Intro to Global Vista Returns

Tools Glossary Help Exit

Welcome

Welcome to *Global Vista Returns!*

Global Vista's Returns functions are used initiate, track and complete customer product-return claims.

At the end of this course, you will be able to:

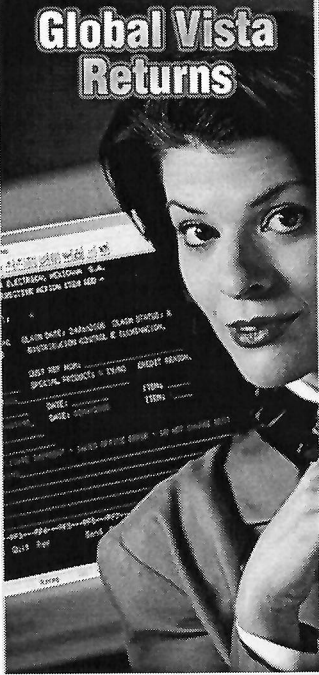

- Explain the steps of the product return process.
- Describe the four different types of returns.
- Create requests for return authorization using type-specific navigations.
- Authorize return requests using type-specific navigations.
- Use the Return Inquiry function to check the status of returns.

In addition, select personnel will be able to:

- Reconcile returns after products have been returned to the warehouse using type-specific navigations.

Lessons 2 through 5 of this course are intended for a general audience; everyone who takes this course should complete them. Lesson 6, which covers reconciliation, should be completed by personnel who are responsible for receiving and reconciling returned products. If you are not involved in those tasks, you do not need to complete Lesson 6.

Click the *Next* button to continue.

Course Overview

Before you get started, here are some tips for using this course.

Navigational buttons work as follows from any page within the course:

- **Next** - Move forward to the next page.
- **Back** - Move backward to the previous page.
- **Replay** - Reloads the current page.
- **Menu** - Access the Course Menu.
- **Exit** - Exit the course.
- **Help** - Access course Help (this information).
- **Glossary** - Access definitions for technical terms and abbreviations presented throughout the course.
- **Tools** - Access a series of additional links related to the content presented in this course.

At times you will be asked to interact with the course by clicking on words or areas on the page or a screen image to:

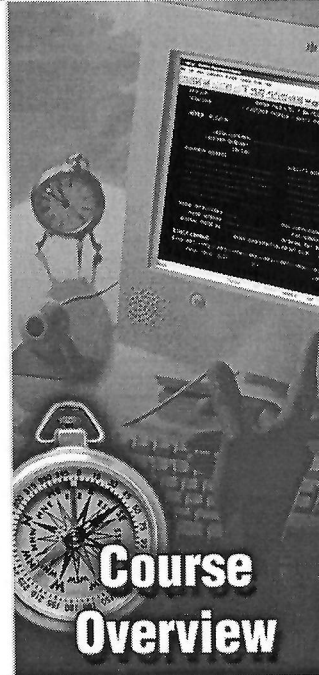

- View additional information.
- Simulate using Global Vista.
- Answer a question.

You should complete all interactions on a page before clicking the **Next** button. To close any information windows that pop up, click the **X** button in their upper right corner.

The instructional text on simulated application screens appears in a blue text box. You can click and drag the text box anywhere on the screen to enable you to see the parts of the application that are covered by the box.

This entire course will take you about **60** minutes to complete. You may stop at any point and re-enter the course later where you left it. You can also access any lesson at any time from the Course Menu.

Click *Next* to continue.

Returns Functions

There are four main return functions in Global Vista:

- **Request Return Authorization** initiates a return and generates a Claim ID.
- **Authorize Returns** manually approves return requests for items that are not auto-authorized by the Global Vista system.
- **Return Inquiry** investigates the status of a return.
- **Reconciliation** completes the return process after the customer has returned the products to the warehouse or plant.

This course covers all four functions. As stated previously, only certain personnel are required to complete the lesson on Reconciliation (Lesson 6).

Introduction to Returns

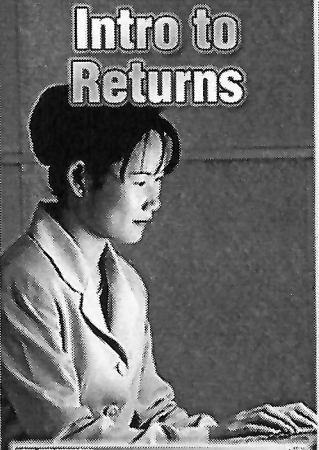

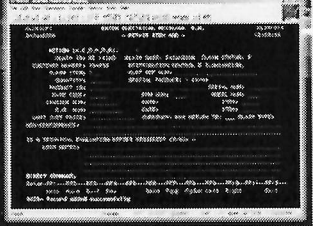

Global Vista Returns is used to submit, track, and reconcile requests for returned Eaton Electrical products.

With this function, you can add or reconcile return information for:

- Components that are broken or malfunctioning.
- Wrong components that were sent to you.
- Components that are not selling well.

You can use the inquiry options to view any claim by claim ID or by customer.

Click Next to continue.

Returns and the Return Process Tools Glossary Help Exit

Types of Returns

Returns are classified into the following four types:

- **Corrective Action Return (CA)** - Errors made by Eaton Electric in shipping the product, such as wrong product shipped, and sales or warehouse errors.
- **Commercial Exchange Return (CE)** - Inventory return for products that are not selling well.
- **Warranty Return for Credit (WC)** - Product does not conform to specifications or standards.
- **Repair or Replace Return Request (RE)** - Product needs to be repaired or exchanged according to Eaton policy.

Before you initiate a return in Global Vista, you need to determine which of these four return types is appropriate. Each type has various situations that could be applicable to it. For example, some situations that fall under the heading of "Corrective Action Return" include:

- Overshipment of product
- Incorrect product sent
- Customer did not order product
- Duplicate shipments
- Product shipped early
- Other sales office errors

Returns and the Return Process Tools Glossary Help Exit

Types of Returns

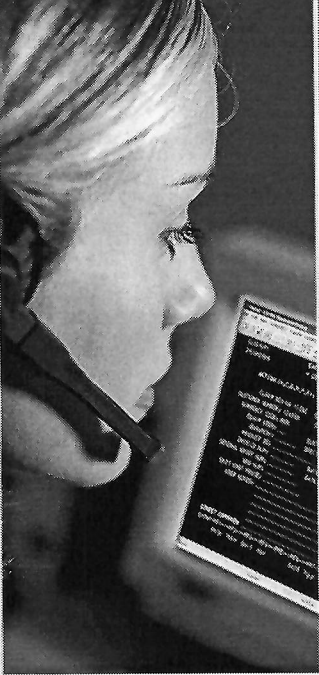

No matter what the reason for a return, the return process has the same phases:

1. Customer service personnel must request a return authorization for a return.
2. Customer service must authorize the return (for products that are not auto-authorized by the Global Vista system).
3. Once the returned product is received at the plant or warehouse, quality assurance personnel must evaluate the product and reconcile the return claim.
4. Either the product is repaired or replaced and sent back to the customer, or a credit is issued by a credit representative.

Each of these phases requires a different navigation within Global Vista. This course focuses on the first three phases listed above.

Depending on your location or Legal Entity, these phases may be performed by different groups of people.

Click Next to continue.

Return Navigations

Each of the four types of returns listed previously requires different navigations to perform the phases of the return process.

The illustration at the right shows how different navigations apply for the various phases of a Corrective Action Return. The table below compares the navigations for a Corrective Action Return with those for a Commercial Exchange Return.

	Corrective Action	Commercial Exchange
Request Authorization	CLA RET CAR AHA	CLA RET CER EHA
Authorize/Reconcile the Return	CLA RET CAR AIR	CLA RET CER EIR

Even the Return Inquiry function has a couple of variations:

- To inquire by claim ID, CLA RET INQ RHL
- To inquire by customer ID, CLA RET INQ CBR.

Review Question

Match the Return Type on the left with its Definition on the right.

Return Type		Definition
Corrective Action	<input type="text"/>	Product needs to be repaired or exchanged according to Eaton policy.
Commercial Exchange	<input type="text"/>	Inventory return for products that are not selling well.
Warranty Ret for Credit	<input type="text"/>	Errors made by Eaton Electric in shipping the product, such as wrong product shipped, sales or warehouse errors.
Repair or Replace	<input type="text"/>	Product does not conform to specifications or standards.

Click a Return Type on the left, and then drag it to the blank area next to the corresponding step description on the right. When you have finished sequencing the steps, click **Submit**. When finished with the question, click **Next** to continue.

Lesson Summary

In this lesson, you learned that:

- Returns are used to submit, track, and reconcile requests for returned Eaton Electrical products.
- There are four types of returns:
 - Corrective Action Returns, for shipping errors.
 - Commercial Exchange Returns, to exchange inventory.
 - Warranty Returns for Credit, for products that do not meet specifications.
 - Repair or Replace Returns, for repair or exchange of product.
- Each type of return has a separate navigation in Global Vista for each phase of the return:
 - Request Authorization of a Return
 - Approve a Return
 - Reconcile a Return

Click **Continue** to proceed directly to the next lesson, or click **Menu** to return to the Course Menu.

EATON - Global Vista Returns - Microsoft Internet Explorer

Global Vista Returns

Request Authorization

Tools Glossary Help Exit

Authorization Requests

The first phase of the returns process is the authorization request.

In this phase, the essential data relating to the return is entered into Global Vista and the system generates a Claim ID to track the return. In general, the request phase is carried out by customer service personnel. However, the people who carry out the request may differ depending on your location or Legal Entity.

Each type of return has its own navigation for authorization requests:

- Corrective Action: **CLA RET CAR AHA**
- Commercial Exchange: **CLA RET CER EHA**
- Warranty Return for Credit: **CLA RET PWR WHA**
- Repair or Replace: **CLA RET REP RHA**

The information required to request authorization varies slightly according to the type of return. Entering the necessary information requires two screens:

- **Header Information** screen is used for entering customer data.
- **Item Add** screen is used for entering data about the items to be returned.

Although the screens differ somewhat depending on the type of return, they are very similar. An overview of these screens is provided on the next two pages.

Click Next to continue.

Header Information: Overview

The Header Information screen is the first screen in the authorization request phase. Key information to enter includes:

- Customer Number -- necessary to identify the customer in Global Vista.
- User Notes -- used to record the reason for the return.

The return's Claim ID is generated in the CLAIM ID field after you enter the information on the screen.

Click each highlighted item, and then click Next to continue.

Scenario - Corrective Action

You will now practice requesting authorization for two returns.

For the first scenario, you will request authorization for a Corrective Action return.

A customer received a duplicate shipment of some products from their last order (general order number MXAA01196). An individual from the company calls you and says that they received a duplicate shipment of 20 circuit breakers with the product ID BAB1020. The customer was not charged so does not need to receive a credit. You will need to submit a corrective action return request.

Begin the scenario on the next page.

Scenario - Repair or Replace

You have just completed an authorization request for a Corrective Action return. Other types of returns require additional information in the Request phase.

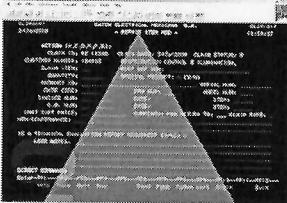

You will now practice requesting authorization for a Repair or Replace return. The additional information required for a Repair or Replace return includes:

- Address and date for the replacement product to be shipped to the customer.
- Warehouse location to which the defective product will be returned.
- The type of Nonconformance for the defective product.

Begin the scenario on the next page.

Click Next to continue.

Repair Item Add

You have now filled in all of the required information for the Header Add and Item Add screens. The final step is to send the request by pressing F6 on your keyboard. Do that now:

- Press F6 on your keyboard.
- Verify that a Y is in the confirmation prompt.
- Press Enter.

Perform the steps shown here. When finished, click Next to continue.

Common Steps

The process for the two authorization requests that you just performed are typical of the steps to request authorization of all four types of returns.

Requesting authorization of other return types may require different information, but keep in mind that the system will not let you complete a request until you have entered all necessary information. To make sure you are doing things right, pay attention to the messages that appear at the bottom of the Global Vista screen.

Click Next to continue.

Review Exercise

Now review the steps for requesting authorization for a return. In this exercise, you will request authorization for a Corrective Action return. On the original order, the incorrect product was sent. First fill in the Header Add screen. Here is the relevant information:

- Customer number: 134893
- Reason for return: Incorrect product sent – sales office error

Perform the steps shown here. When finished, click Next to continue.

Request Authorization

Tools Glossary Help Exit

Lesson Summary

In this lesson, you learned that:

- There is a different navigation for return authorization requests for each type of return:
 - Corrective Action: **CLA RET CAR AHA**
 - Commercial Exchange: **CLA RET CER EHA**
 - Warranty Return for Credit: **CLA RET PWR WHA**
 - Repair or Replace: **CLA RET REP RHA**
- During a request for authorization, Global Vista generates a Claim ID that is used to track a return.
- Completing an authorization request requires filling out two screens, the Header Information screen and the Item Add screen.
- The information required to complete each type of return is similar, but not identical; some types of returns require more information than others

Authorize a Return

Tools Glossary Help Exit

Introduction to Authorizations

After a return request has been submitted, the request must be authorized.

Many Eaton products are set up to auto-authorize in Global Vista. In such cases, no action by a person is required to authorize the return. A fax or email is automatically sent to the customer giving them a claim ID and shipping instructions.

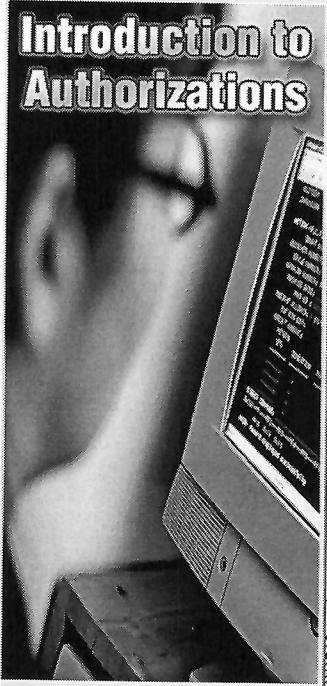

If the product is not set up to auto-authorize, a message is sent via printer or e-mail to the appropriate customer service personnel notifying them that a return request has been submitted. They will need to go into Global Vista and manually approve the request.

As in the Request phase, each of the four types of returns has its own navigation in the Authorize phase:

- Corrective Action: CLA RET CAR AIR
- Commercial Exchange: CLA RET CER EIR
- Warranty: CLA RET PWR WIR
- Repair and Replace: CLA RET REP RIR

Despite these different navigations, the Authorize phase is virtually identical in all four cases. The next pages take you through an authorization scenario for a Repair request.

Find the Return Claim

Next you will authorize the repair request that you created in the previous lesson. To find the request, follow these steps:

- ACTION, type D to Display the claim.
- CLAIM ID, type 112AD (the RE prefix is already entered).
- CLAIM ITEM, type 2.
- Press Enter.

Perform the steps shown here. When finished, click Next to continue.

Review Exercise

For this exercise, approve a request for a Corrective Action return. Here is the information you need:

- Navigation: CLA RET CAR AIR
- Claim ID: CA 1119R
- Claim Item: 1
- You do not need to authorize freight charges during the authorization phase for a Corrective Action return.

Perform the steps shown here. When finished, click Next to continue.

Lesson Summary

In this lesson, you learned that:

- You must manually authorize returns for products that are not set up to auto-authorize.
- In the Authorize phase, each of the four types of returns has its own navigation:
 - Corrective Action: CLA RET CAR AIR
 - Commercial Exchange: CLA RET CER EIR
 - Warranty: CLA RET PWR WIR
 - Repair or Replace: CLA RET REP RIR
- To authorize a return, you must change the claim's status to N.

Click [Continue](#) to proceed directly to the next lesson, or click [Menu](#) to return to the Course Menu.

Return Inquiry

Introduction to Return Inquiry

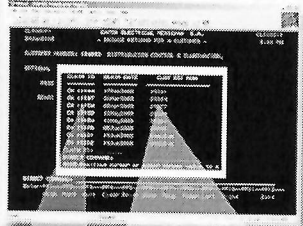

The Return Inquiry function is used to find information about a return request after it has been submitted in Global Vista. With Return Inquiry, you can verify information on a claim or check a claim's status.

There are two navigations to inquire for return claims:

- Inquire by Claim ID using the RETURN HEADER INQUIRY screen: **CLA RET INQ RHI**.
- Inquire by Customer using the BROWSE RETURNS FOR A CUSTOMER screen: **CLA RET INQ CBR**.

This lesson will describe the steps for both types of inquiry.

Inquire by Claim ID

From here you can enter the Claim ID to find any information you are looking for. For example, to inquire about the return of 20 circuit breakers that you set up in lesson 3, follow these steps:

- ACTION, type D to Display.
- CLAIM ID, type CA 112AC.
- Press Enter. The Return Header appears. Here you can confirm customer information.
- To display the rest of the header information, you would press F10 in Global Vista. F10 is not enabled in this simulation, so click **Continue**.
- To display item information, press F4 (Items).

Perform the steps shown here. When finished, click Next to continue.

Browse Claim IDs

If you do not know the exact Claim ID, you can browse for it with the RETURN HEADER INQUIRY screen. For example, you might be looking for a Corrective Action return but do not know the full Claim ID.

Do the following:

- ACTION, type B.
- In the 2-digit part of the CLAIM ID field, type CA (the prefix for Corrective Action returns).
- Press Enter.

Perform the steps shown here. When finished, click Next to continue.

Search by Customer Number

For this exercise, you will search for a Repair claim from the company Distribution Control e Iluminacion that was submitted in January 2006. You must first enter the company's customer number, then search its list of return claims for the correct one:

- CUSTOMER NUMBER, type **134893**.
- Press **Enter**. A browse screen appears that lists all of the company's returns. You can scroll through this list with **F7** and **F8** or continue searching.
- In the first part of the CLAIM ID field, type **RE** (for Repair returns).
- Press **Enter**. The company's repair returns appear.
- Click the line for the repair return with a claim date of January 2006 (**RE 112AD**).
- Press **Enter**.

Perform the steps shown here. When finished, click Next to continue.

Lesson Summary

In this lesson, you learned that:

- The Return Inquiry function is used to find information about a return request after it has been submitted in Global Vista.
- There are two ways to inquire about a return:
 - By Claim ID using the RETURN HEADER INQUIRY screen: CLA RET INQ RHI.
 - By Customer using the BROWSE RETURNS FOR A CUSTOMER screen: CLA RET INQ CBR.

Click Continue to proceed directly to the next lesson, or click Menu to return to the Course Menu.

Tools Glossary Help Exit

Introduction to Reconciliation

Reconciliation is carried out after the returned product has arrived at the warehouse or plant.

In this phase, data is entered to indicate the manner in which the return claim has been resolved. The information entered includes:

- Number of items received.
- Whether the items will be restocked.
- Whether Eaton will pay for shipping charges.
- Condition of the items.

Other data may be required depending on the return type.

The Reconciliation process uses the Item Reconciliation screen (which is also used to authorize return requests). Each type of return has a different navigation to its Item Reconciliation screen:

- Corrective Action: **CLA RET CAR AIR**
- Commercial Exchange: **CLA RET CER EIR**
- Warranty Return: **CLA RET PWR WIR**
- Repair and Replace: **CLA RET REP RIR**

Note: This lesson only needs to be completed by personnel who are involved in the Reconciliation process.

Click Next to continue.

Different Returns, Common Steps

As in the Authorization Request and Authorization phases, the processes for the two Reconciliations that you just performed are typical of the steps to reconcile all four types of returns.

Reconciling other return types may require different information, but keep in mind that the system will not let you complete a request until you have entered all necessary information. To make sure you are doing things right, pay attention to the messages that appear at the bottom of the Global Vista screen.

Click Next to continue.

Lesson Summary

In this lesson, you learned that:

- Reconciliation is carried out after the customer has returned the items to the warehouse or plant.
- To reconcile a return, you use the Item Reconciliation screen appropriate for the return type, reached by the following navigations:
 - 1) Corrective Action: **CLA RET CAR AIR**
 - 2) Commercial Exchange: **CLA RET CER EIR**
 - 3) Warranty Return: **CLA RET PWR WIR**
 - 4) Repair and Replace: **CLA RET REP RIR**
- The information required to complete a reconciliation includes:
 - 1) The number of items received.
 - 2) Whether the items will be restocked.
 - 3) Whether Eaton will pay for shipping charges.
 - 4) The condition of the items.

Click **Continue** to proceed directly to the next lesson, or click **Menu** to return to the Course Menu.

Test Introduction

Congratulations on finishing the Global Vista Returns course! If you are done with all of the lessons, you should be ready for this short test of your knowledge of the course material. You must complete this test to get credit for completing the course.

The test consists of ten (10) questions, similar to the review questions you had at the end of each lesson. For this test:

- You will get one attempt per question.
- You will not receive feedback about your answers.
- Results will be reported on the final page, indicating:
 - The number and percentage of correct answers.
 - Suggested lessons to review, based on incorrect answers.

Click Next to start the test.

When authorizing a return in Global Vista, what must the authorizer do?

- Use Return Inquiry to change the status of the claim to N.
- Use the Item Reconciliation screen to change the status of the claim to N.
- Use the Header Information screen to add items to the return claim.
- Send the customer an email or fax indicating that the return has been authorized.

Select the correct answer, and then click **Submit**.

Question 8

For this question, you have navigated to the Item Reconciliation screen in order to authorize a Repair return. You have already entered the Claim ID and item number for the return.

Enter the remaining information required to complete the authorization, indicating that Eaton will pay freight charges.

Hint: You will need to fill in three fields. Press Enter when you are done.

Perform the specified actions.
