THE HEALTHIER CHOICE OF GUMMY!

THE DIFFERENCE WITH OUR BRAND!

WHAT KIND OF CANNABIS EXTRACT ARE YOUR GUMMIES INFUSED WITH?

Our gummies are infused with "Liquid Diamonds".

Liquid Diamonds are pure **delta-9 THC** oil that resembles the viscosity of distillate. Unlike distillate, Liquid Diamonds do not undergo any type of distillation. Distillate goes through two to three filtration passes to clean it up and purify it from the ethanol crude. This leaves lots of waste and forces the oil to be heated, cooled, and subjected to high pressures as it distills. Which is why delta-9 THC in distillate has a certain burnt smell and flavor.

Our Liquid Diamonds undergo a much more controlled process ensuring its purity and flavor. Our typical purity has been between **93-96% delta-9 THC with 2% in minor cannabinoids** and **+/-5% strain specific terpenes**. Using this process ensures that our Liquid Diamonds have better smell

ZUTED ENHANCED WITH TERPENES

Terpenes are fragrant oils found in cannabis, fruits, plants and herbs. We use terpenes to enhance the optimal effects that a Indica, Sativa and Hybrid produce. Terpenes are responsible for the smell and physiological effects associated with a specific cannabis strain.

INDICA ENHANCED:

LINALOOL, MYRCENE, BETA-CARYOPHYLLENE AND TERPENEOL ARE USED FOR OUR INDICA TO PROVIDE A SEDATIVE AND RELAXING EFFECT.

FOUND IN: CHERRY KIWI, POMEGRANATE, CITRUS BLAST

SATIVA ENHANCED:

LIMONENE, ALPHA-PINENE, BETA-PINENE AND VALENCENE ARE USED IN OUR SATIVA TO GIVE YOU A HEADY UPLIFTING EFFECT.

FOUND IN: TROPICAL TWIST, STRAWBERRY WATERMELON, LYCHEE

HYBRID ENHANCED:

LIMONENE, ALPHA-PINENE, BETA-PINENE AND LINALOOL ARE USED WITH OUR HYBRID, WHICH WILL PROMOTE A EUPHORIC SENSATION AND HELP TO CALM STRESS LEVELS.

FOUND IN: APPLE PEAR, VACATION VIBEZ, HAPPY HOUR VIBEZ

NANO MOLECULAR!

Zuted gummies utilizes nanomolecular technology to create the fast-acting rapid onset process in each batch. We take our great tasting gummies and infuse them with cannabinoid particles smaller than a wavelength of light, which increases the speed and amount that enters into your bloodstream. With only 5mg or 10mg of THC per gummy and an average of 10-20 minutes for onset, these are the perfect gummies.

MELTING POINT?

MOST GUMMIES CONTAIN GELATIN, WHICH HAS A MELTING POINT OF

95
DEGREES
FAHRENHEIT

WITH OUR GUMMIES THE MELTING POINT RANGES BETWEEN APPROXIMATELY

120-150
DEGREES
FAHRENHEIT
