DISINFECTION

Why Choose REGAL?

✓ EASY TO SERVICE

Regal's simple design and far fewer parts than competitors, makes it operator-friendly. Regal has only 68 parts compared to more complex brands with hard-to-replace parts. Fewer parts equals longer life, lower repair costs and less downtime.

✓ PARTS READILY AVAILABLE

Because we carry a large inventory of parts, we are able to provide fast turn-around time to our customers if they require a replacement part.

✓ TECHNICAL SUPPORT

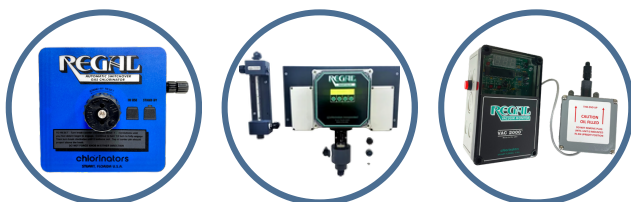

Regal's knowledgeable technicians are available during factory hours to answer any questions regarding our equipment. They can walk you through most problems over the phone while you're on the job. Please call our toll-free number, 1-800-327-9761.

✓ LONGER SERVICE LIFE

The Regal is made with the most corrosion-resistant materials that modern day technology can provide.

✓ MADE IN THE USA

Regal parts are made in the USA and are of the highest quality. Our skilled technicians assemble and test every unit, here in the USA.

Your Trusted Selection
for Water Disinfection

Solutions For

WASTEWATER & WATER TREATMENT | INDUSTRIAL | AGRICULTURE | FOOD & BEVERAGE | IRRIGATION/NURSERY

Products

Models 210/220/250
Gas Chlorinator

The REGAL™ Gas Chlorinator is used to chlorinate water, wastewater, and industrial process water with gas chlorine. The simple, efficient design has made REGAL™ Gas Chlorinators the industry standard. Built with heavy-duty corrosion-resistant parts, REGAL™ Chlorinators provide safe, long-lasting service.

Models 216/226/256
Automatic Switchover

The REGAL™ Automatic Switchover Gas Chlorinator is a totally vacuum-operated system that is designed to automatically switch the chlorine feed from an empty cylinder to a full cylinder. It is also designed to provide system backup. Should a problem develop with either vacuum regulator, chlorination can be continued.

Series 7000
Smartvalve

The REGAL™ SMARTVALVE is designed to automatically regulate the gas feed rate needed to maintain the chemical residual level determined for a specific water treatment application. Different models are available to be used for chlorine or sulfur dioxide applications.

Series 3000
Gas Detector

The REGAL™ Series 3000 Gas Detectors are designed to accurately sense the presence of chlorine and/or sulfur dioxide in an enclosed environment. The REGAL™ detectors are available in both single and dual-sensor models.

Vac 2000
Vacuum Monitor

The REGAL VAC 2000 is a 100% electronic, full-featured vacuum monitoring system utilizing the latest in integrated sensor technology for improved accuracy, reliability, and versatility. The system allows direct contact with many liquids and gases, including chlorine.

Models 401/402
Electronic Scales

REGAL™ Series ECS Electronic Cylinder Scales are very important and recommended accessories that should be part of all REGAL™ Gas Feed System installations.

Models 710/720/750
Sulphonator

The REGAL™ Gas Sulphonator is used to de-chlorinate water, wastewater, and industrial process water with sulfur dioxide. REGAL™ Sulphonators are based on the same simple, efficient design that has made REGAL™ Gas Chlorinators the industry standard. Built with heavy-duty corrosion-resistant parts, REGAL™ Sulphonators provide safe, long-lasting service.

Tay-200
Ton Adaptor

The REGAL TAY-200 Direct Chlorine Ton Container Adaptor is specially designed to allow a standard, direct cylinder mounted gas chlorinator to be mounted directly onto the gas outlet valve of a one (1) ton chlorine container.

SAFE. RELIABLE. ECONOMICAL.

Ejector A-930

Ejectors

The REGAL™ ejector assembly is one of the main components used in a REGAL water treatment system. Various types of ejector assemblies are made available. The basic components consist of an ejector body, nozzle, diffuser and check valve. The REGAL Ejector Assemblies incorporate the very best available materials with the latest technology in design and construction to help reduce maintenance, simplify construction and improve operation.

Remote Meter Panel

The Regal 7500 Remote Meter Panel is designed to be used with the Regal Smartvalve. It has a unique feature that allows chlorine gas to bypass the rate valve adjustment, ensuring that the valve is fully open while in automatic mode.
