# Cellora Engineering

## Who We Work With

We help automation integrators quote faster, deliver smoother, and eliminate mechanical design delays. You get clean, production-ready mechanical engineering support that integrates seamlessly into your process without draining your team's time or attention.

## What We Do

Whether you are racing toward a bid deadline or juggling multiple installs, we step in with reliable, high-quality design so your project keeps moving.

### WHY INTEGRATORS CHOOSE CELLORA

- 01 Experience delivering real-world automation
- 02 Direct access to senior designers
- 03 Models are production-ready and integration-conscious
- 04 Limited clients for optimal speed and responsiveness

## Scoping Sprint - \$500

If you are quoting a job or deciding whether Cellora is the right fit, the Scoping Sprint gives you a clear design direction and a confident estimate in 3 days or less.

- One-on-one alignment call
- Rough CAD or sketch visualization
- Key risks, feasibility notes, and pricing range
- Clear next step recommendation

**Free for actively quoted projects.**

Otherwise \$500, applied toward any booked work.

<sup>1</sup>Rush option available: Add 50% for front-of-queue scheduling

TIER I  
**MODEL ONLY PACKAGE<sup>1</sup>**

Starts at \$2,000

For integrators who just need a CAD model to support quoting, layout planning, or early-stage validation.

- 3D CAD model based on your sketch, spec, or concept
- Basic motion if applicable
- One revision
- Cellora-branded title block drawing package (no custom standards)
- No sourcing or component selection
- Delivery timeline quoted per scope

**Sample Project Timeline**

**AVAILABILITY IS LIMITED**

We only work with three clients at a time to keep turnaround fast and quality high.

If you have an active project or a quote deadline approaching, start with the free Scoping Sprint to reserve your slot.

TIER II  
**CORE DESIGN PACKAGE<sup>1</sup>**

Starts at \$4,800

Ideal for integrators who need dependable, high-quality mechanical design but do not have the team or capacity to take it on.

- Full 3D CAD model
- Manufacturing-ready drawings using your company title block
- COTS components specified or sourced
- Three structured revision cycles
- One motion or layout study
- Weekly check-ins
- Delivery timeline quoted per project

**Sample Project Timeline**

TIER III  
**TRUSTED PARTNER PACKAGE**

Starts at \$14,000

For complex, fast-moving projects where mechanical design needs to be done right the first time.

- Complete CAD model and full drawing package
- Hardware sourcing with COTS components specified or recommended
- Unlimited revisions within scope
- Engineering review and final walkthrough
- Slack or Teams collaboration
- Emergency design response within 48 hours
- On-site support available (billed separately)
- Delivery timeline quoted per project

**Availability:** Only one Tier 3 slot available at this time

**Sample Project Timeline**

**GUARANTEE**

We will meet the quoted delivery date or we will discount your next project
