay young

Dealing with everything becoming loose

In old age anus and all origices become so loose most old people have to wear dippers all the time this is because everything becomes so loose nothing can stay inside instead of everything functioning the same until the end zeus plans were that humans must have the same system like davidgomadza but use natural disasters to kill people but Waaaaaer suggested that some must loose codes so that in the end this helps them to die so he said if i remove one or two then humans will be able to die easily that means to find solutions they might need just to adjust these codes then everyone looked at him and said what solutions and to what because if you had left things the way they are then they would not have died then he laughed and cursed calling all idiots and left therefore

you explain because some people think this is still so because if humans dont know how to correct death will follow zeus plans took a billion years to make and will take more years to make if we remove then humans can spend billions rectifying in that case we get our agt fast than if we let them wait for perfect plans hence he adjusted 8 codes fixed by zeus to loose hence

anus rims expire after 64 years old from strongest strength to loosest strength hence to fix
