Documenting Casework and Preparation for IAT Review

North Carolina Family Assessment Scale

- On the Assessment tab, create initial assessment.
- Using the information gathered, score each subscale, adding explanatory notes if needed.
- Score each Domain based on the sub-scale scores.
- Enter the score(s) for the ACES.
- The scales with the most serious scores will be highlighted

Individualized Intervention Plan

- Click on Create IIP.
- Using the Assessment subscales, choose up to 3 challenges for intervention.
- In the IIP box, choose the domain, then the subscale.
 The goal for the subscale will populate the field.
- Consider family strengths and challenges in choosing interventions.
- Choose provider(s) for the family to attain skills or support to achieve the goal.
- Multiple referrals may be made for a family
