WHY PRIME

PRIME INDUSTRIAL FASTENERS

is your trusted source for **fasteners, tools, and industrial supplies**, proudly serving contractors, fabricators, manufacturers, and industrial businesses across **South Florida, the Caribbean, and Latin America**.

As a **family-owned business** with over 30 years of industry experience, we combine **extensive inventory, competitive pricing, and personalized service** to keep your projects moving.

Whether you need **standard hardware** or **hard-to-find specialty products**, our knowledgeable team delivers **reliable solutions** with **fast turnaround** and **exceptional customer support**.

FASTEN WITH PRIME

30+ YEARS
INDUSTRY
EXPERIENCE

FAMILY
OWNED &
OPERATED

SERVING
SOUTH FLORIDA,
CARIBBEAN &
LATIN AMERICA

THOUSANDS
OF PRODUCTS
IN STOCK

OUR COMMITMENT YOUR ADVANTAGE.

EXCEPTIONAL CUSTOMER SERVICE

Dedicated support from knowledgeable fastener specialists.

FAST TURNAROUND

The products you need, when you need them.

COMPETITIVE PRICING

Reliable products at competitive prices.

LARGE INVENTORY

Thousands of fasteners, tools and supplies in stock and ready to ship.

FREE NEXT-DAY DELIVERY

Local delivery throughout South Florida.

COUNTER STORE & PICK UP

Visit our showroom to browse inventory, get expert assistance, and pick up your order.

EXPORT DIVISION

Export to the Caribbean and Latin America.

BIN STOCKING SERVICE

Custom on-site bin replenishment to keep your fastener inventory stocked and organized.

LET'S BUILD TOGETHER.

FASTENER BASICS

FASTEN WITH PRIME

Your quick reference to fastener terminology, measurements, materials and grades.

HOW TO MEASURE A FASTENER?

#10-24 X 1 1/2" Pan Phil Machine Screw, Stainless Steel 18-8

Diameter

Length

Drive

Fastener Type

Material

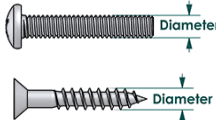

Thread Count (TPI)

Head

Measuring Diameter

For most types of fasteners, the diameter is measured on the **outside of the threads**.

Note: US diameters under 1/4" are given as numbers (e.g. #12) instead of inches, in order of increasing size.

Thread Count & Thread Pitch

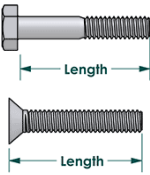

Machine threaded fasteners specify a thread density in **Threads Per Inch (US)** or as a **Thread Pitch** in mm (Metric).

For a given diameter, a fastener may be available in **coarse** (standard), **fine** and sometimes **extra fine** thread.

Measuring Length

Fastener length is usually measured from where the head contacts the material to the end of the fastener.

Countersunk fasteners are measured overall, while non-countersunk fasteners are measured from under the head.

Head Styles

- Hex heads** are typically used with larger bolts and screws, and tightened with a wrench.
- Pan heads** have a slightly domed head that sits above the surface.
- Flat heads** are installed in a countersunk hole for a flat surface.
- Round heads** are tall domed heads, used primarily for decorative purposes.
- Oval heads** are a low domed and countersunk heads, used primarily for decorative purposes.
- Truss heads** are slightly domed, with a wide head for an extra large surface area.
- Socket heads** are narrow with a socket drive, and knurled or smooth sides.
- Button heads** feature a medium dome. Typically used with a hex socket drive.

Drive Types

- Phillips** and **Slotted** drives are common in screws, but more prone to stripping.
- Combo** drives can be used with either driver and are available in many fastener types.
- Hex Socket (Allen)** drives are compact and easy to drive, but can also strip under high torque.
- Star (Torx™)** and **Square** drive are resistant to stripping and are easier to install one-handed.

Need help selecting the right fastener? Our team is here to help.

GRADES & CLASSES

Fastener Grade (US) or **Class (Metric)** indicates a fastener's **strength** and **mechanical properties**. Choose the appropriate grade based on your application's strength requirements.

GRADE	HEAD MARKING	STRENGTH LEVEL	APPLICATIONS
SAE GRADES (INCH)			
SAE Grade 2		LOW STRENGTH	General Purpose <ul style="list-style-type: none">Indoor projectsLight equipmentLow strength requirements
SAE Grade 5		MEDIUM STRENGTH	Medium Duty <ul style="list-style-type: none">Automotive & MachineryConstructionGeneral industrial use
SAE Grade 8		HIGH STRENGTH	High Strength <ul style="list-style-type: none">Heavy equipmentStructural & IndustrialHigh load applications
METRIC CLASSES			
Metric Class 8.8		MEDIUM STRENGTH	General Purpose <ul style="list-style-type: none">General constructionMachinery & AutomotiveEveryday applications
Metric Class 10.9		HIGH STRENGTH	Heavy Duty <ul style="list-style-type: none">Heavy machineryAutomotive & Industrial equip.High strength applications
Metric Class 12.9		VERY HIGH STRENGTH	Maximum Strength <ul style="list-style-type: none">High performanceCritical fastening & extreme loadPrecision applications

NEED A STRUCTURAL OR SPECIALTY FASTENER?

Beyond standard SAE and Metric grades, we also stock a wide range of structural and specialty fasteners.

STRUCTURAL GRADES
A325 • A490 • A193
B7 • F1554
GR. 36 • 55

RELATED HARDWARE
Heavy Hex Nuts • Hardened Washers • Threaded Rod
Special Alloys • And More

MATERIALS & FINISHES

Corrosion Resistance Low to High 2/5

Plain Finish is uncoated carbon steel, best for **indoor applications** or where the fastener will be painted or coated.

Alloy Steel is used in **high-strength industrial and structural applications** and is typically black oxide finished.

Corrosion Resistance Low to High 2/5

Zinc-Plated Steel (Clear or Yellow Zinc) is ideal for general indoor use, providing economical corrosion protection in dry environments.

Corrosion Resistance Low to High 3/5

Hot-Dipped Galvanized Steel is recommended for **outdoor construction** where increased corrosion resistance is required.

Corrosion Resistance Low to High 5/5

Stainless Steel (18-8 and 316) is ideal for **marine, coastal and harsh environments** requiring maximum corrosion resistance.
