

12 PM-3 PM (AEDT), FEB 24, 2022 WASTEWATER MONITORING OF COVID- 19: PROGRESSES AND CHALLENGES

The Asia-Pacific Network for Wastewater Monitoring of COVID-19 (WATMOC)

This WATMOC webinar presents an artificial neural network model for the estimation of COVID-19 case numbers and effective reproduction rate. The webinar also showcases COVID-19 research by the collaborators of the Regional Collaborations Programme COVID-19 Digital Grant funded by Australian Academy of Science & the Department of Industry, Science, Energy and Resources.
