

OUR SAFETY CULTURE: POWERED BY MEERKATS

National Patient Safety Goals

#3 - Use Medicines Safely

This month, our purple meerkats
are on a mission:

Track It Label It
Check It Twice

NPSG #3 reminds us that every
medication—no matter how
routine—deserves our full
attention to keep patients safe..

From the operating room to the discharge
desk, safe medication practices matter.
This goal focuses on three key safety actions:

Label medications carefully
Take extra precautions with blood
thinners
Keep med lists accurate during
every transition in care

*Safety isn't solo.
It takes every one of us.*

Track It. Label It. Check It Twice
