

The world's leading IGRA technology
is now available on the fully-automated
LIAISON[®] XL Analyzer

In collaboration with

DiaSorin

Sample to Insight

Introducing DiaSorin LIAISON QuantiFERON®-TB Gold Plus

LIAISON QuantiFERON-TB Gold Plus is the only FDA-approved, fully automated assay to aid in the detection of TB infection:

Streamlined workflow

Improved capacity

Reduced non-reportable reagent usage

Lab accessibility via revolutionary and trusted QuantiFERON blood collection tubes

Proven LIAISON XL Analyzer efficiency, consolidation and result quality

- Advanced QuantiFERON-TB Gold Plus tube science
- No change required to standard blood collection process
- Single tube collection now available
- LIAISON XL analyzer and reagent integral kit format
- 46 minutes to first result
- Fully automated testing solution
- Analytical results fully traceable to individual tube ID

The world's leading IGRA technology is now available on the fully-automated LIAISON XL Analyzer
