# Spring 2019 Lawncare Tips

Although the snow has been unrelenting for the past several weeks, we could all very well wake up to beautiful spring weather any day now! Grasses, flowers, and other plants may be sound asleep underneath the cover of snow, but they are simultaneously hard at work preparing to emerge from the frozen ground and reach for the warmth of the sun.

Springtime represents an important transition for your lawn, and a handful of key steps will give your lawn its best chance to achieve beauty and longevity throughout the coming months. Don't let spring sneak up on you and cause you to miss your opportunity to provide your lawn with all possible advantages! Luckily, **Masterseed** is here to help you at this important time!

**Masterseed** provides a variety of services ranging from fertilization and aeration to complete lawn restoration and installation. Whether you simply need routine care for an already thriving lawn or you are starting from scratch, **Masterseed** has a solution for you!

Michael, the owner of **Masterseed**, has been working in lawncare for more than 10 years and has extensive knowledge of plant biology and physiology, plant pests and parasites, and strategies to overcome both common and uncommon lawncare problems.

Continue reading to learn about important actions that you should be considering *now* in preparation for spring and how Masterseed can help!

## Tips for a Beautiful Lawn this Spring!

1. **RAKE!** After the snow has melted, remove any areas of soil compaction and thatch to allow grass to poke through the ground and prevent weeds.
2. **FILL HOLES** with top soil to reconcile uneven ground.
3. **TEST YOUR SOIL** to ensure optimal growth conditions. **Masterseed** can help determine the pH and moisture content of soil, among other factors.
4. **AERATE** to allow additional seed (if applied), nutrients, and oxygen to penetrate the soil.
5. **PREVENT WEEDS** by applying a pre-emergent, or reach out to **Masterseed** to schedule this service!
6. **FERTILIZE** your lawn, but be aware that the type and amount applied are critical. Contact **Masterseed** to discuss your fertilization needs and schedule this service!
7. **ASK ABOUT HYDROSEEDING** to repair bare and/or struggling areas in your lawn. Hydroseeding is also a great way to establish a complete, brand new lawn. **Masterseed** can customize a seed blend according to your needs and help you achieve the lawn of your dreams!

Hydroseeding is your  
best option for a  
beautiful, hearty lawn.
