

Structured Maths Approach Assessments

These assessments are a great way to pre or post check the learning that appears in each chunk and lesson within the phase. These could be used in many ways to inform your lessons, your start point and to see how the chunk of learning has gone for your students.

Each phase assessment is split into four chunks (to match each chunk of learning) with a question that can be matched back to each lesson. You will then be able to see what still needs to be worked on or covered in your teaching time.

Phase 4 (Year 5)
 Name: _____
 Term: _____
 Year: _____
Chunk 1: Assessment
 Write this as words: 85,677
 Fill in the numbers:

One	100	
		78,990
		34,501
		66,800

Practice counting forwards:

n 1s: 35,42	n 10s: 35,42

Practice counting:

n 1000s: 35,42

Order these from smallest to biggest:
 94,533 19,870 77,890
 8,213 88,197

Phase 4 (Year 5)
 Name: _____
 Term: _____
 Year: _____
Chunk 2: Assessment
 Round these numbers:

To the closest 10	To the closest 100
32	132
1,665	1,665
12,445	12,445

Decompose and calculate:
 56,843 = _____
 90,000 + 5,000 = _____
 40,000 + 3,000 = _____
 Solve these problems:
 429 + 60 = _____
 436 - 38 = _____
 745 + 232 = _____
 516 - 67 = _____
 63 + _____ = _____
 294 + _____ = _____
 Add and subtract:
 143 + 54 = _____
 156 + 133 = _____
 6286 - 913 = _____
 184 - 42 = _____

Phase 4 (Year 5)
 Name: _____
 Term: _____
 Year: _____
Chunk 3: Assessment
 Solve these by multiplying by the numbers:
 44 x 3 = _____ 28 x 12 = _____
 55 x 5 = _____ 39 x 13 = _____
 61 x 2 = _____ 53 x 10 = _____
 Solve the word problem:
 as birds could fit in a bush.
 There were 4 bushes. How many birds were there?
 _____ = _____
 Work out space: _____

Represent these parts of a whole:
 $\frac{6}{12} =$  $\frac{2}{20} =$ 
 30% =  50% = 
 19 = _____ % 24 = _____ %

Add or subtract these fractions:
 $\frac{1}{5} + \frac{3}{5} =$ $\frac{6}{8} - \frac{1}{8} =$
 $\frac{4}{10} + \frac{2}{10} =$ $\frac{6}{7} - \frac{2}{7} =$

Simplify these fractions:
 $\frac{6}{12} =$  $\frac{5}{15} =$ 
 $\frac{4}{16} =$  $\frac{6}{10} =$ 

Write an equivalent fraction:
 _____ = 

Convert the number to the following:

Convert to a percentage	Convert to a decimal	Convert to a fraction
	0.5	
	33%	$\frac{4}{5}$
	75%	

Draw the fraction:  Write the symbol: _____ Write the word: _____ A bigger fraction: _____

Represent the different parts of the fraction:

Draw the fraction: 	Write the symbol: _____	Write the word: _____	A bigger fraction: _____
	$\frac{2}{8}$		

Subtract these fractions with different denominators:
 $\frac{1}{2} - \frac{3}{8} =$
 $\frac{1}{8} + \frac{2}{4} =$
 $\frac{5}{8} - \frac{2}{4} =$
 $\frac{2}{10} - \frac{1}{2} =$

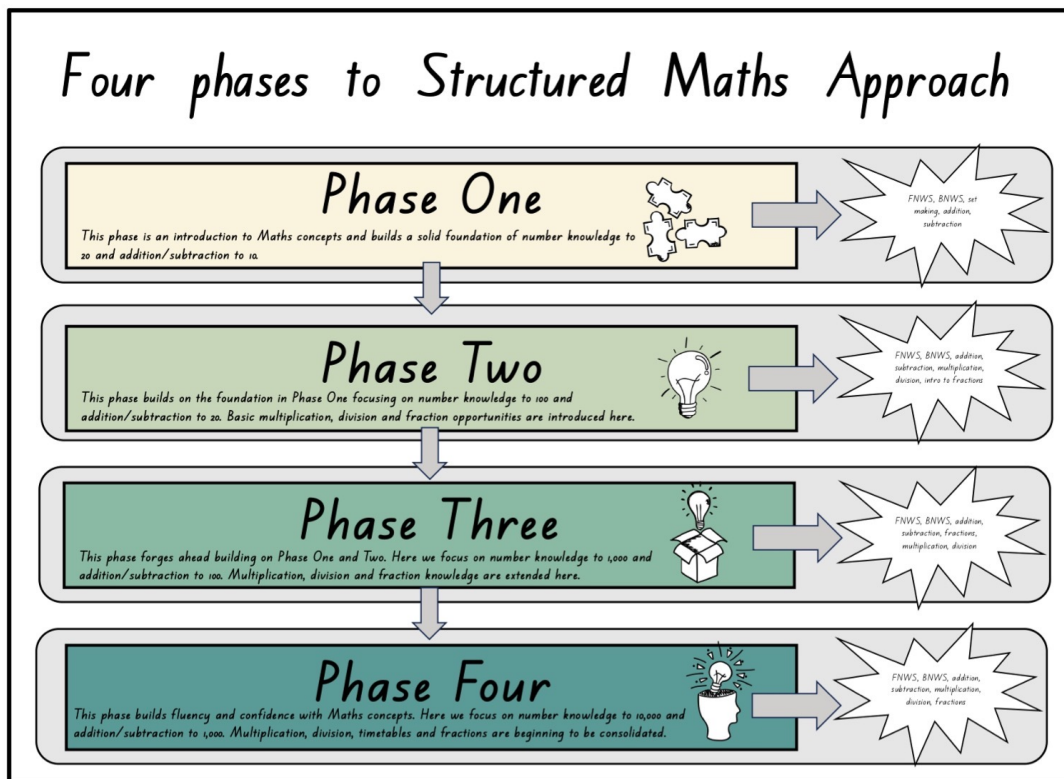

Write the fractions shown on a number line:

Simply print off the chunk you are looking to assess, complete with students and then review their answers.

You could complete another check of the chunk assessment at the end of the time period; or simply that one lesson of questions again.

The Four Phases breakdown to Structured Maths Approach

Here is the complete breakdown to Structured Maths Approach across the four phases and what each chunk will cover with their lessons.

Phase 1 (Year 0 or New Entrants)

Chunk 1 Numbers 1-10	Chunk 2 Add and subtract to 5	Chunk 3 Numbers 11-20	Chunk 4 Add and subtract to 10
-------------------------	----------------------------------	--------------------------	-----------------------------------

Phase 2 (Year 1)

Chunk 1 Numbers 1-100	Chunk 2 Add and subtract to 20	Chunk 3 Number Add and subtract to 20 Fractions	Chunk 4 Multiplication and division Fractions
--------------------------	-----------------------------------	--	---

Phase 3 (Year 2)

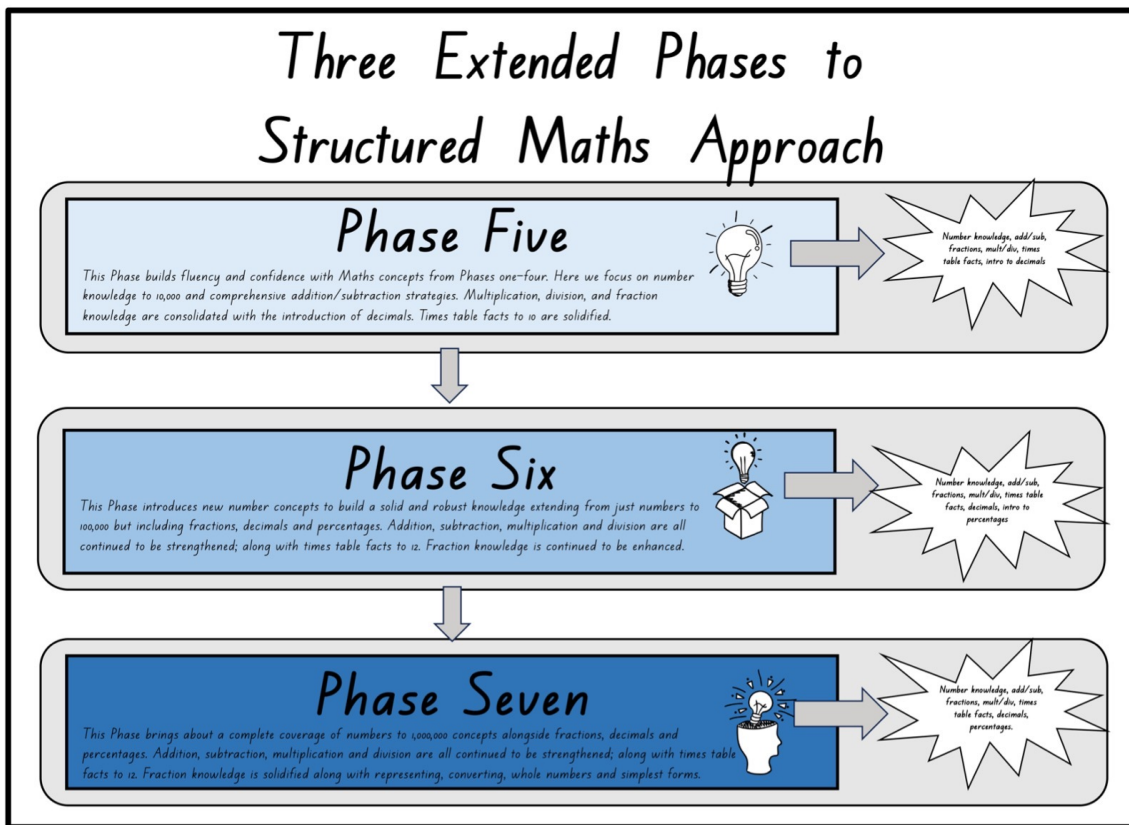

Chunk 1 Numbers 1-1,000	Chunk 2 Add and subtract to 100	Chunk 3 Number Add and subtract to 100 Fractions	Chunk 4 Multiplication and division Fractions
----------------------------	------------------------------------	---	---

Phase 4 (Year 3)

Chunk 1 Numbers 1-10,000	Chunk 2 Add and subtract to 1,000	Chunk 3 Add and subtract to 1,000 Multiplication and division	Chunk 4 Add and subtract to 1,000 Multiplication and division Fractions
-----------------------------	--------------------------------------	---	--

The Three Extended Phases Structured Maths Approach breakdown

Here is the complete breakdown to the extended Structured Maths Approach across the last three additional phases and what each chunk will cover within their lessons. This has been an add-on to the initial Structured Maths Approach plan due to high teacher demand and the need for a continuation for students in higher year groups.

Phase 5 (Year 4)			
Chunk 1 Numbers 1-10,000	Chunk 2 Addition and subtraction	Chunk 3 Multiplication and division	Chunk 4 Fractions

Phase 6 (Year 5)			
Chunk 1 Numbers 1-100,000 Fractions	Chunk 2 Number Addition and subtraction	Chunk 3 Multiplication and division	Chunk 4 Fractions

Phase 7 (Year 6)			
Chunk 1 Numbers 1-1,000,000 Fractions	Chunk 2 Number Addition and subtraction	Chunk 3 Multiplication and division	Chunk 4 Fractions

Round these numbers:

To the closest 10		To the closest 100	
32		132	
1,665		1,665	
12,445		12,445	

Decompose and compose these numbers:

$56,843 =$

$32,007 =$

$90,000 + 5000 + 600 + 70 + 5 =$

$40,000 + 3,000 + 900 + 8 =$

Solve the word problem:

I had 343 lollipops in my jar. I ate some and now there were 245. How many did I eat?

$$\boxed{} - \boxed{} = \boxed{}$$

Working out space:

How many wholes are in these numbers:

$13.41 =$

$3.4 =$

$94.10 =$

$10.99 =$

What is the value of the number underlined:

$85.\underline{33} =$

$\underline{20}.94 =$

$\underline{9}.16 =$

$6.\underline{55} =$

Write a number with a decimal in each of the boxes:

4 in the tenths	
6 whole units	
7 in the hundredths	

Solve these problems using a strategy that you know:

$429 + 60 =$

$436 - 38 =$

$745 + 232 =$

$516 - 67 =$

$63 + \boxed{} = 192$

$294 - \boxed{} = 108$

Add and subtract these decimals together:

$14.3 + 5.4 =$

$15.6 + 13.3 =$

$62.86 - 9.13 =$

$18.4 - 14.2 =$

Solve these by multiplying by the numbers:

$44 \times 3 =$

$28 \times 12 =$

$149 \times 8 =$

$55 \times 5 =$

$39 \times 13 =$

$17 \times 5 =$

$61 \times 2 =$

$53 \times 10 =$

$12 \times 16 =$

Solve the word problem:

33 birds could fit in a bush.
There were 9 bushes. How many
birds were there?

$$\boxed{} \times \boxed{} = \boxed{}$$

Working out space:

Solve these multiplication decimals:

$0.2 \times 3 =$

$0.1 \times 8 =$

$2.1 \times 7 =$

$14.4 \times 2 =$

$17.3 \times 5 =$

Solve these using division with no remainders:

$68 \div 4 =$

$32 \div 2 =$

$48 \div 2 =$

$28 \div 2 =$

$105 \div 5 =$

$144 \div 9 =$

$75 \div 3 =$

$128 \div 4 =$

$170 \div 10 =$

Solve these times table facts:

$7 \times 6 =$

$6 \times 7 =$

$16 \div 4 =$

$100 \div 10 =$

$12 \times 8 =$

$8 \times 3 =$

$110 \div 10 =$

$49 \div 7 =$

$6 \times 10 =$

$11 \times 9 =$

$75 \div 5 =$

$64 \div 8 =$

$12 \times 4 =$

$11 \times 10 =$

$72 \div 8 =$

$24 \div 3 =$

Represent these parts of a whole:

Convert the number to the following:

Convert to a percentage	Convert to a decimal	Convert to a fraction
	0.5	
33%		
		$\frac{4}{5}$
75%		

Add or subtract these fractions:

$$\frac{1}{5} + \frac{3}{5} =$$

$$\frac{6}{8} - \frac{1}{8} =$$

$$\frac{4}{10} + \frac{2}{10} =$$

$$\frac{6}{7} - \frac{2}{7} =$$

Simplify these fractions:

$$\frac{6}{12}$$

$$\frac{4}{16}$$

Write an equivalent fraction:

$$\frac{5}{15}$$

$$\frac{6}{10}$$

Add these fractions with different denominators:

$$\frac{1}{2} + \frac{3}{8} =$$

$$\frac{1}{8} + \frac{2}{4} =$$

Represent the different parts of the fraction:

Draw the fraction	Write the symbol	Write the word	A bigger fraction
	$\frac{2}{8}$		

Subtract these fractions with different denominators:

$$\frac{5}{8} - \frac{2}{4} =$$

$$\frac{2}{10} - \frac{1}{2} =$$

Write the fractions shown on a number line:
