No worries with watertight timber

P. 9

Our watertight Faro and Amato ranges fit beautifully in every room of your home. sit back and relax, this floor can hold its own.

YOUR LIFESTYLE,
YOUR FLOOR

Carefree living starts with exceptional floors that can withstand what life throws at them. From mud trails after walking the dog to wine stains after an epic party with friends: no matter the challenge, your timber floor is protected for years to come, thanks to our Easy To Clean technology. This innovative protective layer prevents dirt from getting into the grain, ensuring that your floor always looks new and authentic. For an extra layer of protection, take a look at our Amato & Faro collections, featuring our unique waterproof surface technology. The ranges offers the very first watertight timber flooring.

Add style and ease to your life

Choose from our wide range of colours and styles and enjoy the natural, authentic feel of true timber. Are you a traditionalist or a modern visionary? Whatever your taste is, we help you bring character into your home. Pick a colour and explore a vast range of floors suitable for your needs. No worries: it's all real timber with zero compromises in terms of strength, durability and performance. It's built for you to last a lifetime.

Make a splash

Watertight timber flooring

Our watertight Faro and Amato ranges are beautifully suited to every room of your home, including your kitchen and bathroom. Experience authentic timber beneath your feet without compromising on durability or ease of use. Sit back and relax: this floor is up for anything.

Unwind

If happiness for you is taking a long, warm bath, you shouldn't be worrying about your floors getting wet. Upgrading the most relaxing room in your home means upgrading your wellbeing. Faro and Amato floors are suitable for use in all rooms, including kitchens and bathrooms.

WOOD FOR LIFE: TIMBER THAT CAN HANDLE YOUR *lifestyle*

Quick-Step timber with Wood for Life

Live life to the fullest. Our durable floors are made for bathtime fun with your kids, dinners with friends and playtime with your pet.

1. EASY-TO-CLEAN SURFACE

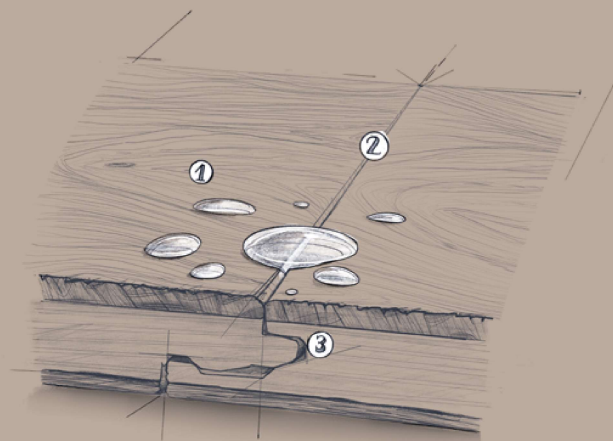

Your floors will never look dirty or dark. Thanks to our Surface & Edge Protect technology the timber is protected from water, making it easy to clean. Dirt and liquids won't stick to the timber!

2. NO DARK JOINTS

The unique hydro repellent technology is applied to the timber joints, ensuring the pores of the timber remain clean and untouched from outside dirt and liquid.

3. NO WATER INFILTRATION

Enjoy our new and improved click design, which ensures a tight fit on all sides. On top of that, the Hydroseal coating stops all water from leaking through and causing damage to the bottom of your floor. Amato and Faro ranges only.

INVITE NATURE INSIDE

With natural materials and plants, you can add a spark of nature to your home. It's all about natural beauty. That's why all our materials are treated with the utmost respect, passion, care and attention to detail. The floors you walk on are the result of years of refinement. Every plank is unique and gives your home authentic character. It's the type of craftsmanship you deserve – straight from the heart.

Creating your perfect floor: a labour of *love*

To manufacture flawless timber for your home, we're constantly looking for the right balance between wood types, grading, colours, structures, finishes and plank sizes. These are the steps we follow meticulously.

1. GRADING YOUR FLOOR

To provide a product for everyone's specific taste, every timber floor receives a unique grading. We make an extensive selection of the wood grain and colour, knots and cracks, and translate the tree's characteristics into a wooden floor. From a clean, calm vibe with a few knots to a more rustic look with more knots, cracks and a lively colour variation.

2. CREATING EASY-TO-USE PATTERNS

Working with patterns like multistrip and chevron shouldn't be difficult. Whether you go for smaller or bigger sizes, we've taken the hard work out of laying patterned timber flooring.

AMATO

AMT3845

3. BRUSHING FOR AN AUTHENTIC FEEL

To create designs that really stand out in your home, we accentuate the wood grain by brushing it lightly or heavily.

4. CHOOSING THE RIGHT COLOURS

Colour is indispensable in any interior. Whether you go for trendy or traditional, we ensure you can pick between light as well as dark colours. In creating your perfect floor, our floor designers match the right colours, grades and surface effects to find the right balance.

5. GOING FOR THE PERFECT FINISH

We protect your floor with a high-quality finish and determine the final gloss level. Extra matt finishes are the most popular, but sometimes we add a little more "shine" to increase the intensity of the colour.

This unique combination is what makes your Quick-Step floors stand out from the rest. Furthermore, we make sure they're always built to last by applying numerous innovations to increase durability.

It's the perfect marriage of design and performance!

BRING NATURE INSIDE

The beauty of nature is in its diversity and detail. Invite it into your home and create that unique, authentic look. From grading to wood treatment and finishing: learn all there is to know about our floors and explore how to enjoy them for many years to come.

NATURE

Natural colour variation and small knots
for a subtle look.

MARQUANT

Lively colour variation with more pronounced knots
for a rustic look.

VIBRANT

Lively colour variation with big knots and cracks
for a floor full of character.

Grading

Our classification system divides our wide range of oak floors into different categories: nature, marquant and vibrant. Even though each plank is unique, this will give you an idea of what your floor will look like in the end.

All Australian wood varieties are graded as per AS2796 Standard and Better. This grade includes knots, gum veins, fine cracks and other natural features of Australian Eucalypts.

Naturally, all wood floors fade and change colour overtime. This is a natural part of the ageing process. Also be aware that your flooring will vary from in-store samples.

Types of wood & Janka rating

The beauty of nature lies in its variety and detail, and that is exactly what the Quick-Step Timber offers.

*Janka rating is a measure of the resistance of the wood to indentation.

The higher the number, the more indentation resistant the timber.

*11

SPOTTED GUM

Spotted Gum is an Australian hardwood with wide colour variation and excellent hardness. It may contain some fine surface cracks. This wood species is not recommended with heated subfloors.

*approx. 8.6

MERBAU

Merbau is a reddish brown hardwood of excellent durability from South East Asia. It often contains a small yellowish fleck in the grain.

*6.0

OAK

European Oak is extremely popular and ranges in colour from pale straw to mid brown. Knots and medullary rays are a real feature of this stunning hardwood.

*9.1

BLACKBUTT

Blackbutt is an Australian hardwood with excellent hardness. It may contain prominent gum veins, insect marks as well as some fine surface cracks. Not recommended with heated subfloors

*7.5

SYDNEY BLUE GUM

Sydney Blue Gum is an Australian hardwood with wide colour variation and moderate hardness. This wood species often contains a variety of dark borer marks and trails.

*5.6

TASMANIAN OAK

Tasmanian Oak is a blend of pink/straw coloured hardwood species of moderate hardness from Tasmania. Some small surface splits or surface checks are an occasional characteristic of Tasmanian Oak.

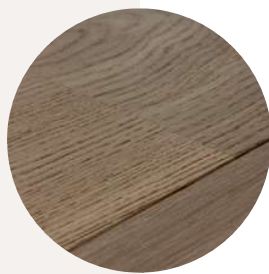

Surface treatment

We apply a broad range of surface treatments, giving you a vast selection of differing styles to choose from.

(DEEP) BRUSHED

Through brushing, the natural grain structure of the wooden plank is accentuated, adding depth.

TIMEWORN

A soft hand-scraped surface, creates contoured boards and bevels for a time worn look and feel. Refer P. 34

NATURAL KNOTS

Knots are a natural part of the wood, emphasising its liveliness. By including knots with subtly recessed surfaces, the authentic look of your floor is emphasised, creating more depth and a vintage look.

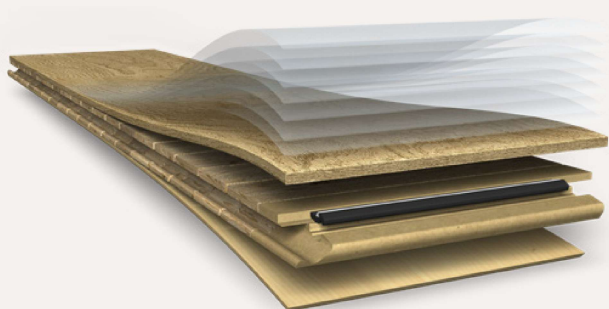

SAW CUT

Random saw marks show craftsmanship and character of the timber planks.

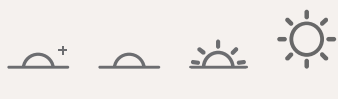

Finish

All Quick-Step timber floors are pre-finished with a specifically formulated, high performance European lacquer. You won't need to lacquer or oil the floor after installation. Thanks to this protective layer, your timber floors will look brand new, even after years of use.

- ✓ High quality lacquer finish
- ✓ Solid hardwood face layer
- ✓ Plantation hardwood Hevea core (Faro and Amato ranges: HDF)
- ✓ Plantation Nordic spruce backing

LACQUER FINISH IN (EXTRA) MATT, LOW SHEEN AND GLOSS

- Seven layers of protective lacquer.
- Highly scratch and wear resistant.
- Improved protective layer that keeps the surface and the joints of your floor clean, even after years of use.

A HEART FOR YOUR HOME AND OUR PLANET

We all love natural beauty. The only way to continue to enjoy the beautiful things our planet has to offer is to treat it with respect. That's why our flooring products not only look good, but are as long-lasting and sustainable as possible. Together, we can reduce our ecological footprint, from the production of your flooring to the end of its life.

Using timber economically

As a renewable resource, trees play a crucial role in combatting climate change. So we must treat them with care, in particular the slow-growing species such as oak. That's why we use these species only in the top layers of our wood. We prefer to use timber from **fast-growing trees** or **recovered timber** such as from sawmills for the core. And for our **Readyflor 2 and 3 strip, along with Herringbone and Intenso**, we create unique designs using small pieces of timber that would otherwise go to waste. This is how we get the most out of every tree, and you get high-quality flooring for your home.

Wood can be an infinite resource if we manage our forests in a sustainable way. A **PEFC label** means that the wood in your flooring comes from sustainably managed forests.

Green source of energy

If the wood has reached the end of its life and is no longer suitable for use in your flooring, we will give it a new lease of life in the form of **green energy**. Our primary heat source for the production of timber is wood residues and dust, which cover about 90% of our requirements.

Clean indoor air

Most of your life takes place indoors, which is why the air quality in your home is so vitally important. Many factors have an effect on it: ventilation, candles, cleaning agents, and even the materials used in your interior, such as the flooring. We minimise the emissions of harmful substances by producing your flooring **in-house** as much as possible. This means we know exactly what materials it contains. In fact, the formaldehyde emission value of our wood products is on average **ten times lower** than the EU's Class E1 requirements.

This label demonstrates that your flooring complies with strict environmental and health standards.

Easy to install and dismantle

As timber flooring is a long-term investment, we provide you with a **lifetime structural & 25 year wear warranty**. What's more, our advanced click technology makes it really easy for you to install your flooring **without any glue**. If you ever need to remove your flooring, you can do so without damaging it or making a mess, thanks to its glue-free installation. This means that your flooring can be processed efficiently when it reaches the end of its life.

TOOLS TO HELP YOU CHOOSE

FloorExplorer

With so many flooring options to choose from, making the right decision can be a challenge. Let our FloorExplorer guide you through a selection of floors that match your personal needs and style in just a few steps. Give it a try!

FIND A DEALER

quick-step.com.au

RoomViewer

Having doubts about which Quick-Step floor suits your interior best? No problem! Thanks to our online RoomViewer, you can preview any floor in your own interior to help you make the right choice.

DOES SIZE MATTER?

Undoubtedly yes!

A simple rule to follow is to use large formats for large rooms to emphasise the spacious ambiance.
For small or irregularly shaped rooms, small formats will match the proportions of the room better.

IN WHICH DIRECTION SHOULD I INSTALL MY FLOOR?

Guided by the light

The direction of your floor has a huge impact on a room's overall appearance and can be a tough nut to crack. As a general rule, lay your floor in the same direction as the main light source in a room and in the same line as the most frequently used entrance. If there are several doors and windows, then opt for the direction that's the easiest to install.

In short rooms

If you're laying your floor in a short room, you'll want to add a sense of depth. Make the room look longer by installing your floor lengthwise. Want to increase the effect of lengthwise installation? Make sure to combine a light-coloured floor with darker walls: this will add even more depth to your room.

MASTER INSTALLERS AT YOUR SERVICE

Opt for professional installation by an accredited Quick-Step Master Installer. These experts are trained at the Quick-Step Academy, the most exclusive training centre in the flooring industry.

- Get the best result with expert underlay selection and subfloor preparation.
- Make your floor stand out with advice on the correct installation direction.
- Enjoy a perfect finish: meticulously fitted skirtings, profiles and staircases.
- A lifetime installation warranty is offered on all Quick-Step floors installed by a Quick-Step Master Installer.

** depending on availability, you will receive planks measuring 1820 mm, 2200 mm or 2400 mm in length. Pack sizes will change accordingly.

**Boxes can contain some shorter boards to make up the full length.
These can be used at the start or end of a row, leaving the full board lengths for the centre.
It also improves sustainability by allowing us to make full use of the tree.**
