HARLEES

ANNUAL

Limousin Bull & Female Sale

Thursday 1st July 2021 - Commencing 1.00pm

*11 Bulls &
30 Female Lots*

3 in 1 Units - Cows and Calves - PTIC

VENDOR

Harlees Limousins - Andrew Harries and Jen Lees

CONTACT

Andrew Harries

Mobile: 0488 735 615

Email: harriesandrew@yahoo.com.au

HARLEES Bull sale will be adhering to Australian Government Regulations regarding Covid 19 and we will update information prior to the sale day on our webpage.

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select “**Sign Up**” in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select “**Dashboard**” and then select “**Request Approval to Buy**”.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

Welcome

Welcome to the Harlees Limousins Bull and Female sale.

The first thing that must be said about the animals for sale is that if they do not sell, they will go straight back in to stud duties. That may seem a strange way to lead in to a sale but I want to make the point that these are not being sold due to a lack of quality, in fact the opposite. This is a selection of animals that have a range of ages, pedigrees and saleable characteristics and for most, we have retained progeny or siblings. They contain genetics from some of the best known studs in Australia and overseas and are the result of a regular artificial insemination program, embryo transfer and natural mating.

In 2018 and 2019 we were in the grips of the worst drought we have ever seen. For that reason, the decision was made not to join so we could get more cattle through and retain a broader base of genetics. As a consequence there were few calves born in 2018 and 2019. When conditions changed, cows and heifers were mated with a gang of bulls. The reason for this was simple, 1 bull with cows was inefficient and time is lost if that bull gets injured or is a bit sore or is simply on the other side of a big paddock when a cow comes on heat. All calves will now be DNA tested for parent verification to ensure you are getting what you pay for. Any cows that were preg tested empty were culled. Calf parentage and cow pregnancy status will be made available before the sale in a supplementary sheet. In terms of nutrition, the cows, calves and bulls have been running on native and improved pastures until 2 months ago when they were put on an oats crop. What you see is what you will get out in the paddock.

We look forward to seeing these animals go on to produce in other herds and be a profitable purchase for their purchaser. Thank you for taking an interest in our sale and good luck bidding.

Kind Regards

Andrew Harries and Jennifer Lees

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

Horn Status: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (ZP) Homozygous Polled by Pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (ZB) Homozygous Black by pedigree, (B) Black, (R) Red (not Apricot)

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for Protoporphyrin, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for Protoporphyrin or have parents which have been tested normal or are free by pedigree.

Homozygous: Is the term where an animal has two copies of the particular gene (tested or pedigree) for a trait (colour, polled). AN example is Homozygous Polled where all progeny will be polled from that particular animal or Homozygous Black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (ZA) 2 copies by pedigree, (CC) no copies.

EXPLANATION OF ESTIMATED BREEDING VALUES

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Calving Ease Direct: indicates the ability of a sires' calves to be born unassisted from 2 year old heifers. Higher, more positive Calving Ease EBVs are more favourable.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs

The EBVs for Limousins cannot be compared with EBVs for animals of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

| Breed Average EBVs for 2019 Born Calves | | | | | | | | |
|---|------|------|-------|-------|-------|------|---------|----------|
| Gest | CED | B.Wt | 200Wt | 400Wt | 600Wt | Milk | Scrotal | Docility |
| -2.0 | +0.8 | +1.6 | +20 | +34 | +47 | +7 | +1.0 | +41 |

Accuracies:

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer:

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

BUYERS INFORMATION

Inspection - All cattle will be available for inspection by appointment from 10 am Monday 28th June to 12.30 pm Thursday 1st July by contacting Andrew on 0488 735 615

Delivery - Please email delivery and stud transfer instructions to harriesandrew@yahoo.com.au. Help with delivery can be arranged by the vendor and selling agents.

Health - All bulls have been vaccinated for Vibrio, 7in1, Pestivirus and drenched prior to the 2021 sale.

The Harlees Studs are located in a Bovine Johne's Disease protected clean area. All cows and calves have had 7 in 1 and have been drenched with Avomec Plus.

Fertility - Our sale bulls have been semen tested prior to sale day. All cows will be preg tested before sale and a supplementary sheet of status will be provided.

Insurance - No Vendor Insurance on Sale Bulls. It will be the responsibility of the purchasers to insure their bulls.

GST - will be added to the purchase price at the fall of the Auctioneers hammer. You will be invoiced purchase price plus GST.

Bidding Instructions

The sale is only online. You must register with Auctions plus at least 48hrs before the sale if you are not currently registered. Contact Scott Newbery for options to bid if you are unable to connect via auctions plus.

INSPECTIONS: BY APPOINTMENT during the week before the sale
