## FALLBROOK RAILROAD.

---

**Will be Constructed by August 15  
From Oceanside.**

The many friends of Fallbrook who are waiting for the reconstruction of the Temecula canyon line before investing in the country of their choice, are hereby notified, says the Fallbrook Observer, that on or about August 15 of this year, Fallbrook will receive a regular train service over the line between that place and Oceanside. The Southern California already has a small force of men working on the track between Oceanside and De Luz, and the people have shown themselves so liberal in their contributions of money and work as to fully warrant the statement that the track will be repaired to Fallbrook station within the next few months.

Everyone is gratified over the result of the agitation for the rebuilding of the railroad, and the anticipation of better times in the Fallbrook country has brightened the faces of the business men and ranchers.
