

What can **you** expect from Patient Centered Medical Home?

- Your team can answer questions and help you better understand your healthcare needs.
- If you need help from other providers, your team can support you every step of the way.
- When you have concerns about your health, your medical home team will work with you to determine the best way to deal with them.

A medical home is a team approach to providing total healthcare. Your medical home team will include your health care provider, nurses, office staff and most importantly... **YOU!**

Make a list

Use a list of questions you've written down. Ask the most important questions first. Even if you cannot get answers on the first visit, having a list will help you keep track of the answers.

Homework

Before you leave the office, be sure you know the things you need to work on before your next appointment. Repeat them back to your team, this way both you and your team will know the information is clear. Ask your team how to reach them after hours.

Medical Home Can

- Help you manage your healthcare
- Help answer your health questions
- Listen to your concerns
- Work with other medical experts if necessary
- Coordinate your care through additional services
- Encourage you to play an active part in your own health.
