

Insmed is a global biopharmaceutical company dedicated to the development of treatments for serious and rare diseases.

Insmed employees work with a profound sense of urgency to deliver medicines in therapeutic areas with the greatest needs.

At Insmed, the needs of patients serve as our compass point when setting priorities for the company and weighing difficult decisions. Our five core values—collaboration, accountability, passion, respect, and integrity—set the tone for our company’s culture and guide the actions we take each day.

Insmed’s commitment to patients has no borders. In addition to our global corporate headquarters in Bridgewater, NJ, we have offices throughout Europe and in Japan, with approximately 500 employees who are dedicated to serving the needs of patients and their families. We are continuing to build Insmed’s global infrastructure and organizational capabilities.
