

WL 34IHVX.RR

FD4

THE FIRST GENETICALLY
ENHANCED ALFALFA TRAIT
DEVELOPED TO **MAXIMIZE
QUALITY** BY REDUCING LIGNIN

BY AT LEAST

15%

Compared to conventional alfalfa at the same stage of maturity.

Includes Roundup Ready®
Technology

Farmers
can maintain
a **NORMAL
HARVEST
SCHEDULE**
and achieve
**HIGHER
QUALITY**

**OR CHOOSE TO DELAY HARVEST FOR UP TO
7-10 DAYS** FOR HIGHER
YIELD POTENTIAL
WITHOUT SACRIFICING QUALITY

Compared to conventional alfalfa at the same stage of maturity.

FIELD-PROVEN BENEFITS

23%

**LESS
LIGNIN**
(acid detergent lignin)
across cuttings and locations

21%

**HIGHER
RFQ**
(relative forage quality)
across cuttings

22%

**HIGHER
NDFD**
(neutral detergent fiber digestibility)
across cuttings

Up to

25%

**HIGHER
YIELD**
WITH DELAYED HARVEST
AT 35-DAY
CUTTING INTERVALS*

*Three cuttings at 35-day intervals compared to four cuttings at 28-day intervals, with the three-cut system yielding 26% more over the life of the stand.

NOTE: Data comes from FGI trials comparing WL 34IHVX.RR, the HarvXtra® Alfalfa with Roundup Ready® Technology variety to commercial checks. Trials were harvested in 2014 - 2016 from Boone, IA; West Salem, WI.; and Mt. Joy, PA. Yield increase is directly correlated to the ability to delay harvest. Due to factors outside of Forage Genetics International's (FGI) control, such as weather, crop production patterns, and other factors, results to be obtained, including but not limited to yields or financial performance, cannot be predicted or guaranteed by FGI. Results are based upon FGI controlled tests and field trials and public trials. Results may vary.

HARVXTRA
with Roundup
Ready® Technology

For the 2017 growing season, growers must direct any product produced from HarvXtra® Alfalfa with Roundup Ready® Technology seed or crops (including hay and hay products) only to United States domestic use. In addition, due to the unique cropping practices do not plant HarvXtra® Alfalfa with Roundup Ready® Technology in Imperial County, California, pending import approval in China and until Forage Genetics International, LLC (FGI) grants express permission for such planting. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their product purchaser to confirm their buying position for this product.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Roundup Ready® and Roundup® are trademarks of Monsanto Technology LLC, used under license by Forage Genetics International, LLC. HarvXtra® is a registered trademark of Forage Genetics International, LLC.
