

## Case Study #4: Recycling Roofing Membrane Promotes Corporate Sustainability

Customer: Roofers for Meijer Grocery Stores  
Job Locations: MI, OH, KY, IN  
Job Size: (4) roofs totaling 959,000 sf  
Yield: 96,000 lbs of EPDM and TPO Membrane  
Timeframe: Spring 2020

The Meijer Company operates 204 grocery stores throughout the Midwest. As part of their commitment to sustainable operations, Meijer specifies that membranes removed during re-roofing operations should be recycled. NFR has been the go-to company for roofers providing services to Meijer for many years. In the spring of 2020, NFR provided recycling services at four (4) Meijer projects. Upon completion, NFR issued certificates of recycling to Meijer giving their sustainability manager something to crow about!

*Nationwide Foam Recycling helps re-roofing contractors save money and reach their sustainability goals by recycling ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO roofing membrane.*

*Unlike traditional recyclers that focus on straightforward waste streams like corrugated cardboard and metal, we specialize in recycling difficult wastes. If you have a re-roofing project that will produce a sizable volume of foam insulation or membrane waste give us a call. We'll implement a collection, transportation, processing and recycling program that will save you time, labor and money.*

**Nationwide Foam  
Recycling collects and  
recycles ISO, XPS and  
EPS Foam Insulation  
Board as well as EPDM,  
PVC and TPO Roofing  
Membrane**

**Our recycling programs  
save re-roofing  
contractors money and  
help them win bids**

**Re-roofing contractors  
that recycle with NFR  
help their building  
owners exceed their  
LEED and sustainability  
goals**

**We've successfully  
recycled re-roofing  
wastes since 1992!**
