VARIETY	SIZE	MATURE SIZE	DESCRIPTION
<b>CONIFERS</b>			
Arborvitae, Techny Tr.	12" - 18"	10-15 ft.	Evergreen compact, broad-based, conical-pyramidal tree that is noted for its rich dark green foliage that does not yellow in winter. Makes an excellent hedge plant and well suited for windbreaks.
Fir, Balsam	12" - 18"	45-75 ft.	Slow growing tree, growing no more than 12" annually. Trees feature a pyramid-like shape and soft, flat needles.
Pine, Red (Norway) Tr.	8" - 16"	50-70 ft.	Needles are 4" - 6" long, flexible and a dark yellow-green color. Grows at a moderate to fast rate in full/part sun. Prefers sandy/well drained soil.
Pine, White Tr.	8" - 16"	50-80 ft.	Bluish-green color needles are 3" - 5" long, very soft and flexible. It grows fast and prefers partial sun. Grows well in rich moist soil, but does best in moist sandy loams.
Spruce, Norway	7"-15"	50-80 ft.	Large, pyramidal tree with long, cylindrical cones that hang like ornaments from the weeping branches against the dark green foliage. This sun-loving tree is often used as windbreaks, screens, or hedges in large-scale landscapes.
<b>DECIDUOUS TREES</b>			
Black Walnut	12" - 18"	70-90 ft.	Tall with deeply fissured brown bark. Important timber tree. Fast growing. Prefers moist, well drained soils. Nuts eaten by squirrels, red and gray fox and humans.
Butternut	18"-24"	30-50 ft.	The twigs, leaf stems, and leaflets, especially in the early stages of growth, have sticky hairs. The flowers and leaves are produced in May. The edible nut ripens in October. Also, known as "white walnut." Grows best on stream banks and on well-drained soil.
Cherry, Black	18"-24"	50-75 ft.	It is perhaps most noted for its profuse spring bloom, attractive summer foliage and fall color. Fragrant white flowers in slender pendulous clusters appear with the foliage in spring. Flowers are followed by drooping clusters of small red cherries that ripen in late summer turning dark purple-black in September.
Maple, Red	18"-24"	50-75 ft.	It is perhaps most noted for its profuse spring bloom, attractive summer foliage and fall color. Fragrant white flowers in slender pendulous clusters appear with the foliage in spring. Flowers are followed by drooping clusters of small red cherries that ripen in late summer turning dark purple-black in September.
Maple, Sugar	18"-24"	60+ ft.	Sugar maple is often 80' or more tall with a trunk up to 3 ft. in diameter. It has a large, dense and rounded crown and is one of the giants of the forest. Deeply furrowed gray bark which turns almost black when wet. Sun to partial shade.
Oak, Red	6" -18"	50-75 ft.	A medium sized, deciduous tree with a rounded to broad-spreading, often irregular crown. Typically grows at a moderate-to-fast rate to a height of 50-75'. Leaves turn brownish-red in autumn.
Oak, White	12" -18"	60-80 ft.	Grows at a moderate rate in full sun and rich, well-drained soil. Produces sweet edible kernel. Excellent species for wildlife and wood products.
<b>SMALL TREES &amp; SHRUBS</b>			
Crabapple, Dolgo	12" -18"	20-30 ft.	Crabapple that is particularly resistant to apple scab and is grown for its large edible fruits. Blooms in spring, usually May. Used in urban landscapes, flower buds may be red opening to pink or white flowers.
Button Bush, <i>Cephalanthus occidentalis</i>	12" -18"	15 ft.	Native shrub in the Coffee family. Flowers form white, sphere-shaped densely packed clusters that attract butterflies and other pollinators. The fruit persists throughout the winter providing food for ducks and other waterfowl. Commonly found in wet open areas, low woods and swamps; tolerant of wet soils.
Honeysuckle, Dwarf Bush, <i>Diervilla lonicera</i>	18"-24"	4-5 ft.	Native honeysuckle shrub that works well in dry, shaded areas and spreads through rhizomes. The flower is attractive to bees and moths. Fall foliage is red.
Ninebark	12" -18"	8-10 ft.	Native shrub in the Rose family June flowering plants with pink buds, opening to white flowers. The bark of old stems will peel in several shades of brown hence the common name "Ninebark." Commonly used for privacy fence and excellent cover for birds.
Japanese Lilac Tree	5'-6'	20-30 ft.	Beautiful ornamental tree known for its white flowers. Leaves are dark green, simple and opposite. Flowers bloom in upright spike-like clusters. Popular landscape tree. Flowers are not as strong smelling as common lilacs and is more disease resistant.
Plum, Wild	8"-18"	12-20 ft.	Can be included in farmstead and field windbreaks, as well as wildlife and recreational plantings. The plum furnishes both good habitat and food for wildlife as the plants mature and may form a thicket.
Winterberry, <i>Ilex verticillata</i>	12"-18"	5-20 ft.	Native shrub in the Holly family that does well in part shade, sun; moist to wet soils; woods, thickets, bogs, swamps, swales, shores, stream banks and wet ditches. Leaves are 2"-4" long with a dark green upper surface and light green lower surface. Fruit is bright red, persisting through the winter. Flowers are important food sources for bees, berries are an important winter food source for birds and small mammals.
