Dr. Michael Smith DC, DACRB

Chiropractic treatment of: **_MED PAY CAR INSURANCE BENEFIT_**

Med Pay is a part of most car insurance plans that covers expenses for treatment of injuries sustained as a result of a motor vehicle accident. A car accident can bring many new stressors, including having a painful injury, going without your car while it is being fixed or waiting for it to be replaced, lost time from work, paper work, and dealing with insurance companies, doctors and sometimes lawyers.

Carrying **Med Pay** on your auto insurance policy can prevent the unwanted stress and worry about who will pay for your injury care. Therefore, you should plan accordingly by reviewing your car insurance coverage and making sure you have adequate Med Pay coverage limits to suite your particular needs. Many times, there is zero coverage or very limited $5,000 coverage which can be increased considerably to minimize any future stress from unexpected and unpaid auto injury medical care cost *(MRI's, emergency room care, emergency surgery, hospital stay, physical therapy can all add up to significantly more than $5000)* … **_for just a few dollars more. Your Insurance Agent will have more details on MEDPAY COVERAGE LIMITS AND PREMIUMS. You can also contact the Illinois Department of Insurance about MEDPAY INSURANCE INFORMATION._**
