- Great choice if planting late after soybeans
- Good forage production for grazing and silage
- Acid soil tolerance
- Listed on Grain Craft preferred variety list

Comparing AgriPro brand varieties? [Selection guides are available for download.](#)

**AgriPro**

## **Agronomics**

Straw Strength	Good
----------------	------

Relative Maturity	Medium Late
-------------------	-------------

Plant Height	Medium Tall
--------------	-------------

Winter Hardiness	Very Good to Excellent
------------------	------------------------

## **Grain**

Head Type	Awned
-----------	-------

Seed Size	Medium
-----------	--------

Chaff Color	White
-------------	-------

Test Weight	Very Good
-------------	-----------

Mill and Bake Quality	Excellent
-----------------------	-----------

Area of adaptation.

**These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics prior to and during the 2023 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations. These have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.**

**One or all of the varieties may be protected under one or more of the following: Plant Variety Protection, United States Plant Patents and/or Utility Patents and may not be propagated or reproduced without authorization.**
