

OUR SAFETY CULTURE: POWERED BY MEERKATS

# National Patient Safety Goals

## #1 - *Identify Patients Correctly*

Correct patient identification is the foundation of safe care. This goal reminds us to always use at least **two** patient identifiers—like name and date of birth—before providing any care, treatment, or service. Whether it's administering medication, collecting specimens, or performing procedures, verifying identity ensures we're delivering care to the right person, every time.

This lively, 60-second animated short turns patient ID into a safety dance! Follow our Meerkat mascot as they lead a quickstep through the do's and don'ts of proper identification.

It's a fun reminder that even routine steps require careful moves.

*Safety isn't solo.  
It takes every one of us.*

The Two ID Tango
