VARIETY	SIZE	MATURE SIZE	DESCRIPTION
<b>CONIFERS</b>			
Fir, Balsam	12" - 18"	45-75 ft.	Slow growing tree, growing no more than 12" annually. Trees feature a pyramid-like shape and soft, flat needles.
Pine, Red (Norway)	8" - 16"	50-70 ft.	Needles are 4" - 6" long, flexible and a dark yellow-green color. Grows at a moderate to fast rate in full/part sun. Prefers sandy/well drained soil.
Pine, Scotch	7"-15"	30-50 ft.	Fast growing tree. Bluish-green needles are produced in pairs, sometimes turning yellow in winter.
Pine, White	7"-15"	50-80 ft.	Bluish-green color needles are 3" - 5" long, very soft and flexible. It grows fast and prefers partial sun. Grows well in rich moist soil, but does best in moist sandy loams.
Spruce, Black	7"-15"	20-50 ft.	Slow growing tree, droppy branches with upturned tips. Like wet soils.
Spruce, Norway	7"-15"	50-80 ft.	Large, pyramidal tree with long, cylindrical cones that hang like ornaments from the weeping branches against the dark green foliage. This sun-loving tree is often used as windbreaks, screens, or hedges in large-scale landscapes.
Spruce, White	5"-12"	40-60 ft.	Prefers sun to light shade. This medium to larged sized conifer has slender branchlets and somewhat smooth, flaky bark.
<b>DECIDUOUS TREES</b>			
Ash, Mountain	12" - 18"	30-40 ft.	Medium sized tree which flowers in May to early June. Fruit is bright orange to red in the fall and into the winter.
Birch, Paper	18"-24"	50-70 ft.	A native tree which grows relatively quickly. White bark peels off into strips. Prefers sun to partial shade.
Birch, River	12" - 18"	40-70 ft.	Leaves turn a golden yellow in the fall. Seeds attract many birds. Prefers sun to partial shade.
Cherry, Black	12"-18"	50-75 ft.	It is perhaps most noted for its profuse spring bloom, attractive summer foliage and fall color. Fragrant white flowers in slender pendulous clusters appear with the foliage in spring. Flowers are followed by drooping clusters of small red cherries that ripen in late summer turning dark purple-black in September.
Hackberry	12"-18"	30-50 ft.	Prefers full sun and moist soils. Purple fruits tend to hang on the tree during winter months and will attract birds.
Maple, Sugar	12"-18"	60+ ft.	Sugar maple is often 80' or more tall with a trunk up to 3 ft. in diameter. It has a large, dense and rounded crown and is one of the giants of the forest. Deeply furrowed gray bark which turns almost black when wet. Sun to partial shade.
Oak, Red	12"-18"	75+ ft.	Medium sized tree , typically growing at a medium rate. Leaves will turn brownish red in the fall. Will produce acorns at maturity.
Oak, Swamp White	18"-24"	65 ft.	Bark is thick, deeply and irregularly divided by fissures, grayish brown color. Leaves are dark green and shiny above, grayish and fuzzy beneath turning brown in fall. The nut provides a food source to wildlife. Requires moist soils, moderately shade tolerant and slow growing.
Oak, White	18"-24"	60-80 ft.	Grows at a moderate rate in full sun and rich, well-drained soil. Produces sweet edible kernel. Excellent species for wildlife and wood products.
Walnut, Black	12" - 18"	70-90 ft.	Tall with deeply fissured brown bark. Important timber tree. Fast growing. Prefers moist, well drained soils. Nuts eaten by squirrels, red and gray fox and humans.
<b>SMALL TREES &amp; SHRUBS</b>			
Apricot	12"-18"	12-16 ft.	Prefers full sun. Will produce white to pink flowers. Fruit will ripen towards the end of July to August.
Crabapple, Red Splendour	12"-18"	15-20 ft.	Produces beautiful rosy red flowers and small red fruit that attract birds and cling to trees into the winter.
Cranberrybush	12"-18"	8-12 ft.	Produces white flowers in May to middle of June, and bright bunches of red berries in August.
Dogwood, Red Osier	8"-18"	3-8 ft.	Small shrub blooming May-August. Does well in part shade, sun; open wetlands. Flowers provide food source for a variety of pollinators. Stems are reddish green during the growing season becoming deep red in dormant season. Leaves turn shades of red, orange and yellow in the fall. Fruit is a round, white berry-like drupe.
Elderberry	12"-18"	5-12 ft.	This shrub prefers rich soil. Dark fruit attracts many bird and mammals. Fruit widely used to make wines and jellies.
Ninebark, Common	12"-18"	6-10 ft.	Produces small white or pink flowers in late spring, which give way to clusters of reddish fruit. Prefers sun to partial shade.
Plum, American	12"-18"	12-20 ft.	Attracts a wide variety of wildlife. Fruit ripens in early summer and are best suited for preserves and jellies.
Serviceberry (Juneberry)	12"-18"	15-25 ft.	Large group of small trees or shrubs that dot woodlands, meadows and roadsides. Blooms early, April-May, good for pollinators. Dark purplish-red fruit is used by humans and wildlife. Shrubs provide nesting habitat for birds. Leaves turn red in fall.
