World's first innovative Roofing System featuring  
***Polycarbon/Polycarbonate***  
technology

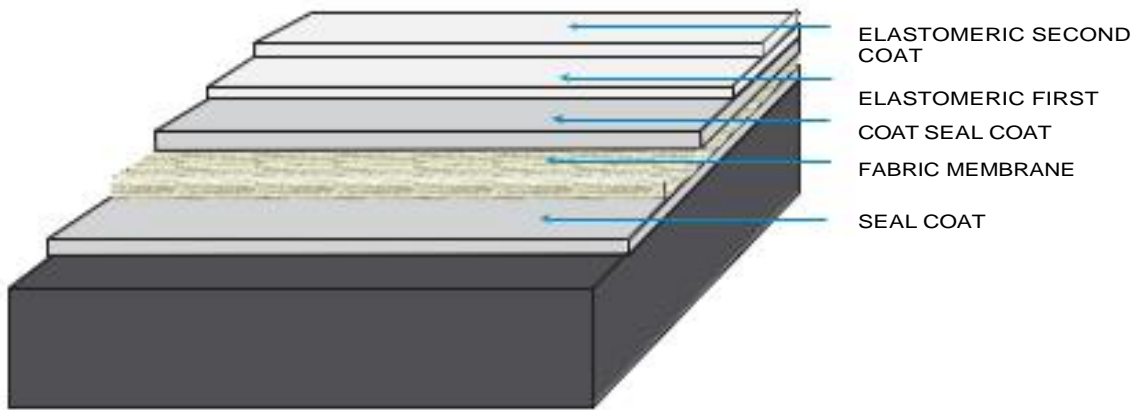

Get Cool, Go Green, Get Pro-Seal

## LMS COOL ROOFS

- Polycarbon/Polycarbonate technology
- Go Green Certified
- Resists Ponding Water
- Saves Electricity Bills
- 20 Year Warrantees Available
- V.O.C. Compliant
- 87% U.V Reflectivity
- Reduces Interior Temperatures
- Extends life of HVAC's
- Financing Available

LMS nano polycarbon/polycarbonate Cool Roofs was specifically designed to extend the life of built-up, metal, concrete and single-ply roofs by providing a high tensile strength and ultra-bright white reflective topcoat system. The high reflectivity LMS Cool Roofs' rich consistency forms a permanently flexible monolithic membrane it can also be a stand-alone over insulation. It provides protection from normal weathering, aging and ultraviolet exposure.
