We never think a crime will happen to us, until it actually does. While sometimes unfortunate things do happen unexpectedly, it is important to be equipped with the knowledge and skills needed for personal safety and crime prevention. Having a personal safety strategy in place and knowing the techniques and tactics you can use to avoid becoming a potential victim can help you live smarter and be safer. Taught by a female instructor. Learn how to be the wrong person, tips for surviving a violent attack, less lethal options, some hand-to-hand self-defense, selecting the right firearm, and the different carry options for women. Must be 15 and older to attend.
