

**Walgreen Co.  
ATTN: Consumer Relations  
200 Wilmot Rd.  
MS #2002  
Deerfield, IL 60015**

**Dear President John T. Standley,**

**I was alarmed to read that Walgreens has made the decision to dispense pills that cause the deliberate death of an unborn baby and have the potential to gravely harm the mother.**

**Pharmaceutical drugs are designed to prolong life, cure a disease, or mitigate the symptoms of a disease. However, Mifeprex (generic: mifepristone) was developed to cause the death of an unborn child and the drug's intended use, when combined with misoprostol, is to take a life.**

**This matters deeply not only to the hundreds of thousands of pro-lifers who are regular customers of yours, but also to the hundreds of thousands of women and their unborn children whose lives are threatened by these deadly drugs.**

**This decision does grave harm to our communities and Walgreens should reconsider whether dispensing death would be considered one of the best business practices it could make.**

**Sincerely,**

**Walgreen Co.
