

YOUR POTENTIAL, OUR PASSION

ICT Business Aggregator

ICT Business Aggregator

Vision

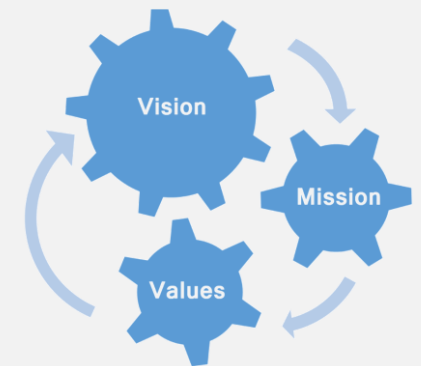

To build a better world with Information Technology

Mission

To be the providers of ICT strategies and services, which deliver long term commercial benefits, based upon our Customers key business goals and requirements. The strategies evolved should be economical, efficient, durable, flexible and allow the organisations to respond rapidly to both market and customer needs.

Values

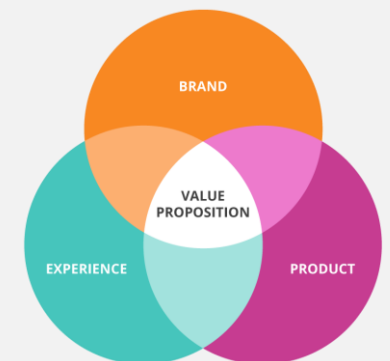

- Be Passionate and Determined
- Embrace and Drive Change
- Take Ownership and Accountability
- Think and Act as a Professional
- Establish Trust with Communication
- Revitalise through Learning and Growth

Value Proposition

We help SMME's and Enterprise Customers that need to make the shift to a Business-first Networking Model succeed by allowing the network to conform to the Business through a leading SD-WAN solution.

Unlike other SD-WAN offerings, Silver Peak drives the way network resources are applied to match the business. This is demonstrated by the Silver Peak EdgeConnect architecture that utilises virtual WAN overlays based on business requirements for every class of application.
