

## THE DE LUZ MINES.

**Their Supplies Soon to Be Obtained  
in San Diego.**

County Surveyor Vail and his assistants have made a careful survey of the proposed road from Fallbrook to De Luz settlement, says the Observer. The distance from the station to the point of intersection with the main De Luz road, near the Heylmann ranch, is a trifle less than six and one-half miles. The route from De Luz station across the Santa Margarita ranch to El Moro has also been staked off in detail. This road will be eight and one-tenth miles in length. The surveyors have also run a preliminary flag line from De Luz station to the San Luis Rey bridge. It is understood that no further work will be done at present on the latter survey.
