

# MK-ULTRA Never Ended

## Evolution of MK-ULTRA

| Time Period   | Program Phase                          | Primary Control Methods   | Delivery/Technology   | Primary Targets   | Key Changes/Evolution  |
|---------------|--|---|---|---|--|
| 1950 – 1960s  | Classic MK-Ultra                       | LSD & other drugs, hypnosis, electroshock, sensory deprivation, “psychic driving” (repeated audio loops)  | In-person/Lab-based: Injections, hospitals, prisons, safehouses; early electrode implants (animal tests)  | Unwitting civilians, prisoners, mental patients, soldiers, researchers                                | Physical/chemical focus. Goal: break & reprogram minds for interrogation, assassination triggers (“Manchurian Candidate”), behavior modification. High risk of detection due to direct contact.  |
| 1970s – 1980s | Post-Church Committee                  | Shift from drugs to early electromagnetic experiments; continued psychic driving but with emerging radio/microwave tech; subliminal audio testing. Early V2K. | Covert labs + initial remote experiments; microwave auditory effect (Frey, 1961) weaponized; early satellite signals  | Whistleblowers, dissidents, military personnel; some family lines from prior experiments              | Official “termination” in 1973 masks continuation. Move toward lower-visibility methods. Subliminal messages tested via radio/TV; first claims of synthetic telepathy via EMF. Reduced physical evidence.  |
| 1990s - 2000s | Wireless “No Touch” Torture Era begins | Remote Neural Monitoring (RNM) rollout V2K (voice-to-skull), subliminal EMF messaging, directed energy for pain induction                                     | Satellites, cell towers, microwave pulses for auditory hallucinations; neural entrainment via ELF/VLF waves   | Expanded to civilians exposing government/corporate corruption; “prototype” families                  | Full pivot to remote operation. Reduced implants and drugs needed. Subliminal messages delivered directly into brain via modulated microwaves (bypassing ears). Integration with GPS tracking & data fusion. Plausible deniability maximized.  |
| 2010s – 2026  | Modern “MK-Ultra 2.0”                  | Advanced RNM, synthetic telepathy, real-time brainwave reading/alteration, subliminal behavioral commands, organ specific DEW attacks                         | Ubiquitous infrastructure 5G/6G towers, satellites, drones, smart devices, AI-driven signal processing (TAMI-like systems), spread-Spectrum & bio-amplification for undetectable delivery | Whistleblowers, activists, journalists, random civilians (to test scalability): gangstalking as cover | Fully remote, scalable, AI- automated. Subliminal messages now primary tool for thought insertion, emotional manipulation, behavior scripting without subject awareness. Physical symptoms (pain, fatigue) via calcium-ion disruption. Global, 24/7 coverage; integration with surveillance state. Goal: Silence threats without traceable evidence. |
