CONTACTLESS DISPENSER COMAC N24X

The N24X is a compact dispenser with a capacity of 1100 ml.
It can be attached directly to the wall or on its optional adjustable base stand.
Adjustable vaporization volume of 1 ml per use

Automatic spraying of liquid by infrared sensor, suitable for the use of various disinfectant liquids and hand sanitizer
Works with 4 AA batteries
(DC: 6V) 70 000 cycles

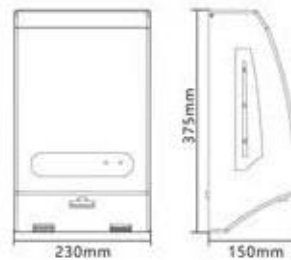

- 3 models available :
- Mousse
 - Gel
 - Spray

A VERSATILE AUTOMATIC DISPENSOR

DISPENSORS

The **2100COME** offers a large capacity of 2100 ml and can diffuse to the choice of gel or spray.

It can run on battery and either wall mounted or on the ground with an optional available stand. Adjustable vaporization volume from 0.6 to 10 ml per use

Automatic spraying of liquid by infrared sensor, suitable for the use of various disinfectant liquids and hand sanitizer

Suitable for high-traffic facilities and public area use. Level indicator located on the side of the dispenser, constantly indicates the level of liquid available inside the dispenser. 70,000 cycles with batteries.

Disinfection

TAP 2 IN 1

FAUCET/DRYER WITH HEPA FILTER

The new generation of 2 in 1 Faucet with built-in Hand Dryer.

DUAL TAP was designed to compliment all washrooms with the latest zero-contact technology. As an example- for use in all schools as a simple method to ensure that children wash and dry their hands without having 2 seperate tasks/stations. Other examples- airports and all other public areas, even offices and kitchen prep. The TAP is also a contactless dryer and there's no build up of water on the ground. It has a HEPA filter and has been designed to fit on all types of sinks. The jets in the dryer have an angle so that the water is not sent back to the user. A perfect dryer and way to wash/dry your hands for the COVID-19 pandemic that we are experiencing.

DISINFECTION THROUGH MISTING

Over time, your surroundings naturally accumulate moisture, bacteria and viruses. Although germs congregate everywhere, they are particularly dominant in areas of high contact. These areas include objects and surfaces that are touched the most. Good examples are door handles, table tops and light switches, desks, etc...The high use of these areas makes them perfect breeding grounds for cross-contamination. The more people touch an area, the more likely they are to leave bacteria for the next person. Misting allows the disinfectant to be applied to large spaces such as offices, classrooms, dressing rooms, offices etc., covering high contact areas; thus reducing the risk of germs spreading between people.

COMAC offers the easiest model to use with a simple electrical connection. Just plug it in, and with simple programming, you can disinfect up to 1,500 square feet of any room in 15 minutes. It can reach a long range due to its 23.8-litre tank.

ULVC DEVICE

THE POWER OF U.V. LIGHTING TO DISINFECT THE AIR

Disinfection of ventilation ducts
with UV-C light

COMAC offers the provision and installation of a universal kit for disinfecting ventilation ducts with UV-C LED systems in a safe manner.

UV-C radiation is a well-known disinfectant for air, surfaces, objects and water, which reduces the risk of contracting an infection and has been widely used for more than 40 years. All bacteria and viruses tested to date respond to UV-C disinfection. In laboratory tests, UV-C LEDs inactivated 99% of the viruses.

Benefits:

Environmentally friendly - No ozone

Wavelength optimization - UV-C LEDs can be manufactured to operate at the optimum wave length for necessary application.

Disinfection LED UV-C LIGHT

Sterilization by UV

Disinfection

3 IN 1 MEDICAL GRADE STERILISATION BOX W/UV-C LIGHT MULTI-FUNCTIONAL

Medical grade 3 in 1 multifunctional sterilization box WITH UV-C LED sterilization for disinfection in 60 seconds. Will also charge your devices, and essential oil possibility in order to diffuse a perfume.

Dimensions : 260 x 190 x 210 mm

- Personal Objects
- Masks
- Glasses
- Cell phones / Tablets
- Small clothing items
- etc...

Charging- 5 V/ 1 A type USB- C

Sterilization by UV

Disinfection

UV-C MULTIFUNCTIONAL STERILIZATION BOX

Wide Multifunctional Sterilization Box in a foldable design and material. UV-C LED sterilization for rapid disinfection in 3 minutes.

- Personal objects
- Masks
- Glasses
- Cell Phones/ tablets
- Clothing
- etc...

Charging- 5 V/ 1 A type USB- C
