

Case Study #1: 10 Trailer Loads of PolyIso Foam Insulation

Job Location: Allen, TX

Job Size: 120,000 sf

Yield: Ten (10) 48' trailer loads of 2.5" PolyIso

Nationwide Foam Recycling (NFR) provided recycling services for the re-roofing project at Allen Premium Outlets in Allen, TX.

NFR provided live load pick-ups of 2.5" PolyIso foam insulation using 48' flatbed trailers. In just two weeks, NFR picked up ten (10) truckloads of insulation which saved the roofing contractor over \$16,000 in avoided disposal costs.

Prior to bringing NFR onto the job, the roofer had a full-time person staged at the 30 yd trash dumpster cutting, fitting and stacking the insulation to try to reduce the number of dumpster swaps needed. The project manager stated that stacking and loading insulation onto NFR trailers was simpler, more efficient and actually reduced their labor costs.

When asked to critique NFR's service, the project manager said that NFR communicated well and showed up for pick-ups when scheduled. The only regret he had was not finding NFR sooner.

Nationwide Foam Recycling helps re-roofing contractors save money and reach their sustainability goals by recycling ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO roofing membrane.

Unlike traditional recyclers that focus on straightforward waste streams like corrugated cardboard and metal, we specialize in recycling difficult wastes. If you have a re-roofing project that will produce a sizable volume of foam insulation or membrane waste give us a call. We'll implement a collection, transportation, processing and recycling program that will save you time, labor and money.

Nationwide Foam Recycling collects and recycles ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO Roofing Membrane

Our recycling programs save re-roofing contractors money and help them win bids

Re-roofing contractors that recycle with NFR help their building owners exceed their LEED and sustainability goals

We've successfully recycled re-roofing wastes since 1992!

Case Study #2: 70 Trailer Loads of PolyIso Foam Insulation

Job Location: Mt. Juliet, Tennessee
Job Size: Three (3) roofs, totaling 1,300,000 sf
Yield: Seventy (70) 48' trailer loads of 4.3" PolyIso
Timeframe: Spring 2020

As a result of severe damage caused by a tornado touch down in Mt. Juliet, TN, Nationwide Foam Recycling provided services at three (3) separate large re-roofing projects at the same time.

Combined, the three roofs generated 70 tractor trailer loads of reclaimed insulation. With the buildings exposed, rapid repairs were necessary. The projects moved quickly - NFR provided up to five 48' flatbed pick-ups per day. The cost of NFR's recycling service was 4 times lower than disposal, resulting in a cost savings of \$75,000 for the three roofers.

Nationwide Foam Recycling helps re-roofing contractors save money and reach their sustainability goals by recycling ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO roofing membrane.

Case Study #3: Recycling Off-Spec XPS Foam Insulation

Customer: Foam Insulation Board Manufacturer

Timeframe: 2019-2020

NFR is providing recycling services to a manufacturer of XPS foam insulation in support of their shift to a more environmentally benign blowing agent. NFR has picked up and reclaimed over 150 truckloads of foam insulation to date. NFR's recycling services have saved the manufacturer thousands of dollars per month in avoided disposal costs.

Nationwide Foam Recycling helps re-roofing contractors save money and reach their sustainability goals by recycling ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO roofing membrane.

Case Study #4: Recycling Roofing Membrane Promotes Corporate Sustainability

Customer: Roofers for Meijer Grocery Stores
Job Locations: MI, OH, KY, IN
Job Size: (4) roofs totaling 959,000 sf
Yield: 96,000 lbs of EPDM and TPO Membrane
Timeframe: Spring 2020

The Meijer Company operates 204 grocery stores throughout the Midwest. As part of their commitment to sustainable operations, Meijer specifies that membranes removed during re-roofing operations should be recycled. NFR has been the go-to company for roofers providing services to Meijer for many years. In the spring of 2020, NFR provided recycling services at four (4) Meijer projects. Upon completion, NFR issued certificates of recycling to Meijer giving their sustainability manager something to crow about!

Nationwide Foam Recycling helps re-roofing contractors save money and reach their sustainability goals by recycling ISO, XPS and EPS Foam Insulation Board as well as EPDM, PVC and TPO roofing membrane.
