

Honest (Gwayakwaadiziwin) Services:

Project Management: Indigenous/community engagement, permitting services, contract administration, QC/QA consulting and general consulting/contracting to provide a turn-key solution for your next project.

Civil, Geotechnical & Environmental: front-end engineering including RTK GPS topographic surveys, geotechnical investigations, environmental phase I & II assessments, excess soils sampling/analysis/classification and site grading and drainage design.

Overhead Utility Audit & Design: Our designers are USF-trained and have experience providing O. Reg 22/04 permitted and sealed design packages directly to Hydro One, LDC's and their contractors.

Why SAABE Engineering:

Expertise & Reliability: We are a dedicated team of professionals emphasizing our Canadian-based experience, bringing with it deep industry knowledge and a commitment to providing premium engineering and professional services.

Cost-Effective Solutions: Our project-focused, client-tailored approach ensures that you receive cost-effective professional services without compromising on quality.

Indigenous Partnership and Engagement: As an Indigenous-owned firm, we are uniquely positioned to assist our clients with their projects while simultaneously helping our clients build strong relationships with Indigenous communities and businesses, fostering mutual respect and collaboration.
