East Torrance Soil and Water Conservation District is Happy to Announce we now offer Virtual Fencing as one of our costshare programs!!

East Torrance SWCD will pay up to $7,500.00 for the first year only. Producers will fill out the application with the count of livestock and number of collars. In addition, they will need to have their property locations mapped out for identification of proposed area. Area must have a source of water for the livestock as the fence moves. This is not a direct replacement for your physical fences. This program is to encourage more conservation through rotational grazing. Properties must have existing perimeter fencing.

The following is a list of virtual fence manufacturers or you can find one not on this list that would better serve your needs.
