About Us

Quantarion is an IT powerhouse specializing in a full spectrum of services from web and app development to the intricacies of cybersecurity, data engineering, and data science. At its helm is Shavenese Rosado with a storied 12-year tenure in quality assurance and a knack for leadership in high-stakes environments.

Alan Rosado, the company's technical advisor and a seasoned IT professional, bring a world-class background including pivotal roles at Microsoft and a commitment to technological innovation and excellence.

Quantarion's mission is to drive and deliver cutting-edge IT solutions with a personal touch.

Why Choose Us?

- We boast over 16 years of IT experience, encompassing a breadth of specializations and customization approaches
- We are guided by a commitment to excellence with our approach to development of IT solutions
- We provide customers with seamless support and prompt responses to inquiries
- We can manage complex IT projects and integrate across your existing systems

Custom Development

Quantarion can build custom mobile apps to meet your business and customer needs. We can also build applications and systems that expand the capabilities of your app services, including IoT

Spatial Computing

Quantarion can develop services leveraging the latest technologies in spatial computing, from the HoloLens to the Apple Vision Pro

Solutions Suite

Quantarion offers existing solutions that customers can leverage, from hospitality solutions to point of sale systems
