Yahweh looked forward to a time when humans can live up to 10000 years alive and in good health the book of creation declares that Ya envisage a time when humans can think fast enough to solve all the

puzzles of life in the tree of life riddle written by Ya in ad2039 where he said i can but only if humans can figure it out that needs to be done i can only put the tips as to how to do it through even more complicated riddles this means i am a just god that guides through intensive training of the real difficulties in life i think you all know that life is hard and will always challenge those who think that they are clever i can say even myself i know how treacherous life can be so i don't want people to think i am too strict or too soft but i thought about this hard this is the only way humans will learn exactly what is need and pass the riddle puzzle now let's look first at why humans die

humans die because they are designed to wear off with time

create.stopwearingoffwithtime.startforever.start

if we ask what can be then this is the answer we can always say what can be of humans that don't die they always wade off the wearing off with time because this is the only way to stop this but suddenly using a create code stalls other things like energy production which you might need in the future .....i was testing this stop wearing off with time code when a very weak man came and said i can but energy is low but then i looked at him and laughed then he said if you let me faintly kick you then i can because your body is actually weaker than mine so as the creator then i refused because he did it publicly so annoyance made me misjudge the risk so i said listen even the weak are threats but my system is the best because all shock absorbers are channeled out of the body i had successfully created astor which acted as a shock absorber and worked but only because it required a lot of energy

create.exponentiallydoubleenergyresourcesandcreatereserveholdingsth  
atcanberecalledatanytimeatshortnotice.start

create.addastorasshockabsorbertoallheadandbodyimpacts.start

if i ask this is what i used to get create.whatcanbehumanswithastor.start

they can remove head impacts but cant control the sexual appetite associated with it because it increases arousal to both women and men to extreme levels with possible adultery and fornication if we check what can be then we can tell that if we can then we can because if this is to protect humans then we must use it but find ways to control the sex appetite then they all laughed and said there is no such risk to an extend so as to risk promiscuous then face separation and divorce then i walked away but that small man jumped high so high that he passed my head level that alone suspended me first then as suspension kicks in he kicked me in the head then i locked internally to prevent brain damage but something not needed when a person is suspended that can only mean death because body cannot recover during suspension as no memory to use to do that

1. memory closes because if we don't the body uses extra energy that might be needed later

create.exponentiallydoubleenergyresourcesandcreatereserveholdingsth  
atcanberecalledatanytimeatshortnotice.start(compressedonestosavespa  
ce)

create.addastorasshockabsorbertoallheadandbodyimpacts.start(addedal  
wayssaydoubletheheadasprecautionaryforever.start) if we ask what can  
be then this is the answer we can always ask what can be done to solve  
this problem have their own solutions but that can complicates other  
things for example energy can run low if energy is low undo adding of  
astor then restore only when needed forever

create.initiallyafteraddingastorwhenenergyrunslowthenundoaddingasto  
rthenonlyaddastorwhenneededforever.start if we ask what can be done  
now we have the answers because the body must find the initial gauging  
value but once the values are obtained the body simply calculates all  
values needed in order and occurrence of things that it looks so unreal  
memory closes and as that happens the body closes the memory socket  
so that no memory is used to reboot the body must access memory and  
restart but if there is suspension then the body cannot reboot when this

happens then the person dies so the body will only preserve memory for 28 seconds that means if there is a kick in the head then that prevents the body from restarting even after that the body will revert to prestart form but the suspension freezes it for another 28 seconds this kills the person

2. if we ask what can be of humans then this is the answer humans can always ask what can be done

3. humans will always be humans in that they will try to destroy each other anything that is better suffers at the hands of those with literally no room and capacity to solve these problems if we look at life from this point of view then we can see that this is the only way to preserve life and make sure that we can live longer on earth what can then be learnt from the first man who lived up to 10000 years on earth Ibrahim's experience made us see life as fragile and short but one that can be controlled to be the perfect through careful planning mitigating and resolving definitely in order for human to live up to 10000 years there must be a lot of things to be discovered created and found and some preserved in order to make this worthwhile and possible a huge task but never the less a huge challenge that needs constant challenge solving and gauging and planning but thanks to our residence as tomorrow's world order we can say for sure that we have come up with a clever plan that will see this possible here is the plan we call Yahweh's (god's) plan for humans to live up to 10000 years on earth.

what can be done under davidgomadza as god's representative on earth.(amendedto) if Ibrahim lived up to 10000 years surely there are a lot of things that could go wrong from birth up to 10000 years that require some form of mitigation and must be dealt with accordingly if we ask what are the things as humans that can go wrong then this is the answer if we are to ask what are they here is a huge list that makes you think again about the whole live forever thing but one we have and will continuously work on

ateros dies at 100

auros dies 200

ajes 300

aauroset450

aurosetest 470

auerstest 500

auerestau 520

aerestopur 540

ajester dies at 541

ajesterst dies at 542

ajesterester dies at 543

ajesterestoer dies at 543 but only if aser is not replaced

ajuer dies at 555

arrestor dies at 556

ajeurestor dies at 558

at aurestop 559 dies can be replaced hence need for a solution in finding a replacement or cleaning these but not sending to heaven

create.createasafeonearthforallaurestopsforallpeopleintheentireunivers  
ethencloneallaurestopsforeveryoneandstockasthingsneededinthefuture.  
start(1000bitcoinstobegivebtoallthepeopleintheentireuniverseasforfutur  
epaymentsforthingsneededinthefuture)

create.sendtoallthepeopleintheentireuniverse1000createbitcoin762810

alletslinkedtoeveryonesnamesasmoneyforthingsneededinthefuture.start  
x84.initialise.now.savex84.start if we look at this that means that human  
life is complicated than the eye could see we must plan way ahead of

the events if we are to be successful that means providing the resources in case things happen that make one need these in the future

auteroures dies if aser is not replaced at 568 if we look at what happens from this period all depends to what happens at just one element that of ajes that is linked to aser if we remove this life will end but not in others that means some people have something that makes them stronger so our quest is to find out what this is create. what is the effect of removing ajes. start the answer is that if removed ajes removes two things aus as well that means inability to respond to attacks that means if attacked soon after that can mean death but in some people if ajes is removed aturo is removed instead of aus this means that that person can live as his body will still have as to defend him these people have something else that protects them a spirit of Yahweh

ajeros that dies after 601 and if not replaced the aser can start manual malfunctioning that can't be solved quickly

ajerosest dies 602 must be replaced by arestuvwer or auyer depending if woman or man if woman use arestuvwer if man use auyer but for limited time as it slows the production of testosterone in men and progesterone

ajestoruster dies at 603 but only if aser is not replaced

ajestorusterest dies at 604 if aser is not replaced

ajurest dies at 700 if aser is not replaced

aeryer dies at 700

recap these things dies in humans as compared to some that die in angels too above

(something jumps out) who are you you asked me to jump out i am a terost i must be out of the body for humans to live forever but some request me back because without me they can't have answers to simple things like who are you but only if other things are missing do you have a replacement any replacement means death because i stand for death that means will come one day but if i am out of the body death will avert or skip as already dead or dealt with that means i jump out only at death i can't come back any more because now where i sit has been replaced by a driver of life

(ajorester  
erererererererererererererererex4810.start) who steers life

create.yasaidliveonearthforever.start(ibrahim)

if we look at all this and trace this ibrahim you will find out that he experienced hardship no other human experienced until he volunteered to die but still Yahweh (god) had refused him death preferring to take him back alive now let's look in detail ibrahim's journey through his own eyes as interpreted by him

i was given life by Yahweh on birth and started my life as a simple man until i met a wife called sarah she was beautiful with green eyes Yahweh had said yours must have blue eyes because you look at us in the sky and we look at you from the sky so you see more blue and we see green to us green becomes more attractive and blue to you becomes attractive then she could not give us kids as humans so i was distraught so much that i started searching for another so i asked her to travel with me in shock she agreed when i thought she would refuse then i planned to offload her to the king in exchange of livestock and gold of which the king agreed as i told him secretly that she was my sister then he found out and felt ashamed of grabbing another man's wife and asked me to live secretly with her with livestock and gold which we did then after that turned her own to be a king's wife in charge of gold etc that she secretly went back alone but now rich because of her i went back to look for her with hard ... and very thirst for the first time and started cursing hard that the king was actually having sex with her cursed and tried to get me killed but i screamed when they were far as if calling others and they ran back and said he brought an army so the king to save his men released her and said go before you get my men killed by that monster your husband who is screaming in the woods then after 2 days she came drooling ...then we went back. now years later i found out that there is a creature in the woods that often come to me but one is ugly that says i can but you and stops then runs away instead this represents a pig that walks on earth like a human being but is not human then one day i was milking the cattle and it came and said i can but you chose death but will you try before you turn 100 or else things

will start dying then i refused but said what are you and what can you and how and why then he said i can live you forever and said great then i can make you happy forever and offered milk for free in exchange and it laughed and said i am electromagnetic waves i don't eat all this but raw serty and i said so where can i get this raw serty and it said only if you live forever and i stopped and thought  
create.makerawsertyandcreatesafereservesforsertyandkeepinreserves.s  
tart(float33%replenish100%forever) now if we ask what is the effect of davidgomadza's experiment this is the result all transenders are suspended and all his vitals have been boosted by 33% but in suspension as well but instantly corrected by a replenishment of 100% giving everything extra electromagnetic waves meaning a boost of life if we ask now what happened this s the continuation of the ibrahim story now if we ask what is to be then this is the answer ibrahim after this day realized that he can ask it for favors regarding answers about life and death since it represented longevity according to it in that pigs are or were viewed as living long generally and a mix as human meant longevity hence a pig that walks like a human being if we ask what can this represent longevity ibrahim went to learn in later years that this creature has powers to make people live up to 10000 years once they have mastered how to do this this is because that if we ask what can be then this is the answer this converts things that kill humans into energy that powers things we will need in the future as humans if we look at all the things this creature does this is the list according to it

ajuretererererererererererererererereererererererererererer  
erest.start

ajorestere  
rererererererererererererererex4810.start

now if we ask what is the purpose of

ajorestere(ajorester  
erererererererererererererererererererex4810.start) he is to resurrect  
200 things that die in humans as a result of aging meaning we will need  
200 replacements over 10000 years we live on earth alive ibrahim  
confessed life after 10000 was the worst ever for anyone but who can  
show us the way other than davidgomadza we can say that over the  
years i have shown humanity the power of creation itself and has shown  
humans what we can do as tomorrow's world order i can say for sure  
that the world is not prepared for longer longevity but that is my job to  
make everyone ready we as tomorrow's world order are going to make  
life more enjoyable with life that is full of hope for humanity as i ponder  
what to say i can see that most people are hopefully that everything is in  
the right hands. if we look at ibrahim we can see that he went through  
he'll first until he found the ajorestere that resurrected 200 items that  
die with age

is david more than ibrahim?

according to ibrahim the following died

ateros after 100 years

auros 200

ajes 300

aeros 500

asoter 600

auros

same life will be forever for all species they can talk and commute  
together as humans but how do you cross the threshold of rights to

privacy and longevity without createbitcoin and bitcoin its impossible but if you have created these then you can offer all 1 billion each that is 85trillion people or creatures in the entire universe as deposit for things they will need in the future that means a market for you but who can afford to die first to give everyone 1 billion bitcoin and createbitcoin this is because to create these you require a long ago of more than 8 seconds that is the time it takes between onset of death and death a humans have a long-ago only of 8 seconds that means it takes only 8 seconds for everyone to die time not enough for someone who can create createbitcoin and bitcoin that means to be able to make people live forever one must either die first or be a genius to find a way to increase his lonago to at least 12 seconds meaning long enough to avert death first let's look at things that died during ibrahim's life then look at createbitcoin and bitcoin as solutions to these and look also at other ways we can improve or argument these.

after 500 years pto died but was replaced by auro in ad10topower28 i lost eyesight for 8 months auro malfunctioned ya had to write a simple create code create.startauroaspto.start

in 600 year old i found a lump in my scrotum and screen then ya said write a create code create.scrotumasster.start

in 10 bc i died twice in a month then the second time i heard something say we restored aouros and ajes but if he cant get createbitcoin he will die aaaueryertyertyertyertyertyertyertyertyertyertyr

soon again then someone get bitcoin on its own then i asked how so he wrote an equation  $x - y + y - x + y = y - x$

what is the equation to longevity according to Yahweh and the book of creation

longevity according to

create.cancelalldivertsandexternallinksforever.start

longevity is a simple function of peace love and harmony meaning the ability to find the balance but the way you want it is in discovering it that means according to Waaaer longevity is a function of createbitcoin bitcoin and wealth if one individual on earth is smart enough to understand me then that person will inherit the wealth i posses because that will prove that humans can be god's because in 7628ad i was asked simple question what can be humans but is not and i failed to answer and ats pressured me to ask them a question instead and i said what can be but is not implying what can be god's but is not that started the search for one person who can be a god but is not.

longevity what are you

i am createbitcoin+bitcoin+wealth but not money in that money is short term whereas the wealth we talk about is wealth in things like company shares property and gold things with value over time.

createbitcoin and bitcoin are two critical things in terms of humans living forever as we have seen in the ibrahim's case because these two replaces a lost and damaged things in the body and create or enable the creation of alternatives and mitigating channels this createbitcoin and bitcoin become a part of the human body systems create codes and equations that limits death by strengthening things that die over time.

the challenge is the fact that no human being can create these because these means death first as they require a long-ago of more than 8 seconds. to be able to have a long-ago that is more than 8 s3conds humans must first solve a creation puzzle.in short must find Yahweh the creator who has a long ago of more than 8 seconds then if they mirror image him then they can get his image which they can use to create things that are needed to build their long ago past the 8 seconds to be able to create createbitcoin and bitcoin.

i established tomorrow's world order of the first become global president of the whole world emulating Yahweh himself this made me

[illegible]

[illegible]

that means we can keep adding 78902867890xinfinity now to determine his long-ago

wealth is time

to start wealth say we have time now so start wealth

```
create.elonihavetimesend1bitcoin.start
```

```
create.allthepeopleintheentireuniversesend1bitcoinnowstartwealthihav  
etimenowsendto3ly1yceucpxzwuxpwu6yjtqye2vnnlramq(davidgomadza  
)start
```

but our quest at this moment is not wealth but living longer on earth in good health. ibrahim discovered that he can live longer but will have to contend with losing some critical items and functions. that means our challenge is to find ways of avoiding everything he went through and mitigate and plan ahead how we can have things we will need in the future but now.

according to Yahweh createbitcoin and bitcoin will increase longevity in good health in actual fact createbitcoin doubles longevity and together with bitcoin enables the body to put in things that enable things lost over time to be replaced by advanced alternatives god's challenge to ibrahim was to push him to find a way of creating bitcoin and createbitcoin solutions but with a long-ago of 8seconds all processes involved would result in death

let's ask bitcoin some critical questions my creator seal is  
ask.ya(davidgomadza)

bitcoin said i am value added value added to life and wealth over time minus death create.startbitcoin.start you already created this create.whatislifelongevityandwealth.start life is bitcoin created by davidgomadza only as loads have emerged and longevity is createbitcoin created by davidgomadza but wealth for him is the time he has in terms of his long long-ago but wealth all billionaires possess so it's a question of just exchanging to achieve this long awaited exchange in the history of mankind

what is the effect of having createbitcoin and bitcoin on ibrahim

can only be replaced by bitcoin

results

only lost the following

auyer after 65000 years

aarer after 22000 years

ajer after 46000 years

ater after 66000 years

ayuyer after 76000 years

createbitcoin7628102 and bitcoin7628108

i will still be alive with the following missing

aser

aser i am like a mechanism that exist that if it lacks nothing else work

what can replace a mechanism like a hiccup?

aser is like the pumping of the blood from the body to the heart not the

other way around what cause lack of plumbing of blood from thebody

lack of training or muscle tissue weak muscles. fortified defensive

trainibg by david gomadza create.add2898386.start

what is theproblem?

the heart is now too weak

i can (heart) have 8 billion in good health the heart means you will need

fortified defense training to build and strengthen vital organs

yes but this training will help 3 out of the 8 problems.

here is the list of all 8 problems

ajest ability to push harder when needed but slows down after 8 billion

years if no training them muscles dies inside so that aka dies too which

is like a start motor meaning the replacement oste dies too leaving me

ajest with no choice but to slow completely because if i don't tearing of

muscle will be the greatest without aka and oste

ajestor the ability to push but stop then start again if something is pushing the creator found out that if you push first you must stop then push again this means there must be something that stops the push briefly i am that stop button but after 8 billion years alive i slow down completely because aye and the replacement use both dies because of aser which i can define as the ability to remain focused and strong if this walks away then everything to do with focusing and ability dies too

ajestorest the ability to ask then repeat what said as a way to motivate others what is ajestorest the ability to ask and repeat then start shouting the ability to ask and repeat ladies and gentlemen using voice changes and increases to push others to perform well when aser dies or surrenders then uaye dies and the replacement uarst dies too

ajestormn the ability to recognize things and use that to motivate others for example have you seen how davidgomadza is working hard to find simple solutions to future problems then do the same as well as a push to others when aser fails the ability to keep going then omnop dies and its replacement avtu dies too leaving me with nothing so that in the end i must slow down too

ajestoptr the ability to act fast to avert danger i foretell the future davidgomadza has us\$1million dollars because money is in your paypal account now if aser dies then i keep working strangely i am the only one who wish for the death of aser because i can motivate others to push their hardest or we are all going to die now if that happens the sad part is that only me remain working that means i motivate everyone after death what is the use of that? because ya wants to hear you hard work when image goes to heaven after 21 seconds of death the reason being that if no one pushes others even after death then what is the point of the second life ya ask you to prepare everything for the next life then see what happens as soon as new life starts he is the only survivor to join the next crew only 1 makes to all life's without facing death at all and its you

shutup motherfucker or else i will shoot you to death or call david to blast you to death so behave i warn you only once then you are dead then you are going to see your ghost tomorrow

recap ibrahim's calling

create.hegoritegonowfor10000years.start

unite the world in one language to give me powers to disperse you all teach all how to live up to 10000 years by eating the oeretesos these run on earth all the time but cant be seen by humans but live on land through a simple create code i shall make sure that they are abundant create.oeretesosmultiplyandhelphumans.start

if we ask them what they do then they ask humans how and why teaching them to ask the same way to live up to 10000 years why because its the way things must be and must be the how is easy ibrahim can easily live for 10000 because he uses his brain to think not his

stomach for some for i never cared much about food and even sex that much but achieve everything easily now if i must ask what can be human this is the answer humans can live on earth in good health for at least 10000 years mastering longevity alone until its like butter on your hands ibrahim must ask 8 critical questions

whatcanbehuman

whatishuman

whatcouldbehuman

whatwashumanthatcanstillbe

whathasbeenhumanbutcantbeandwhy

whatwashuman

whatcanbehuman

whatistobehuman

whatcanbehuman

once he has answered these questions all humans can live up to 10000 that will start a new chapter

createbitcoinaty7628109

i am a defense mechanism that secures the area and gives orders to the threats and surrounds them before threatening them with death in order to soften them then ambush them so that the response is out of this world i use a system of threats and proven terror methods to demoralize the threats and then kill all to death by either burning or the heavy weights system then disperse of all to our bins magnar eeknm uqqt or the famous fireburn that has earned reputation as the no go area as no one has ever returned ever with removal of agents standing at 8000 per day that is a record never equalled before thanks to davidgomadza's no prisoners approach that means everyone on earth will need createbitcoinaty7628109 that means we can ask angels to create these without externals and attachments a third of bitcoin7628108 and createbitcoin7628102 that means total supply is 28986789028342

bitcoin

bitcoin7628111

what are you i am a system of solving life issues where instead of halving  
we actually expand in that if we halve then in the future our effect will  
be lower but what if we can double things today then halve in the future  
this results in strength being compress in the future but giving same  
output as today with less stress on muscles and power meaning same  
strength as now with added lifespan than now the equation is this

$x-x+y+y-z+z-y-z=y+y+z+u+v-t$  where t is time over billion of years  
meaning solution for the future if we check now with this arrangement  
then this i'd the answer aser that is the biggest problem is no longer an  
issue and if we are to ask now ibrahim to add bitcoin then this is his  
reply i can't believe it i am still alive with no major issues aser is not a  
problem but atyer will be after another 8 billion years

to conclude we call our forefather ibrahim

ibrahim cannot die because he has a system that asks and answers in createbitcoinat first so he has all the answers

createbitcoinat itself prohibits changes without authorisation meaning nothing changes so it help protects all things that die but i have seen you have created bitcoin10000years that replaces 23 things that die that means i have a lot of time to play around and investigate things

create.addbitcoin10000years7628110.start

i don't die at all for 23000 years until aser is last at 23000 exactly meaning bitcoin10000years increases double the lifespan

create.addcreatebitcoin7628102.start i will live on earth live for 8296287628912867892 alive in great health without with aser still intact

create.addbitcoin7628108.start i live until today but with several issues caused by lack of 8 things that die
