

The roofing solution that offers new options for today's metal roofing customer.

Horizon S brings value, beauty and performance together while offering a superior roofing choice for residential and light commercial applications. The value is clear in the substrate and finish, featuring 26 gauge high strength Galvalume steel, and Energy Star approved standard colors with 10 layers of protection provided by the Enduracote[®] paint system. Performance stands out with the proven snap together design, standard shadow lines and standard factory applied sealant.

Horizon S offers a look for every style and is made to withstand the elements; it is weather, wind, fire, insect and hail resistant. You will appreciate the value Horizon S offers as the years accumulate with little or no maintenance costs.

For great looks, maximum performance and installation that's a snap, choose Horizon S.

- Light weight, energy efficient and fire resistant
- Easy to install - can be installed over solid decking or over an existing shingle roof with furring strips
- Snap together design with pre-punched fastener slots
- Fade-resistant Enduracote[®] paint system with a lifetime finish warranty for many years of low maintenance beauty
- Shadow lines to enhance appearance
- Factory applied sealant is standard for optimum weather tightness
- 16" standard coverage; custom cut to lengths
