

Foods to include in your diet

The Phyto-Power favourites

We have created a list of specifically chosen foods that are naturally high in important phyto-nutrients, and that should be a regular part of your daily intake.

We recommend a predominantly (but not exclusively) vegetarian diet and it is important that the fruits, vegetables and herbs are as organic as possible due to the negative effect of some agro-chemicals on the body's normal functions.

Vegetables		
Artichokes (Globe)	Asparagus	Beansprouts
Broccoli	Brussel Sprouts	Cabbage
Calabrese	Celery	Kale
Peppers (any colour)	Salad Rocket	Spinach
Spring Cabbage	Watercress
