

GROWN BY THE GAME

## ABOUT DUNZO

With three generations of combined experience, our group continues to deliver the pinnacle of craft cannabis perfection. Unleashing exciting flavors and strains into the community for enjoyment. Dunzo quickly became known for its exceptional buds that stand out as visual delights, but its appeal extends beyond aesthetics delivering a satisfying and enjoyable session. Our unique strains with amazing terpene profiles offer exceptional cannabis to every adult for every occasion. Meticulously cultivated to embody the essence of the cannabis artistry.

We are a family-owned and operated company that only offers cannabis that we cultivate. We are a true single-source outfit and are deeply community-driven. Our relationships in the cannabis space are built on reliability, honesty, and the ability to deliver resounding quality with unique experiences in our cannabis flower's flavor and terpenes.

Our father, a humble pioneer in traditional cannabis, cultivated as far back as the 60's, 70' and 80's from New York to California. He was forced to do a brief period of time incarcerated for his belief in the cannabis plant and its power to heal and bring relief to patients and recreational users alike; those whom he helped gain access to cannabis.

Currently, Dunzo is operated by 3 family members. Two of which have been in the cannabis space since the 90's as well as their son who is going on his 6th year being involved in the cannabis industry and has done everything from pack pre rolls, handle distillation, build out grow spaces and run communication, to learning the nuances of craft cultivation, advanced drying techniques, proper curing methods and more. A family that truly lives in the culture.

Dunzo is a quality and value-driven cannabis brand with a deep desire to provide our consumers access to craft cannabis that is unique in aroma, structure, and in the mouth experience for enjoyers. Our mission remains true; to remove the negative stigma surrounding this high-powered plant and help people gain a deeper understanding of the positive impacts that cannabis has to offer.
