

Job Title: Site Manager – P25 Land Mobile Radio Systems

Position Summary:

We are seeking a skilled and proactive Site Manager to oversee the deployment and maintenance of Project 25 (P25) land mobile radio systems at designated sites. This role involves managing field operations, coordinating with contractors and technical teams, and ensuring that all site activities meet project specifications, safety standards, and P25 compliance requirements.

Key Responsibilities:

- **Site Operations Management**
 - Supervise day-to-day activities at radio system installation sites.
 - Coordinate site preparation, equipment delivery, and installation schedules.
 - Ensure all work is performed according to engineering plans and P25 standards.
 - **Technical Oversight**
 - Monitor installation of RF equipment, antennas, towers, shelters, and power systems.
 - Conduct site inspections and verify system performance through testing and validation.
 - Troubleshoot technical issues and escalate as needed to engineering teams.
 - **Team & Contractor Coordination**
 - Manage subcontractors and field technicians to ensure timely and quality work.
 - Enforce safety protocols and site access procedures.
 - Provide on-site leadership and resolve operational conflicts.
 - **Documentation & Reporting**
 - Maintain accurate records of site activities, equipment inventories, and test results.
 - Submit daily/weekly progress reports to the Project Manager.
 - Ensure all documentation complies with regulatory and internal standards.
 - **Compliance & Quality Assurance**
 - Ensure site work adheres to FCC regulations, local codes, and P25 interoperability standards.
 - Perform quality checks and support final system acceptance testing.
 - Assist in obtaining necessary permits and coordinating with local authorities.
-

Qualifications:

- Associate or bachelor's degree in Telecommunications, Electronics, or related field.
 - 3+ years of experience in radio system installation or site management, preferably with P25 systems.
 - Strong understanding of RF systems, site infrastructure, and public safety communications.
 - Familiarity with L3Harris, Motorola, or other P25 equipment vendors.
 - Ability to read and interpret technical drawings and site plans.
 - Excellent organizational and communication skills.
 - Willingness to travel and work in field environments.
 - Ability to pass background checks and drug screening.
 - Valid driver's license required.
-

Preferred Skills:

- OSHA certification or equivalent safety training.
 - Principals and safety of tower climbing or familiarity.
 - Knowledge of IP networking and system integration.
 - Familiarity with radio coverage testing tools (e.g., PCTEL, Anritsu).
 - Experience working with public safety agencies or government entities.
-

Benefits:

- Health and dental insurance
 - 401(k) with company match
 - Paid time off
 - Opportunities for advancement
-
