

# Help Bring Johnny Home

On Friday, August 1st, Johnny Jones left his home in Indianapolis for a weekend visit with Mom. That was the last time Dad has seen or heard from Johnny. Dad's worst fears were realized when the FBI provided information that they had left the country. They were last spotted crossing the pedestrian bridge from Detroit into Windsor Canada on August 2nd. These types of cases are complex and the costs are well outside of a single father's resources.
