

We provide you with an ESG model for your company: Governance with Integrity - Social and Environmental Responsibility

TKonsult coordinates independent consultants with extensive experience in industry and business. We have been in high responsibility positions in the areas of Compliance and Risk Management, Quality Management, Finance, Human Resources and Project Management. In addition, we are involved in academia transmitting our knowledge.

We offer the combination of business practice, namely for the implementation of Governance and Integrity management systems, as well as Social Responsibility projects, with the academic and conceptual support that allows us to transmit our knowledge and educate company experts. Our consulting process includes the accompaniment of the persons designated by the company until concrete results are being achieved and the system efficacy has been proven. We do not limit ourselves to make proposals and give conferences. We make sure that the enterprise learns how to manage the systems and understands the benefits.

We offer **consulting and training** in the fields of

- Process Management
- Objective Management
- Compliance
- Risk Management: strategic, operative and compliance risks
- Integrity Policy, Conflict of Interest and Corruption prevention
- Structured Social and Environmental Responsibility
- Institutional Relations and Corporate Communications
- USMCA requirements compliance

Ensuring the compliance with commitments regarding ESG requires preventing undesirable events and deviations with a robust **Governance** system, which includes Compliance, Risk Management, Integrity Policy and Institutional Relations. The Governance-focused ESG model

- Improves resilience of the enterprise in uncertain environments
- Reduces the probability of non-compliance
- Commits business partners and employees
- Improves the working atmosphere and the sense of belonging
- Improves productivity avoiding redundancies and rework

TKonsult provides an ESG Management model adapted to the specific needs and possibilities of the company. The model incorporates the traditional CSR and Sustainability concepts, reduces unnecessary costs, and ensures that stakeholders understand and appreciate the efforts of the company. The basic element of the ESG model is a **Governance** system that

- Integrates existing Objective and Process Management mechanisms
- Links them to Regulatory Compliance and Risk Management
- Introduces Integrity as the guiding principle of company and employee conduct
