

A close-up photograph of a horse's head, focusing on its forehead. The word 'HEL' is carved into the horse's skin in a large, blocky, sans-serif font. The horse's coat is a dark, mottled grey or brown color. The lighting is dramatic, highlighting the texture of the horse's skin and the depth of the carving.

Buyers Information

Auction – The sale is online on Auctions Plus and on farm and will be a helmsman system. This means that all bulls are up for auction at the same time just like a normal Friday cattle auction on Auctions Plus. You can bid at any time from 1pm and a timer will start at about 1.30pm

When no further bids have been received within a period of time for any lot, the auction will end. To bid on Auctions Plus you must register prior to the sale. This is easily done from the Auctions Plus website. People who are at the physical sale on farm will just have to register with the agent to bid, just like a normal on farm sale.

The agents will help with people who are unfamiliar with Auctions Plus, have bad internet connectivity or would prefer to phone bid.

Inspection- Bulls will be penned up and available for inspection from 10am on Friday 25th of August.

Delivery – Delivery instructions can be given to the agent at the completion of the sale. The agent and vendor will help to coordinate delivery. All care will be taken of bulls after the sale but no responsibility accepted while awaiting delivery. Taking out insurance on your purchase is recommended.

Health – All bulls have been vaccinated for pestivirus and given 7in1 and drenched with Avomec plus prior to the 2023 sale. We are in a Bovine Johnes Disease protected clean Area and are J-BAS 6.

Fertility – All bulls have been semen tested by Geoff Steinbeck. Scanning and independent assessment of animals done by Roger Evans.

Insurance- No Vendor insurance on sale bulls. It is the responsibility of the purchaser to insure their bulls

Phone bidding – available through the agents

Additional information – Supplementary sheets will be available from Auctions Plus prior to the sale.

Welcome to the Harlees Limousins Bull Sale

We are offering our thickest bulls to date in this years sale. They are all polled and by our walking sires such as Flemington Lift Off L40, Summit Zane N38, Harlees Big Star and Harlees Canadian Ways. We also have a very good lineup of bulls by AI sires such as LFLC Denver and Raven Mandate. The years of selection for grass fed productivity are shining through. The bulls reflect a consistent line, especially amongst sire groups, that will suit a number of different markets. The bulls have been run as a large contemporary group under exactly the same environmental conditions. This allows fair comparisons to be made between the bulls with age being taken into consideration.

All bulls have been DNA tested for horn, colour, F94L, genetic faults and sire verification. They have been vaccinated for Pestivirus and are up to date with 7in1. They have also been drenched with Avomec Plus.

The bulls have spent their lives soft ground on a mixture of native and improved pastures, the most dominant of which is lucerne. They will have been on an oats crop for 6 weeks by the time sale day comes around. What you see is what you get with not faults hidden by excessive feeding.

The bulls will be semen tested by Geoff Steinbeck and will be scanned and assessed independently by Roger Evans. This information will be available by supplementary sheet prior to the sale.

This year the sale will run as a helmsman system both on farm and in conjunction with Auctions Plus. If you have the Auctions Plus app on your phone you could put a bid on as you walk around the bulls or you could do it at home on your computer later. The Auction will start at 1pm on Friday the 25th of August and a timer will start at about 1.30pm.

Scott (Davidson Cameron & Co) and I will help to coordinate transport for the bulls purchased.

Thank you for taking an interest in our sale and do not hesitate to contact me for more information. Good luck bidding.

- Andrew Harries

Getting the most from your new bull

Buying a bull is a long-term investment in the future genetics and sale income of your herd. To get the most from your new bull, it pays to look after him well, especially in the first season of use. It is worth considering insurance to cover transport and the first three to six months of use.

Please contact the Agent to communicate delivery instructions. Before you take delivery of your new bull, please check our catalogue for the list of treatments that your new bull has received.

Once you take delivery of your new bull, we recommend arranging to have a few PTIC cows or steers in the yards when your new bull or bulls arrive, just to keep them company while they adjust to their new surroundings.

Our sale bulls have all had continued contact with people since weaning, are handled with dogs, utilities and ATV's. We handle all our cattle quietly and with respect.

Email: info@auctionsplus.com.au

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

Horn Status: (HP) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (2P) Homozygous Polled by Pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not Apricot)

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for Protoporphyrin, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for Protoporphyrin or have parents which have been tested normal or are free by pedigree.

Homozygous: Is the term where an animal has two copies of the particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous Polled where all progeny will be polled from that particular animal or Homozygous Black where all progeny will be black.

P94L: (AA) 2 copies, (AC) 1 copy, (ZA) 2 copies by pedigree, (CC) no copies.

EXPLANATION OF ESTIMATED BREEDING VALUES

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Calving Ease Direct: indicates the ability of a sire's calves to be born unassisted from 2 year old heifers. Higher, more positive Calving Ease EBVs are more favourable.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Dockity: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs

The EBVs for Limousins cannot be compared with EBVs for animals of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

Breed Average EBVs for 2019 Born Calves								
Gest	CED	B.Wt	200Wt	400Wt	600Wt	Milk	Scrotal	Dockity
-2.0	+0.8	+1.6	+20	+34	+47	+7	+1.0	+41

Accuracies:

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer:

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

51%	34%	63%	54%	52%	53%	39%	38%	47%

Traits Observed: BWT,DOC

HARLEES STORMY S119 is probably the softest bull in the draft. He still packs depth and volume but will also improve the ability to put on cover. His dam has been one of our most productive donor cows and she goes back to the Mandayen Daphne line.

Traits Observed: BWT,DOC

HARLEES S163 is another cracker from Harlees Mable M109. Her last 2 calves have been bricks with eyes and S163 is no exception. He is one of the youngest bulls in the draft but you would not know it. Fantastic muscle expression, depth and width.

-3.2		+0.8	+22	+31	+48	+10	+0.2	+36
39%		57%	47%	45%	46%	33%	27%	41%

Traits Observed: BWT, 400WT, DOC

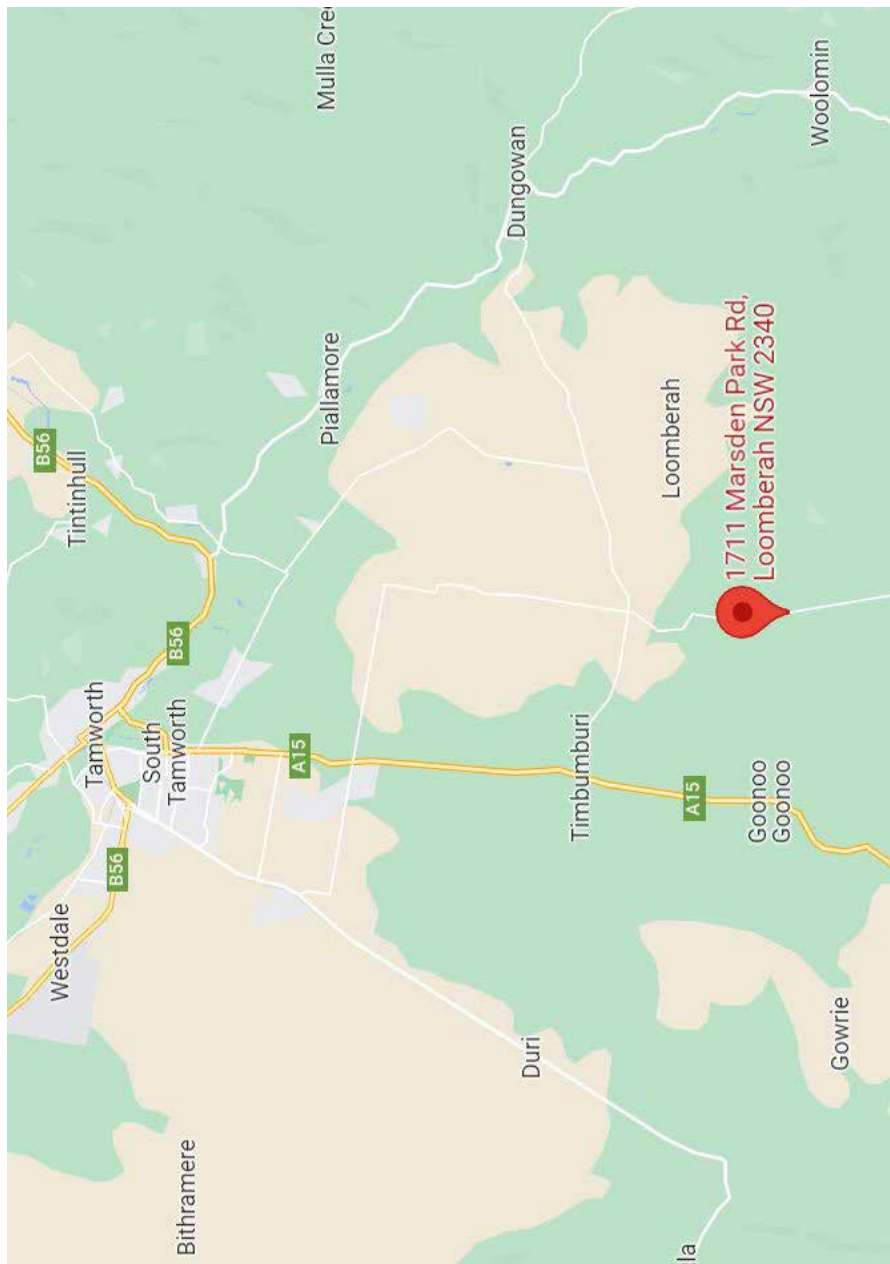

Harlees Sam S51 is a cracker and his photos have generated a lot of attention. He ticks all the boxes genetically, being homozygous polled and homozygous black with 2 copies of the F94L gene. Unfortunately we have been unable to verify his sire. Which means he will sell unregistered. Phenotypically he is the perfect vealer bull showing early growth, great muscle expression and a softness that reflects his ability to cover.
