260613 909 am assault on right knee in stairwell Bldg One followed 857am request for legal service addresses from Shirinian and HHM (eml pdf attached), and previous evening/Sat am hiking and backpacking kit assembly on REI.com and Amazon for possible exit path if force out completed and Section 8 functional non-transferability sustained in accordance with 2020 attempt to relocate denial by email correspondence nominally with NJ DCA (DHS or other eml interposer, if any, unknown).

Psychological coercion, dominance and control pattern of bioweapon aggressions and rights violations (racketeering and Bivens violations, principally perpetrated by DHS personnel at street level across multiple states, after 9/11 and formation of DHS in EOP-Ridge then as dept) in street level and bioweapon punitive and predatory police powers operations has been a consistent pattern since August 2002 exit from CNA Industrial Engineering, as forensically reverse engineered and periodically documented.

**Subject** Intrusive Thought Threat to Life - Bioweapon Thought And NarrativeCapabilities

Modern versions of the illegal bioweapon have both thought and natural language narrative capabilities. Over the past several days in addition to the right knee physical assault and street level indirect threats delivered on walks to/from Edgewater Commons yesterday pm about going too far, there was a sleep med tv ad last night followed this time by a 437am self-harm intrusive thought sequence related to that. I immediately responded with a verbalization about a final solution which documents the moment of occurrence.

This thought and narrative process has been known for some time. It was initially trained in on bus rides over the past two years where phrases in my head were simultaneously echoed by verbalizations from fellow passengers (undercover federal agents). It was introduced in a positive and humorous way but in recent months has turned mostly dark along with the other physical assaultive behaviors being demonstrated in repeated falls which are bioweapon driven.

Natural language capabilities have been used in two-way communication about logistics to and from NYC and other locales for around two years.

For some time, I stopped making public my schedule which eliminated other police powers visibility, among other things. I recently restored that visibility to my schedule with the expected results of broader undercover coverage particularly in NYC.

In recent times, those scorched earth tactics have been increasingly applied to perverse outcomes such as the clear out of public spaces (such as Brooklyn Museum on two most recent visits and Brooklyn Botanical Garden most recent visit) to try to eliminate interactions with the general public as part their intentional disappearing Dennis operations. Over several years, this tactic has been combined with massive fraudulent staged events such as two UJC Conferences in NYC, one MLK Day diversion in DC, fake art show at Javits proclaiming itself as an Armory Art Show and similar events.

Taken together with housing instability introduced by DHS in recent weeks (likely playing a captive version of pocket pool with that issue among others across its own entities and personnel), the totality is definitive evidence of a driving campaign and dispositive evidence of attempts to criminalize through the systematic abuses of rights and exploitations of the mind control aspects of the illegal bioweapon and its delivery system weaponized against American civilians in violations of the Constitution and amendments, 18 USC 175-178, 241, 242, 1385 and myriad laws which fall under 1961-1968.

On Wednesday, June 10, when Trump was visible in NYC for Knicks Spurs game 4, there were no issues with muscle cramping control pulse respiration etc double time both ways on twice daily walks to/from City Place Edgewater Commons with 3.5 flights of stair descent and climb each direction, as was typical over past several years, except during specific disruptions reported elsewhere, This was typical personal physical functionality until this latest physical driving episode began about 7.7 months into long cycle 5.5 hour sleep deprivation since Oct 4, federal fiscal year related date, with differential circadian rhythm disruptions 10pm one night, 2am another night to simulate added stress comparable to persistent jet lag.

Other physical interventions are clearly bioweapon related, including three plus weeks of leg muscle tightening, as well as recent assaults reported elsewhere.

Last night 930pm with disruptions total appx 30-60 minutes by 630am. Most prior nights over past 2 plus weeks were closer to 4 hours net of disruptions, occasionally 5.5 hours. Overall total averaged remains in 5.5 hour range, well short of 7.5 plus prior to October 4, 2025 start of systematic sleep deprivation by bioweapon disruptions.

Physical injury assault at PABT as last reported has been followed by brief dizzy woozy episodes on up escalator on each visit followed by crowded conditions on next departure. Forced to wait at least one run, appx 30 minutes, to leave PABT each time to avoid faint/fall risk associated with additional standing time under dizzy woozy imposed symptoms and wild yaws on turning corners associated with these enroute trips back to City Place lasting about 25 minutes typically. Necessary precaution to avoid further faint/fall risk by bioweapon assaults enroute, as previously experienced on MTA Hudson Line train and DC Megabus return runs to NYC.

Login attempt failures when in airplane mode selected prior to last power off shutdown and disconnect

B. Similar pattern is true for cell phone as noted while car camping in WY - phone notifications buzzed while phone was supposedly completely turned off and not connected to any power source.

C. Both cell phone and pc went to zero charge indicated while in WY/CO

Only legal means of these no-notice ops would be a FISA warrant. All other means are illegal and First Amendment violations.

Potential health and safety risk even if emergency service actually available as victims logically assume zero access is the actual condition. No aid would yield potentially deadly effect. Potential for anonymous accountability fails with no consequences.

**Subject** Phone charge hacks

Extensive notes detailing phone charge hacks over past 10 days or so were deleted from this cell phone this morning by others.

Phone charge was diminished on multiple occasions from 54% to mid 20s then to near zero multiple times over past week.

Elements of DHS harassment and driving campaign on ground and across pc and phone. Comparable to longer cycle in NJ and to CO/WY travel series in first half of August. 18 USC 241 242 KKK Act violations.

Stephen Waters hook up was named Connie, our LazerSoft office AA, hired by Roger Stone, my predecessor.

Connie was supposedly ex-secy and then ex-wife of Denny who ran computer training schools in Bellevue area.

Waters was from Austin in the Adm. Inman Chair CEO of Austin area tech companies era.

We used Auscomm channel interface unit in our LazerSoft optical disk drive products. Was supposedly debugged by Auscomm after Waters took the unit and flew to Austin for quick fix at one point in Puget Sound Power install. Same install as TMG, Cheney/Leo 1988 scenario described on ProjectMindBreaker.org website.

Waters SMU EE in the same way Mr Name Not Recalled at CNA was BSME and later Speaker Johnson during HomeGrocer.com Austin and Mattis en masse field ops cycle late 90s.

Waters later took me on a mid 90s chartered Cruz with strangers on Lake Washington, supposedly fellow Microsoft employees. Sen. Ted TX.

Compare this scenario to West shower scene attempt (lived one house to my east. Fed by lower West Side Manhattan shower scene with Steph Clifford.

Then you might begin to understand long cycle federal Intel community tradecraft rhymes in pursuit of serial federal public corruption. 2005, 2008.

Subject: Federal Biochemical Abuse Signatures

Sexual abuse biochemical signatures in federal bioweapon inventory:

Female - ran in conjunction with income starveout business wrecking in 04-05 using rich woman wife poser and shower open front door at adjacent West "household" and previously during left leg pains DVT related ultrasound at Evergreen Hospital adjacent clinic.

Child - 11yo male across street over several months in same timeframe just prior to forced sale. Part of staged neighborhood in same residence used by Burns as Heffron in early 90s.

No voluntary or involuntary action taken by me but signatures were repeated and unmistakable for anything else. Mysterious appearance and disappearance at that time due to lack of understanding of root cause as reverse-engineered in 2020s.

Political corruption and cabal self protection are directly related as persons who appeared in same extended timeframes 80s 90s either were or now are political leaders in both major parties. See New Corruption Identities for starters, more likely follow once recent illegal propagandized sourcing is discontinued by government.

Remaining open items include, without limitation, mass abuse targeting, mass casualty events, international abuses given Epstein/Maxwell meme around 83 QEII visit to Seattle (18 USC 175 says by or against US persons) while Stone was on S Africa ATM project during apartheid in Reagan/Casey era and Iran Contra was underway.
