

## Continuous School Improvement Workshops and Data Institutes

We partner with schools, districts, and learning organizations to provide professional training. Our workshops focus on building your capacity to use data for Continuous School Improvement. While each workshop is tailored to the specific needs of the organization, the workshops will include the topics and work defined below. Each workshop includes administration of *Education for the Future* online staff, student and parent questionnaires for your school and these results are utilized during the workshop.

### Workshop Agendas

Our 1-2 day workshops utilize the CSI Framework and topics include; an overview of comprehensive data analysis and how it works with continuous school improvement, why each type of data is important, and a review of the school's data one type at a time. Our 3-5 day Data Institutes delve deeper into your school's data to find implications, understand why you are getting the results you are getting, and learn how to use data to implement a shared vision for school improvement.

### Data Analysis for Continuous School Improvement, Fourth Edition

Considered to be the user's guide to data analysis for Continuous School Improvement. This book is used most frequently as part of our workshops and institutes. It is the step-by-step "how to" for the Continuous School Improvement framework written by our Executive Director, Dr. Victoria L. Bernhardt.
