

DRILLS

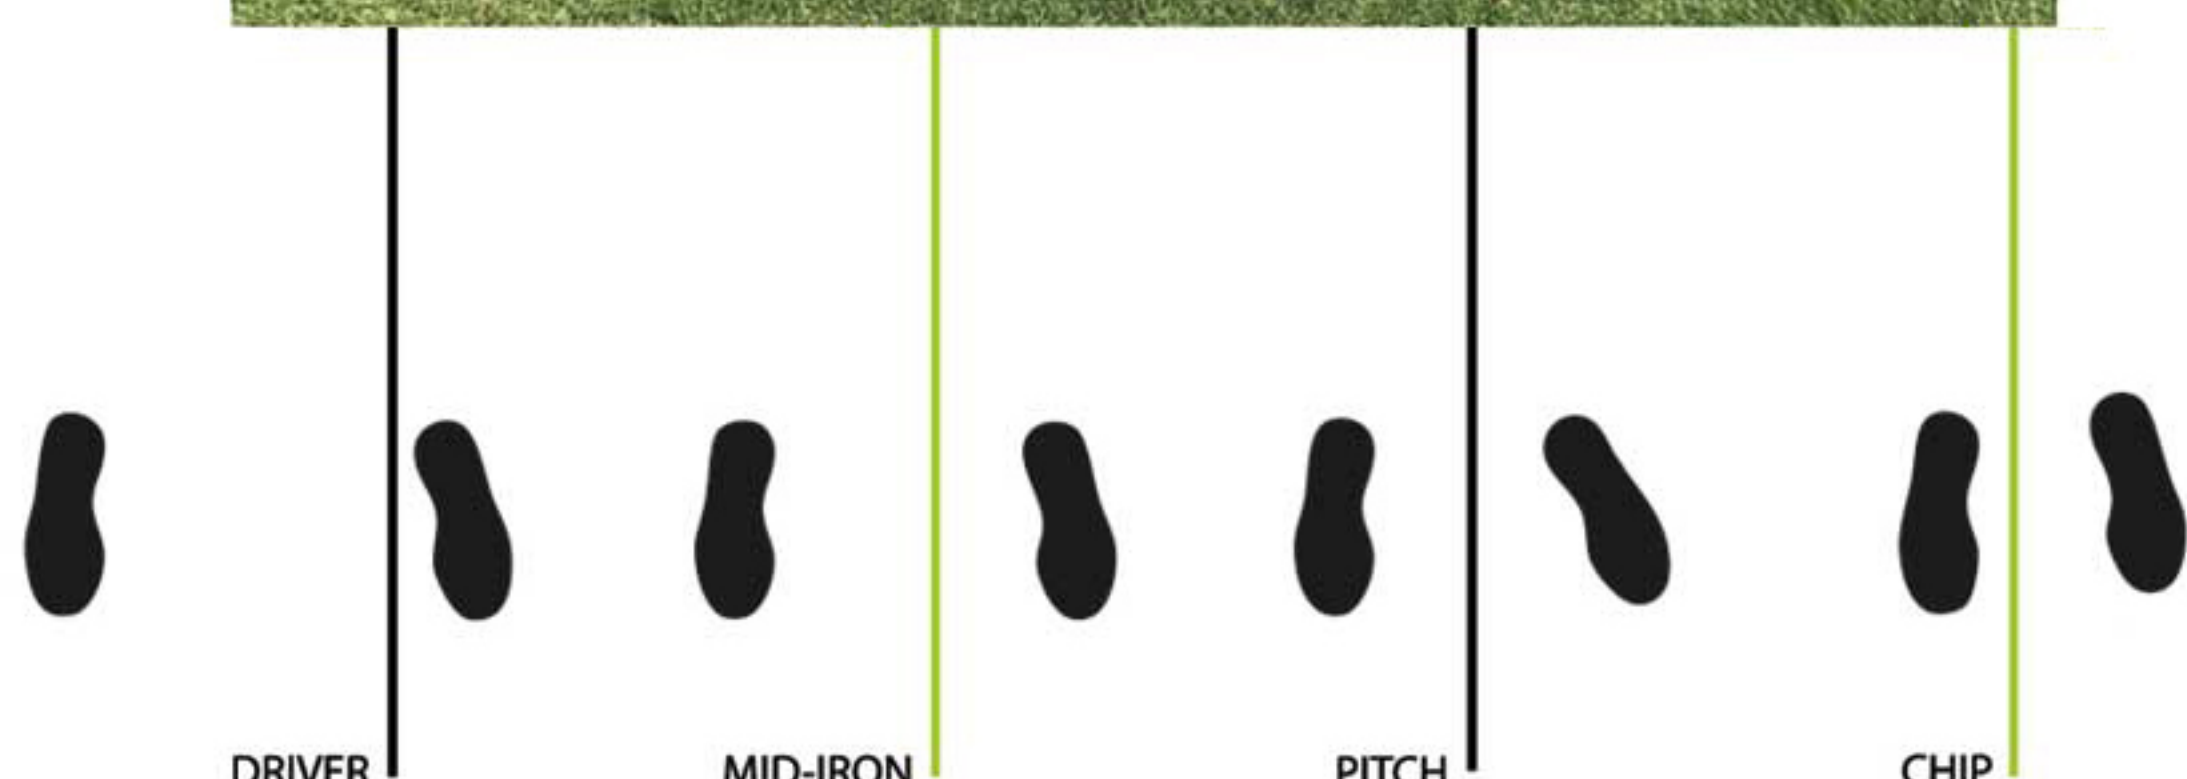

ALIGNMENT

Lay 2 rods approximately 1.5 feet apart on the ground parallel to your target line. Hit balls focusing on setting up parallel to the rods and using them to visualize your shot path.

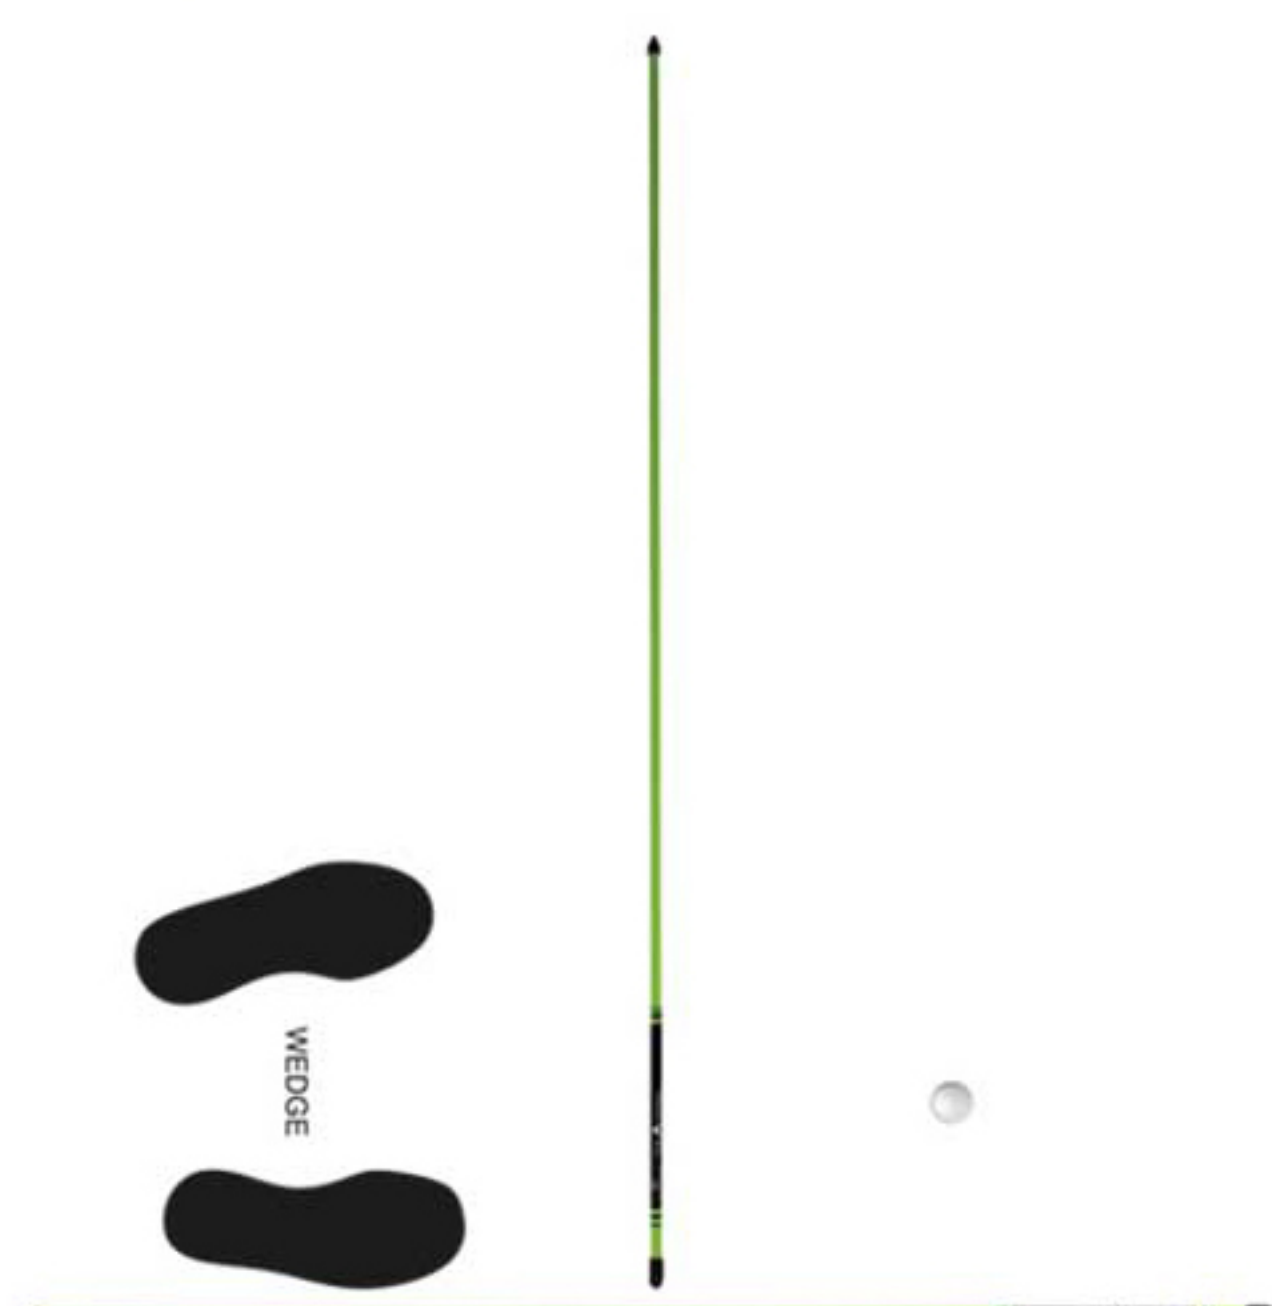

BALL POSITION

Set-up correctly each time by following the chart below. Align rods in a "T" position with a rod running horizontal for your target line and another rod running vertical for your ball position. Mimic foot position to set-up correctly for a chip, pitch, mid-iron, and driver.

CHIPPING

Lay one rod behind ball just outside and parallel to right foot. Keep weight on left foot and move clubhead away with arms and shoulders keeping wrist firm. Miss rod back and through to feel proper angle for a chip and the sensation of "Trapping" hitting down on ball for iron shots.
