

Tactical Emergency Casualty Care

Pre-Registration Required! Simply add-on to your conference ticket at purchase or utilize the quick link in your conference confirmation email to re-enter the platform.

Cost: \$100 (non-refundable, may be transferred to another attendee)

Date/Time: Friday, March 7- Saturday, March 8, 0800-1700

The 2nd edition of NAEMT's Tactical Emergency Casualty Care (TECC) course teaches EMS practitioners and other prehospital providers how to respond to and care for patients in a civilian tactical environment.

The course presents the three phases of tactical care and integrates parallel EMS nomenclature:

- Hot Zone/Direct Threat Care that is rendered while under attack or in adverse conditions.
- Warm Zone/Indirect Threat Care that is rendered while the threat has been suppressed but may resurface at any point.
- Cold Zone/Evacuation Care that is rendered while the casualty is being evacuated from the incident site.

The 16-hour classroom course includes all new patient simulations and covers the following topics:

- Hemorrhage control including immediate action drills for tourniquet application throughout the course;
- Complete coverage of the MARCH assessment;
- Surgical airway control and needle decompression;
- Strategies for treating wounded responders in threatening environments;
- Caring for pediatric patients;

- Techniques for dragging and carrying victims to safety; and
- A final, mass-casualty/active shooter event simulation.

NAEMT's TECC course is endorsed by the American College of Surgeons Committee on Trauma, is consistent with the current guidelines established by the [Committee on TECC](#) (Co-TECC), and meets all of the updated [National Tactical Emergency Medical Support Competency Domains](#). This course is accredited by CAPCE for 16 hours of continuing education credit, and recognized by NREMT.

NAEMT is a [recognized education partner](#) of the Co-TECC. The Co-TECC establishes guidelines for the provision of prehospital care to injured patients during a tactical incident. The Co-TECC neither creates curriculum for the prehospital provider, nor does it endorse the curriculum of other organizations.
