

TAKIN' CARE OF BUSINESS

HAS NEVER BEEN EASIER THAN WITH A STAMPEDE STEEL HYDRAULIC CHUTE

Not only will your cows thank you, but so will your crew!

With the development of the first livestock handling system in the industry to operate from the rear, Stampede Steel's innovative design keeps you and your crew out of the flight zone, making for better and safer handling of livestock than ever before. Add a Stampede easy-flow "S" Alley and Crowding Tub to make working cows a pleasurable experience, not to mention a real time-saver!

Producers have two Hydraulic Chute models to choose from – the Basic Hydraulic Squeeze and the Rancher's Choice. The chutes feature heavy duty construction with an emphasis on noise reduction in the handling area. The Bifold Action Head Gate is completely parallel from top to bottom, resulting in better comfort for the cattle. The design also eliminates the possibility of choking.

Chutes are available with the traditional Load Bar or Overhead Scale Systems and the Optional Pivot Arm, allowing operators to work from the front, rear, right or left. The arm pivots 340 degrees, allowing the operator to be in any position to the animal in the chute and completely out of the flight zone.

QUALITY AND CUSTOMER SERVICE ARE SECOND-TO-NONE AT STAMPEDE.

Stampede Takes the Hassle Out of Working Cattle!

STAMPEDE STEEL *Chutes*

MAKE WORKING CATTLE ENJOYABLE!

BASIC

Stampede Steel Hydraulic Squeeze Chutes can do it all! The Basic model is designed to meet the needs of ranchers with any size and type of operation.

The Basic Hydraulic Squeeze comes standard with Neck Injection Doors, Brisket Bar and Ratchet Bar. Available options, include: Double Dutch Doors, Neck Bender, SureCatch, Pivot Arm, Overhead or Load Bar Scale System, Transport Unit and Gas Power Pac.

The Stampede Sales team, made of up ranchers who understand the needs of today's cattlemen, will work with you to setup a system to fit your operation.

RANCHER'S CHOICE

The Rancher's Choice model comes standard with Neck Injection Doors, Brisket Bar, Ratchet Bar, Palpation Doors, Overhead Pivot Control Arm, 5-Horsepower Pac and Double Dutch Doors, allowing for access to the bottom portion of the animal in the chute. Available options, include: Hydraulic Head Restraint, Overhead or Load Bar Scale System, Transport Unit and Gas Power Pac.

Stampede takes the hassle out of working cattle to the next level with the Rancher's Choice model, which can be used for everything from vaccinations to preg checking and embryo transfer work. Once you use it, you'll wonder how you got along all those years without it!
