

Nanolyn®

Carbon Nanotube Fibers

Dallas, Texas (September 21st, 2021) – Alchemy Creative, Inc. a venture holding company headquartered in Dallas, Texas is pleased to announce that Nanoland U.S.A., Inc. has a strong intention to establish a mutually beneficial business relationship with Siddarmark, LLC (Siddarmark) of Japan.

NanoLand U.S.A., Inc, a wholly owned subsidiary of Alchemy Creative Inc. (ALMY-OTC Pk) is a Pennsylvania based corporation and pioneer in the business of specialized nanotechnology applications.

Siddarmark is the international marketing and sales arm of Japan’s Siddarmark Wearable Sensor, Co. Ltd. (SMS). In 2020 Siddarmark successfully introduced the world’s first biological vital sensor chip made from CNT yarns consisting of Double- Triple walled CNTs with no size distribution.

This move brings together technical expertise and practical experiences from each of the parties in order to develop next generation Carbon Nanotube Yarn Biosensors that will service worldwide commercial applications.

The Parties have studied the business and technical feasibility for commercializing Nanolyn branded Bio Sensors for the North American marketplace and determined that Siddarmark’s CNT Yarn is an advanced technology that will embrace specific wearable ECG, EMG, and EEG biosensor applications in addition to motion sensors that enable to visualize human motions in 3D of medical and videogame fields.

The Parties plan to immediately penetrate the SaMD sector by deploying a scope of work, time frame for major milestones, role and responsibility of product development and system integration workflow with testing to be part of a definitive agreement planned for Q4 2021.

Dr. Ilise Feitshans, Scientific Advisor to Nanoland U.S.A, Director of ESI Safernano Training at the European Scientific Institute and Author (Global Impacts of Nanotechnology Law) stated “Everyone expects big things from nanoparticles but this effort for developing specialized CNT Yarn biosensors has massive commercial potential.”

Dr. Shuji Tsuruoka, Siddarmark’s Director of research and product develop shared, “our product offers unique features within refined innovation that responds to problems our CNT competitors could not address.”

Safe Harbor Statement

This release may contain statements that are forward looking. Such statements are made based upon current expectations that are subject to risk and uncertainty. ALMY does not undertake to update forward-looking statements in this news release to reflect actual results or any or all changes in assumptions or other factors affecting said forward-looking information. The actual plans and results of the companies therefore may differ significantly from such forward-looking Statements which do not provide binding representations regarding the relationship of the parties or future products.
