

Report to the Board of the Town of White Lake July, 2021

Diane Lauritsen, Ph.D., LIMNOSCIENCES

July is Lakes Appreciation Month—a time to reflect on the gifts provided by lakes that form the heart of communities such as the Town of White Lake. It is also a time to reflect on how much work has been done in recent years to understand White Lake and how it has changed over time.

The list of lake-related things to appreciate this year includes:

- Relatively high lake levels this summer, aided by above average rainfall in June (7.9")
- Stable lake conditions, comparable to the past three summers
- The repair and replacement projects, both large and small, that have been done on the Town's wastewater collection system, with more work planned
- The initiation of stormwater planning for the Town
- The work that is being done to update the Town's Comprehensive Land Use Plan
- The creation of a science advisory group for White Lake
- The completion of an annual report which documents all of the lake monitoring projects done in 2020
- The value of the White Lake Watch website, which contains current and historical information about White Lake (including the annual reports and monthly monitoring data)
